2.3 System Requirement

- OS System: Windows 2000, XP + SP2, Server 2003, Vista32/64, Win7
- CPU: Intel Pentium III 750MHz above or Intel Celeron 1GHz above
- Memory Size: 128MB (256MB recommended)
- VGA Card Resolution: 800 x 600 or above

3.0 Hardware Installation

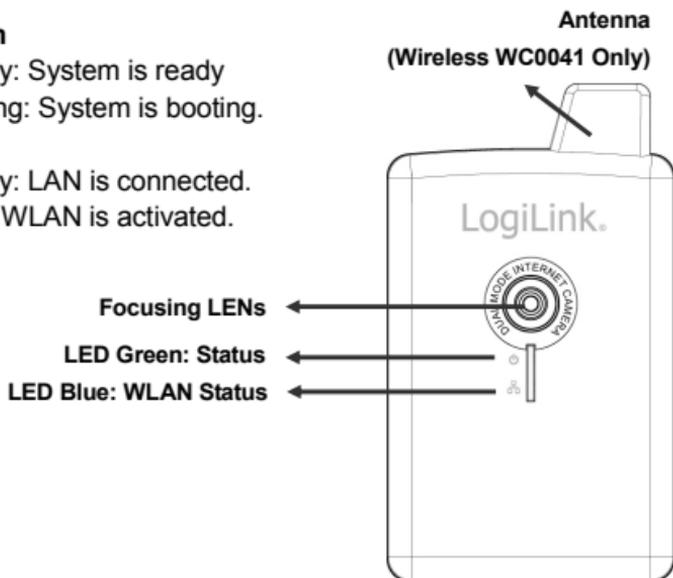

3.1 LED and Focusing

The Camera head and its focus ring allow you to modify the aim and focus of the Camera.

To adjust the Camera's focus, rotate the dark focus ring.

There are two LEDs indicating the camera status and networking status.

- **Green**
Steady: System is ready
Blinking: System is booting.
- **Blue**
Steady: LAN is connected.
Blink: WLAN is activated.

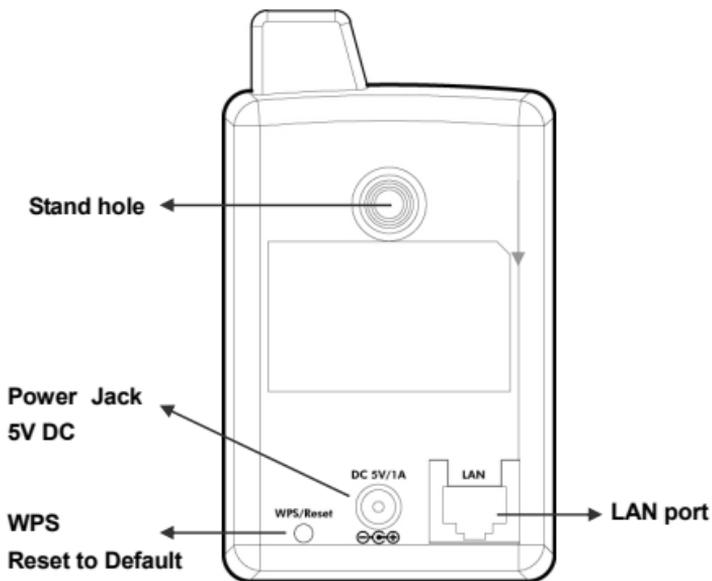

3.2 Camera Ports

The Camera features two ports and a button.

WPS Button: click for WPS function (wireless model) or reset function or hold for more than 5 seconds to reset the camera settings to factory default value.

Power Jack: Connect to power adapter for power supply with 5V DC.

LAN Jack: Connect to your local area network by network cable.

3.3 Installation Procedure

1. Connect the Internet Camera to your network by attached the network cable from the switch/router to the LAN port of the Internet Camera.
2. Connect the power adapter to the Internet Camera and plug the power adapter to power outlet. The Internet Camera will be powered on. When the Internet Camera is ready, the Green LED will light.

Note: It is highly recommended to use the power adapter shipped with the Internet Camera, do NOT use any other power adapter from any sources.

