Precautions for use

- **Coverage area**
The DECT functions provided by your Alcatel-Lucent system allow user mobility management via DECT cordless telephones.
Radio coverage of the Alcatel-Lucent system is ensured by a network of radio base stations. The coverage area of a radio base station is called a cell.
- **Mobility:**
A user can make or receive calls in any cell.
- **Radio transfer: (Handover)**
This function enables the user to move during a conversation and go from one cell to another. The transfer takes place automatically and has no effect on the conversation. In some cases, slight crackling may be audible at the moment of transition.

Use of approved DECT equipment

This DECT telephone is designed to be used with a private automatic branch exchange (PABX) without an Alcatel-Lucent wire. The CE symbol means that this product is compliant with current European Community directives, more especially the following directives:

- 89/336/CEE Electromagnetic Compatibility ,
- 73/23/CEE (low voltage) ,
- 1999/5/CE (R&TTE).

Pursuant to directive 1999/5/CE (R&TTE) published in the Official Journal of the European Community of April 7, 1999, these items of equipment use the DECT harmonized frequency spectrum and can be used in all the countries of the European Community, in Switzerland and Norway.

No guarantee is given concerning possible interference affecting DECT equipment, due to other authorised utilisation of the radio frequencies concerned.

Operating conditions

This approved DECT telephone is intended to be used with an Alcatel-Lucent cordless PABX. The following conditions must be respected, notably concerning the use of radioelectric frequencies:

- Changes or modifications to the equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- To limit the risk of interference, people with pacemakers must keep the wireless telephone away from their equipment (minimum distance of 15 cm/6 inches).
- It is recommended to follow the standard acceptance procedures before using this equipment in human safety critical areas (hospitals...).
- DECT equipment can only be used to establish links between fixed points if these links are temporary and the equivalent isotropically radiated power at the antenna is less than 250 mW.
- The conditions of access to a DECT equipment telepoint network shall be stipulated by contract with the operator of the authorized telepoint network concerned.
- Do not expose your telephone to severe conditions (rain, sea air, dust, etc.).
- Switch off the telephone before changing the battery.
- You must not switch on or use your telephone near gas or inflammable liquids.
- This equipment complies with radiation exposure limits set by FCC/IC and the European Council.
- There is a danger of explosion if the battery is replaced incorrectly. Use only recommended battery Alcatel-Lucent 3BN67332AA (China Shenzhen DRN Battery Co. Ltd. RTR001FXX / RTX Hong Kong Ltd CE-MB206-5C-XX - Li-ion 3.7V 1100mAh 4.1Wh).
- The mains power socket used must be close to the charger/holder and easily accessible, so that it can be used as an "on/off" facility.
- Battery charge
Charge the battery for about 6 hours before initial use.
- Use the following 82x2 DECT Handset charging units:
 - 8232 DECT Handset Desktop charger (3BN67331AA),
 - 82x2 DECT Handset Dual Charger (3BN67341AA).
 With the following Power Supply Units:
 - 8232 DECT Handset Desktop charger PSU Europe (3BN67335AA),
 - Friwo FW7713/XX. (rating I/P:AC 100-240V, 150mA; O/P: DC 5V, 1A),
 - 8232 DECT Handset Desktop charger PSU WW (3BN67336AA),
 - Friwo FW7712 (rating I/P:AC 100-240V, 125mA; O/P: DC 5V, 0.9A).
- You can charge the device by connecting it to a USB 2.0 port (type A). Use only the cable provided with the 8242 DECT Handset Desktop Charger (USB "A" plug), or the 82x2 DECT Handset Dual Charger.
- To prevent possible hearing damage, do not listen at high volume levels for long periods.

The labels and icons presented in this document are not contractually binding and may be modified without prior warning. The labels and icons displayed on your phone depend on the system to which you are connected and may differ from those specified in this document.

2 Getting started

In order to have a fully operational Alcatel-Lucent 8242 DECT Handset, make sure that you have the following items: the battery, the AC/DC adapter, the power supply and the USB cable.

