## Chapter 1 Introduction to SGM (Smart Graphic Module Plus) Start Kit

### 1.1 Preface

Users will have understanding of below per ReadMe First.

1. Accessories in Start Kit, operation manuals, application and guidance to examples.
2. Briefing of Start Kit enables instant experience of SGM PLUS.
3. Development process demonstrates required tools and manual in development.
4. Users can refer to relevant Operation Manuals and Introductions as recommended in chapter 4.
5. Multiple demo examples are also enclosure for users' emulation and inspiration.

### 1.2 P/N of Start Kit

Size (Res.)	Start Kit P/N	Standard Module P/N	
3.5"(320x234)	FPEP035QA4-00R	FP035QIA14-00R	
4.3"(480*272)	FPEP043YA4-00R	FP043YIA14-00R	
5.6" (640x480)	FPEP056VA4-00R	FP056VIA04-00R	
7" (800x480)	FPEP070WA4-00R	FP070WIA04-00R	
10.4"(800x600)	FPEP104SA4-00R	FP104SIA24-00R	

Please refer to for specification

## 1.3 Packaging List

NO	Item	Order P/N	Picture	Note
1	Graphic Control Kit (GCK-003)	LOMCU0003B- FDR		
2	SGM Plus 5V Input + RS232 to UART	LOPOWER011-FDR		
3	USB To UART Converter Board	LOUSB00001-FDR		
4	Power Cord for Europe (L:1800mm) (shipping depend on Area)	LACABLE047-FDR		
5	Power Cord for USA (L:1800mm) (shipping depend on Area)	LAAC818000-FDR		

6	L:1500mm,100-240VAC 47-63Hz to +5VDC @ 3A, $\phi$ 2.5	LASTD05030-FDR		
7	USB Extended Cable (A-Type Plug _A-Type Receptacle L:1800mm)	LAUSB18001-FDR		
8	RS232 Cable Female/Female Null Modem type L:1800mm (white)	LACABLE045-FDR		
9	Power & UART Cable 7Pin 2.0mm to DC Jack+4Pin 1.25mm (L:150mm)	LACABLE008- FDR		for 4.3"~10.4"
10	Power & UART Cable 5Pin 1.25mm to DC Jack+4Pin 1.25mm (L:150mm)	LACABLE012-FDR		for 3.5" only
11	GCK-003 Signal Cable 7Pin 2.0mm to 7Pin 1.25mm (L:150mm)	LACABLE009- FDR		for 4.3"~10.4"
12	CK-003 Signal Cable 5Pin 1.25mm to 7Pin 1.25mm (L:150mm)	LACABLE016-FDR		for 3.5" only
13	Cable 5Pin 1.25mm to 4Pin 1.25mm(L:120mm)	LACABLE010-FDR		
14	Micro SDHC 4GB	LASDCD0001-FDR		
15	PIN HEADER 2.0mm 2P Jumper (Black)	LACONN0016-FDR		

16	Micro SD to USB adapter	LASDCD0003-FDR		
17	CR1220 Li-ion Battery(3V)	LABATT0001-FDR		
18	DVD-ROM Disk	LADVD00003- FDR

## Chapter 2 Evaluate Start Kit

Introduction to default demonstration mode in Start Kit which are Auto, UART and MCU mode.

**Please refer to for details "CD: \Start Kit\Documents\Start\_Kit\_Demo\_User\_Guide.pdf"**

### 2.1 Auto Mode

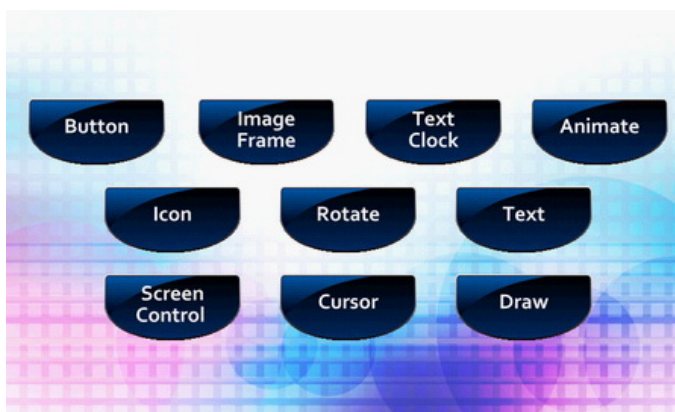

Entering Auto Mode enables feature demonstration with ICONS.

