Warning!

This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions manual, it may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

Electric Shock Hazard – Do not operate the machine with its back cover removed. There are dangerous high voltages inside.

2.1 Front Panel OSD Functions

 Power switch: To turn ON or OFF the power

 Shift the icon to the right side or shift it up

 Shift the icon to the left side or shift it down

 Menu: To enter OSD menu for related icon and item.

 Auto Button: One-touch auto adjustment

1.) Getting into Burn-in Mode

Before setting into a burn-in mode, first disconnect the AC power cord. Then press (don't let them go) the   buttons until the AC power cord is connected and the “RGB” appears on the top left corner of your screen. Now it can be put into the burn-in mode for changing colors.

2.) Getting Out of Burn-in Mode

Before getting out of the burn-in mode, please first disconnect the AC power cord. Then press the  button (If not workable, press the  button and don't let them go) until the AC power cord is connected. Please don't let your fingers go until the AC power cord is connected again and the wording of “RGB” appears on the top left corner of your screen, and wait for 3 seconds. Under the non-signal entry situation, if **Cable Not Connected** is seen, exit is thus successfully made.

2.2 OSD Controls

To make any adjustment, select the following:

1. Press  (Menu) to show the OSD menu or disable the OSD menu.
 2. Select the icon that you wish to adjust with the (/ or +/-) key in the menu.
 3. Press  (Menu) and then choose the item with the (/ or +/-) key.
 4. Press  (Menu) and then adjust the quality with the (/ or +/-) key.
-
- 1.) If the “RGB” is still on the top left corner of the screen, press  to enter “Miscellaneous” and choose “Reset”, and then **Yes**, and press . When the screen goes black, disconnect power and repeat the above steps.
 - 2.) If the “RGB” is not found, disconnect the AC power cord first. Then press the   buttons (don't let them go) until the AC power cord is connected, and wait for 2 to 3 seconds. When “RGB” appears, repeat the above steps.
 - 3.) Functions of OSD Keys

Chapter 3

3.1 Introduction to Control Board

This chapter describes how to install drivers and other software that will allow your Touch Screen Controller Board to work with different operating systems. eGalaxy touch panel control board is a touch screen control board designed for USB interface and specific for touch screens. It is designed with USB interface features with multiple devices supporting function. It is designed for Projected Capacitive Touch Panel (PCAP) application; through glass touch sensing is ready for products that require a complete flat surface. It also can drive the touch panel to get two fingers touch function that based on the Windows 7 support.

Figure 3.1: Bird's Eye View of control board

3.2 Installation of Control Board

Before installing the Windows 2000/XP driver software, you must have the Windows 2000/XP system installed and running on your computer.

