

IriTrack is an embarked system of safety... associating mainly the GPS and Phonie technologies by connection satellite. Without substituting itself for the distress beacon, he allows to improve considerably:

- The communication between the competitors and the organization
- The management of intervention of the help to the competitors

MANUAL FUNCTION

3 scenarios can appear at you :

YOU ASK FOR MEDICAL HELP – IN CASE OF EMERGENCY

= > alert of a grave problem, eg : accident, aggression

- Press on the RED button. This action will send a message of ALARM to the PC Course at the same time as your GPS position. In answer to this alarm, the PC Course will contact at once pilot/s inside the vehicle thanks to the phonie function free hands integrated into IriTrack.

" Answer, as possible, the questions which will be put to you - medical help is going to be you sent "

- If in 2 in 3 minutes which follow the sending of the message of ALARM to the PC Course you were not contacted press on the BLUE button. A pre-scheduled phone number will put you directly in touch with the PC Course.

YOU INFORM ABOUT A PROBLEMATIC SITUATION

= > show of a fact of running no gravity nor urgency in the human, but significant enough plan so that you considered above competition, eg : irreparable mechanical breakage, desolation ...

- Press on The BLUE button. A pre-scheduled phone number will put in you directly in touch with the PC COURSE thanks to the phonie function free hands integrated into IriTrack.

" Explain clearly your problem - If need was, an assistance will be sent to you "

YOU WARN OF A CONCERN WITHOUT CONSEQUENCE

= > to warn of a fact of running without any gravity nor urgency in the human but significant enough plan to provoke a prolonged stop of the vehicle is superior to 5 minutes, eg : repair, change of wheel, pose...

- Press on The GREEN button before going out of the vehicle. This action will send a message of ALERT " stop without gravity " to the PC Course at the same time as your GPS position.

" The PC Course will watch your good progress to come "

AUTOMATIC FUNCTION

YOU HAVE JUST HAD AN ACCIDENT ... THE PC COURSE IS INFORMED

= > case of shock violating causing a rough deceleration or up and down (*), an automatic alarm of demand of first aid is passed on to the PC Course at the same time as your GPS position and it without intervention of your part.

- If in 2 in 3 minutes which follow the accident you were not contacted press on the RED button such as indicated previously in case of "DEMAND OF FIRST AID".

(*) excepted in case of destruction of IriTrack material or the 2 antenna before sending of the alarm or the position of the vehicle on the roof.

MATTERING NAMELY

= > the fact of using IriTrack doesn't activate any out of race sanction neither penalty.

= > as possible please check in the event of an accident and particularly in case of up and down of the vehicle that 2 antenna GPS and Phone satellite are well turned to the sky and always in connection with the IriTrack.

**ATTENTION the distress beacon is and stays the absolute means of safety.
In case of emergency you have to activate it.**
