Functions on Main menu

This vehicle multimedia playing system provides DVD, Radio, External Input, Bluetooth, Navigation, SD, USB, and iPod functions, user can realize the relevant functions just by directly touching the function modules on the Main menu. Return to the Main menu by touching the right corner on touch screen under different play modes.

As shown in the following diagram:

<Function Buttons on main menu>Table

Serial no.	Serial number of push-buttons
1	Touch “  ” icon to enter the External Input Function
2	Touch “  ” icon to enter the Setting Menu
3	Touch “  ” icon to return to the Previous State
4	Touch “  ” icon to enter the Navigation Function
5	Touch “  ” icon to enter the Radio Function
6	Touch “  ” icon to enter the Digital/Analog TV Function
7	Touch “  ” icon to enter the Bluetooth Function
8	Touch “  ” icon to enter the DVD Function
9	Touch “  ” icon to enter the USB Play Function
10	Touch “  ” icon to return to the SD Play Function
11	Touch “  ” icon to enter the IPOD Play Function

DVD Function Operation

This vehicle multimedia system can play discs of various formats, such as DVD/VCD/CD/MP3/WMA/JPEG/MPEG4/MP5/RMVB and so on (limited to the standard round disc with diameter of 12CM).

Basic Operation

Enter/Exit <DVD Function Operation>

Under the Main menu, touch “” icon to enter the DVD Function.

Under the DVD status, touch the right upper corner of the screen to exit the DVD Function

Touch “” icon on DVD menu to exit the DVD Function.

Enter/Exit the Disc Operation

Put the side with silk-screening up, lightly put it in the slot; the disc drive can load in the disc and play it automatically, touch “” icon to eject out the disc.

DVD Hidden Functions

To enable user to use it more conveniently and quickly, hidden press-button function is specially designed with this vehicle multimedia system, eight hidden touch zones are divided under the DVD play status, as shown in the following diagram:

	A	B
C	D	E
F	G	H

<DVD Hidden button Functions>Table

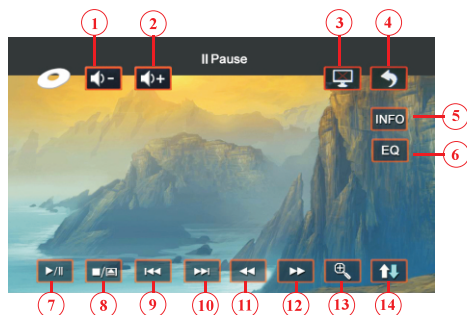

Serial no.	Functions
A	Pop-out the Search Menu
B	Return to Main Menu
C	Previous Song
D	Pop-out DVD Function Buttons
E	Next Song
F	Fast Backward
G	Pause/Play
H	Fast Forward

Notes: please use standard genuine disc, keep the disc clean, and keep good use habit to guarantee the normal service life of this vehicle multimedia system.

DVD play

During the DVD playing, touch the midpoint position of touch screen (D zone), <DVD Play Button> pops out, touch the midpoint position (D zone) again, <DVD Play Button> shuts off.

<DVD Play Button> exits automatically if no operation is carried out for 10 seconds. As shown in the following diagram.

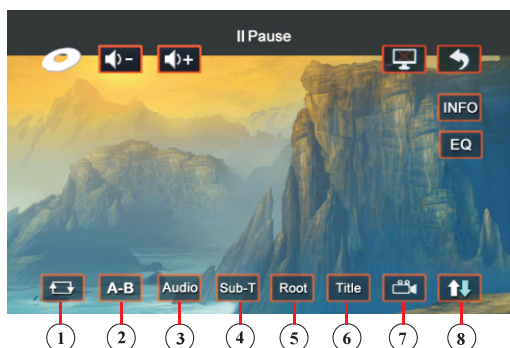

Page 1 of <DVD Play Button> Table

Serial no.	Functions
1	Volume Down
2	Volume Up
3	Shut off the Display Screen,and Open It by Touching Any Position on It
4	Return to Main Menu
5	Display the Current Play Information
6	Enter EQ Setting
7	Pause/Play
8	Stop/Eject the Disc
9	Previous Song
10	Next Song
11	Fast Backward
12	Fast Forward
13	Zoom
14	Enter Page2

Touch “ ” icon to enter the Play Buttons on P2. As shown in the following diagram.

Page 2 of <DVD Play Button> Table

Serial no.	Functions

Instruction of Bluetooth Function

1 Pairing

After entering the Bluetooth status, touch "**Pair**" icon, open the Bluetooth function of mobile phone to search the equipment, and select "Connect" after searching out Bluetooth of this product, (Bluetooth equipment of this unit is named "car kit"), enter the pair password "0000", the Bluetooth icon is displayed on upward side of the screen after the pairing is completed successfully.  Icon of Bluetooth Connection Status:

- ① When icon twinkles, it means the Bluetooth equipment is not connected.
- ② When icon displays all the time, it means the Bluetooth equipment has been connected.

