Check the product and accessories as below to see if they are complete,
otherwise please contact your local supplier.

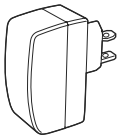

Camera body

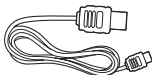

Wall mount (Optional)

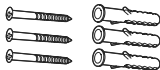

Magnetic base

Charger

Power cable

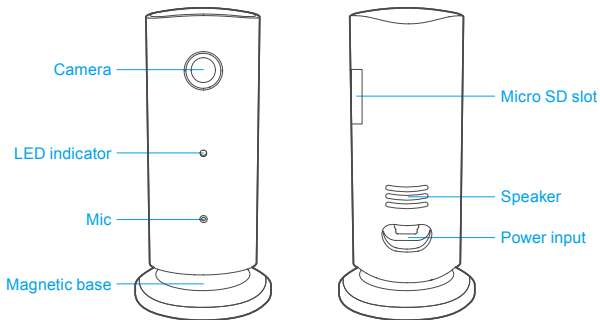

Setscrew×3 (Optional)
Screw×3 (Optional)

2 Specifications

Type	JH08
CPU	32bit RISC SoC Processor
Image sensor	1/4"Color CMOS Sensor
Image resolution	HD 720P(1280*720), WVGA(854*480)
Camera lens	Aperture F2.8, 127° wide angle
Video compression format	H.264
Video bitrate	Dynamic VBR 32Kbps-2Mbps self-adaption
FPS	Max 30fps
Audio working mode	Two-way voice intercom, one-way monitor
Audio format	ADPCM (16bit/8KHz)
Network interface	WiFi (IEEE802.11b/g/n)
Connection way	Wireless connect to AP, AP to P2P directly
Infrared night vision	Auto Infrared LED(within 10m)

Memory	TF Card (Max 32G) local storage and cloud storage server
Video format	AVI
Working status indicator	Bi-color LED Indicator Light
Photo capture	Support
Motion detection alarm	Support alarm message pushing
Mobile terminal	Support iOS/Android System Smart phone
Max terminal number	10
Working environment	-30°C~60°C, Humidity<95%
Upgrade way	Support Firmware OTA Remote Upgrade
Security setting	128bit AES Password
Power consumption	<5W
Power input	5V/1A, USB Interface
Dimensions	50(L)×50(W)×98(H)mm (with base) 40(L)×36(W)×89(H)mm (without base)

3 Structure

3.1 LED indicator status

Status	Meaning
Blue constant on	AP setting mode
Blue flashing slow	WIFI connection normal
Red flashing slow one time in interval	Recording
Red flashing fast two time in interval	User viewing online
Red flashing fast constant	Upgrading

4 Operation

4.1 Connect with power

1. Connect with the power cable and charger
2. The Blue LED indicator will be flashing slowly if the device is connected successfully with the WIFI network. If the Blue LED is constant on, it means the WIFI network is not set correctly or there is no WIFI, and it will enter into AP setting mode.

4.2 Fast setting

4.2.1 APP

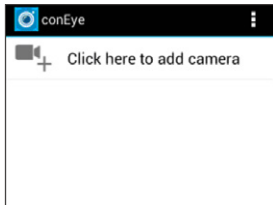

Please download APP “Jimilive” from APP store or at www.jimilab.com.

4.2.2 WIFI setting

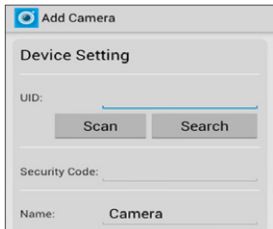

1. When the device is powered and the blue LED is constant on, find the AP hotspot "JH008_"+"first 6 digit of the device UUID" in WLAN settings. Click to connect and the default password is "88888888".

2. After the connection is made successful, start the APP on your phone, then click "add camera".

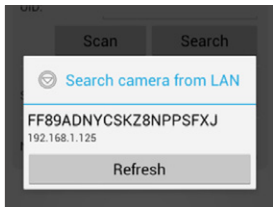

3. Click "Search" button.

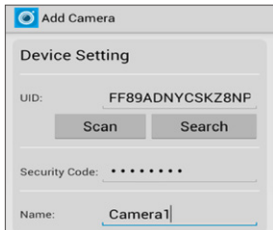

The screenshot shows a window titled "Add Camera" with a blue eye icon. Below the title bar is a section labeled "Device Setting". It contains three input fields: "UID:" with a blue underline, "Security Code:" with a grey underline, and "Name:" with the text "Camera" entered. Below the "UID:" field are two buttons: "Scan" and "Search".

4. Click the device "UUID" from search result, or type in the "UUID" manually.

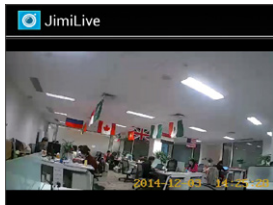

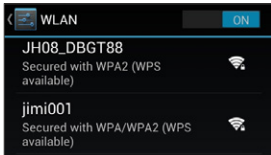

The screenshot shows a dark overlay with a search results card. The card has a blue header with a dropdown icon and the text "Search camera from LAN". Below the header, the device's UUID "FF89ADNYCSKZ8NPPSFXJ" and its IP address "192.168.1.125" are displayed. At the bottom of the card is a grey button labeled "Refresh".