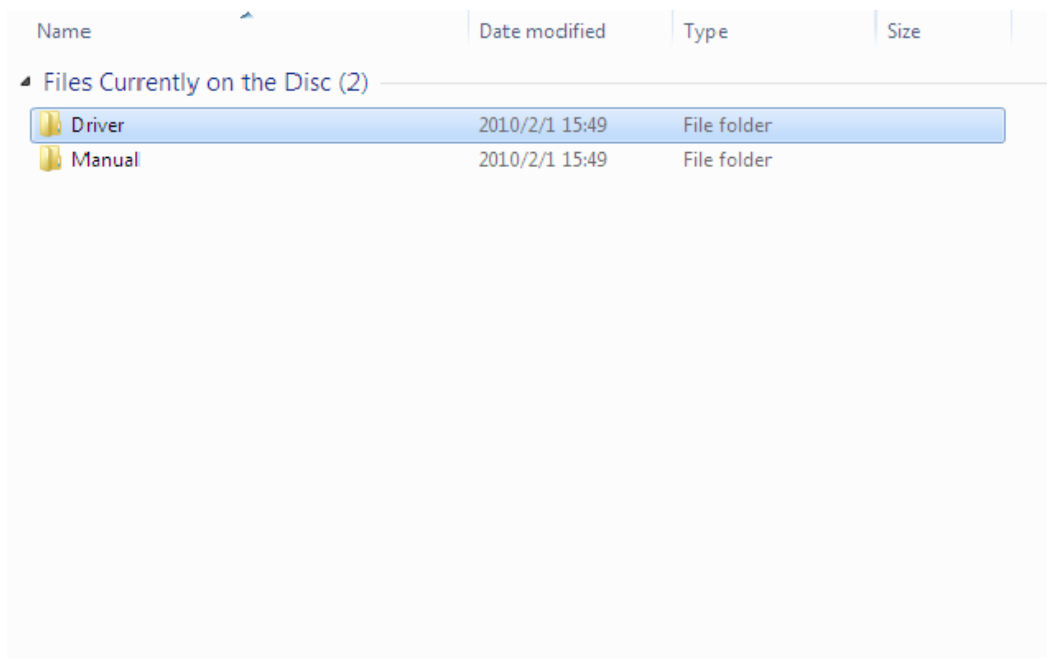

Chapter 4

4.1 Windows 2000/XP Driver Installation for eGalaxy Control Board

Before installing the Windows 2000/XP driver software, you must have the Windows 2000/XP system installed and running on your computer. You must also have eGalaxy Interface controller board installed.

Follow the steps below to install eGalaxy Windows 2000/XP driver.

Step 1. Insert the CD-ROM. Go to Driver folder. Click **Driver**.

Step 2. There is eGalaxTouch, double click the folder.

Step 3. Click setup.

4.2 Configuring eGalaxTouch Windows 2000/XP Driver

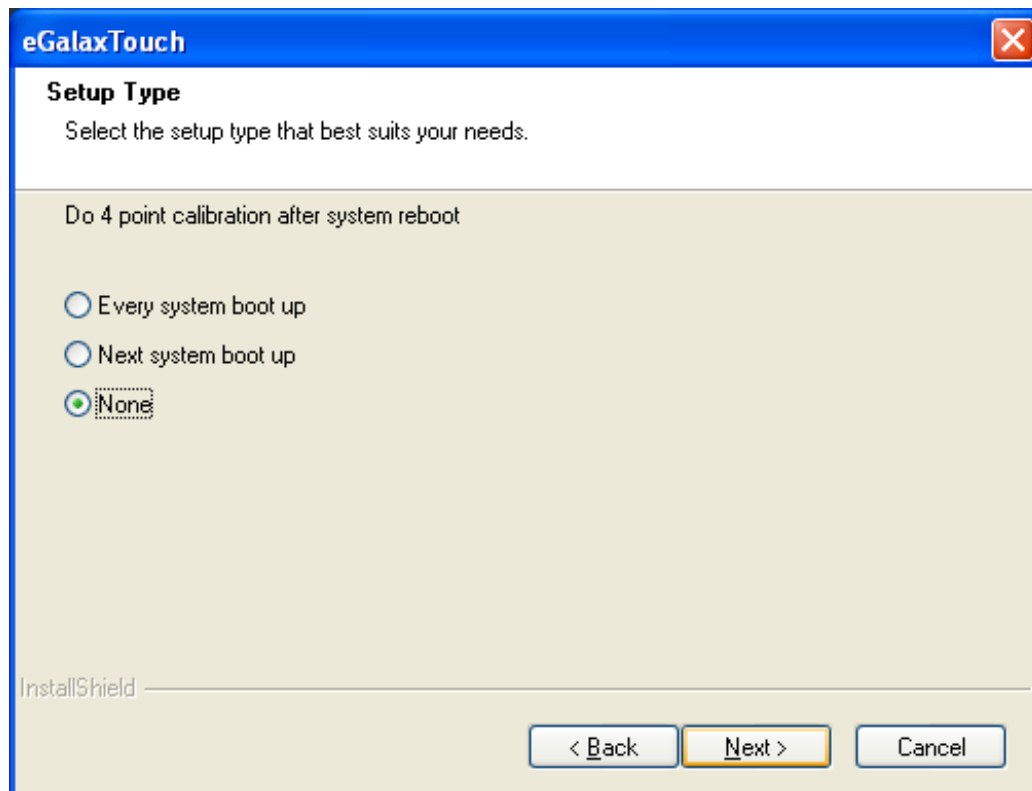

After click **setup**, InstallShield Wizard screen appears click **Next** to continue.

Step 1. Tick **Install RS232 interface driver.** Then click **Next.**

Step 2. Select **None.** Then click **Next** to continue.

