Safety Instructions

Before connecting the AC power cord to the DC adapter outlet, make sure the voltage designation of the DC adapter corresponds to the local electrical supply.

Never insert anything metallic into the cabinet openings of the Liquid Crystal Display LCD TV: doing so may create the danger of electric shock.

To avoid electric shock, never touch the inside of the LCD TV. Only a qualified technician should open the case of the LCD TV.

Never use your LCD TV if the power cord has been damaged. Do not allow anything to rest on the power cord, and keep the cord away from areas where people can trip over it.

Be sure to hold the plug, not the cord, when disconnecting the LCD TV from an electric socket.

Openings in the LCD TV cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Also, avoid using the LCD TV on a bed, sofa, rug, or other soft surface. Doing so may block the ventilation openings in the bottom of the cabinet. If you put the LCD TV in a bookcase or some other enclosed space, be sure to provide adequate ventilation. Put your LCD TV in a location with low humidity and a minimum of dust.

Place the LCD TV on a solid surface and treat it carefully.

The screen is made of thin glass with a plastic front surface and be damaged if dropped, hit or scratched. Do not clean the front panel with keton-type materials (e.g., acetone), ethyl alcohol, toluene, ethylacid, methyl, or chloride - these may damage the panel.

Locate your LCD TV near an easily accessible AC outlet.

General safety precautions

Thank you for purchasing our product.

Before using it, please read this user's manual carefully and apply it correctly and safely.

Please keep this manual close to you so you can refer to it anytime after reading it.

Also, for the transportation of the product, please attach this manual without fail.

Please observe the notes below.

1. Use at the rated power voltage.
Use of non-rated voltage may cause fire, electric shock and breakdown.
2. Do not open the cabinet and external cover.
The high voltage inside of this product may cause the electric shock.
3. Do not remodel or disassemble this product.
Remodeling or disassembling in wrong method may cause fire, electric shock or breakdown.
4. Do not insert or drop any foreign substance such as metals or flammable object inside from the air hole.
It may cause fire, electric shock or breakdown.
If any foreign substance is inserted inside of this product, turn off the power, pull the plug out of the socket and contact the sales department. Do not use the product with the foreign substance in.
5. Never touch the antenna lie or power plug if it starts to thunder.
It may cause the electric shock.
6. If any impact is applied, the parts inside of the product may be fallen out or broken to be the cause of fire, electric shock or breakdown.
7. Clean the dust on the power plug periodically.
The dusty power plug may cause the poor insulation due to the moisture to be the reason of fire.
8. Do not destroy, process, make closer to heating device, bend or twist forcibly, place any heavy object on nor bind the power cord or power plug. If it is used in the broken condition, it may cause fire or electric shock.
9. Do not touch the power plug with wet hands.
If you pull in or out the power plug with wet hands, it may cause electric shocks.
10. Put the power plug in firmly.
Putting the plug incompletely may cause the electric shock or fire by the generation of heat.
11. Do not use any non-rated power socket with numerous devices jointed on one power socket or cable device.
The wire of non-designated capacity may cause the fire due to the generation of heat.
12. In case of malfunction, turn off the power switch immediately and pull out the power plug.
If this product is used in the abnormal condition such as damage to it, foreign substance inside of the product, generation of joints, smelling, smoking, overheating and non production of signal, it may cause fire, electric shock or breakdown.
Turn off the power switch immediately, pull the power plug out of the socket and contact to the sales store..
13. Leave space 10 cm or more from the wall for the installation of the device.
Do not install it close to the wall nor block the ventilation of the air.
Insufficient ventilation or accumulated heat inside of the product may cause the fire.

