

ebode

www.ebodeelectronics.eu

ebode is our own established European brand focusing on CE market with innovative automation, entertainment and security solutions. However, the ebode product line can be sold in multiple distribution channels and is including (but not limited to) 'Electrical' Retailers, Department stores, DIY stores, Electrical contractors and wholesalers, system integrators and installers, as well as online.

Today ebode is divided in the following product groups:

- IP HD P2P Security Cameras
- IP MJPEG Security Cameras
- IP Security Camera Accessories (NVR & POE)
- IR Solutions (control A/V equipment in closed cabinets)
- Wireless IR Extenders
- HDMI Extenders
- HD Splitters, Switches, Converters & IR over HDMI
- Wireless Bluetooth Sound
- FM Transmitters
- Wireless HD senders (streaming A/V wirelessly room to room)
- Automation Products

ebode is dedicated to providing our customers around the world with innovative and affordable 'wireless' A/V solutions, accessories that enable them to take control of their electronic environments. The products have many uses - whether a customer is looking to save time, energy or simply improve the convenience and comfort of their home or building. ebode offers easy, smart and safe solutions to fit the customers needs today, tomorrow and in the future.

INSTEON®

Insteon is the best-selling, most reliable home automation technology. Insteon enables simple, low-cost devices to be networked together using the powerline (PLC), radio (RF) or both. All Insteon devices are peers, meaning that any device can transmit, receive or repeat other messages without requiring a master controller or complex routing software.

Insteon adds remote control and automation to lighting, appliance and home control applications of all types. From lighting control to sensor alerts, the new home automation standard allows you to manage your home the way you want. Insteon just launched an Ethernet Hub and a free App with which you can control lighting and electrical devices via your Smartphone (Android or iOS).

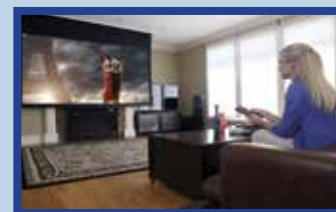

X10 is a communication language that allows compatible home automation products to talk to each other via the existing 220Vac/50Hz electrical wiring in the home. In this way, there is no need to pull new cables. Available modules: DIN Rail modules, switch modules, appliance modules and controllers.

For 25 years, X10 has been recognized as the market leader in low cost, plug and play wireless home networking solutions, allowing the inter-connection of all household electrical devices without any additional wiring. Thanks to an ingenious combination of technologies, all appliances can be controlled remotely from anywhere in the home.

BMB Electronics B.V. is a family owned and managed business with their head office in the beautiful Dutch countryside. Here our sales office, technical services, marketing, training- & demo facility, showroom and warehouse are based.

There are many choices of custom and A/V suppliers today, offering a large amount of different brands, so why should you choose to work with the BMB team instead of other companies? While brands come and go in terms of popularity, price or performance we believe it is important that companies work based on relationships, good service and fair prices.

In the custom A/V business the old saying 'the service is remembered long after the price has been forgotten' is still very true. In an industry like ours that relies on referrals and repeat business from our customers it is vital that professional long term service can be provided, sometimes years after the sale has been made.

Total Control is a family of products that work together flawlessly to easily control your entertainment, lighting, climate and more. Consolidate all your electronics into one easy-to-navigate menu and enjoy simple control from anywhere around the house. Total Control puts it all in your hands.

- Centralized and in-room controllers
- Remotes and control interfaces
- iOS and Android control
- Audio streaming products
- Single- and multi zone amplifiers
- Home Theatre 7.1 amplifier/processor
- IP camera's, thermostat, MAC filtering switches.

The URC Complete Control range of products brings together a home's electronic devices so the system can be used to it's fullest potential, so simply. Elaborate configurations can be easily handled, created and customised using the intuitive 'Complete Control Program'

- IR & RF remote controls
- Network remote controls
- RF and network base stations
- In-wall keypad
- Personal media server PSX-2
- iOS and Android control

amino

INVISIBLE LOUDSPEAKERS

Amina is the specialist manufacturer of flat panel, truly invisible plaster-over loudspeaker systems, supplying high definition sound solutions for design conscious customers who want to hear their music clearly but do not want to see their speakers!

The Evolution Series and new "i" series feature a couple of new technologies which has resulted in:

- Improved bass definition especially at higher volume levels
- Better sound dispersion with exceptionally wide sweet spot
- Improved low frequency extension and dynamic range
- Smoother midrange and treble dispersion

Lighting Control for the 220/240V Market. Leviton Security & Automation has developed a full line of award winning automation products, including home control systems, programmable communicating thermostats, smart light switches, whole house audio systems, video surveillance equipment, access control products, touch screen interfaces, and software that allows access and control of an automation system over the Internet.

With Leviton's Omni-Bus Lighting Network you can combine the benefits of a central lighting control system with the flexibility of a distributed lighting control system. You can control up to 256 lights, shades, fans, shutters, pumps, and much more with Leviton S&A Omni-Bus.

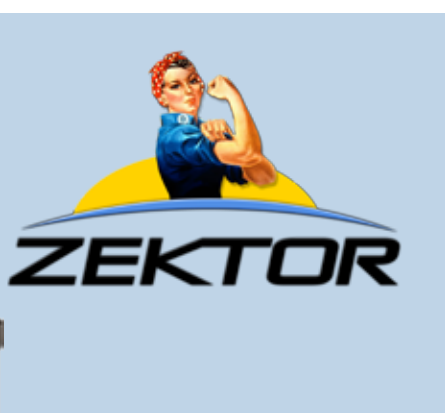

All of us know that there are many choices when it comes to Audio / Video switching and distribution products. When you select a Zektor product, you can count on long term reliability and signal quality every time you use your entertainment system.