Step1 : Please refer to 'CD:\ SGM\_Plus\_Quick\_Start.pdf' for assembling details.

Boot Screen is as below.

Step2 : Click "Auto" to enter AUTO MODE.

Step3 : Click icons to demonstrate given features.

## 2.2 UART Mode.

Using preinstalled "StartKit\_Demo\_xxx.txt" to demonstrate given features via connection between USB- to-UART-Converter-Board and PC along with CommandPilot2.

**Please refer to "CD: \Start Kit\Documents\Start\_Kit\_Demo\_User\_Guide.pdf" for details.**

Step1 : Refer to 'CD:\ SGM\_Plus\_Quick\_Start.pdf' for assembling details.

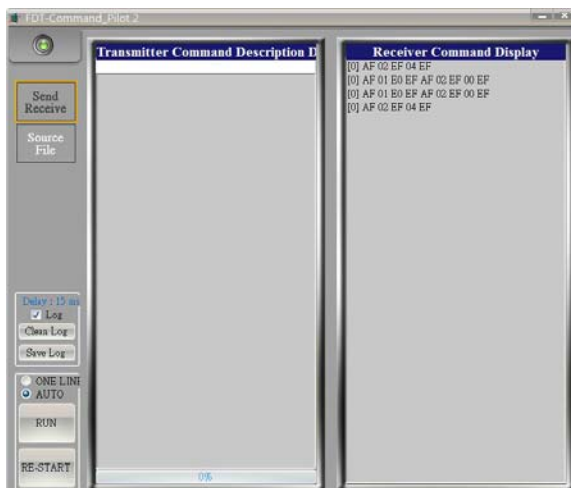

Boot Screen is as below.

Step2 : Click UART to enter the page below.

Step3 : Import "StartKit\_Demo\_xxx.txt" in Command\_Pilot2 to run preinstalled demo examples.

## Relevant tools 2-2-1

Items	Path	File Name	Remarks
Command Pilot2 Operation Guid	CD:\ Tools(software) \FDT-Command_pilot2	Command_Pilot2_Operation_Guide.pdf	Read this first.
SGM Plus UART Command Manual	CD:\ Tools(software) \ FDT-Command_pilot2\	SGM_Plus_UART_Command_Manual.pdf	
USB to UART Converter Installation Guide	CD: \ Tools(software)\ USB to Uart Converter Driver\	USB_to_UART_Converter_Installation_Guide.pdf	
USB to UART Converter Driver	CD: \ Tools(software) \ USB to UART Converter Driver - \CDM v2.08.30 WHQL Certified\		
Command_Pilot2	CD:\ Tools(software) \ FDT-Command_pilot2\	FDT-Command_pilot2(2.6.10.1)	
Command_Pilot2 demo examples	CD:\Start Kit \UART Example\Demo	StartKit_Demo_xxx.txt	15 items in total

## 2.3 MCU Mode

Demonstrate preinstalled examples via MCU controller board (GCK-003.)

Please refer to "CD: \Start Kit\Documents\Start\_Kit\_Demo\_User\_Guide.pdf" for details.

Step1 : Refer to 'CD:\ SGM\_Plus\_Quick\_Start.pdf' for assembling details.

Boot Screen is as below.