2.1 Installing the battery in the telephone

- Installing the battery in the telephone:

<p>If the belt clip is installed, you must lift it up and maintain it in this position during the battery installation or replacement. You are advised to proceed with the belt clip lifted rather than turned.</p> <p>You can also turn the belt clip counterclockwise.</p>	
<p>Lift up the cover.</p>	
<p>Position the battery "connectors" side as shown in the drawing (A). Terminate the installation of the battery in its compartment by pressing as shown in the drawing (B).</p>	
<p>Replace the cover.</p>	

- Removing the battery from the telephone

<p>If the belt clip is installed, you must lift it up and maintain it in this position during the battery installation or replacement.</p> <p>You can also turn the belt clip counterclockwise.</p>	
---	---

Lift up the cover.	
Remove the battery from its compartment as shown in the drawing.	

2.2 Charging your telephone battery

2.2.1 Charging the battery on a single charger

Put your phone on its support. Plug the USB cable into the 5V socket of the desktop charger. Plug the other end of the USB cable into the AC/DC adaptor. Plug the AC/DC adaptor into the mains power supply.

- Green steady: the phone is on the charger (or connected to the USB cable) and the battery is fully charged.
- Red steady: the phone is on the charger and the battery is charging.

2.2.2 Charging the battery on a dual charger

Place the handset front forward into the Dual Charger upper slot. Place a spare Battery Pack in the front slot, charging contacts down.

To remove the spare battery, push down on the front button.

- Green steady: the phone is on the charger (or connected to the USB cable) and the battery is fully charged.
- Red steady: the phone is on the charger and the battery is charging.

2.2.3 How to dock your phone with the USB cable

Plug the USB cable into the USB port of your phone. The other end of the USB cable can be plugged into the AC/DC adaptor or into a computer USB port.

You can also charge your phone from any USB plug, such as a computer USB plug. However, the charging time is longer than charging with the AC/DC adapter.

2.2.4 LED

- Green steady: the phone is on the charger (or connected to the USB cable) and the battery is fully charged.
- Red steady: the phone is on the charger and the battery is charging.

Recharge your telephone battery regularly. The telephone can be on or off when recharging the battery. If the telephone is to remain unused or out of its charger for several weeks, remove the battery and store it separately.

The battery charging time is less than 3 hours. The charging time is longer if charging through the USB plug from a device other than the AC/DC adapter.

2.2.5 Autonomy of your telephone

On standby in the radio coverage zone. Up to 160 hours.

In continuous conversation. Up to 20 hours if economy mode is activated, 17 hours if economy mode is not activated.

Switch off the telephone before changing the battery.

2.3 Switching on your telephone

- Press the switch on/off key (long press).
- Your telephone is switched on.

If the display fails to light up or the battery icon is flashing, recharge the battery.

If the radio reception icon doesn't appear on the telephone display:

- Check that you're in an area covered (if you're not, move close to a radio base station).
- Check that the telephone is properly installed in the system (consult the PABX manager).

If the display indicates: "System 1 Auto install ?", see paragraph "Registering the telephone" or contact your installation technician.

2.4 Switching off your telephone:

- Press the switch on/off key (long press).
- Select the switch off feature.
- Your telephone is switched off.

For the mobile telephone to function, it must be registered on at least one Alcatel-Lucent or GAP system (registration operation). If when first switched on the display indicates: “Auto install?” your telephone has not been registered on any system.

	<ul style="list-style-type: none"> • <i>Settings</i>
	<ul style="list-style-type: none"> • <i>System settings</i>
	<ul style="list-style-type: none"> • Enter the PIN Code (The default is 0000). • Apply.
Registration can begin	
A- If the system does not use an AC code	
	<ul style="list-style-type: none"> • Launch subscription.
B- If the system uses an AC (authentication code)	
	<ul style="list-style-type: none"> • <i>Register</i>
	<ul style="list-style-type: none"> • Select a system (It is recommended that the first empty system is selected).
	<ul style="list-style-type: none"> • Enter PARK indentifier (optional). • Press the 'OK' key to confirm.
	<ul style="list-style-type: none"> • Enter access code. • Press the 'OK' key to confirm.
	<ul style="list-style-type: none"> • Select Power mode (You are advised not to select the 50 mW power mode unless required. The “50mW power mode“ is intended for hazardous sites such as nuclear plants where it is requested that emissions do not exceed the maximum value.).

The registration operation can last up to 2 minutes.

- If the operation has been done correctly (subscription accepted), the radio reception quality icon is displayed and the telephone is ready to be used.
- If the registration operation has not been successful, the station proposes launching the subscription again.

Utilization of the telephone in GAP mode can lead to functional limitations for which no claims will be considered under the terms of the warranty.