5. Type in the default password “88888888”, name the device, then click “OK”.

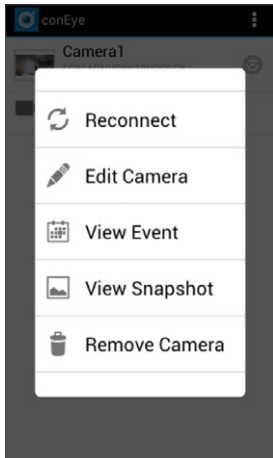

The screenshot shows a web interface for adding a camera. At the top is a blue camera icon and the text 'Add Camera'. Below this is a section titled 'Device Setting'. It contains a 'UID' field with the value 'FF89ADNYCSKZ8NP', two buttons labeled 'Scan' and 'Search', a 'Security Code' field with eight dots, and a 'Name' field with the value 'Camera1'.

6. Click the device and enter the monitoring screen in AP mode.

7. Click the  on the right to show the setting menu.

8. Click “Edit camera”, ➡ “Advanced” to show the setting.

12. DropBox upload verification: to activate the DropBox upload function for event recordings, you need to link your dropbox account with JimiLive.

13. Click “manage WIFI networks” to connect to a WIFI SSID, type in the password and click “OK”, the device will reboot and connect to this WIFI network. The connection is successful if the LED blue light is flashing slowly and the device is online in APP.

Beeper alarm description:

Beeper status	Meaning
Beep two times	Wifi setting success
Beep four times	Password wrong
Beep five times	Connection failure

14. After the Wi-Fi is connected successful, the device is ready for remote live-monitor, two-way talk, snapshot, video recording and alarm messages review, etc.

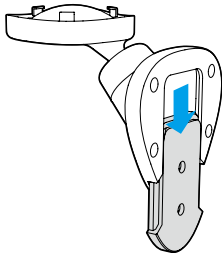

5 Installation

you can put the device on a flat surface with the magnetic base or install it on the wall or the ceiling. Details please check below:

-  **Notice:** a. Before installation, please make sure the device is close to the power socket.
b. Before secure the pin and the screw, please drill holes on flat and solid surface.

5.1 Wall mount installation

5.1.1 Remove the pin from wall mount

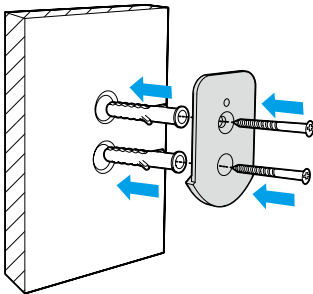

5.1.2 Drill holes

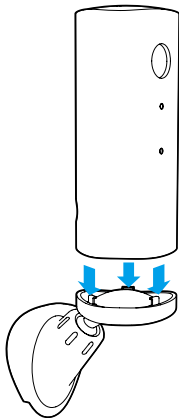

Drills holes on the wall according to the position of the pin holes.

5.1.3 Secure the pin to the wall

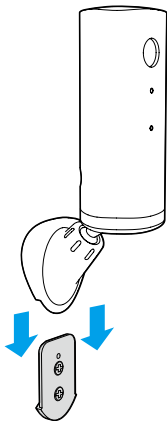

Place two setscrews into the holes, then secure the pin to the wall with the two screws.

5.1.4 Secure the device on the wall mount.

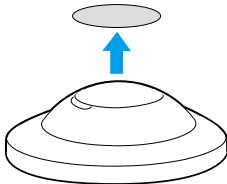

5.1.5 Secure the wall mount to the pin.

5.2 Ceiling installation

 **Notice:** Please set “Video flip” in the APP’s “Camera setting” if install on the ceiling, otherwise the image will be back side down.

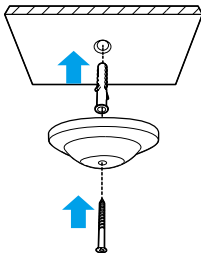

5.2.1 Use a slot type screwdriver to take out the top cover gently and reveal the screw hole.

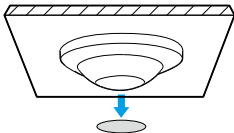

5.2.2 Drill holes on the ceiling according to position of the magnetic base.

5.2.3 Secure the magnetic base onto the ceiling

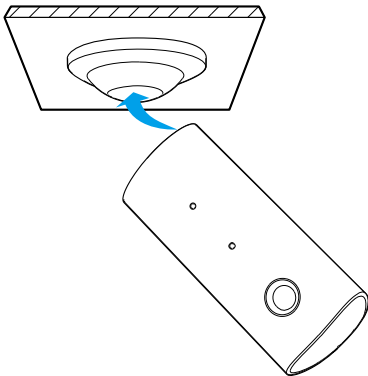

Use one setscrew and one screw to secure the magnetic base to the ceiling.

5.2.4 Press back the circle top cover.

5.2.5 Place the device onto the magnetic base, and then adjust the angle to a proper position.

6 Trouble shooting

During operating if encounter any problems, please read the following table, contact your local supplier if the problem remain unsolved.

Common errors	Possible Causes	Solutions
Connection failed	Device not in WIFI	Confirm the device is connected to WIFI successfully
	WIFI network error	Check WIFI status
	Phone network error	Make sure your phone can access internet
Cannot receive motion detect alarm messages	Motion detect not activated	Activate motion detect function
	Not login to APP	Make sure the APP is running or running in backstage
Micro SD error	No SD card	Insert SD card
	Micro SD card fail	Replace or format the card
Live view black screen or replay failure	Bad network connection of cellphone	Improve network condition