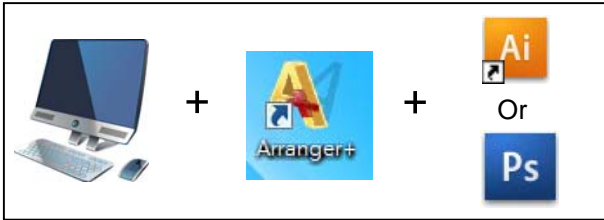

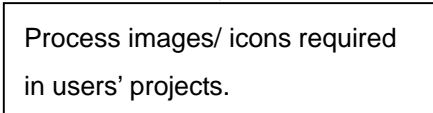

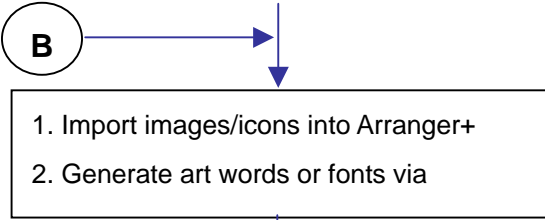

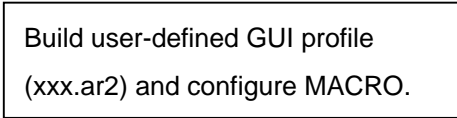

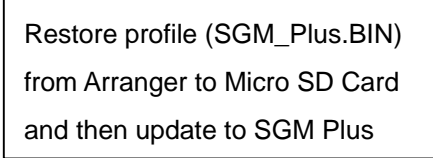

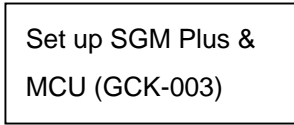

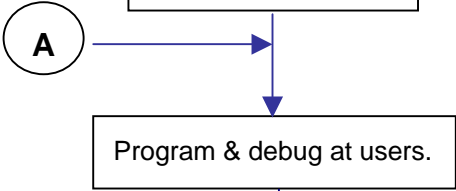

Step2 : Press buttons on GCK-003 to run demo examples.

## Chapter 3 SGM Plus Development Process

### 3.1 SGM Plus Development Process

Item	Tools	Flow Chart	Note
1	1.PC + Windows 7/8 2.FDT Arranger Plus 3.Photo Shop/Illustrator		Remarks 3-1
2	1.Windows 7/8 PC 2.Photo Shop/Illustrator		PNG format is recommended.
3	1.Windows 7/8 PC 2.FDT Arranger Plus 3.BMP/PNG images 4.Build Font		Remarks 3-1
4	1.Windows 7/8 PC 2.FDT Arranger Plus		Remarks 3-1 Note1
5	1. Windows 7/8 PC 2. FDT Arranger Plus 3. SGM Plus TFT Module 4. Micro SD Card		Remarks 3-1 Appendix A How to update profile
6	1. SGM Plus Module 2. GCK-003		Remarks 3-2 How to connect each part in SGM PLUS.
7	Program Compiler 1.KEIL C FOR GCK-003 3. User-Defined		MCU Board can be FDT's GCK-003 Board or users' device.

Item	Tools	Flow Chart	Note
8	1.Windows 7/8 PC 2.GCK-003 3. USB to UART Converter 4.GCK-003 update program 5.UartISP_v3.0.0.exe		Remarks 3-3 GCK-003 Reference
9	1.SGM Plus Module 2.GCK-003		
10	1.SGM Plus 7' Module 2.GCK-003 3.PC Windows 7/8 4.FDT Arranger Plus		
11			