8.2 Registering the telephone on other systems

The telephone can be registered on several systems (maximum of 4).

Note: the input is usually reserved for use with your main Alcatel-Lucent system. You can select the other inputs to register the telephone under another system (Alcatel-Lucent or other system).

8.2.1 To make a new registration, when the telephone has already been registered on one or more systems, proceed as follows:

1. Prepare your system for registration (see the system installation manual or consult your installation manager).	
2. When the system is ready:	
	<ul style="list-style-type: none"> • Access MENU.
	<ul style="list-style-type: none"> • <i>Settings</i>
	<ul style="list-style-type: none"> • <i>System settings</i>
	<ul style="list-style-type: none"> • Enter the PIN Code. • Apply.
	<ul style="list-style-type: none"> • <i>Register</i>
	<ul style="list-style-type: none"> • Select a system.
	<ul style="list-style-type: none"> • Enter PARK code. • Apply.
	<ul style="list-style-type: none"> • Enter access code. • Apply.
	<ul style="list-style-type: none"> • Select Power mode.
Launch subscription.	

	<ul style="list-style-type: none"> • Return to idle.
--	---

- If the registration operation runs correctly (Subscription accepted), the telephone is ready for use, and the radio coverage icon appears.
- If the registration operation has not been successful, the station proposes launching the subscription again.
- Depending on the type of system concerned, registration may require one or more additional operations on the system.

8.2.2 Selecting your DECT system

Your telephone can be programmed to function on 5 different DECT systems (Alcatel-Lucent or GAP).

	<ul style="list-style-type: none"> • Access MENU.
	<ul style="list-style-type: none"> • <i>Settings</i>
	<ul style="list-style-type: none"> • <i>Select System</i>
	<ul style="list-style-type: none"> • <i>Select network</i>
	<ul style="list-style-type: none"> • Select the desired input (the chosen option is indicated by the radio button with a central dot).
	<ul style="list-style-type: none"> • Return to idle.

The selection is retained even after switching the telephone on/off. The selection of a specific system (SYSTEM...) forces operation on a specific system. This selection must be changed if one wishes to change system. Selecting "Lock to any" enables the telephone to connect automatically when it enters a system coverage zone. If the systems programmed in the telephone have common coverage zones, the telephone selects the first system found.

9 Accessories

9.1 Phone package

	<p>When you purchase your phone, it is equipped with a belt clip on the back.</p>
	<p>You can remove this belt clip and replace it with the cover provided in the box of your new phone.</p> <ul style="list-style-type: none"> • Turn the belt clip by doing a counterclockwise quarter turn. • Remove the belt clip by pulling it towards you.
	<p>Put on the cover instead of the belt clip as shown in the picture. Push the cover towards the back of the phone until the cover is clipped on.</p>

9.2 Chargers and power supply

Your phone charger is supplied with the following equipment:

	<p>An AC/DC adapter made of a body and a separate plug head that clips onto the AC/DC adaptor body. The charger is provided separately.</p>
	<p>A USB cable (provided with the handset).</p>

A desk support for docking your phone.

How to dock your phone on the desk support

Put your phone on its support. Plug the USB cable into the 5V socket of the desktop charger. Plug the other end of the USB cable into the AC/DC adaptor. Plug the AC/DC adaptor into the mains power supply.

How to dock your phone with the USB cable

Plug the USB cable into the USB port of your phone. The other end of the USB cable can be plugged into the AC/DC adaptor or into a computer USB port.

9.3 Dual Chargers

The Dual Desktop charger includes:

1.a stand to house your telephone and additional battery and a charge indicator light for the additional battery.

2.a mains cable via an AC/DC adaptor.

Place the handset front forward into the Dual Charger upper slot. Place a spare Battery Pack in the front slot, charging contacts down.

- The handset battery charging time is less than 3 hours.
- The spare battery charging time is less than 6 hours.

To remove the spare battery, push down on the front button.

The power supply USB plug allows you to charge both the handset and the spare battery.

The Data USB plug allows you to charge the handset from any PC. In this case, only the handset is charged, the spare battery is not charged.

9.4 Characteristics of the mains power adapter

- Input: 100/240 V - 50/60 Hz.
- Output: 5V - 1A.

The mains power socket used must be close to the charger/holder and easily accessible, so that it can be used as an “on/off” facility.

