This document is a general reference guide for navigation and use of on-line data portals developed by EcoLayers, Inc. While it is not a comprehensive manual for the use of the features available on the all portal levels offered, this manual should provide sufficient instruction for most users to successfully navigate, sort, query and export data from a portal. While this User Manual is edited for each customer based upon the features and capabilities provided for their portal, there may appear instruction or references to features and capabilities not available for that particular user's portal.

Accessing the Portal

Recommended Browsers

For best performance with EcoLayer's data portals, it is suggested that Google Chrome or Mozilla Firefox be used as the internet browser.

Enable Pop-ups

Pop-ups must be enabled for use this Portal. Refer to your browser Help files on how to allow all pop-ups for this site: www.ca-watersheds.org.

Portal Access

The Portal is accessed by typing [http:// 75.101.159.147/xxxxxxx](http://75.101.159.147/xxxxxxx) in your browser's search bar. There are three modes for using most EcoLayer's portals. Portal navigation in this guide is explained in the context of these three modes. The modes are:

1. Public (non-registered user) can access data and run basic queries and reports. *Click "Continue as unregistered user". A public user can also register on this page; see yellow arrow.*
2. Registered users have access to multiple data layers at the same time and run advanced queries and reports. *Type xxxxxxxxxxxx for the User Name and Password. See yellow arrow.*
3. Administrative mode to access a portal back end (not be available for all portal levels). This user may add, edit or delete data, programs and features. This user can also set sharing permissions and approve uploads from other users.

EcoLayers 2.0: Integrating Water Quality, Water Resources and Land Use

Water Flows. Data Doesn't.

EcoLayers 2.0 is an enterprise-class hosted software services platform for content aggregation, analysis and integration of a stakeholder's activities across organizations, watersheds, jurisdictions and water bodies over any geographic scale.

EcoLayers 2.0 will help its users make better decisions and bridge the disconnects between:

- Departmental and information "silos" for planning, monitoring, operations and compliance
- A permittee and the multiple regulatory agencies and consultants it must interface with regularly
- Inter-dependent stakeholders who wish to pursue collaborative, integrated strategies to better meet their own goals and shared goals (e.g., TMDLs, shared water resources)
- Regulatory agencies, wastewater facilities, municipalities, watershed councils or NGOs and their served constituencies, particularly the public

The benefits are lower costs, lower regulatory risks, improved security and sustainable outcomes.

For more information, please contact:

Navigating the Left, Right, and Center Panes of the Portal

The Portal has three main information panes: left pane for interaction with spatial and data layers, center pane for interactions with the map, and right pane to view reports and support special user interactions. Pane widths can be adjusted by placing the cursor on the border between two panes. When all panes are maximized, some information may be wrapped in the adjacent pane or hidden from view. The yellow arrows on the screen shot below show the locations of buttons and scroll bars that allow the user to maximize, minimize, or scroll through information in each pane.

Key Features

The main features of the Portal are numbered in the figure below and correspond to the feature descriptions that follow.

1. Base layers. These layers are static.
2. Information layers specific to this Portal. Queries and data reports are linked to these layers
3. Tool bar. Starting on the left, the tool bar icons and their functions are:
 - a. Magnifying glass: Opens the query box to refine data displayed for selected layer
 - b. Two arrows: Reset or clear the selected layers from the map
 - c. Shaded polygon: draws point, polyline or polygon around area of interest and selects data features within.
 - d. Paper and magnifying glass: performs analysis on selected polygon
 - e. Recycling basket: Users can add a site manually
 - f. Hand: Clears selected area for analysis
 - g. Blue globe: exports data features as KMZ file. Links to portal data are maintained in this file type.