2. Making a call

Method 1: after pairing is completed successfully, type the phone number you want to dial, and touch "Dial" icon, then you can make a call using the Bluetooth function.

Method 2: after pairing is completed successfully, directly make a call using the mobile phone, the machine will pop-out the Bluetooth interface automatically.

3. Answering a call

After pairing is completed successfully, when there is a call coming in, the system automatically switches to the Bluetooth status under whatever modes, touch "" icon to answer the phone.

4. Hanging up a call

Touch "" icon to reject any incoming calls or end the conversation.

5. Conversation switchover

Touch "**Voice**" icon during the conversation to switch the conversation mode to the mobile phone, touch "**Voice**" icon again to switch the conversation mode back to the machine.

6. Bluetooth Music Play (only realizable by the mobile phone that supports the A2DP Protocol)

After Pairing of Bluetooth and mobile phone is successfully completed, touch Play Button in the Bluetooth interface to play the Bluetooth music.

Note: due to the difference with the brand design of mobile phone, some music can be played only after selected through the mobile phone; some can be played just by directly touching the play key in Bluetooth interface.

! Due to the difference of Bluetooth modules and software used by various brands of mobile phones, there may exist certain difference and even incompatibility with some functions during the actual use process, please forgive us for any inconveniences caused to you!

Navigation Function

Basic operation

Enter/Exit <Navigation> Function

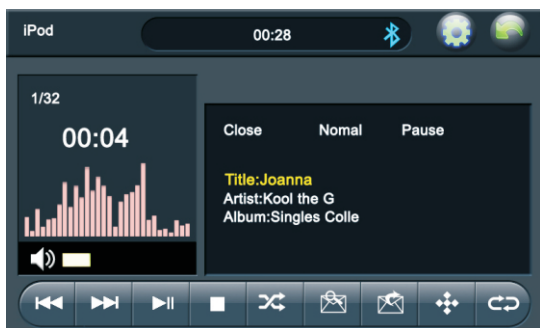

- Under Main menu, touch “” icon to enter the Navigation status.
- Shut off navigation in the Navigation menu to exit the navigation status.
- Use “NAVI” key on the faceplate to quickly enter or exit the navigation function.
Please refer to “Instruction Book of Navigation Software” for the using method of navigation software.

IPOD Function

Basic operation

Enter/Exit <IPOD> Function

- Under the Main menu, touch “” icon to enter the IPOD Function.
- When under other status, insert the IPOD equipment, it automatically enters the iPod function.
- Touch “” icon under <IPOD> menu to exit the IPOD function.
- Pull out the IPOD equipment, it automatically exit the IPOD function.

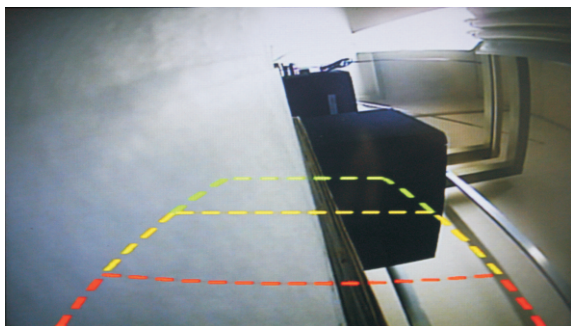

Note: Please refer to <CD/MP3/WMA Disc Play> for the operating method of IPOD interface.

Rearview Mirror Function

Basic operation

Enter/Exit <Rearview Mirror> Function

- Adjust the gear of vehicle to the rearview gear to enter the Rearview Mirror Function automatically.
- Touch the “” icon under <Rearview Mirror> menu to exit the Rearview Mirror Function.
- Adjust the vehicle gear to the forward or stop gear, it automatically exits the Rearview Mirror Function.

Setting Function

Basic operation

Enter/Exit the <Setting> Function

Under the menu of various function status, touch “” icon to enter setting.

Touch “” icon under the <Setting> menu to exit the system setting function.

DVD Setting

Touch "  " icon under the setting menu to enter the DVD setting interface.

Touch “” icon in Setting menu to enter the Navigation Path Setting function.

<Navigation Path Setting Press-button> Table

Serial no.	Functions
1	Return to Main Menu
2	File on Previous Page
3	Confirm
4	File on next Page

Setting method of navigation path is as follows:

1. Enter the navigation path setting page.
2. Select navigation engine file, with general file extension name of .exe.
3. Touch OK to finish the setting.

Radio Setting

Touch “” icon in Setting menu to enter the Radio Setting function.

