Factory data reset

If this tablet is infected, or third party software installed to run in this tablet is corrupted, remove the third party software. If the problem persists, restore to tablet default status and factory settings.

* Please **NOTE** that Factory data reset will erase all data from your tablet's internal storage, including all personal accounts; system and Apps data and settings; and downloaded Apps etc.

Select "Factory data reset" in "Settings" - "Backup & reset", confirm to remove all the data.

Upgrade Tablet Driver

The firmware is a built-in program, by which you can run various hardware functions. By upgrading the firmware, you can improve or enhance the performance and functions of the tablet. No upgrading the firmware will not affect the normal operation of the tablet itself.

The upgrading of firmware may lead to the unit unable to work properly due to error in operation. Please read the instructions carefully before upgrading:

1. Please make sure that tablet is upgrading at more than 60% of the battery power level to avoid upgrade failure.
2. During the upgrade process, do not reset or shutdown the tablet to avoid upgrade failure.
3. Upon the firmware upgrade, all data stored in the tablet will be deleted. So before the firmware upgrade, you must backup your data.
5. The machine firmware does not apply to other types of products, resulting from the negative consequences; the company does not undertake any related responsibility.
