

# Remote DVR Control User Manual

---

FUSION's Remote DVR Control gives you access to your FUSION system from PCs, laptops, iPads, Smart Phones and other connected devices. All you need is an Internet connection and a WatchTVEverywhere Account (which is free).

Remote DVR Control lets you manage your DVR. You can set programs to record, review/delete recorded shows, change series recording and more. Remote DVR Control also includes a complete interactive program guide so you can see, schedule or record any program for the next 14 days.

Remote DVR Control does NOT let you watch recorded programs on remote devices.

## WatchTVEverywhere

You need a free WatchTVEverywhere Account to access your FUSION system from the Internet. To create your free WatchTVEverywhere Account:

- Visit [www.watchtveverywhere.com](http://www.watchtveverywhere.com)
- Find MCTV in the "select your tv provider" drop down menu
- Select "register."
- Complete the required information. For Subscriber Validation, you need to know your MCTV Account Number and the Last Name as it appears on the account. For New User Information, you can enter any password or email address you choose.

Once you have created your WatchTVEverywhere Account you are ready to use FUSION's Remote DVR Control. As an added bonus, you can watch live and recorded TV shows from WatchTVEverywhere. See the list of available networks when you log in. All WatchTVEverywhere programs are FREE.

## Remote DVR Control

Remote DVR Control includes four easy-to-use screens. The screens shown here are from a PC. They will look slightly different on other devices, but all work the same.

### SUMMARY

This page shows:

- SCHEDULED - all the programs currently scheduled to record on your FUSION Gateway.
- RECORDED - all the programs currently stored in FUSION. You can examine the program information and even delete them if you choose.
- DEFAULTS - check or change the default settings for future recordings.
- SERIES OPTIONS – see all the series you have chosen to record and change the settings.

## MANAGE DEVICE

This page allows you to label your FUSION Players. FUSION will attach this label to recordings so you know which Player requested it.

## FLICKR

This page allows you to view photos posted on Flickr on your big screen TV. Either search for the Flickr Member by name or enter them by the Flickr User ID. Flickr photos display in the Photos category of the main FUSION menu. Checking Interestingness will add that popular Flickr feature for display as well.

## ON LINE SCHEDULING

This page provides a full, interactive program guide. Selecting a date and time will show you a complete grid guide. Or, you can search by program title. You can select individual programs to see details about the show or schedule them to record on your FUSION system while you are away. On Line Scheduling uses real-time conflict resolution, so you will know immediately if there are any problems recording your program.
