LIGHT RESEARCH

### **EN - DISPOSAL OF THE DEVICE**

Dispose of the unit and used batteries in an environment friendly manner according to your country regulations.

### **FR - DÉCLASSER L'APPAREIL**

Débarrassez-vous de l'appareil et des piles usagées de manière écologique Conformément aux dispositions légales de votre pays.

### **NL - VERWIJDEREN VAN HET APPARAAT**

Verwijder het toestel en de gebruikte batterijen op een milieuvriendelijke manier conform de in uw land geldende voorschriften.

### **DU - ENTSORGUNG DES GERÄTS**

Entsorgen Sie das Gerät und die Batterien auf umweltfreundliche Art und Weise gemäß den Vorschriften Ihres Landes.

### **ES - DESHACERSE DEL APARATO**

Reciclar el aparato y pilas usadas de forma ecologica conforme a las disposiciones legales de su país.

### **PT - COMO DESFAZER-SE DA UNIDADE**

Tente reciclar a unidade e as pilhas usadas respeitando o ambiente e em conformidade com as normas vigentes no seu país.

# OPERATION MANUAL

Thank you for buying this Briteq® product. To take full advantage of all possibilities and for your own safety, please read these operating instructions very carefully before you start using this unit.

## FEATURES

This unit is radio-interference suppressed. This product meets the requirements of the current European and national guidelines. Conformity has been established and the relevant statements and documents have been deposited by the manufacturer. This device was designed to produce decorative effect lighting and is used in light show systems.

- Perfect for rental companies: this projector has BEAM + SPOT + WASH in 1 UNIT
- The OSRAM SIRIUS HRI 280 lamp (7800K), combined with Hi-Q optics, make it incredibly bright:
  - BEAM: 2,7° ~ 11°, max. 82.650 lux @ 20m
  - SPOT: 5° ~ 23°, max. 25.400 lux @ 10m
- The different effect wheels create dazzling effects:
  - 1 color wheel with 13 carefully selected colors, including CTO & CTB-filters + white
  - 1 gobo wheel with 14 static gobos + open
  - 1 gobo wheel with 9 easily replaceable rotating gobos (glass + metal, OD: 15.8mm / IM: 12.5mm)
  - **The 8 facet round + 6 facet linear prisms have separate rotation speed settings and can be mixed for stunning effects!**
  - FROST-effect (WASH effect)
  - Motorized ZOOM + FOCUS with calibrated DMX-values
  - Accurate Dimmer/shutter for linear dimming and variable strobe effects
- The 3-Phase MOONS' stepper motors assure very fast 540°/270° PAN/TILT movements with 8 or 16bit precision.
- Modular setup for easy servicing and cleaning.
- Optional wireless DMX-module available (W-DMX Sweden)
- 2.8" Color touch screen with automatic display rotation for easy and intuitive menu navigation
- 3 Different DMX channel modes (16ch, 24ch & 25ch) for maximum flexibility
- Easy firmware updates keep your machine up-to-date at all times (optional firmware updater needed)
- Remote lamp on/off control
- Neutrik 3pin & 5pin XLR® in/outputs for maximum flexibility in a professional environment
- Neutrik PowerCON® in/outputs: up to 16A can be daisy chained for easy installation
- Equipped with omega brackets for fast installation.
- Power consumption: only 400W

## BEFORE USE

- Before you start using this unit, please check if there's no transportation damage. Should there be any, do not use the device and consult your dealer first.
- **Important:** This device left our factory in perfect condition and well packaged. It is absolutely necessary for the user to strictly follow the safety instructions and warnings in this user manual. Any damage caused by mishandling is not subject to warranty. The dealer will not accept responsibility for any resulting defects or problems caused by disregarding this user manual.
- Keep this booklet in a safe place for future consultation. If you sell the fixture, be sure to add this user manual.

### Check the contents:

Check that the carton contains the following items:

- BTX-TITAN
- 2pcs Quick lock "Omega bracket"
- PowerCON® cable
- Safety cable
- Operating instructions
- DMX cable (3m)
- Lockable cable connector, power-out, screw terminals. (Neutrik NAC3FCB)

## SAFETY INSTRUCTIONS

**CAUTION**  
RISK OF ELECTRIC SHOCK  
DO NOT OPEN

**CAUTION:** To reduce the risk of electric shock, do not remove the top cover. No user-serviceable parts inside. Refer servicing to qualified service personnel only.

