1. Safety Precautions and Warnings

To prevent personal injury or damage to vehicles and/or the tool, read this instruction manual first and observe the following safety precautions at a minimum whenever working on a vehicle:

● Always perform automotive testing in a safe environment.
● Wear safety eye protection that meets ANSI standards.
● Keep clothing, hair, hands, tools, test equipment, etc. away from all moving or hot engine parts.
● Operate the vehicle in a well ventilated work area: Exhaust gases are poisonous.
● Put blocks in front of the drive wheels and never leave the vehicle unattended while running tests.
● Use extreme caution when working around the ignition coil, distributor cap, ignition wires and spark plugs. These components create hazardous voltages when the engine is running.
● Put the transmission in PARK (for automatic transmission) or NEUTRAL (for manual transmission) and make sure the parking brake is engaged.
● Keep a fire extinguisher suitable for gasoline/chemical/electrical fires nearby.
● Don't connect or disconnect any test equipment while the ignition is on or the engine is running.
● Keep the tool dry, clean, free from oil/water or grease. Use a mild detergent on a clean cloth to clean the outside of the scan tool, when necessary.