### Remarks 3-1 Reference

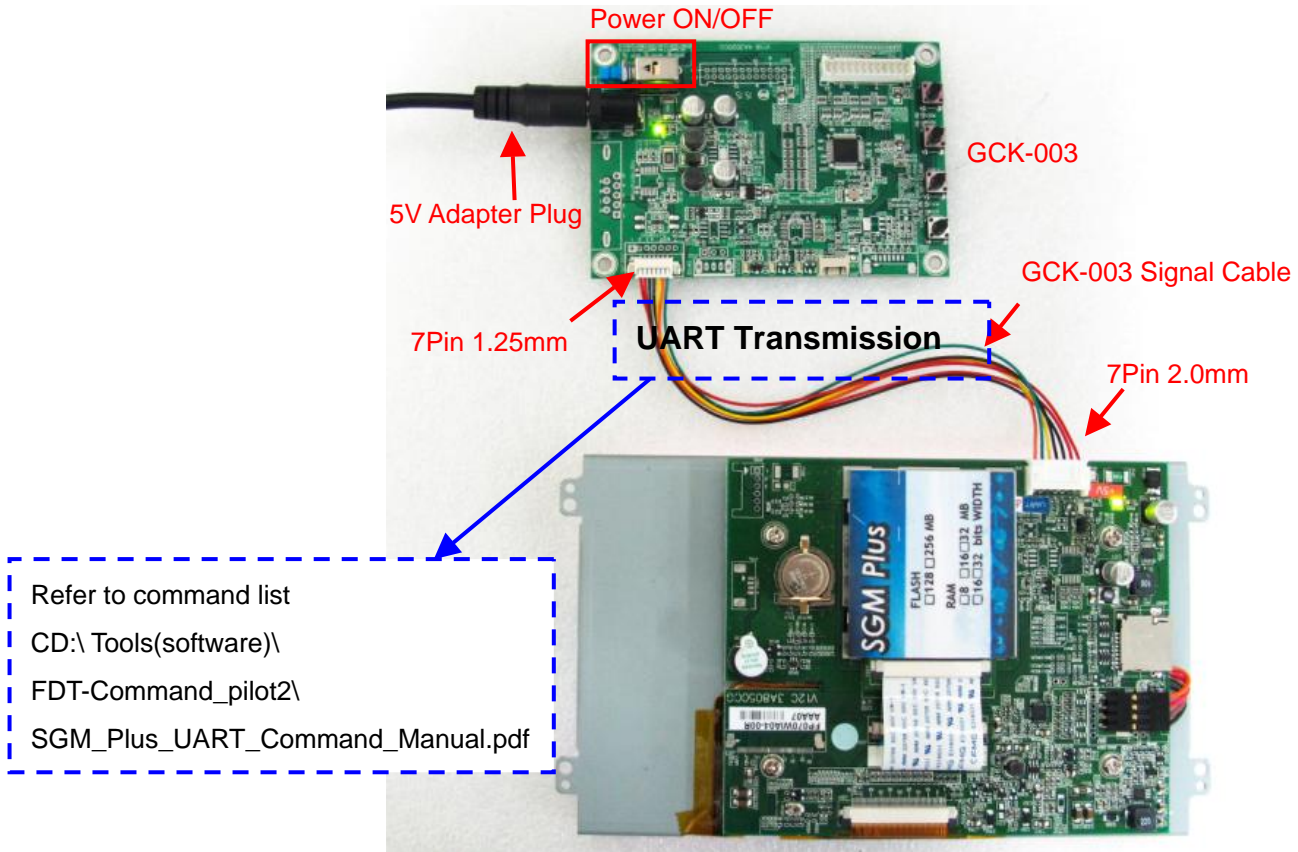

Item	Path	File name	Note
Arranger Plus Installation Guide	CD:\Tools(software)\Arranger Plus\English\	Arranger_Plus_Installation_Guide.pdf	
Arranger Plus Simple Operation Guide	CD:\Tools(software)\Arranger Plus\English\	Arranger_Plus_Simple_Operation_Guide.pdf	Pls refer this firstly.
Arranger Plus User Manual	CD:\Tools(software)\Arranger Plus\English\	Arranger_Plus_User_Manual.pdf	

**Note1. "xxx.AR2" is the file names created by Arranger+ for different GUI projects.**

## Remarks 3-2:GCK-003 How to connect parts in SGM PLUS.

1. Connection between 7" SGM PLUS and GCK-003 (same in 4.3"/5.6"/10.4" SGM PLUS)

2. Connection between 3.5" SGM PLUS and GCK-003

## Remarks 3-3 : GCK-003 Reference

Item	Path	File Name	Note
GCK-003 Programming Operation Guide.	CD:\Start Kit\GCK-003 Tools\GCK-003 FW	GCK-003_Programming_Operation_Guide.pdf	
Graphic Control Kit (GCK-003) Diagram	CD: \Start Kit\GCK-003 Tools\GCK-003 Circuit	GCK-003_Circuit_v1.2C.pdf	
MCU data of Graphic Control Kit (GCK-003)	CD:\ StartKit\ GCK-003_Tools\ WT61P9 Datasheet\	WT61P9.pdf	
GCK-003 Example Source codes	CD: \Start Kit\GCK-003 Tools\GCK-003 FW\Source Code\Demo	-	16 items.
Update Tools (Execution files)	CD: \Start Kit\GCK-003 Tools\UartISP	UartISP_v3.0.0.exe	

## Chapter 4 Basic/ Advanced Development Documentation

<b>Library</b>	Default image library	Library	\Tools(software)\Picture_Library\

## Appendix A: How to update profile. (SGM\_Plus.BIN) Take 7" module as reference

Step1 : Restore SGM\_Plus.BIN into Micro SD Card

Use PC to restore into SD card

**Note1: Turn on Arranger+ →Tools→Output→ Export GUI profile “SGM\_Plus.BIN.”**

Step2 : Update GUI Profile

A. Green LED light is on when module is powered up.

Make sure Modules boot up normally. Boot screens are as below.

C. Insert Micro SD Card into SD slot and the update will be processing immediately.

Step3 : "Update finished" will show after update is done.