General safety precautions

14. Do not install it at the unstable location such as on the bouncing prop or tilted place.
It may be tipped over as it loses balance or damaged as it is fallen down.
15. Do not install it at the place with poisonous gas.
It may cause the fire.
16. Do not install it at the location with continuous vibration.
It may be tipped over as it loses balance or damaged as it is fallen down.
17. Do not install it at the place on the strong magnetic field or current field.
It may cause fire, electric shock or break down.
This equipment may be observed deterioration of the picture by electromagnetic radiation in electromagnetic environment.
18. Fasten the wheel of the product or shelf with wheels when installing this product.
If it moves or is tipped over, it may be damaged.
19. Do not leave it in the car under the burning sun for a long time.
The high temperature may distort the cabinet or the parts inside may be broken down or heated.
If you use this product in this condition, it may cause the fire, electric shock or breakdown due to the short circuit or poor insulation.
20. Do not place any fire source such as candlelight close to this product or place it on this product.
If it is tipped over or fallen down, it may cause damage or fire.
21. Do not place heavy objects on this product.
It may be tipped over as it loses balance or damaged as it is fallen down.
22. Do not transport it with the power cord or the connection cable connected.
If you move this product with the power cord or the connection cable connected, the damaged power cord, connection cable or connection terminal may cause the fire, the electric shock or breakdown.
23. Pull the power cord out while holding the plug portion.
If you pull the power cord out by force, the cord may the fire or the electric shock.
24. Do not climb on this product.
If you climb on it, it may damage or hurt it.
25. 2 persons or more shall transport the device, which is heavier than 18 kg.
If you drop or tip over the device, it may damage it.
The weight is indicated on the user's manual.
26. Use the attached power cord and connection cable, or those, which are indicated on the user's manual.
If you do not use the designated power cord and connection cable, it may cause the electric shock or breakdown.
27. Turn off the power switch when connecting the power cord or connection cable.
If you not turn off when connecting it, it may cause the electric shock or breakdown.
28. Do not use any chemical such as the paint thinner or benzine to clean the cabinet.
It may scratch the surface or disappear the indication to cause wrong operation, which can be the reason for disorder.
29. Clean the cabinet with 5-6 time diluted neutral detergent water on smooth cloth as stirring to remove the contamination.
After that, clean it with dry cloth to remove any stain.

Press the Red, Green, Yellow, Blue key to move to specific page.

Important note-in Connection with jacks

< Be sure to screw up the connectors with indicated torque >

DISCLAIMER

Nanov Waterproof LCD TV/Monitor is intended for use in moist, humid and wet environmental conditions. The brightness has been increased to make the unit viewable outdoors during the day. With the high brightness, it can also serve as a source of light at night in dark outdoor surroundings or the swimming pool area. However, the unit should not be kept or used under direct sunlight as it may cause overheating of the liquid in the LCD panel. The device is not designed to be used in hot areas where there could be overheating. The operating temperature of the Device is -20 centigrade to +50 centigrade. If the unit begins to blacken due to exposure to direct sunlight, we recommend letting the unit cool down. The unit will resume normal operation once it cools down. This device is not intended for use underwater. The IP67, underwater models must be installed by pre-approved professionals who use the instructions from the installation manual received from the factory including instructions on how to seal the connectors. The company does not offer warranty on any opened device which has water damage on model NKLT201WP.

APPENDIX A: Troubleshooting

If you have a problem setting up or using your LCD TV, you may be able to solve it yourself. Before contacting customer service, try the suggested actions that are appropriate to your problem.

What you see...	Suggested Actions
Screen is blank and power indicator is off	Ensure that the power cord is firmly connected and the LCD TV is on.
"NO SIGNAL" message	Ensure that the signal cable is firmly connected to the PC or video sources. Ensure that the PC or video sources are turned on.
The image is too light or too dark	Adjust the Brightness and Contrast.
Vertical bars appear to flicker, jitter or shimmer on the image	Adjust the Frequency function. Auto Tracking will clear it automatically.
Horizontal bars appear to flicker, jitter or shimmer on the image.	Adjust the phase function and then adjust the clock function. Auto tracking will clear it automatically.
Screen is blank	The monitor is using its power management system. Move the computer's mouse or press a key on the keyboard.
Image is not stable and may appear to vibrate	Auto tracking will clear it automatically Check that the display resolution and frequency from your PC or video board is an available mode for your monitor. On your computer check: Control Panel, Display, Settings
Image is not centered on the screen.	Auto tracking will set the best position automatically Adjust the horizontal and vertical position.
Problem	Suggested Actions
Sound level is too low	Check the volume level. If the volume is still too low after turning the control to its maximum, check the volume control on the computer sound card or software program.
Sound is too high pitched or too low pitched	Adjust the equalizer to appropriate level.