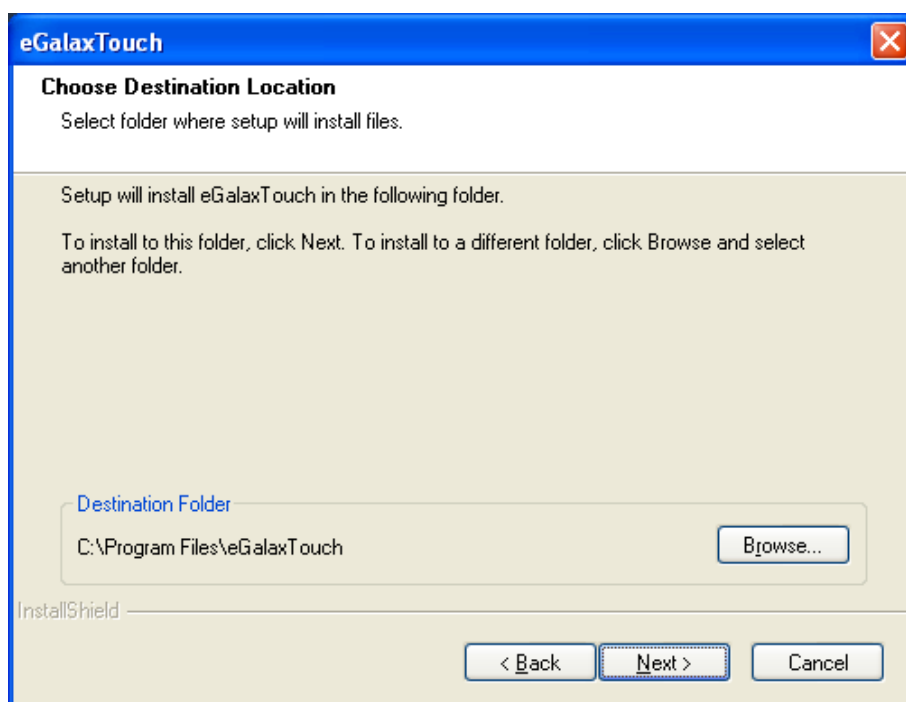

Step 3. Please make sure your touch monitor or touch controller's USB cable is plugged into the computer now. Click **OK** to continue the installation.

Step 4. If you want to use Multi-Monitor, check **Support Multi-Monitor System**. Then, click **Next** to continue the installation.