- h. Printer: Sends map image to printer.
 - i. Impacted Area Line: Allows user to draw line along impacted area and add this as an impacted region.
 - j. Impacted Area Poly: Allows user to draw line around impacted area and add this as an impacted region.
 - k. Draw NGO area: Allows user to draw the geographical area of interest for a Stewardship Organization.
4. Main Google map
 5. User-selected spatial features (sites) for the active layers drawn on Google Map
 6. Links to site level item reports, charts, and other user action. See #10 "Item Report."
 7. Return to Home Page. This returns the right pane to the Home Page where a user can add a site under "Mark Watershed Location On Map"
 8. Right pane that displays address box for adding new sites or data and information from selected sites.
 9. Preview. Opens a preview pane below the Google map frame consisting of the list of spatial features displayed on the map for the active layer.
 10. Item Report Links. Shows links to data in selected layer in format of tabular reports, charts, and other user interactions in the right pane.
 - a. When a particular record or site is clicked on in the map for a data layer, a conversation bubble will appear with links to "View Reports and Charts". Clicking this will take the user to the Item Report outputs for that particular site.
 - b. If the Item Report link is clicked below the map, the right pane will display links to data for all records or sites in the selected layer.
 11. Site information window that appears when a site icon or a spatial feature is left clicked.
 12. Site locator icon. The colored icons in the Preview Window, when left clicked, will open a site information window for the selected feature in the active layer.
 13. Select Partner Organization or Program. This is a drop down list of Partners or other Programs for the portal. When a Partner or Program is selected from the list, a new web page opens to the Partner's site or Program and the Partner's data folder in the left pane becomes active.

The Portal Landing page

After logging into the portal or accessing as a non-registered user, the user arrives at the portal landing page, similar to the screen below.

Global Ocean Alert System

Layers: GOAS, GOAS Public Sites, River Steward

Feature Count: 4/4

Selected Partner: [Dropdown]

Home Page

Mark watershed project location on map

In the search box below enter street address or geographic name followed by city and/or state (e.g., Big Bear Lake, Big Bear, CA) for the location of **your watershed project**, not your personal or organization's location. Then click the GO! button.

[Examples](#)

Clicking "Preview" to the right will display all records of the active layer

Enter location to place site on map and click "Go"