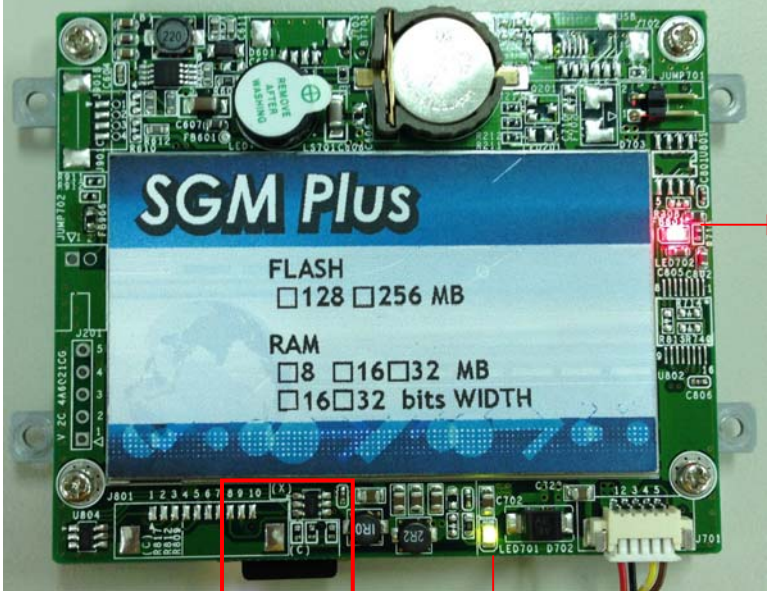

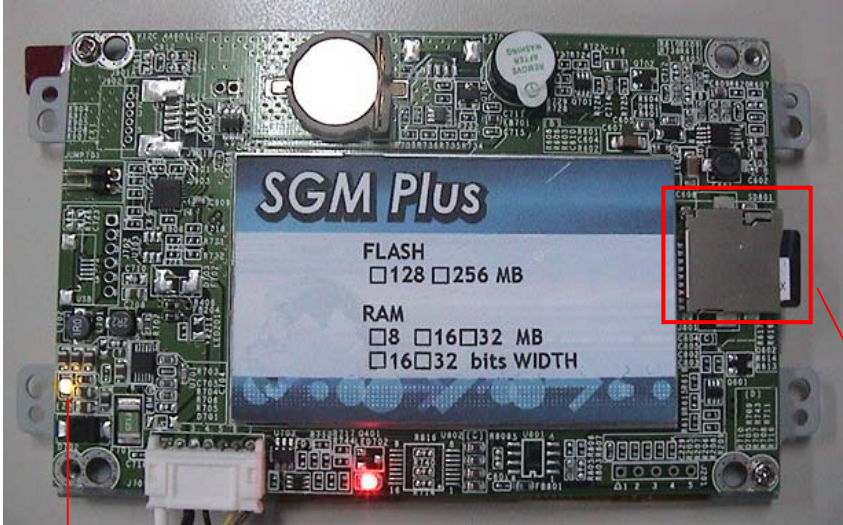

Step4 : Remove Micro SD Card and power up SGM+ again. GUI profile should show on screen.

Below is only for reference.

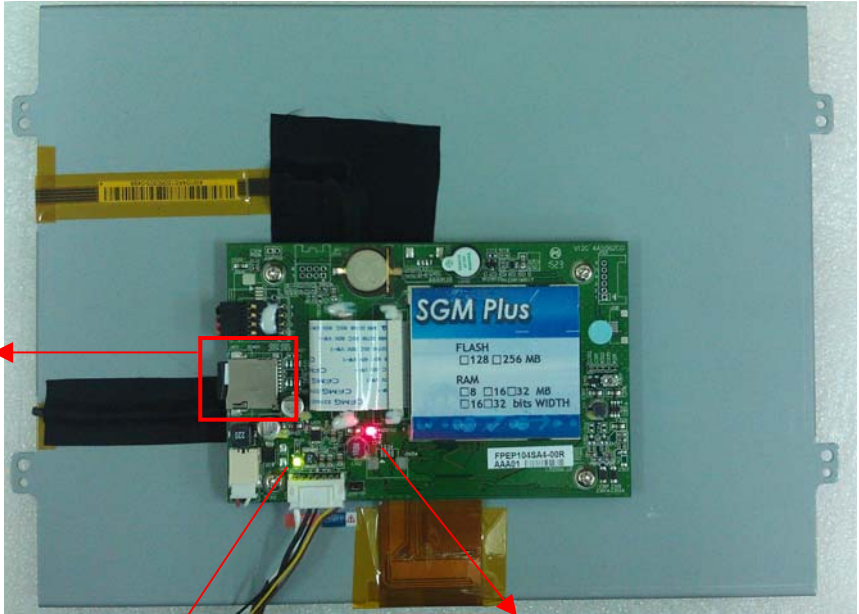

**Note: If Micro SD Card isn't removed, compulsory GUI profile update will occur when reinserting SD card or re-powering module**

Other sizes