The lightning flash with arrowhead symbol within the equilateral triangle is intended to alert the user to the presence of un-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within the equilateral triangle is intended to alert the user to the presence of important operation and maintenance (servicing) instructions in the literature accompanying this appliance.

This symbol means: indoor use only

This symbol means: Read instructions

This symbol means: Safety Class I appliance

This symbol determines: the minimum distance from lighted objects. The minimum distance between light-output and the illuminated surface must be more than 12 meters

The device is not suitable for direct mounting on normally flammable surfaces. (suitable only for mounting on non-combustible surfaces)

- To protect the environment, please try to recycle the packing material as much as possible.
- A new light effect sometimes causes some unwanted smoke and/or smell. This is normal and disappears after some minutes.
- To prevent fire or shock hazard, do not expose this appliance to rain or moisture.
- To avoid condensation to be formed inside, allow the unit to adapt to the surrounding temperatures when bringing it into a warm room after transport. Condense sometimes prevents the unit from working at full performance or may even cause damages.
- This unit is for indoor use only.
- Don't place metal objects or spill liquid inside the unit. Electric shock or malfunction may result. If a foreign object enters the unit, immediately disconnect the mains power.
- Locate the fixture in a well ventilated spot, away from any flammable materials and/or liquids. The fixture must be fixed at least 50cm from surrounding walls.
- Don't cover any ventilation openings as this may result in overheating.
- Prevent use in dusty environments and clean the unit regularly.
- Keep the unit away from children.
- Inexperienced persons should not operate this device.
- Maximum save ambient temperature is 40°C. Don't use this unit at higher ambient temperatures.
- The units' surface temperature may reach up to 85°C. Don't touch the housing with bare hands during its operation.
- Make sure the area below the installation place is free from unwanted persons during rigging, de-rigging and servicing.
- Allow the device about 10 minutes to cool down before replacing the bulb or start servicing.
- Always unplug the unit when it is not used for a longer time or before replacing the bulb or start servicing.
- The electrical installation should be carried out by qualified personal only, according to the regulations for electrical and mechanical safety in your country.
- Check that the available voltage is not higher than the one stated on the rear panel of the unit.
- The power cord should always be in perfect condition. Switch the unit immediately off when the power cord is squashed or damaged. It must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Never let the power-cord come into contact with other cables!
- This fixture must be earthed in order to comply with safety regulations.
- Don't connect the unit to any dimmer pack.
- Always use an appropriate and certified safety cable when installing the unit.
- In order to prevent electric shock, do not open the cover. Apart from the lamp and mains fuse there are no user serviceable parts inside.
- Never repair a fuse or bypass the fuse holder. Always replace a damaged fuse with a fuse of the same type and electrical specifications!
- In the event of serious operating problems, stop using the fixture and contact your dealer immediately.

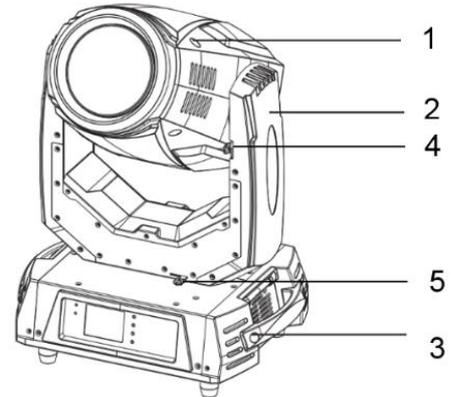

- The housing and the lenses must be replaced if they are visibly damaged.
- Please use the original packing when the device is to be transported.
- Due to safety reasons it is prohibited to make unauthorized modifications to the unit.

**Important:** Never look directly into the light source! Don't use the effect in the presence of persons suffering from epilepsy.

