

Mari gunakan perangkat Anda.

PT ZTE Indonesia

The East Building, Jl. Lingkar Mega Kuningan Kav.E 3.2 No.1 Jakarta 12950 Indonesia

Handset Call Center ZTE : (+62)21 2994 2006 Website : www.zte.co.id Untuk melihat daftar layanan purnajual silakan kunjungi website kami.

Mengenal perangkat Anda

Tampilan

Gambar dibawah ini hanya sebagai referensi Anda. Produk asli akan kelihatan berbeda

- 1. Slot kartu mikro SD
- 2. Tombol RESET
- 3. Slot kartu SIM/USIM
- 4. Konektor USB
- 5. Konektor antenna eksternal
- 6. Tutup depan
- 7. Indikator
- 8. Tutup perangkat

Catatan:

- Logo microSD MSS adalah merk dagang daro asosiasi SD Card.
- Silahkan gunakan antenna eksternal ali jika diperlukan.

Indikator

Indiakto	Status	Penjelasan	
	Merah terang	Nyala dan belum teregistrasi	
	Hijau Terang	Registrasi ke 2G	
3G	Hijau berkedip	Terhubung dengan 2G dan data sedang ditransfer	
	Biru terang	Tersambung dengan 3G	
	Biru berkedip	Tersambung dengan 3G dan data sedang ditransfer.	
	Biru berkedip	Wi-Fi aktif	
Wi-Fi	Biru terang	WPS aktif	
	LED Mati	Wi-Fi mati	

Skeneraio tersambung

Perangkat Anda mendukung klien ganda untuk surfing di internet pada satu waktu. Gambar dibawah ini hanya untuk referensi Anda.

TIPs: Dengan aksesoris lain, seperti mobile power dan adaptor daya mobil, Anda dapat menambah suplai daya ke perangkat Anda dan gunakan dimanapun dan kapanpun.

Instal Perangkat Ana

1. Buka tutup depan

CATATAN: Jangan membuka dengan kasar untuk menghindari kerusakan di tutup depan.

 Masukkan kartu SIM/USIM dan kartu microSD .

3. Tutup kembali tutup depan

Terhubung dengan perangkat Anda

Melalui konektor USB

1. Colokan konektor USB ke port USB dan pastikan masuk dengan benar.

 OS akan mendeteksi dan mengenali perangkat bari dan menyelesaikan instalasi secara otomatis.

Catatan: Jika sistem tidak terinstal otoamtis, Anda dapat menjalankan program instalasi di My Computer > ZTEMODEM.

 Halaman konfigurasi WebGUI akan terbuka dengan otomatis, dan klien, PC Anda akan terhubung dengan perangkat dengan sukses.

Melalui Wi-Fi

- Suplai daya ke perangkat Anda dengan terhubung dengan PC Anda atau menggunakan aksesoris lain.
- Gunakan aplikasi Wi-FI normal di klien untuk mencari jaringan nirkabel yang tersedia.

3	Wireless Network Connection

Getting to Know Your Device

Appearance

The following figure is only for your reference. The actual product may be different.

- 1. microSD Card Slot
- 2. RESET Button
- 3. SIM/USIM Card Slot
- 4. USB Connector
- 5. External Antenna Connector
- 6. Front Cover
- 7. Indicator
- 8. Device Cap

NOTES:

- microSD logo Missi is a trademark of SD Card Association.
- Please use the original external antenna if necessary.

Indicator

Indicator	Status	Description	
	Red solid	Turned on and not registered.	
	Green solid	Registered to 2G.	
3G	Green blinking	Connected to 2G and data is being transferred.	
	Blue solid	Registered to 3G.	
	Blue blinking	Connected to 3G and data is being transferred.	
	Blue blinking	Wi-Fi is Active.	
Wi-Fi	Blue solid	WPS is Active.	
	LED off	Wi-Fi is off.	

Connection Scenario

Your device supports multi-clients for surfing on the Internet at the same time. The following figure is only for your reference.

TIP: With other accessories, such as mobile power and car power adapter, you will be able to supply power to your device and use it anywhere and anytime.

Installing Your Device

1. Open the front cover.

NOTE: Do not open the front cover rudely so as to avoid the damage of the front cover.

2. Insert the SIM/USIM card and microSD card.

3. Close the front cover.

Connecting to Your Device

Via USB Connector

 Plug the USB connector into the USB port and make sure it is tightly inserted.

 The OS detects and recognizes new hardware and finishes the installation automatically.

NOTE: If the system does not launch installation automatically, you can run the installation program in path of **My Computer > ZTEMODEM**.

 The WebGUI configuration page will open automatically, and then the client, your PC, will connect to your device successfully.

Via Wi-Fi

- 1. Supply power to your device by connecting to your PC or using other accessories.
- Use your normal Wi-Fi application on the client to search the available wireless network.

	Mireless Network Connection
	Disable
	View Available Wireless Networks
	Status
	Repair
-	Bridge Connections
	Create Shortcut
	Delete
	Rename
	Properties

NOTE: Please set the client to obtain an IP address automatically referring to the chapter "Configuring your PC", and then the client will get an IP address like "192.168.0.100". 3. Select the SSID of your device, and then click **Connect.**

reework key:			

NOTE:

Password may be requested for Wi-Fi connection. Please check the body of your device to find the default information after opening the front cover. Wait a moment, and then the client will connect to your device successfully.

Accessing the Internet

After successfully connecting to your device, you can access the Internet in the **Automatic** or **Manual** mode. The default mode is **Automatic**.

Mode	Operations
Automatic	Your device will connect to the Internet automatically, and your clients can surf on the Internet directly.
Manual	Login the webGUI configuration page, and select Settings > 3G Settings > Network Select > WAN Connection Mode > Manual, click Connect or Disconnect.

NOTE:

If you want to modify the detailed parameters of your device, please login the webGUI configuration page by visiting http://192.168.0.1 or http:// m.home. The default password is **admin**.

Configuring Your PC

Follow the following steps and figures for Windows XP to configure the Internet Protocol for your Wi-Fi connection.

 Right-click My Network Places, and then select Properties.

2. Right-click Wireless Network Connection, and then select Properties.

 Select Internet Protocol(TCP/IP), and then click Properties.