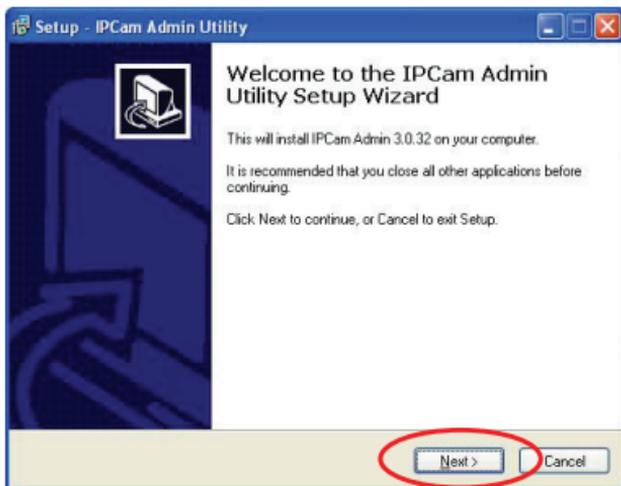

4.0 Software Installation

Follow the simple steps below to run the Install Wizard to guide you quickly through the Installation process. The following installation is implemented in Windows XP. The installation procedures in Windows 2000/XP/Server 2003/Vista/Win7 are similar.

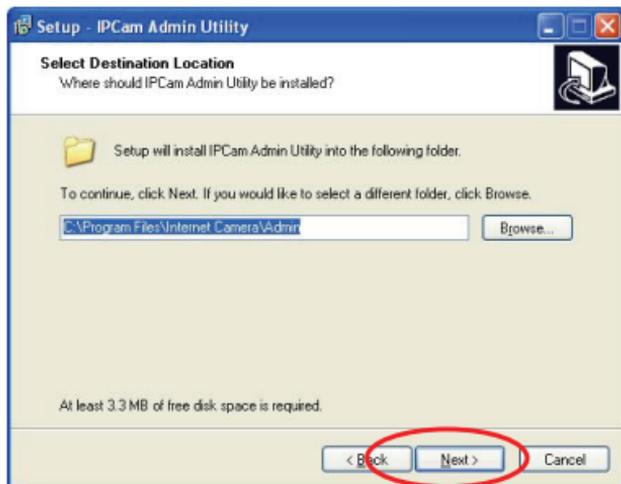

1. Insert the provided CD into your CD-ROM drive. The “Autorun.exe” program should be executed automatically. If not, run “Autorun.exe” manually from “Autorun” folder in the CD.
2. The Install Wizard will show three selections, select the program you want to install or click “Exit” to install the program later. The following installation steps are the demonstration of “Install Administrator Utility” and “Install 16 Chan Camera Viewer”.

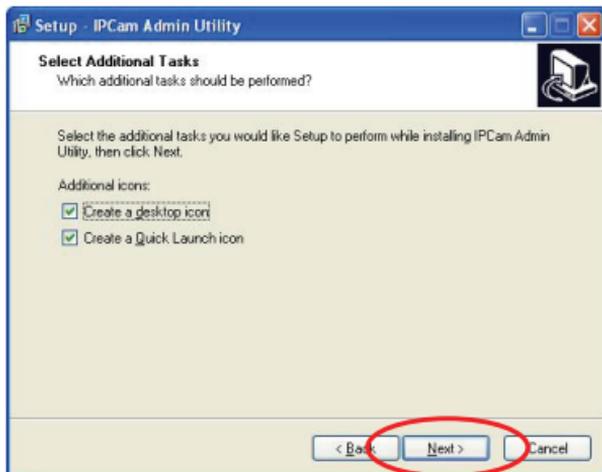

3. Click **“Install Administrator Utility”** and when the following window appears, click **‘Next’**.

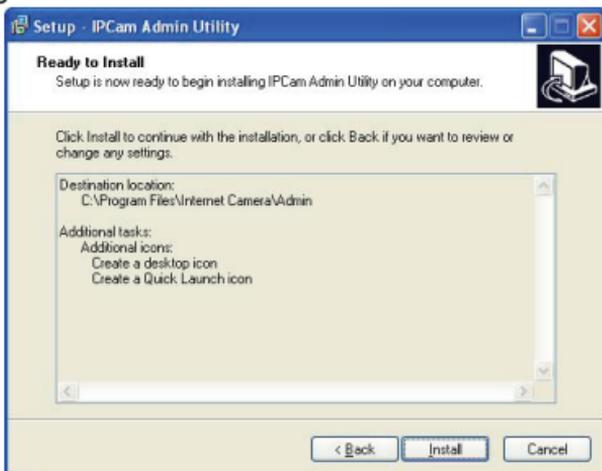

4. You can specify the destination folder of software installation. You can just use the default folder, and click **‘Next’** to continue.

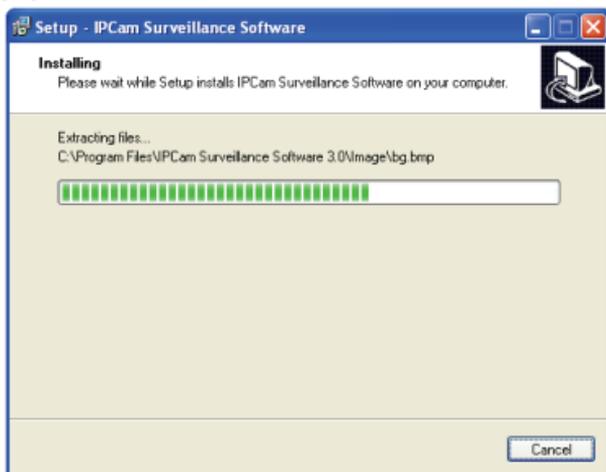

5. If you need installation program to create a desktop icon or a quick launch icon for you, click all items you need here, and click **'Next'** to continue.

