First of all, we are glad to introduce U-Quick2.0 to you. This document will help you to understand this powerful signage management software which is designed for the MedeaWiz DV-81. Please enjoy it!

1. About U-Quick

U-Quick is the intranet central-base signage management software which designs for the DV-81 FHD signage player. U-Quick is the PC software that must install and execute in a Windows PC. After installation, users can use this U-Quick to control and manage signage players easily. Therefore, the DV-81 with U-Quick will be the most simple turkey solution for SMB signage applications.

#### 2. U-Quick Installation

- 2.1 Execute "Setup.exe" in U-Quick Release
- 2.2 Follow the instruction during the installation
- 2.3 Click "Allow access" in Windows Firewall Security Alert

#### 3. Starting U-Quick

#### Click "U-Quick" icon to execute U-Quick

Double Click

U-Quick will start to search for DV-81's automatically on your network and this process will take about 30 seconds.

UICK MESSAGE	X
Initializing and searching devices	: 7%

Notes:

- 1. U-Quick searches DV-81's automatically under the same router (in the intranet) only.
- 2. The PC for U-Quick must have access to internet via cable (not WiFi)

U-Quick 2.0 User Manual

#### 5. Quick Guide to Use

Please insert SD cards into DV-81's (*The default disk is <u>SD card</u>*. USB disk is ok but must change the disk label to LOCALFS from PC before insert to DV-81). It's ok to use an empty disk. Please also plug in the internet cable before executing U-Quick. Simply 4-steps will let you manage signage players easily.

**Basic Procedures** 

Step 1: Edit the Configuration and Playlist

Step 2: <u>Publish content and configuration to ftp Server</u>

Step 3: Apply Configuration to players

PS: DV-81 will stay at Start-up Screen (Desktop) for next step.

Step 4: <u>Ask the players to Sync with ftp</u>

After Sync, players will re-start automatically!

Notes:

If the content does not change, you won't need to do "Step 4". But users must reboot the players manually and remotely (click "green" icon).

#### 6.7 Weather

You can get the zip code of the city from "Weather.Com". There is a link for you to search right after the zip code.

http://www.weather.com/

You can change the style and scale of what displays in Signage.

For example:

The weather code of New Orleans, LA is "USLA0338".

Please type "USLA0338" in below:

### 7. Publishing Digital Signage

This portion will let you know how to save and publish signage.

#### 7.1 Hot Key Area Function

- 1. New: Create a new project to edit signage
- 2. Open Project: Open an existing signage project in computer
- 3. Save: Save signage as a project into the computer
- 4. Select a SD/USB device for exporting the signage project
- 5. Import from Disk: Open a project which is in a selected SD card/USB storage
- 6. Export to Disk: Export current project into SD card/USB storage
- 7. FTP Upload: Save project or files to FTP server

(Please refer to "Chapter 8" for detail FTP operation steps)

Insert the finished SD card/USB storage into the player and playback will start automatically.

U-Quick 2.0 User Manual Issue d	date : 07/30/2013	Rev.: A06	22 of 34
---------------------------------	-------------------	-----------	----------

#### 7.2 Device Information

You can get device information from the Device List on the intranet. It will show the IP address, MAC address and the status of each DV-81 as illustrated below. Signage also can be published and modified in this portion.

1. Refresh:

Search for devices manually

2. Back to desktop:

Stop playing signage.

3. Return to playback:

Replay signage.

- 4. Change Device Name:
  - 1. Open Change Device Name setting for the selected player.
    - \* Change only one device name each time.
  - 2. Enter the new device name in column.

U-Quick 2.0 User Manual Issue date : 07/30/2013 Rev.: A