**DESCRIPTION:**

**DEVICE:**

1. Head
2. Arm
3. Base
4. Tilt arm self-locking handle
5. Pan self-locking handle

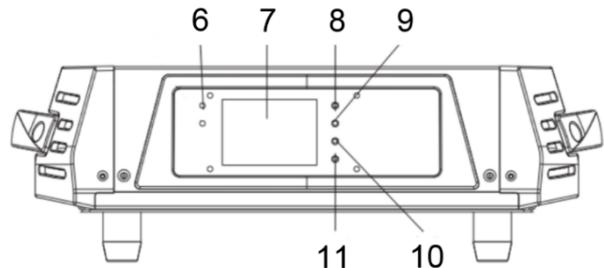

**Caution: the head and arm must be unlocked before operation!**

- Tilt mechanism locks and releases every 45°
- Pan mechanism locks and releases every 45°

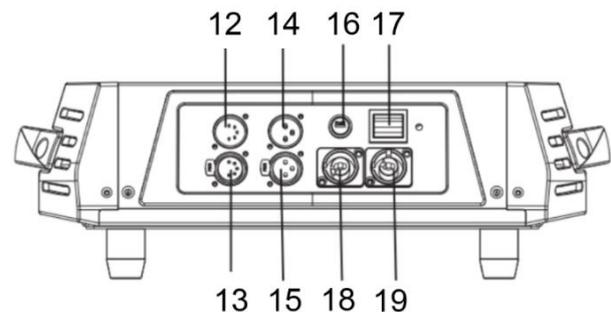

**CONTROL PANEL:**

6. Wireless DMX led
7. LCD Touchscreen display
8. MODE button
9. UP button
10. DOWN button
11. ENTER button

**REAR PANEL:**

12. DMX XLR-5Pin out
13. DMX XLR-5Pin in
14. DMX XLR-3Pin out
15. DMX XLR-3Pin in
16. Main Fuse
17. Power switch
18. PowerCon® In
19. PowerCon® Out

*Hint: Please check our website for special cable assemblies that contain both power (3x1.5mm<sup>2</sup> with Neutrik PowerCON®) and balanced signal (XLR 3pin) in one cable. Different lengths are available: 1.3m, 3m, 5m and 10m, very convenient!*

# LAMP (RE)PLACEMENT

In case of replacement of the lamp or maintenance, do not open the fixture within 10 minutes until the unit cools down after switching off. Always unplug the unit before servicing! Always use the same type of spare parts (bulbs, fuses, etc.) When replacing parts, please only genuine spare parts.

Because of its high internal pressure, there might be a risk that the Discharge lamp would explode during operation. The lamp emits intense UV radiation which is harmful to the eyes and skin. The high luminance of the arc can cause severe damage to the retina if you take a close look at the lamp.

To protect the lamp, always turn off the lamp first (via control panel or DMX controller) and let the unit run at least five minutes to cool down before switching off the mains supply. Never handle the lamp or luminary when it is hot.

Wear gloves, do not touch the bulb with bare hands. If this happens, clean the lamp with denatured alcohol and wipe it with a lint free cloth before installation.

When lighting up, the lamp operates at high pressure and there is a slight risk of arc tube rupture. The risk increases with age, temperature and improper handling of the lamp.

Do not use the lamp longer than its lifespan.

Make sure the lamp is located in the center of the reflector for the best projection.

- Switch off the unit and unplug the mains cable.
- Wait for about 10 minutes until the unit has been cooled down.
- Use a screwdriver to unscrew the screws (A-B-C) to open the back cover of the fixture.(Fig. 1)

