

Protect your belongings while secretly spying on your home or office from anywhere in the world by receiving MMS messages when the motion detection detects an intruder or by sending an SMS message to the GSM spy camera. The security spy camera will then take a series of snapshots that will be sent to your mobile phone via MMS messaging.

No one will be able to fool the brilliantly constructed **GSM Security Spy Camera** that comes with 12 onboard LED lights, night vision sensor, and motion detection sensor. The **GSM Remote Security Camera with Nightvision** is able to cover a wide viewing area of 70 degrees, and capture a clear image of up to 8 meters distance in nightvision mode.

The MMS function within this GSM remote security camera is not limited to motion detection activation, you can also send an SMS message command to the SIM card number within the GSM remote security camera, and it will then reply directly to your mobile phone, sending you a series of MMS images.

This GSM security remote camera is made up of strong molded ABS plastic, high tech internal components, 12 LED's with an (IR) infrared sensor, a motion detection sensor along with onboard MIC. With its practical functions, fashionable appearance, this is the perfect security option for your security needs.

Manufacturers Specification

§ Main Function: GSM Remote Security Camera with Nightvision - Dual Band

- § Built Material: ABS
- § Color: Black
- § Lens: CMOS, 0.3MP
- § Power Adapter: Input AC 100V-240V /50-60Hz Output DC 5.5V /2A
- § Working Temperature: -10 to +45 Degrees Celsius
- § Storage Temperature: -20 to +60 Degrees Celsius
- § Relative Working Humidity: 10-90%,without condensation
- § Frequency: 900/1800MHz (Dual Band)
- § Communication Protocols (including data operation): GSM PHASE 2/2+
- § Wireless Sensor Receiving Code: ASK
- § Wireless Sensor Receiving Band: 433MHz / 315MHz
- § Effective Distant of the Remote Control: 20 Meters
- § Image Format: JPEG
- § Image Resolution: 160 x 128, QVGA 320 x 240, VGA640 x 480
- § Camera Pixel: 0.3 MP
- § Camera Capture Angel: 70 degree
- § Capturing Distance at Night: Up to 8 meters
- § Lithium Battery: 1700mAh
- § Battery Standby Time: 19 to 35 hours (Affected By Network)
- § Dimensions: L:125 x W:85 x D:35 (mm)

#### **Product Notes**

- § Integrated (IR) body detector - not Limited to Humans :)
- § Real-time audio - call the security camera SIM card number to listen in to surrounding voices
- § Remote control - control & configure the camera with SMS command from your mobile phone.
- § Send images to E-Mail - the security spy camera can send MMS images to a pre-set E-mail address.
- § Built-in lithium rechargeable battery - ensuring continuous operation in case of external power failure.

#### **Package Contents for Model - CVPU-DC24**

- § Dual Band GSM Security Camera with Night vision
- § Power Adapter (100-240v)
- § Detailed Instruction User Manual - English
- § x 2 wireless keychain Remote Control

#### FAQ - Frequently Asked Questions

- § **Does the Nightvision function activate automatically when lighting conditions are dark?**  
No, the nightvision can only be activated with an SMS command so as to save battery power.
- § **Can I use this camera as a webcam as well?**  
This nightvision GSM remote security camera is not designed to be used as a webcam
- § **IS this CCTV GSM remoter security camera provided with a SIM card?**  
This GSM security camera is not provided with a SIM card, you will need to purchase a Dual Band SIM card at your local SIM card provider store.
