Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as spectrum analyzers, signal generators, oscilloscopes, power meters, logic analysers etc from all the major suppliers such as Agilent, Tektronix, Anritsu and Rohde & Schwarz.

We are focused at the professional end of the marketplace, primarily working with customers for whom high performance, quality and service are key, whilst realising the cost savings that second user equipment offers. As such, we fully test & refurbish equipment in our in-house, traceable Lab. Items are supplied with manuals, accessories and typically a full no-quibble 2 year warranty. Our staff have extensive backgrounds in T&M, totalling over 150 years of combined experience, which enables us to deliver industry-leading service and support. We endeavour to be customer focused in every way right down to the detail, such as offering free delivery on sales, covering the cost of warranty returns BOTH ways (plus supplying a loan unit, if available) and supplying a free business tool with every order.

As well as the headline benefit of cost saving, second user offers shorter lead times, higher reliability and multivendor solutions. Rental, of course, is ideal for shorter term needs and offers fast delivery, flexibility, try-before-you-buy, zero capital expenditure, lower risk and off balance sheet accounting. Both second user and rental improve the key business measure of Return On Capital Employed.

We are based near Heathrow Airport in the UK from where we supply test equipment worldwide. Our facility incorporates Sales, Support, Admin, Logistics and our own in-house Lab.

All products supplied by Test Equipment Solutions include:

- No-quibble parts & labour warranty (we provide transport for UK mainland addresses).
- Free loan equipment during warranty repair, if available.
- Full electrical, mechanical and safety refurbishment in our in-house Lab.
- Certificate of Conformance (calibration available on request).
- Manuals and accessories required for normal operation.
- Free insured delivery to your UK mainland address (sales).
- Support from our team of seasoned Test & Measurement engineers.
- ISO9001 quality assurance.

# Data Timing Generator

► DTG5078 • DTG5274 • DTG5334

New serial data standards, expanding networks and ubiquitous computing continually redefine the cutting-edge of technology. The design engineer is challenged to economize without sacrificing performance.

The DTG5000 Series combines the power of a data generator with the capabilities of a pulse generator in a versatile, bench-top form factor, shortening the duration of complex test procedures and simplifying the generation of low-jitter, high-accuracy clock signals, parallel or serial data across multiple channels. Its modular platform allows you to easily

configure the performance of the instrument to your existing and emerging needs to minimize equipment costs.

Three mainframes and five plug-in output modules combine to cover a range of applications from legacy devices to the latest technologies. In addition, eight low-current, independently-controlled DC outputs can substitute for external power supplies. Each mainframe incorporates a full complement of auxiliary input and output channels to easily integrate with other instruments, such as oscilloscopes and logic analyzers, to create a flexible and powerful lab.