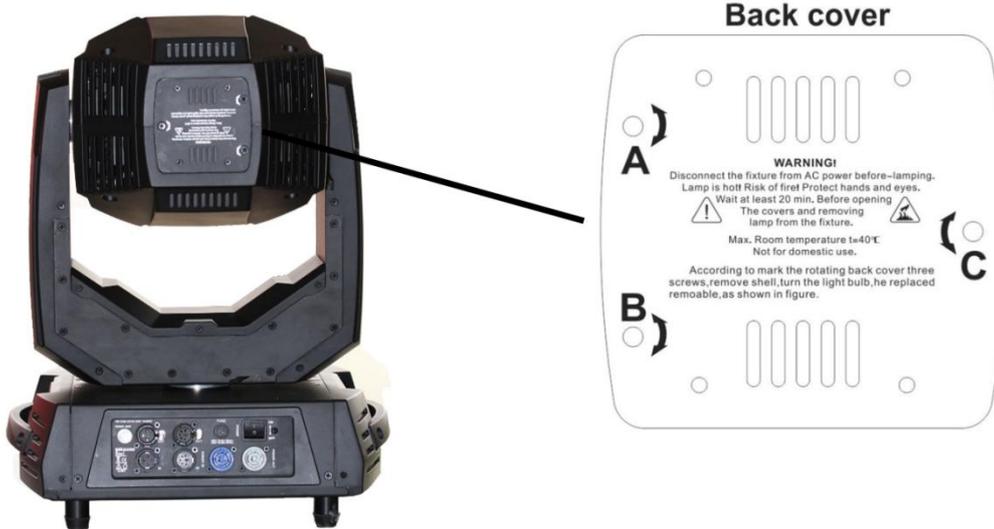

Figure 1 – Back cover

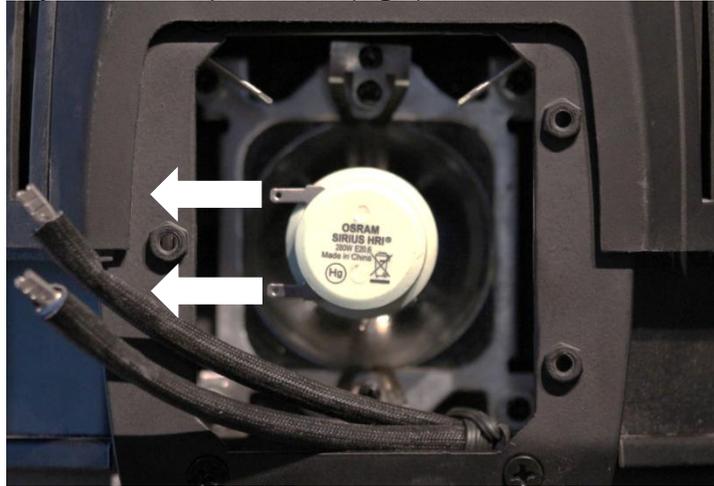

Inside you will find the OSRAM “Sirius HRI 280W E20.6” lamp (Figure 2)

**Attention:** wear gloves, do not touch the bulb with bare hands. If this happens, clean the lamp with denatured alcohol and wipe it with a lint free cloth before installation. Not doing this will shorten the life of the new lamp!

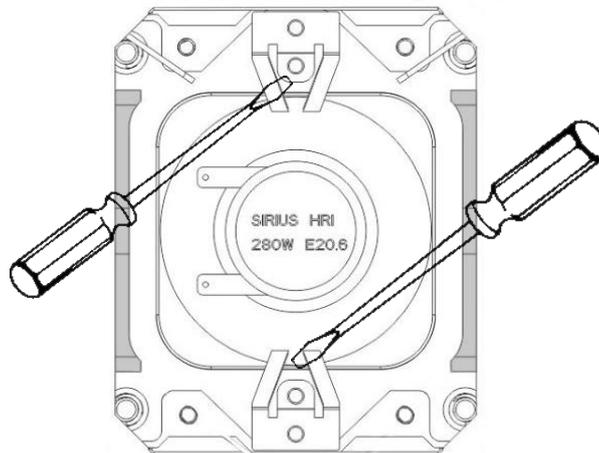

Figure 2 - OSRAM Sirius HRI 280W

- Remove the cables gently from the lamp terminals (Fig.3)

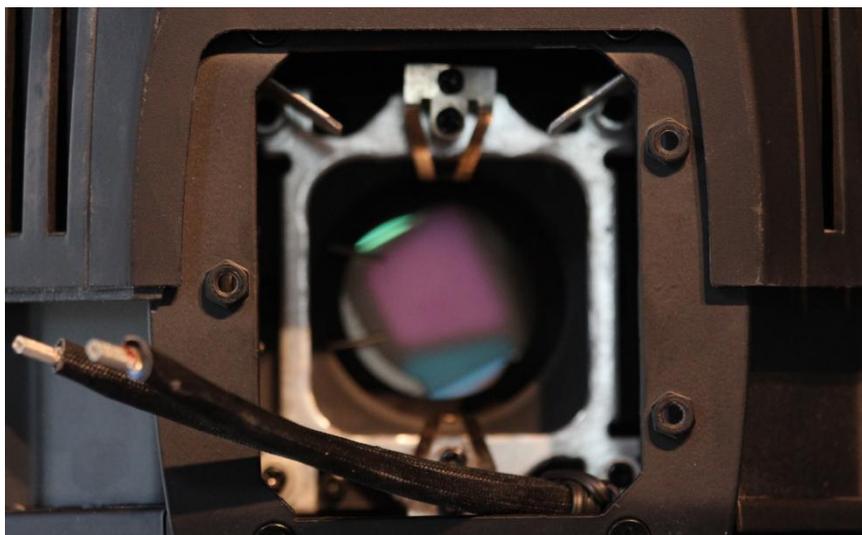

**Figure 3 - Removed cables**

- No need to unscrew any more screws to remove the lamp, just GENTLY move the two metal parts that maintain the lamp in position. Hold the lamp by the base during this operation (Figure 4)

