iWatchLife Camera User Manual

iWatchLife Camera User Manual

User Manual: (December 2, 2009)

This user guide has two main parts, IWatchLIfe Camera Quick Start Guide and iWatchLife Camera Configuration. The first section is deliberately short for the customer to get set up very easily and quickly. It will be placed in the packing box with the camera. The second part offers details of the various menu tabs on the web site that a user can explore after gaining a bit of confidence and curiosity. The entire manual will be placed as a free customer accessible PDF document on the web site.

Quick Start Guide

Welcome to iWatchLife!

Thank you for joining the iWatchLife family. The following instructions are designed to get you started easily. We look forward to helping you set up your camera quickly, either wirelessly or wired.

Recommended Browsers: Mozilla Firefox 2.0 or higher, Internet Explorer, Safari, or Netscape.
Note: We currently do not support Google Chrome.

Recommended Routers: Linksys, D-Link, Netgear, TP-Link, or Trendnet.

Step 1: Click here to create your user name and password.

Step 2: Account Creation

1.   Wait for your verification email to arrive.
2.   Click on the link, in the email, that says: "iWatchLife Registration Service".
3.   Follow the prompts (click on Login)

If you have any issues or questions during this process, please contact iWatchLife Support at or phone 1-877-217-7666. Support hours: 9:00am to 7:00pm EST Monday to Friday.

First Time Camera Connection:

1.   After completing the above steps choose a room to locate your camera.
2.   Plug the power supply into the camera.
3.   Plug an Ethernet network cable into your network router and the camera. In most simple home networks your router will be positioned close to your Internet modem. It will probably have 4 Ethernet ports on the back, one of which will accept your camera's network cable.
4.   Wait for the camera's status lights on the back to turn steady green.
5.   Now Open www.iWatchLIfe.com, Log In and see if Live View is providing your camera's expected image of your chosen location.

Elton's notes to self:
1.   *Missing Steps here need to be added and reviewed?*
2.   *Make notes when I do the next 2 cameras from Tom tomorrow.*

Resetting a Camera

1. Press and hold the reset button on the back during this entire process.
2. Press the reset button on the back - hold it in.
3. Disconnect the power supply from the camera's back.
4. Wait 5 seconds.
5. Re-Connect the power supply to the camera.
6. Wait for the indicator ring around the camera lens to turn yellow.
7. Release the reset button you have been holding on the camera's back.
8. Wait 5 to 10 minutes before you go through auto config at **www.iwatchlife.com/welcome**.

iWatchLIfe Camera Quick Start Guide

My Dashboard Functions:
1. Check to see what has been seen by your camera lately.
2. Your camera(s) are listed here along with their online/offline status.
3. Click here to purchase more cameras for other areas you want to monitor in your home or business.

iWatchLife Camera Configuration

Live View Screen Features:

1. The current camera's name showing in the main view (2). You did name it back in the **Cameras** tab didn't you?
2. The current camera's active view.
3. Selectable thumbnails to change the currently viewed camera image.
4. Press **Record** if you want to record your brother-in-law embarassing himself!
5. Press **Stop** when he has gone home!
6. Select to see one, or more than one, camera image at a time.
7. Choose which of your cameras is the default image to view when you first open this screen.

> *Elton's notes to self:*
> *1. Redo this screen capture with 3 cameras when Tom Leger brings 2 more.*
> *2. Use everyday names like Front Entry, Office, Patio Door, etc.*

Event View Screen settings/features:
1. View by day or month.
2. Advanced view is only current default.
3. Left Click your mouse on the dates with green event indicators to find out what happened.
4. Indicator icons for selected date.

Elton's notes to self:
1. *I don't really know what this is for?*
2. *Ask Tom what this will do for the customer.*

Locations Screen purpose:
1.

iWatchLife.

iWatchLife Camera Management settings

1. Enter a **Name** for the area you are monitoring with your camera.
2. Add a **Description** for this camera monitored area if necessary.
3. Optionally type in the camera **Manufacturer**'s name.
4. Check **Monitor Events** on ☑, if not already turned on. Turn off to stop e-mail notices.
5. **Alert Configurations** need to be set for Foreground Motion and Recorded Video on most cameras. Other settings can be turned on at user's discretion. Don't flood your inbox!!
6. Enter the exact **E-mail** addresses that want to be notified of Alerts.
7. Don't forget to left click on "**Save Camera**" to keep your camera's changes/settings.

Profile Screen data requirements:

1. Your name and e-mail for communications from iWatchLife. We don't sell your information to Internet marketers.
2. Your billing address information.
3. Your password to log on to view your cameras. Don't forget your password or you can't log on to see your camera's exciting story!
4. Don't forget to left click your mouse on the "**Save Profile**" button when you finish entering your data or changes.

SupportScreen Information:
1. To purchase more cameras, click on **Buy iWatchLife**.
2. Phone number for Customer Service.
3. General phone calls to iWatchLife.
4. Other support resources on the Internet.

Frequently Asked Questions

1. How do I stop all the Alerts to my e-mail?
2. How do I change the e-mail it sends to?
3. How do I reduce the number of Alerts?
4. How do I name the cameras?
5. How do I reset the camera remotely if I am away?