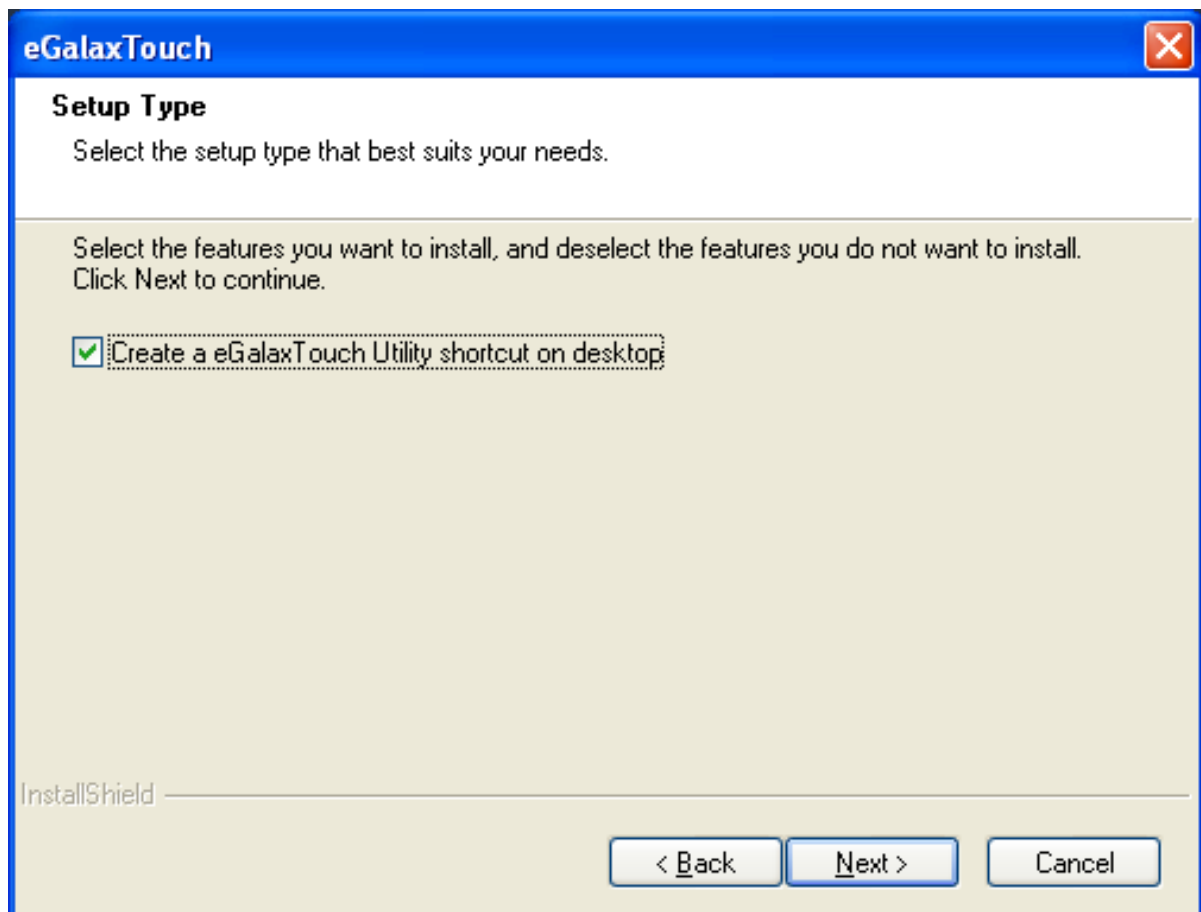

Step 5. Click **Browse** to create a new folder. Click **Next** to setup eGalaxTouch in the destination folder you want to install. Click **Next** to continue the installation.

Step 6. Under eGalaxTouch, select **Accessories**.

Step 7. Check **Create a eGalaxTouch Utility shortcut on desktop**. Click **Next** to continue.

Step 8. The installation files are extracted.

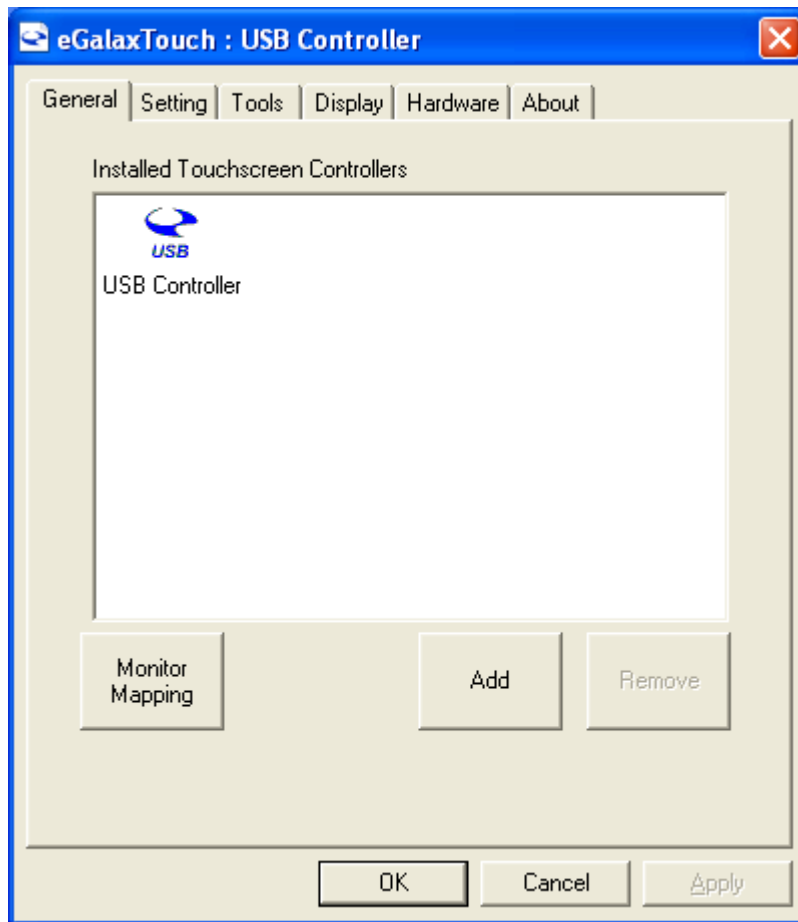

Step 9. eGalaxTouch driver has been installed. To do 4 point calibration, click **Yes** to continue.

5.2.2 Software Functions