9.5 Presentation of the battery pack

9.5.1 Autonomy of your telephone

On standby in the radio coverage zone.	Up to 160 hours.
In continuous conversation.	Up to 20 hours if economy mode is activated, 17 hours if economy mode is not activated.

9.5.2 Initial charge:

Place the telephone in the charging holder.	
	Battery icon flashing.
	The battery is charged.

Maximum battery performance is only reached after around 10 charge/discharge cycles.
These batteries contain polluting substances: do not dispose of them in a dustbin - take them to a specialized collection point.

9.6 Headphone / external microphone

The side of the telephone features a 3.5 mm jack connector for headphone / external microphone. Contact your retailer for information on the various headphone models available.

9.7 Cleaning your telephone

Your telephone does not require any particular servicing. However, it may be cleaned using a soft, damp cloth.

Use appropriate soap or detergent to clean the surface of the telephone.

9.8 Transporting and protecting your telephone

To avoid losing your telephone, get into the habit of clipping it onto your belt. Your telephone can also be carried in a protective case.

Various models of carrying case are available. Ask your installation technician for information. It is vital to use the special protective carrying case if your telephone is to be used in an industrial environment (presence of dust, filings, vapours of diverse origins and risk of being dropped). If the telephone is used with a carrying case, the belt clip must be removed.

10 Glossary

- Call transfer The transfer function allows a user who is in contact with one person to transfer the person to another person.
- Conference: The conference function allows the user, in contact with two callers, to set up a three-way conference.
- DECT: European cordless telephone standard: Digital Enhanced Cordless Telecommunication.
- Hunting groups: Several telephones grouped under one directory number. A call to this number is directed to one of the free telephones within the group.
- Intrusion: Function allowing intrusion into a conversation between two callers.
- Personal assistant: This facility enables the caller to avoid having to leave a message in the voice mailbox and directs him/her to an extension number, an outside number, a mobile or the switchboard.
- Parking: This function places an outside call on hold, for subsequent recovery on another “authorised” extension within the system.
- Common directory: This directory contains all the abbreviated numbers that can be accessed by users of the Alcatel-Lucent installation.
- Personal directory: This directory contains the personal numbers of the user of a terminal.
- Pick-up group: This function enables you to answer a call ringing on another terminal. Calls can only be picked up within the pick-up group.
- DTMF During a conversation, DTMF codes are sometimes required. These codes are used when a user wants to consult a voice server, access a PABX or remotely consult an answering machine.

11 Declaration of compliance

Marking: 

This equipment uses the DECT harmonized frequency spectrum (1880Mhz-1900Mhz).

This equipment is in compliance with the essential requirements of R&TTE Directive 1999/5/EC and with Directive 2011/65/UE (ROHS).

The Declaration of Conformity may be obtained from: Alcatel-Lucent 3 avenue Octave Gréard 75007 Paris, France

Contact: ebg_global_supportcenter@Alcatel-Lucent.com

USA and Canada

Handset: this device complies with Part 15-D of the FCC Rules and with RSS-213 of Industry Canada (). (FCC ID: T7HCT8121 IC: 4979B-CT8121). This device complies with Part 68 of the FCC Rules and with IC CS-03 Part V of Industry Canada. The ACTA registration number is: T7HW4NANCT8121.

Chargers: this device complies with Part 15-B of the FCC Rules and with ICES-003 of Industry Canada.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Exposure to Radio Frequency Signals.:

This device has been designed and manufactured not to exceed the SAR (Specific Absorption Rate) radio frequency power transmission limits established by the different countries concerned. The SAR value measured is equal to 0.102 W/kg (the globally accepted maximum limit being 1.6 W/kg).

User Instructions:

This equipment has very low levels of RF energy and is deemed to be compliant without testing of the specific absorption rate (SAR).

This apparatus is Hearing Aid Compatible (HAC).

Acoustic shock protection

The acoustic level of the signal generated by the handset earpiece is less than 130 dBspl for a transient signal (123 dBspl for Australia) and less than 118 dBspl (rms) for a continuous signal (120 dBA for Australia).

Directive 2003/10/EC specifying the risks inherent in noise at work

The ring contributes towards overall daily noise. To reduce the level, the following is recommended: reduce the setting, program a progressive ring.

Privacy:

Privacy of communications may not be ensured when using the Bluetooth® handset or any additional Bluetooth® device.

**Disposal:**

The equipment must be returned to a collection point for electronic equipment waste disposal.

Defective batteries must be returned to a collection point for chemical waste disposal.
