- If you use master keyboard that has the wheel, you can change sounds of almost all presets by modulation wheel. Basically applied 'vibrato'. And there are applied 'changed sound', 'widen stereo width', and there are not applied anything.

- Many percussive presets applied intelligent Round Robin. Some presets applied to avoid Machine-Gun effect, and some presets applied for up-down playing to the rhythm.

- Analog Synth Wave Samples are kind of a bonus. These sample's sounds that are recorded from vintage console are very thick and rich harmonics. Each waves are mapped into all chromatic keys, and wave's looping cycle is very long. If you want to make analog synth sound by filters

and envelope LFO in Kontakt, you can make using these samples. These looped analog waves are good music source to you.