We are so confident about our products that our Pro A/V products come with a standard warranty that is the best in the business.

Our goal is to be the favorite product in your system that you never have to think about. At the request of our dealers and integrators, Zektor is now in the major controller libraries of Leviton S&A and Universal Remote.

CURRENTAUDIO®

Current Audio products are supplied to end-users through a carefully chosen group of custom installers who meet stringent technical, financial, and customer service requirements.

In addition, they must be dedicated to providing their customers with the finest products and service obtainable.

End-users and installers alike have the utmost confidence in our products because of the way we do business.

High quality sound reproduction, new ideas, new materials, reliability, and superior quality in craftsmanship are our key differentiators in the market and place us in front of the crowd.

Additionally, we believe in what we do and provide an extensive warranty for all products.

Great Sound in All Places™

Terra purpose built 'All Climate' loudspeakers are built to a very high standard and deliver the quality of sound you would expect from fine indoor speakers.

AC Series- All Climate Loudspeakers.

Terra's enhanced AC Series use innovative design and superior construction to deliver the quality of sound you'd expect from fine indoor speakers.... outdoors. But unlike most "weather resistant" speakers, Terra speakers are weatherproof.

LS Series - LED Outdoor Lighting & Sound

The LuminSound™ LS.32 is an attractive, compact black bollard that fits well into any type of landscaping. At 32.5-inches high and 7-inches maximum diameter it's designed to provide adjustable path and/or landscape lighting while allowing precise aiming of high fidelity sound for maximum coverage and enjoyment.

CA Series - Custom Application Loudspeakers

Terra CA Series Custom Application loudspeakers use innovative technologies to combine the dynamics of traditional "box" speakers with the aesthetic advantages and placement flexibility of in-wall "architectural" speakers.

MIGHTY BRIGHTY Projection Screen Paint

Mighty Brighty is a unique concept for creating the perfect projection screen right on the wall, using a special Projection Screen Paint. It turns any regular wall into a high-performance projection screen that always meets your exact specifications, all-in-one simple and easy to apply package.

An image projected on Mighty Brighty Projection Screen Paint has much better contrast and brightness than that of a plain white wall - it has the same quality as a professional projection screen but costs far less.

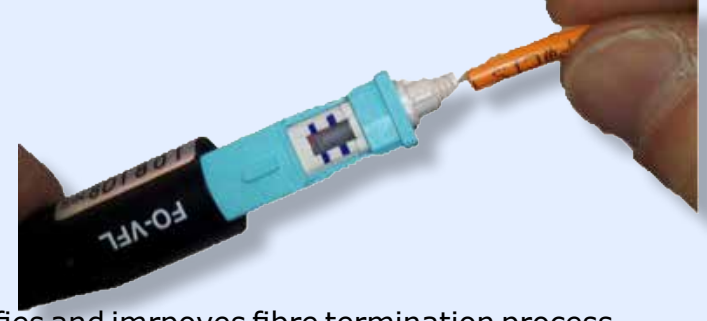

Whether you have 1 location or 1000, Five-motion is an easy and affordable path to vivid, engaging digital branding and communication. If you know how to use Power-Point and a web browser, are basically half-way through the Five-motion user manual.

No canned music service knows your customers the way you do. Take control as easily as making a playlist for a family road trip. Web based tools designed to work like your favorite online calendar leave you free to concentrate on your message.

Self-serve Signage Music & Messaging Intuitive control

Cleerline Technology Group, the makers of the Planet Waves CI range, has launched a new range of affordable, easy to install Fibre Optic Cables for the custom installation sector. The ground-breaking Non Strip Fibre (NSF) is a fast and safe alternative for custom installers that simplifies and improves fibre termination process.

Cleerline NSF:

- Can be easily stripped without the use of any specialist tools
- Offers virtually unlimited data stream bandwidth
- Let you use large cable lengths without reduction in quality
- Is supplied in both simplex and duplex multimode options

Planet Waves provides a fast, easy to use and solderless interconnect construction system for custom installers and AV integrators.

- 3 easy steps to make cable: Cut, Twist & Screw
- RCA, BNC and F connectors
- Banana Plugs for speaker wire
- HDMI cables and Port Savers

Rimikon's LED lighting systems are Extra Low Voltage DC. Durable and very easy to install. Designed to provide a safe and energy efficient new approach to recessed lighting.

Rimikon provides LED lighting that let you create exciting lighting solutions for residential, commercial and architectural applications.

In essence, integrators can install Rimikon's Extra Low Voltage LED devices utilizing low cost installation methods. This is a strong and critical advantage to integrators and building developers alike.

Lowell is the leader in innovative, reliable, high value custom rack mounting product solutions for the commercial sound, security, professional audio, broadcast, data communications and A/V markets.

The products are engineered for performance and durability, built by hand in the USA and offer a wide selection of products to suit every need.

An extensive selection of accessory panels, drawers, shelves, add-on items, cable, and thermal management solutions are also available.

SCP → Structured Cable Products

Quality Installations Deserve Quality Products

SCP is a leading global manufacturer and supplier of low voltage wire, cable and accessories.

Whether you are looking for bulk cables such as Cat5e/Cat 6, coaxial cables, speaker cables, security, fire alarm, direct burial, structured wiring, or specialized control cables, SCP has the widest product selection in the industry.
