Warning Before Installation

- Power off the Network Camera as soon as smoke or unusual odors are detected.
- Do not place the Network Camera on unsteady surfaces.
- Do not insert sharp or tiny objects into the Network Camera.
- Refer to your user's manual for the operating temperature.
- Do not touch the Network Camera during a lightning storm.
- Do not drop the Network Camera.

Quick Installation Guide

Screws / Anchors / Cable tie

EN - 2

Hardware Installation

First, open the dome cover by pressing the release button. You may squeeze the opposite edge of the dome cover if the dome cover does not come off easily. Then, follow the steps below to install the camera to either a ceiling or a wall.

Connecting Cables

If you need to route cables through the side opening, proceed with the following:

- 1. Connect the Ethernet and the Power & IO cables. The Ethernet cable is user-supplied.
- 2. Use an included cable tie to secure the Ethernet and IO cable to the base plate. Insert the cable tie through the vertical mounting tab located on the edge of the cabling cutout.
- 3. Make a clearance between cables and the vertical mounting tab. Arrange the cables neatly to avoid getting in the way when the dome cover is attached.
- 4. Cut the extra length from the cable tie.

Strain relief boot

It is recommended to remove the strain relief boot if your Ethernet cable comes with one.

IMPORTANT:

Refer to the "Panoramic PTZ Installation Guide" in your product CD for design considerations before you proceed with physical installation.

Attach Camera to Mounting Adaptor

An adapter bracket, AM-517, is required.

- 1. Align the bracket's screw slots with mounting holes on the AM-51A.
- 2. Secure the bracket to AM-51A using 2 pan head M2.6 screws.

178 mm

Install to the Ceiling

- 1. Drill pilot holes into the ceiling. Then hammer four anchors into the holes.
- 2. Secure the pendant head to the ceiling using four screws.
- 3. Connect the two white header connectors to the J6 and J7 connectors.
- 4. Connect the Ethernet cable to the RJ-45 socket.
- 5. You will find a desiccant bag attached to the camera. Replace the desiccant bag included in the camera with the one shipped within the accessory bag.
- 6. Attach the dome cover to the camera.
- 7. Route cables through a 3/4" conduit from the pendant head.

NOTE:

Arrange the cables neatly to avoid getting in the way when the dome cover is attached.

Wall Mount Bracket Installation

Below is a sample procedure using a wall mount bracket and a pendant pipe:

- Determine a hard surface ceiling location. Use the four mounting holes on the wall mount bracket to mark the positions where holes will be drilled to secure the bracket and routing cables. Note that screws are user-supplied and they should be at least 11mm long.
- 2. Feed cables through the bracket.
- 3. Install the pendant pipe.
- Install the camera to the mounting adapter. See <u>Attach Camera to Mounting Adapter</u> on the previous page.
- 5. Install the mounting adapter to pendant pipe.
- 6. Tighten the connection using the included hex wrench.

- Install the speed dome camera next to the fisheye, with their lens positioned at approximately the same height. For details about speed dome installation, please refer to its documentation.
- 8. Connect all cabling, including the IO cables to J6 and J7, and the Ethernet cable to RJ-45 connector.
- 9. Install the dome cover.

If DC power is preferred, it should comply with: O/P: 12VDC, 1.5Amin., L.P.S. per IEC 60950-1.

General Connection (without PoE)

- 1. Connect RJ45 Ethernet cable to a switch.
- 2. Connect the power cable from the Network Camera to a power outlet.
- 3. If you have external devices such as sensors and alarms, make the connection from the general I/O terminal block.

EN - 8

Power over Ethernet (PoE)

When using a PoE-enabled switch

The Network Camera is PoE-compliant, allowing transmission of power and data via a single Ethernet cable. Follow the below illustration to connect the Network Camera to a PoE-enabled switch via Ethernet cable.

When using a non-PoE switch

Use a PoE power injector (optional) to connect between the Network Camera and a non-PoE switch.

Assigning an IP Address

- 1. Install "Installation Wizard 2" from the Software Utility directory on the software CD.
- The program will conduct an analysis of your network environment. After your network is analyzed, please click on the "Next" button to continue the program.
- The program will search for VIVOTEK Video Receivers, Video Servers, and Network Cameras on the same LAN.
- 4. After a brief search, the main installer window will pop up. Double-click on the MAC address that matches the one printed on the camera label or the serial number on the package box label to open a browser management session with the Network Camera.

1. A browser session with the Network Camera should prompt as shown below.

2. Refer to the "Panoramic PTZ Installation Guide" in your product CD for the rest of the configuration details.

If you encounter problems with displaying live view or the onscreen plug-in control, you may try to manually remove the plug-ins that might have been installed on your computer. Remove the following folder: C:\Program Files (x86)\Camera Stream Controller.

HARDWARE LIMITED WARRANTY

What Is Covered: This warranty covers any hardware defects in materials or workmanship, with the exceptions stated below.

How Long Coverage Lasts: This warranty lasts for TWENTY-FOUR MONTHS from the date of purchase by the original end-user customer.

What Is Not Covered: This warranty does not cover cosmetic damage or any other damage or defect caused by abuse, misuse, neglect, use in violation of instructions, repair by an unauthorized third party, or an act of God. Also, if serial numbers have been altered, defaced, or removed. Further, consequential and incidental damages are not recoverable under this warranty.

What VIVOTEK WIII Do: VIVOTEK will, in our sole discretion, repair or replace any product that proves to be defective in material or workmanship. Any repair or replaced part of the product will receive a THREE-MONTH warranty extension.

How To Get Service: Contact our authorized distributors in your region. Please check our website (www.vivotek.com) for the information of an authorized distributor near you.

Your Rights: SOME STATES DO NOT ALLOW EXCLUSION OR LIMITATION OF CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THE ABOVE EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

> VIVOTEK INC. 6F, No. 192, Lien-Cheng Rd., Chung-Ho, Taipei County, Taiwan. www.vivotek.com

1. Proof of the date of purchase is required. In the event you can not render such document, warranty will commence from the date of manufacture.

2. Cosmetic damage will only be covered by this warranty if such damage has been existed at the time of purchase.