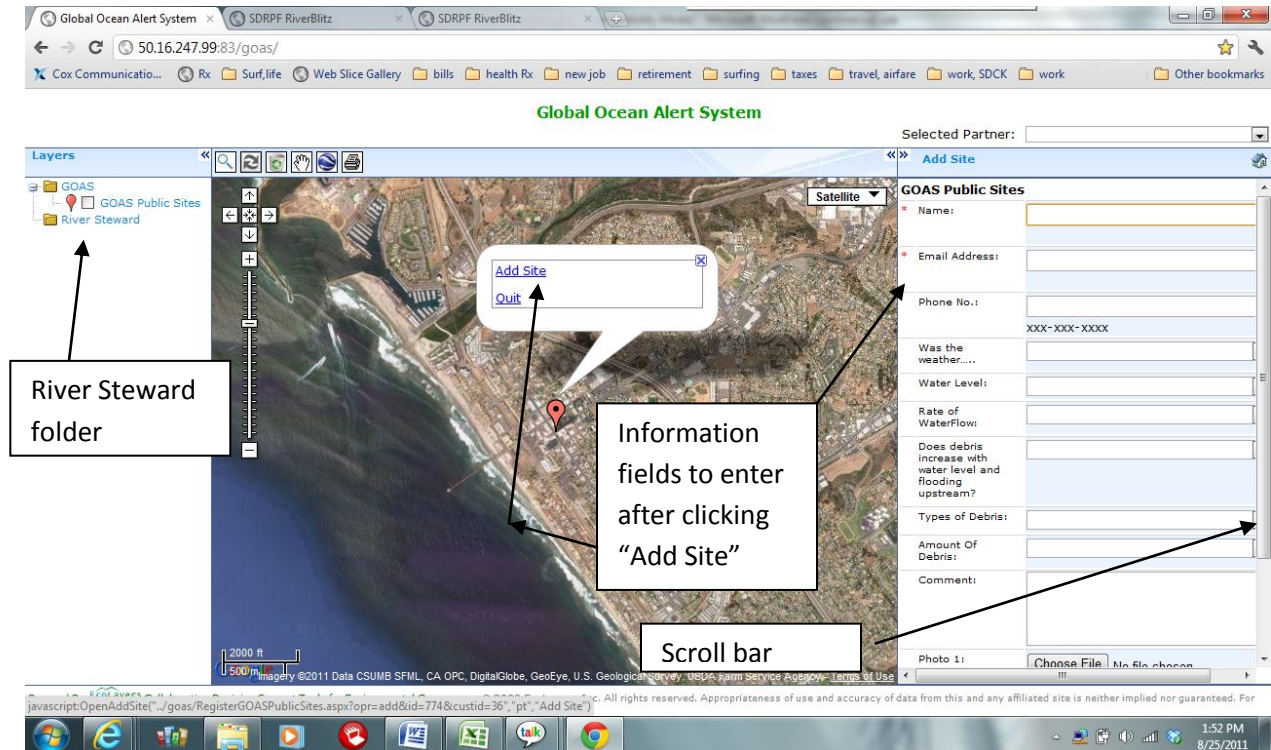

Site ID	Name	Weather	Water Level	Types Of Debris
000001	Peter Parker	Cloudy	Medium High	Other plastic
000002	Joe Sacramento	Dry	Medium High	Wrappers
000003	Joe Klamath	Cloudy	Medium High	Bags
000004	Joe Namada	Light rain within the last 24 h...	Low	Other plastic

Powered By EcoLayers Collaborative Decision Support Tools for Environmental Governance. © 2009 EcoLayers, Inc. All rights reserved. Appropriateness of use and accuracy of data from this and any affiliated site is neither implied nor guaranteed. For best performance use Firefox 3.0+. Also compatible with IE6+.

1:45 PM 8/25/2011

On portals with this feature, the user defines their area of geographical interest by typing an address in the right window pane and clicks "Go". The map will zoom into the location entered. For portals without this feature on the landing page, the portal will open the geographical area of interest for that particular portal.

Adding a New Site

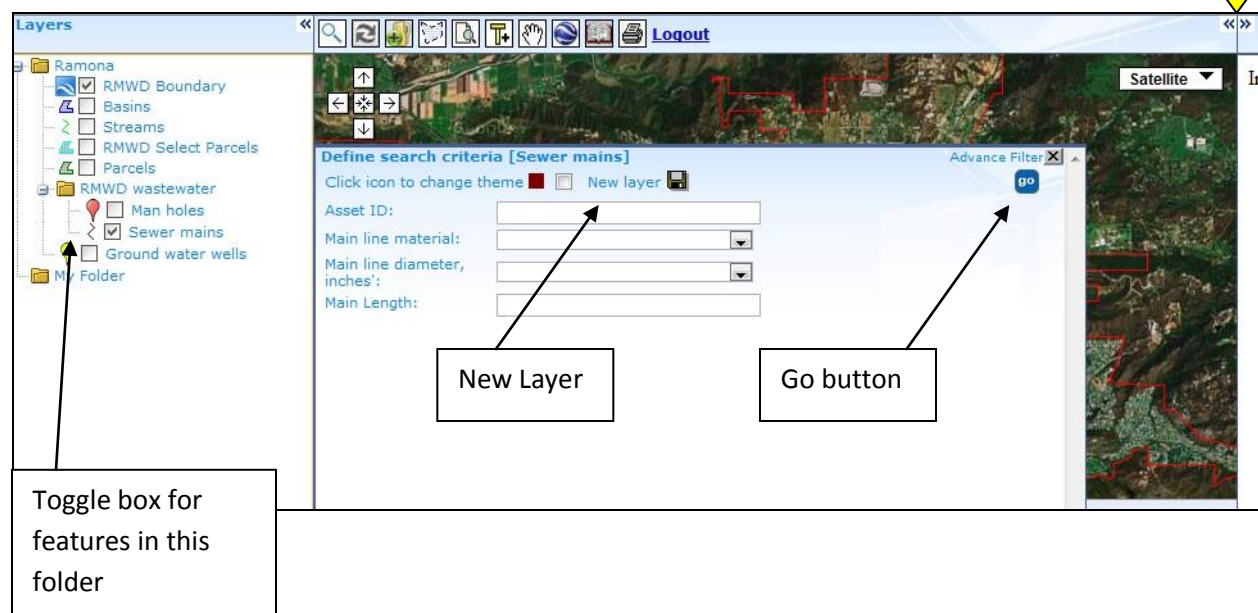

On portals with this feature, after the user clicks “Go” next to the address entered, the screen above will appear.

