

Energy-regulating
magnetic field therapy

**For mobility
and health**

Control-unit

The Control-unit **EQUIMAG 2** is the heart of our magnetic system. It generates pulses that come through our special coil system in the organism. The pulses are combined with different frequencies ranging from 1 Hz to 30 Hz to a frequency bundle. The shape of the pulses is of particular importance in order to address a wide range of the body's own frequencies.

The pulses are transmitted throughout the body and can penetrate the body completely. Between pulses, the targeted cell structures also receive sufficient breaks to continue on their own working. Robust housing, clean front panel, equipped with standard rechargeable batteries, incl. Power-charging unit and adapter cable for mobile recharging.

Art. Nr. 1240 Technical details:

- Needle rectangular pulse with superimposed exponential function
- Automatic North-South Pole changeover circuit
- Average Field strength 40 micro Tesla
- Automatic adjustment of frequency field strength and time (Biological active window)
- Capacity: The battery power for up to 50 treatments
- 2 Outputs for applicators, expandable to 4 outputs
- The run of the programs is freely selectable

Programs

- Program 1 „Basis“
- Program 2 „Vital“
- Program 3 „Relax“

Intensity - 3 variants

- 50 %
- 100 %
- 25 % to 100 % increasing intensity per pass

Basic- & Basic-Set plus

Confirmed by professional and home users as the optimal therapy set.

- Best workmanship and materials
- Easy to use
- Easy to clean in the washing machine
- Suitable fit for almost all horse sizes
- Length and height adjustable chest fastener
- Smooth gaiter directly suitable for use on joints
- The coil system is identical to the professional blanket applicator

Scope of supply Art. Nr. 1000 Basic-Set:

- 1 EQUIMAG 2 Control-unit with accessories
(4 rechargeable batteries, AC charging adapter, car adapter, 1 adapter connector)
- 1 Blanket applicator „Basic“ with accessories
(elastic girth belt with pocket for the control unit, chest fastener, tail belt)
- 2 Leg gaiter
- 2 Extension parts for gaiter
- 1 Large carrying bag with side pockets
- 1 User Manual, German-English literature, German on CD)

Practical and versatile: The gaiter can be used with the extension pieces as neck applicator.

Scope of supply Art. 1001 Basic-Set plus:

- 1 Large neck applicator
- 1 Intensive stick applicator, 1 adapter plug

Compact-Set

The compact set with proven EQUIMAG technology is used therapeutically as a gaiter, neck or back pad. With the breast belt and the elastic lap strap and control unit pocket you are prepared for an universal application. Easy handling, comfortable cleaning and low safekeeping expenditure and transport expenditure speak for this compact set.

Scope of supply Art. Nr. 1140 Compact-Set:

- 1 EQUIMAG 2 Control-unit with accessories
(4 accumulators, car adaptor cable, AC charging adapter)
- 1 Combi-blanket-applicator (60 x 75 cm)
- 1 Elastic waist belt with pocket for the control unit
- 1 Carrying case