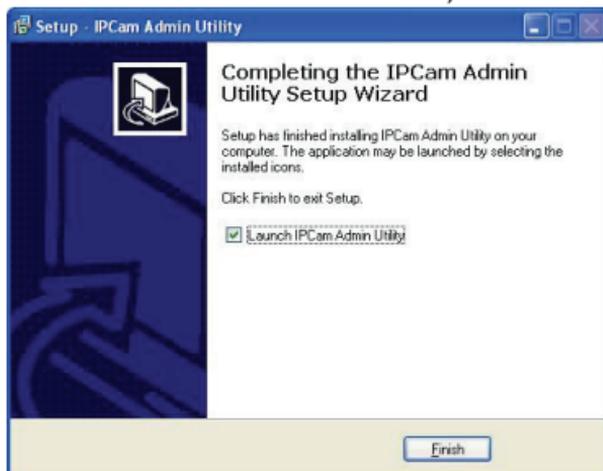

6. Here lists all options you chose in previous steps, if everything's correct, click **'Install'** to start installing procedure, or click **'Back'** to go back to previous step to modify installing settings.

7. The installing procedure will take some time, please be patient.

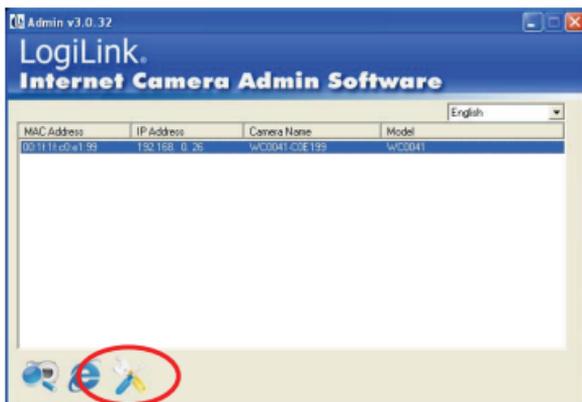

8. When you see this window, it means the software installing procedure is complete. Please click '**Finish**' to finish the procedure (IP camera surveillance software will start after you click 'Finish' button, if you want to start it later, uncheck 'Launch IP Cam Surveillance Software' box).

9. After finished the installation of Administrator Utility, please go back to wizard page and click **"Install 16 Chan camera viewer"**, the system will start running viewer installation and the procedures are similar to the installation of administration utility.

10. When the installation is completed. Please run "Administrator Utility". On the Internet Camera first page, the cameras found in the network are listed. Choose the one you want to configure and click "Setting Wizard" to proceed.

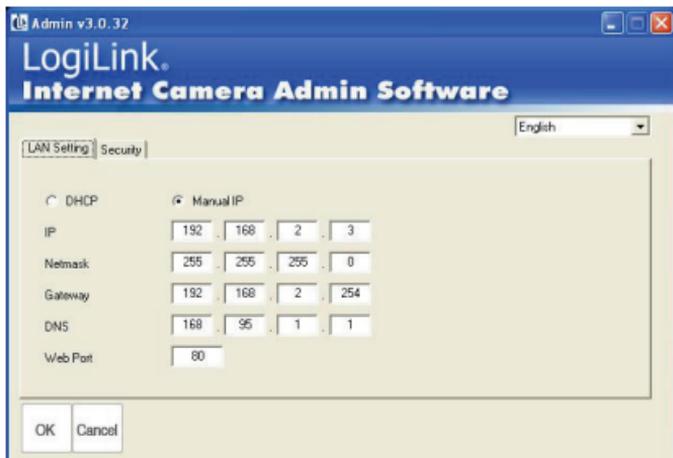

11. Please enter the default password “1234” and click “OK” to login to the IP setup page.

A login dialog box titled "Login" with a blue border and a close button in the top right corner. It contains two input fields: "User Name" with the text "admin" and "Password" with the text "1234". Below the fields are two buttons: "OK" and "Cancel".