A conversation bubble will appear above the location icon. Click “Add Site” and the information fields will appear in the right pane. The user then enters all information for the new site as well as uploads photos. Use the scroll bar on the right pull the pane down to click Save. This site will appear in the appropriate folder in the left window pane after the portal administrator approves the site.

Defining Filter Criteria for Selected Features

When a user toggles the box for the data folder from the left window pane, the search criteria box opens for that Feature.

- Using this function, the user can filter the data by Date, Analyte, Results or other parameters.
- After selecting the filter criteria for the parameters of interest, click the blue 'go' button on the top-right of the search criteria box.
- To see all data for the Feature, click 'go' without selecting any filter criteria. If the 'go' button not visible, minimize the right window pane (see yellow arrow).

Creating New Layers Using the Query Box

If the "New Layer" option is selected, the results of your query will be shown as a new layer. New layers created this way may be deleted later.

- To enter another query, select (toggle) the main or sub-layer and click the first tool bar above the map.
- Sub-layers may be added only to the main layer.

Viewing Site Details and Item Reports for Selected Features

After selecting the Feature, with or without filter criteria, the icons will appear on the map.

- Click on Preview to see all records for the Feature
- To find a particular location:
 - Select the desired layer in the 'Select Layer' drop down list below the map.
 - Click on "Site Locate on Map" icon in the Preview window for a conversation bubble to point to the location of the record
 - Click directly on the icon on the map for links to Site Details
- Click Item Report below the map or Site Detail in the conversation bubble and the right pane will show available data output formats for a location.
 - Click on the links in the conversation bubble to view data and reports for that a particular location/ record.
 - Click on Item Report button below the map on the right side to view data and reports for all records in the selected layer.

The screenshot shows the Global Ocean Alert System (GOAS) web application. The browser address bar shows the URL 50.16.247.99:83/goas/. The application has a top navigation bar with the title "Global Ocean Alert System" and a "Selected Partner:" dropdown. Below this is a "Layers" panel on the left with a tree view showing "GOAS", "GOAS Public Sites", "River Steward", "River Blitz Survey...", "Identified", and "Removed". The main map area displays a satellite view of a coastal region with a red boundary. A callout bubble over the map shows details for "Site ID: RB-T0297", "Location Name: 55 Gallon Barrel", and "Trash Type: Dumping", with links for "View Site Detail", "View Site Photos", and "Add to selection". Below the map is a "Select Layer" dropdown set to "River Blitz Survey... Trash Tyr" and a table with 115 rows. The table has columns for "Site ID", "Location Name", and "Trash Type". The right-hand pane shows "Item Report" and "RiverBlitz Trash Site Detail" options. Callout boxes provide instructions: "Use 'Select Layer' to choose which layer to show records for", "Site Locate on Map and Preview pane", "Site Detail and Item Report options", and "Preview and Item Report buttons".

Use 'Select Layer' to choose which layer to show records for

Site Locate on Map and Preview pane

Site Detail and Item Report options

Preview and Item Report buttons

Site ID	Location Name	Trash Type
RB-T0167	Dumping	Dumping
RB-T0208	Blanket	Dumping
RB-T0219	Green Car Hood	Dumping
RB-T0226	Wheelchair and Grill	Dumping

Viewing Data in Item Reports and Charts

A user can obtain data and other information such as documents at the layer level (all selected sites for that layer), or by individual site or spatial feature through any of the following options.

- Click the spatial feature on the map or the icon in the Preview Window. A site information window for the selected site will open. Click the link in the site information window to view reports and charts *for the selected site only*. Report and chart options appear on the right.
- Click the “Item Report” link on the Preview Window to view reports and charts *for all selected sites for that layer*.
- In addition to reports for the queried selection (through the Query Box), individual sites may be selected for a composite report or chart by clicking the “Add to Selection” link in the site information window. This selection may be removed by clicking “Remove Selection” in the Preview Window.

