## Camera Settings (Default Settings)

	Timer	OFF
	Time Lapse	OFF
	Delay	OFF
	Stamp	ON
	SD Cycle Recording	OFF
	Camera Sound	ON

**PIR** PIR Sensitivity High

 Time/Date

**GPRS** GPRS Switch OFF

 Camera Password OFF

**Default** Reset NO

If wanted setting icon is not showing on camera LCD screen, press  repeatedly until it appears.

 Timer	<p><b>a. Set up</b></p> <ol style="list-style-type: none"><li>1) Press  to enter configuration page, press  to choose ON; press  again to set timer;</li><li>2) Press  to choose wanted time, press  to confirm wanted number and move to next number;</li><li>3) Press  again after Start time and End Time is set to Exit.</li></ol> <p><b>4) How does this work?</b> Camera will only work during pre-set Start Time and End Time.</p>
 Time Lapse	<p><b>a. Set up</b></p> <ol style="list-style-type: none"><li>1) Press  to enter configuration page, press  to choose ON; press  again to set Time Lapse;</li><li>2) Press  to choose wanted time, press  to confirm wanted number and move to next number;</li><li>3) Press  again to confirm.</li></ol> <p><b>b. How does this work?</b> Camera will take photos/ videos automatically upon the interval user set.</p>
 Delay	<p><b>a. Set up</b></p> <ol style="list-style-type: none"><li>1) Press  to enter configuration page, press  to choose ON; press  again to set Delay;</li><li>2) Press  to choose wanted time, press  to confirm wanted number and move to next number;</li><li>3) Press  again to confirm.</li></ol> <p><b>b. How does this work?</b> Camera will take photos/ videos based on the pre-set time interval upon motion. This option prevents from taking too many photos or videos.</p>
	<p><b>a. Set up</b></p> <p>Press  to enter configuration page, press  to choose</p>

<p>Stamp</p>	<p>ON/OFF; press  to confirm setting.</p> <p><b>b. How does this work?</b> Left battery volume, Moon phase, Temperature, Date/Time, and pre-set Camera ID will be displayed on every photo.</p>
<p> SD Cycle Recording</p>	<p><b>a. Set up</b> Press  to enter configuration page, press  to choose ON/OFF; press  to confirm setting.</p> <p><b>b. How does this work?</b> Select "ON", camera will continue to record photos/videos by deleting earliest photos or video clips recorded in SD card.</p>
<p> Camera Sound</p>	<p><b>a. Set up</b> Press  to enter configuration page, press  to choose ON/OFF; press  to confirm setting.</p> <p><b>b. How does this work?</b> Select "OFF" to turn off camera speaker.</p>
<p> PIR Sensitivity</p>	<p><b>a. Set up</b> Press  to enter configuration page, press  to choose High/Middle/Low; press  to confirm setting.</p> <p><b>b. How does this work?</b> High/ Middle/ Low; Higher sensitivity is 1) more sensitive to movements by smaller subjects; 2) longer detection distance; 3) easier for sensor to detect difference between body heat and outdoor temperature; 4) easier to trigger camera to record. In <b>high temperature</b> environment, body heat of subjects and environment temperature is hard to tell by camera, <b>suggest to set High.</b></p>
<p> Time/Date</p>	<p><b>a. Set up</b></p> <ol style="list-style-type: none"> <li>1) Press  to enter configuration page, press  to choose ON; press  again to set Time/Date;</li> <li>2) Press  to choose wanted time, press  to confirm wanted number and move to next number;</li> <li>3) Press  again to confirm.</li> </ol> <p><b>b. How does this work?</b> Date/Time; Date: "month/ date/ year"; Time: "hour/minute" <b>Note: Plz adjust Time/Date when you turn on camera to ensure camera to function well as expected.</b></p>
<p> GPRS Switch</p>	<p><b>a. Set up</b> Press  to enter configuration page, press  to choose ON/OFF; press  to confirm setting.</p> <p><b>b. How does this work?</b> To enable/ disable GPRS/MMS function.</p>
<p></p>	<p><b>a. Set up</b></p> <ol style="list-style-type: none"> <li>1) Press  to enter configuration page, press  to</li> </ol>

