Lighting the Path of Innovation

NovaTac™ EDC T-Series Specifications

Designed to meet the rigorous reliability and durability requirements of the Military, Law Enforcement, and personal defense user, the NovaTac EDC-85T or EDC 120T is a handheld tactical flashlight that surpasses its predecessors and exceeds expectations. Lightweight, easy to use, easy to carry, and virtually indestructible, it could very well be the last flashlight you will ever need.

Survival of the Brightest

The EDC-85T or 120T intelligent power supply automatically reduces output to preserve the battery as it starts to run down, reducing the risk that you will ever be left in the dark. The brightness levels can also be adjusted to meet your mission requirements or to conserve power. At the lowest continuous output level, the EDC-85T or 120T will run for up to ten days on a single battery.

Could This Little Light Save Your Life?

When an assailant sets his sights on you, having the EDC-85T or 120T in hand could very well save your life. The EDC-85T or 120T can produce blinding brightness or a disorienting strobe in the eyes of an oncoming attacker, giving you time to take control of the situation. The EDC-85T or 120T strobe can also be used to signal your team to your whereabouts. In the toughest situations, a NovaTac EDC-85T or 120T in your hand may be the difference between life and death.

Proceed with Confidence

NovaTac flashlights are truly made for the mission. Pre-programmed at the factory to produce various light intensities and strobe, it's the toughest light you can buy. Guaranteed for life.
