Bottle Babé in Shower Mode

Bottle Babé in Gas Cooker Mode

Kariba Combo – **Bottle Babé**

The Kariba Combo – **Bottle Babé** is a unique, "all in one" ultra compact and light weight camping appliance, designed for user friendly and practical outdoor use. This model screws directly onto a standard South African camping gas bottle. It is uncluttered and sets up in a few seconds. Although **Bottle Babé** is tiny, it features a combination of a HOT water camp shower/geyser which is removable, to allow a powerful gas cooker facility that boils a liter of water in less than 4 minutes. A "push button" Italian made "Pizo" manual flame ignition system is fitted for reliability in remote camping areas. This user friendly appliance is set up in a few seconds, and rated at a medium duty cycle, to deliver up to five consecutive showers with a short break in between showers, and cooking three family meals per day. The **Bottle Babé** is best suited to small families and groups of up to 5 people. The maximum recommended cooking utensil size is 2 liters, and the minimum gas cylinder size is a 3 Kg. (South Africa No. 7 gas bottle as seen on the photographs above). Over 300 appliances sold over the past three years.

Frequently asked questions & answers:

- Does it feature an automatic shut off system ➡ **Bottle Babé** has manual control for reliability.
- Does it feature an automatic ignition system ➡ **Bottle Babé** has a "Pizo" manual ignition