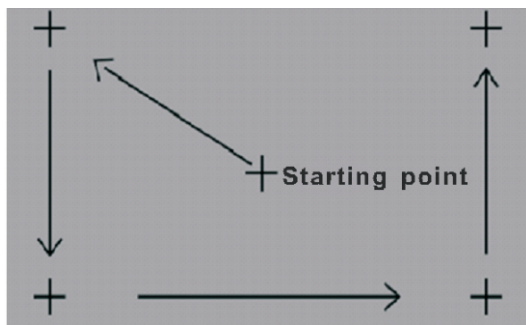

<Radio Setting Press-button> Table

Serial no.	Functions
1	Return to Main Menu
2	Radio Region Setting

Touch Screen Calibration

Touch “” icon in system setting menu to enter the touch screen calibration interface.

Method of calibration: aim the touch pen at the central position of “+” icon, press it continuously till the “+” icon run to the next point of calibration, repeat the above operation, calibrate five points properly in the sequence as shown in the following diagram, and then randomly touch one position of the touch screen to exit the touch screen calibration status, if it does not aim at the central position of “+” icon while in calibration, recalibration needs to be carried out, exit the touch screen calibration status till the touch screen is properly calibrated.

Precautions

1. Precautions for host machine

- Do not insert hard object or other metal contents in the unit.
- Do not attempt to repair it. This display screen consists of many precision electronic components, damage or breakage may be resulted in by any dismantlement or modification, power it off immediately in case of a failure, and notify the company or your dealer of that.
- Do not expose the display screen to humidity, dust, steam, oily fume or any other pollutants.
- Do not wipe the surface of display screen with thinner or other chemical cleaners; wipe away the dirt on the surface with a soft cloth.
- Do not expose the display screen to sunlight for a long time.
- If moisture content or other objects enter this unit, power it off immediately and contact with the company or your dealer.
- Please cut off the power when clearing off the dirt.
- This product is designed for the vehicle equipped with 12V negative grounding battery system.

2. Precautions for Use of Disc

- Misoperation would be caused when dirty, dusty, scratched or bended disc was used.
- Do not put it on sharp objects to prevent disc being scratched.
- Disc shall be taken out when not used.
- Disc shall not be placed in the following areas:
 1. Area exposed to direct sunlight.
 2. Dirty, dusty and humid areas.
 3. Area where there is an auto heater nearby.
 4. On vehicle seat or meter panel.
- Do not use disc with diameter less than 12cm (12cm excluded) or irregularly shaped disc (heart shape or octagon and so on)
- Disc cleaning: wipe the disc surface with a soft wet cloth; if the disc is very dirty, wipe it gently with a soft cloth soaked with warm propanol liquid. Do not use solutes, such as gasoline, thinner and so on, to prevent disc surface being scratched.

3. Precautions for External Connected Power Amplifier

- Before connecting, check to ensure the sound box impedance matches the optimal matching impedance of power amplifier.
- Please select high-quality loudspeaker cable; the cable length shall be just sufficient for proper in-position connection.
- When connecting the signal line, the jack/interface of sound track shall match exactly.
- To reduce noise, when there is a external connected power amplifier, first adjust the volume of Host machine to 1/3 of the maximum sound level, and then adjust the volume of external connected power amplifier, till the sound is distorted (note: the tone shall be adjusted centered).
- While in installation, the input/output line shall be far away from power source and computer wire, otherwise noise may be caused.

Troubleshooting

Before sending this unit for repair, check the problem that has occurred with the unit against the following table, and take corresponding countermeasures to carry out simple inspection or minor adjustment, thus the problem may be possibly eliminated and the unit may restore normal operation. If the problem cannot be effectively resolved with the remedies as shown in the table, please contact our company or the professional maintenance center.

Problem	Possible cause	Countermeasure
LCD no display	Power switch and ignition switch not connected	Connect the switch
	Connection wire loose	Reconnect it properly
	Protective tube burn out	Replace it with a new protective tube
No sound played	The system is in Mute status	Shut off Mute
	Sound box connection loosen off	Reconnect it properly
	Sound box damaged	Replace it with a new sound box
No image played	Disc not properly loaded	Place the disc with the label side face-up on the tray
	Disc dirty or damaged	Try other discs
Occasional sound jumping	Disc dirty or damaged	Try other discs
Musical sound jumps while in vibrating	Host machine not properly installed	Ensure the host machine firmly fixed
	Changer fixing screw screwed down in the wrong position	Adjust the screw marked with screwdriver to the proper mounting direction
Bluetooth handfree non-function	Not properly matched with host machine	Rematch

Warning

Directions: please operate it in accordance with this Manual before using;

This unit is made of precision components, pay attention to guard against damp;

Pay attention to prevent LCD display being scratched;

High pressure in the unit, dismantlement can only attempted by authorized personnel;

Instructions: few color dots may appear on LCD display, it is a common phenomenon in active matrix display technology, and does not represent any defects or faults.

Thanks for your use