After clicking “View Reports and Charts” from the site information window, or “Item Report” from the Preview Window, the right pane will show the list of data display and report options. Depending upon the layer and portal configuration, the user can choose one of the following for data displays. The selection will be shown in blue highlight:

1. Column (tabular).
2. Chart (time series)
3. Histogram (frequency of occurrence)

Running Queries on Item Reports

For each data display (Column, Chart, or Histogram), the user selects the desired data report. The availability of different data reports depends upon the data associated with the layers for each individual portal.

- Some report/ chart links may open additional user filter options, e.g., date range, analyte.
- Click “Go!” after selecting the report/chart filters.

Data and charts meeting the report/ chart filter conditions are displayed for sites or spatial features shown on the map

Querying Column (tabular) Reports

Column (tabular) reports may be queried as described below.

The screenshot shows the San Diego Regional Water Quality Data Portal. At the top, there's a navigation bar with links like 'Download Report' and '[Number of Rows: 56]'. Below this is a search bar with dropdown menus for 'Station ID', 'Sample Type', 'Sample Date', and 'Sample Time', followed by 'Anc', 'Add', and 'Go' buttons. The main part of the page is a table with the following columns: Station ID, Sample Type, Sample Date, Sample Time, Analyte, Result, Unit, and Reporting Limit. The table contains data for various samples, including SDR-05-2009 and SDR-06-2008. A text box overlay with an orange arrow points to the search bar, stating 'Define criteria or filter data using drop down boxes'. The bottom of the page has a footer with a disclaimer and a taskbar showing the date as 3/16/2011.

Station ID	Sample Type	Sample Date	Sample Time	Analyte	Result	Unit	Reporting Limit
SDR-05-2009	ms4	2010		Total Suspended Solids	21	mg/L	20
SDR-05-2009	ms4	2010		Total Phosphorus	0.18	mg/L	0.05
SDR-05-2009	ms4	2010		Total Kjeldahl Nitrogen	0.5	mg/L	0.5
SDR-05-2009	ms4	2010		Total Nitrogen (calculated)	2.4	mg/L	0.5
SDR-05-2009	ms4	2010		Total Coliform	7000	MPN/100 mL	
SDR-05-2009	ms4	2010		Total Dissolved Solids	3472	mg/L	
SDR-05-2009	ms4	2010		Temperature	23.1	Celcius	
SDR-05-2009	ms4	2010		Nitrate as N	1.92	mg/L	0.5
SDR-05-2009	ms4_random_dry_2009	06/03/2010		Nitrite as N	0.025	mg/L	0.05
SDR-05-2009	ms4				5000	MPN/100 mL	
SDR-05-2009	ms4				40	MPN/100 mL	
SDR-05-2009	ms4				4960	µS/cm	
SDR-05-2009	ms4				7.7	pH Units	
SDR-05-2009	ms4			as N	1.93	mg/L	0.5
SDR-05-2009	ms4			as N	1.22	mg/L	0.1
SDR-06-2008	ms4_random_dry_2008	06/08/2009		pH	7.77	pH Units	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Conductivity	3040	µS/cm	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Fecal Coliform	5000	MPN/100 mL	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Enterococcus	3500	MPN/100 mL	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Nitrite as N	0.0035	mg/L	0.05
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Nitrate as N	1.19	mg/L	0.1
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Temperature	20.7	Celcius	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Total Dissolved Solids	2128	mg/L	
SDR-06-2008	ms4_random_dry_2008	06/08/2009		Total Coliform	7000	MPN/100 mL	

Select items from the drop down boxes above the data table. Starting on the left, define the query by using these drop-down selections:

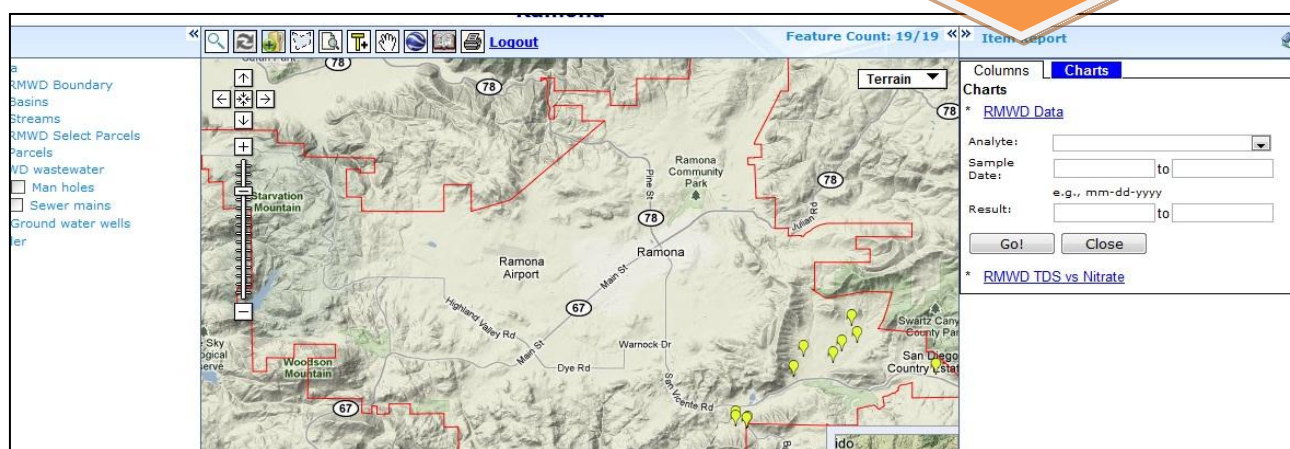

- Column Name
 - Logical operator (=, Like, Contains, <, >, etc.)
 - Value from the data table
 - And/ Or (to define a complex query).
- If the tabular report has many rows, it may take a few seconds for the logical operator drop-down to appear.
 - Click on Go, look for the running panther, and wait for results to appear.
 - The previous query may be deleted or additional filters added by using the drop-down boxes above the table.
 - Clicking the Download Report link above the table will export the data into Excel as a .csv file. If your browser or PC security settings prevent this from happening, then right-click the mouse button on the Download Report link and select, "Save File As" to manually save the table as a file into your selected folder.

Querying Chart or Histogram Reports

For illustrative purposes, the layout of the Chart interface is shown below with four user filters for the Outfall Dry Weather data set:

- i. Program
- ii. Date range
- iii. Analyte
- iv. Result

For Chart or Histogram

Export to Google Earth

Important: This feature requires Google Earth be installed on your computer. Visit Google's website for more information.

- The custom map view that you created above may be exported to Google Earth. Click the Google Earth icon in the tool bar above the map.
- Click the new icon that appears in the tool bar menu next to the Google Earth icon to download the KMZ file or view your custom map directly in Google Earth. This may take several seconds.
- When the KMZ file is opened in Google Earth, reports and charts for individual sites may be viewed by clicking the individual sites or spatial features. Data for a collection of sites cannot be viewed in Google Earth.
- You can now add your own layers (in KMZ format), save the file on your local drive or email it to others!

Other

Google Map Views

Select different map views from the drop down on Google Map. To view in Google Earth, you must first download the plug-in from the Google site.

Disclaimers

- The water quality data is being provided as a public service
- Accuracy or completeness of any data from this or an affiliated site is neither implied nor guaranteed
- Appropriateness of use of any features or data from this or affiliated site is neither suggested nor implied
- If and how the Portal and its data are used will be determined solely by you and you will be solely responsible for the outcomes resulting from the use of the Portal and its data such as any loss or damages, consequential or otherwise, including but not limited to time, money, or goodwill, and you further agree to indemnify, defend, and hold harmless all other parties.
- Your use of the Portal does not grant you any ownership, rights or interests in the data, software or any other aspect of the Portal
- Availability and performance of the Portal and its affiliated sites, their service features and their content cannot be guaranteed
- Any information you provide through the Portal or in connection with its use will be treated as public information and may be made public.

Note: If your session is idle for too long, you will get an “Exception” error. Click the “Clear Map” tool bar to refresh the map.

Portal Interaction for Administrative User

For administrative issues such as data management and approval of publicly submitted sites, log-in at <http://75.101.159.147> with the User ID and password provided for your portal. Portal administration is a feature available on higher level portals.