Camera Password	<p>choose ON; press  again to set Password;</p> <p>2) Press  to choose wanted password combination, press  to confirm wanted digit/ alphabet and move to next number;</p> <p>3) Press  again to confirm.</p> <p><b>b. How does this work?</b> Enable password protection for your camera; support totally 6 digits/ alphabets long password access.</p>
 Reset	<p><b>a. Set up</b> Press  to enter configuration page, press  to choose YES/NO; press  to confirm setting.</p> <p><b>b. How does this work?</b> Choose YES to reset camera settings back to factory default settings.</p>

### Photo Settings (Default Settings)

	Image Size	2M
	Multi-shot	1P

 Image Size	<p><b>Set up</b> Press  to enter configuration page, press  to choose desired Photo Size; press  to confirm setting. (8MP/5MP/2MP: 3264x2448, 2560x1920, 1920x1080)</p>
 Multi-shot	<p><b>Set up</b> Press  to enter configuration page, press  to choose desired Photo Burst number; press  to confirm setting. (Support 1~7 photos per burst/ trigger.)</p>

### Video Settings(Default Settings)

	Video Size	VGA
<b>Length</b>	Video Length	5s
<b>Frame</b>	Video Frame	30FPS

**Hz** Frequency 50Hz

 Audio Recording ON

 Video Size	<b>Set up</b> Press  to enter configuration page, press  to choose desired Video Size (720P/VGA/CIF: 1280x720/640x480/320x240)
<b>Length</b> Video Length	<b>Set up</b> Press  to enter configuration page, press  to choose desired Video Length per Burst/ Trigger; press  to confirm setting. (Support 5~60 seconds)
<b>Frame</b> Video Frame	<b>Set up</b> Press  to enter configuration page, press  to choose desired Video Frame; press  to confirm setting. (Optional 15FPS and 30FPS)
<b>Hz</b> Frequency	<b>Set up</b> Press  to enter configuration page, press  to choose desired Frequency based on local Country Frequency; press  to confirm setting. (Optional 50HZ and 60HZ)
 Audio Recording	<b>Set up</b> Press  to enter configuration page, press  to choose to turn ON/ OFF audio recording in video; press  to confirm setting. Select "ON", audio available in video clips.

## Software Upgrade

1. Copy the upgrade software files (3 files) into MicroSD Card;  
Note: Suggest to use 1 or 2 GB SD card to do the upgrade.

1628  
VLC media file (.bin)  
1,695 KB

DRAMPARA  
Text Document  
1 KB

ISP  
VLC media file (.bin)  
128 KB

2. Insert MicroSD Card into camera;
3. Insert batteries/ or plug in USB power cable;
4. Press and hold **Power/Navigation button** , camera speaker emits one Beep Sound;
5. Release button  when you see red indicator led flashes;
6. Then press and hold **Menu/OK button** ;  
**Note:** red indicator LED stops flashing but keeps lighting up;
7. Release button  after you see until **ISP** interface shows up in screen

ISP

8. Upgrade succeeds when red indicator led is off;

9. Plug out batteries/or power cable;
10. Insert batteries/ or power cable; turn on camera. Done.

**Note: Don't cut off power supply somehow; otherwise, camera will not be able to be turned on again unless software upgrade via PC.**

## USB Connection

When camera is connected via USB, press and hold button , camera speaker emits one Beep Sound, and red indicator LED lights up; then interface below appears.

Press  to choose DC in, or PC connection; press  to confirm choosing.

### a. DC in for Power Supply

Camera enters Test Mode Main Interface.

### b. PC Connection to Read MicroSD Card

Camera screen shows interface as below. Now you can read MicroSD Card contents via PC.

**By pressing  again, camera will be turned into a PC camera; press  again to Exit.**

## 5. MicroSD Card Selection & Battery Life Test Report

### MicroSD Card Selection

A memory card is required to operate the camera. When the camera is "ON" and no memory card is inserted, screen displays "No SD Card". MicroSD Card slot of camera supports up 32 GB memory card. Before inserting or removing the memory card, the camera must be powered OFF. Failing to do so may cause loss of or damage the pictures already recorded in the memory card. Following data shows an approximate quantity of photos which can be recorded by the camera depending on the memory card capacity.

Chart below will show you the approximate capacity of different size SD cards. Pls check to see which size card can fit your needs best.