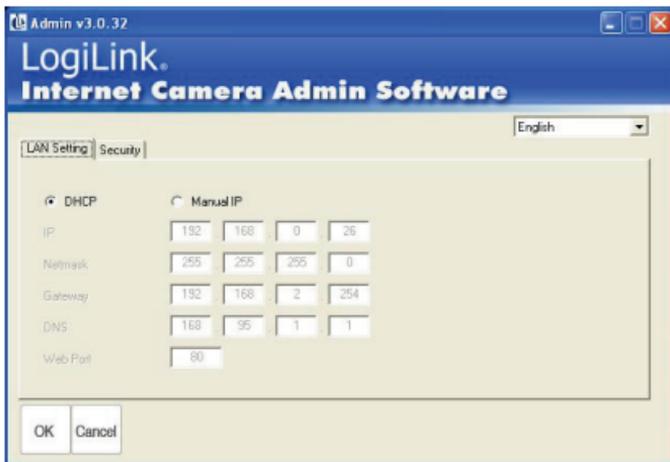

12. Internet Camera is working through the network (TCP/IP Protocol). The IP address setting must be correct, or you cannot access to the camera. The wizard program will detect the IP address status of your network automatically and suggest a free IP address for the Camera. You can accept the suggested value or enter the value manually. If you enter the value manually, please be aware that the “Subnet Mask” must be the same for both the camera and the PC. Click “OK” to apply the configuration.

The "LogiLink Internet Camera Admin Software" interface, version 3.0.32, showing the "LAN Setting" tab. The "Security" sub-tab is active. The "Manual IP" radio button is selected. The IP address is set to 192.168.2.3, the Netmask to 255.255.255.0, the Gateway to 192.168.2.254, the DNS to 168.95.1.1, and the Web Port to 80. There are "OK" and "Cancel" buttons at the bottom.

Field	Value
IP	192 . 168 . 2 . 3
Netmask	255 . 255 . 255 . 0
Gateway	192 . 168 . 2 . 254
DNS	168 . 95 . 1 . 1
Web Port	80

Or select “DHCP” to obtain an auto IP setting from DHCP server and click “OK” to apply the configuration.

13. Click 'IP Cam Surveillance Software' icon from desktop, quick launch bar, or start menu to start the IP camera surveillance software.

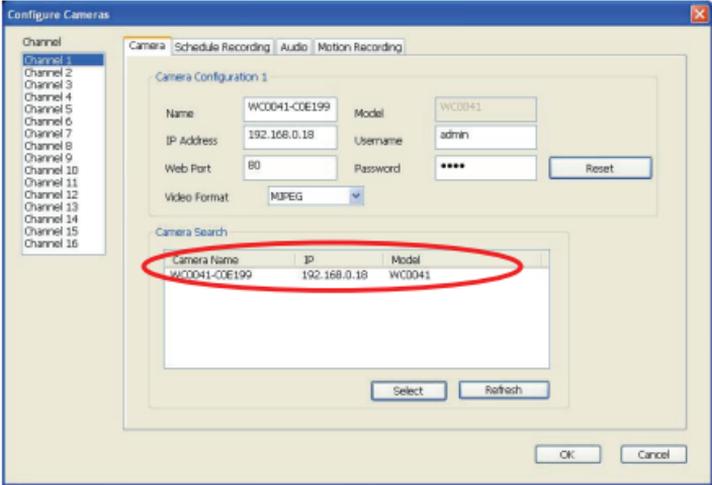

14. Please click '**System configure**' button  and a popup menu will appear

Configure Cameras
General Options

Please select '**Configure Cameras**' to configure cameras

15. In this table you can configure all cameras you wish to connect. Up to 16 cameras can be connected simultaneously, choose the camera you want to connect on the "**Camera Search**" list and click "**Select**" to add it into the channel you want to view then click "**ok**"

The screenshot shows the 'Configure Cameras' dialog box with the following details:

- Channel List:** Channel 1 (selected), Channel 2, Channel 3, Channel 4, Channel 5, Channel 6, Channel 7, Channel 8, Channel 9, Channel 10, Channel 11, Channel 12, Channel 13, Channel 14, Channel 15, Channel 16.
- Camera Configuration 1:**
 - Name: WCC041-COE199
 - Model: WCC041
 - IP Address: 192.168.0.18
 - Username: admin
 - Web Port: 80
 - Password: ****
 - Video Format: MJPEG
 - Buttons: Reset
- Camera Search Table:** (Highlighted with a red oval)

Camera Name	IP	Model
WCC041-COE199	192.168.0.18	WCC041

Buttons: Select, Refresh
- Bottom Buttons:** OK, Cancel

16. The IP Cam Viewer will pop out and the video will show on the channel you choose automatically. Congratulations!! You have settled the camera successfully.

The CE mark confirmed that this product meets the main requirements of the Directive 2004/108/EC and 2006/95/EC of the European Parliament and the Council of Europe concerning telecommunications and terminals regarding the Safety and health of users and of electro-magnetic interference compliance. The CE has been demonstrated. These statements are deposited by the manufacturer.
