Before detecting and engraving, you have to obtain a declaration or permission from the private property or owned or from the responsible of the place

The laws differ greatly from one place to another ( Cities, emirates, province, and regions concerning the use of metal detectors).

We demand that you respect public and private property laws of metal detection and leave the place in a better shape than it was before so as to protect others.

And please do not damage monuments and governmental places and take care of monuments in particular in order to keep it safe.