SD Size Capacity	1GB	2 GB	4 GB	8 GB	16 GB	32 GB
<b>Photo (pictures)</b>						
<b>2 MP</b>	1645	3195	6197	12401	23786	50146
<b>5 MP</b>	653	1244	2356	4453	7957	14241
<b>8 MP</b>	421	796	1488	2873	4864	8092
<b>Video (hours)</b>						
<b>720P HD</b>	00:09:50	00:18:41	00:35:15	01:06:51	02:11:18	04:20:54
<b>640x480</b>	00:21:31	00:41:58	01:22:13	02:47:27	05:29:13	13:01:16
<b>320x160</b>	00:50:45	01:44:18	03:21:04	06:37:45	13:22:58	27:00:20

### Battery Life Test Report for Reference

Test Condition: LCD screen off. Mode: "Power On" _PIR intelligent automatically monitoring

## 6. Specification

Model	2.8C
<b>Recording</b>	
Video Format	.avi
Video Compression	MPEG4
Video Resolution	720P (1280*720) D1 (640*480) CIF (320x240)
Video Frame Rate	15 / 30 FPS; programmable
Video Length	5-60sec. programmable
Still Image Format	JPEG
Still Image Resolution	2MP (1920x1080) 5MP (2560x1920) 8MP(3264x2448)
Shooting Numbers	1~7 photos/trigger(programmable)
Photo Stamp	Logo
	Battery left volume
	moon phase
	temperature
	Date & time
	camera ID—4 digits (Programmable by User)
Record Delay	1second~23h 59min 59sec
<b>Night Vision</b>	
Night Vision Distance	8~10m, 30 feet
No. of Infra-Red LEDs	26pcs
<b>General</b>	
Image Sensor	1.3 Mega Pixels Color CMOS
Effective Pixel Size	1280x960
Lens	F=3.0; FOV=49°; Auto IR-Cut-Remove
Effective IR Flash	8 meters
Infrared Cut Filter	Yes
White Balance	Automatic
Day/Night Mode	Color during day / B&W at night
Minimum Illumination	0 Lux (IR on)
Effective PIR Angle	100°
PIR Sensitivity	High / Normal / Low 3 levels
Audio Recording	Yes
Operation Power	6~12V DC (1~2A)
Battery Type	4 AA
Auto Power Off	automatically power off in 1min without any operations
Interface	USB; Micro SD card slot

Memory Type and Size	SD Card, up to <b>32G</b>
Display	1.0 inch B/W Screen
Playback Zoom In	Yes
Language	English
Sensor Type	PIR (Passive Infrared)
Sensor Range	12~15m; 50 feet
Sensor Trigger Speed	0.8-1 sec
Power Consumption	150mA(350mA--IR LEDs on)
Low Battery Alert	Yes
Stand-by Time	4 months (4AAbatteries)
Operating Temperature	(-20 - 60)°C
Operation Humidity	5%-90%
Waterproof spec	IP54
Dimensions	100.4*70.44*51.32mm
Weight	171.2 g
Certification	CE, FCC, RoHs
<b>Functions</b>	
Photo+Video	Yes
Time Lapse	Yes
Timer	Yes
Time Lapse Delay	Yes
Password Protection	Yes, 6 digits
SD Card Cycle Recording	Yes
Auto Power Off in Test Mode	Yes
Water/WeatherProof	Yes
SD Card	Support up to 32GB

Specifications are subject to change without prior notice

## 7. Warranty

With great pride and full confidence in our products, we always keep our words which are given to our customers as specified warranty terms and service below. Based on a strict QC system, we initially offer all our customers [one year long time limited warranty](#), come along with selectable chargeable [renewal policy of warranty as one, two, three, or four years](#).

Our products are warranted against defects in materials and workmanship for a period of one year from the date of original purchase. If a defect exists, we will, at our option and to extent permitted by law will (1) repair the product at no charge using new or refurbished parts; (2) exchange the product with a functionally equivalent product that is new or refurbished. Provided the product is returned freight charge paid.

This warranty excludes damage resulting from abuse, accident, modifications or other causes that are not defects in materials and workmanship, or by someone other than our authorized technicians. This warranty only covers failures due to defects in materials or workmanship under normal usage.

To obtain warranty service, please contact us to determine the nature of problem before return the product under this warranty (with a written description of the problem and print samples) for repairing or exchanging.
