CPR Prompt Manikins

Easy to use, clean and carry. CPR Prompt Manikins are designed specifically for CPR and AED training with the anatomical features desirable for instruction. By offering professional level quality at an affordable price, instructors are able to deliver hands-on, one-to-one training in CPR, AED use, and choking to increase lifesaving skills and retention. CPR Prompt manikins provide valuable student feedback and other important features such as an age selector dial that adjusts the compression depth required for adult or child CPR, head-tilt/chin-lift to open the airway, visible chest rise, and an audible clicker to verify proper compression depth. Encouraging student confidence, manikins provide built-in feedback, have realistic anatomical markings, and are available in adult/child or infant sizes. All manikins are lightweight, portable and finished with a resilient “Duracoat” coating for a realistic skin-like finish tough enough to withstand repeated use and easy cleaning for long life—perfect for the professional Instructor.

Basic Buddy Manikins

The Basic Buddy® CPR Manikins are dramatic, inexpensive, and state-of-the-art manikins designed for teaching individuals or large groups the life-saving techniques of CPR. These manikins offer a realistic and affordable way to provide each student with their own CPR manikin. The one-piece, disposable lung/mouth protection system makes these manikins completely sanitary. The airway opens using the head tilt/chin lift method, and there is a visible chest rise when ventilated. The xiphoid process provides an anatomical reference point for hand placement and compressions. These manikins also feature both adult and child capabilities.