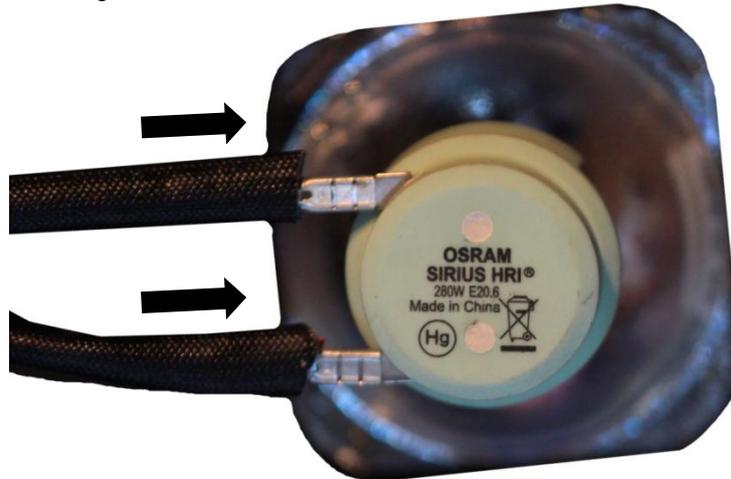

**Figure 4 - Move the metal support of the lamp GENTLY**

- Remove the lamp from the head of the BTX-TITAN (Figure 5)

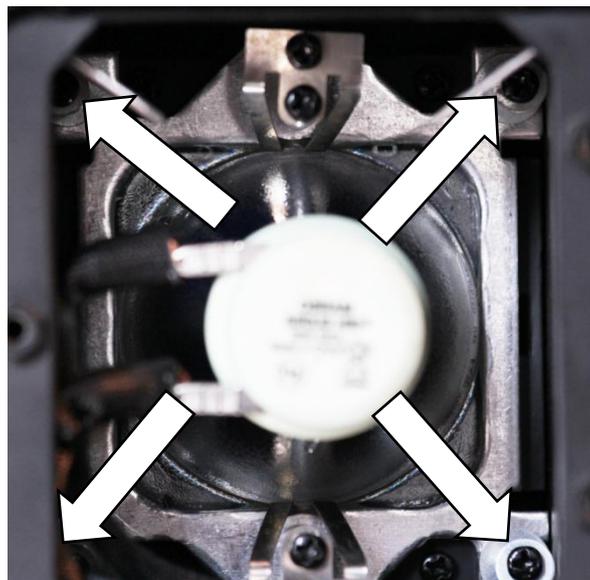

**Figure 5 - Lamp removed from the head of the BTX-TITAN**

- Connect the cables to the new OSRAM “Sirius HRI 280W E20.6” lamp  
**Important:** ONLY use an original “Philips MSD Platinum 2R” lamp, other lamps could result in less performance or even damage the unit.

- Place the new lamp on the support by pressing it until the two metal supports maintains correctly the lamp.
- Switch the unit back on and use a DMX controller to point the open beam on a wall.  
**Attention:** avoid looking at light coming directly from the lamp inside the unit, the UV-radiation of the lamp is harmful for your eyes. (The light of the beam passes through a UV-filter first)
- You will see a hotspot in the beam projected on the wall. Adjust this hotspot using the screw as shown in Fig. 6. The hotspot should be as much as possible in the center of the beam.

**Figure 6 - Hotspot correction screws**

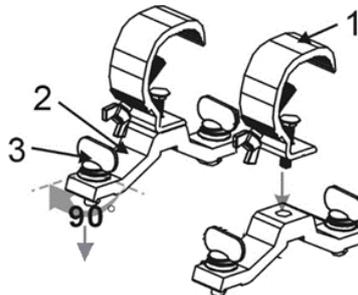

- Close the cover
- Done

## OVERHEAD RIGGING

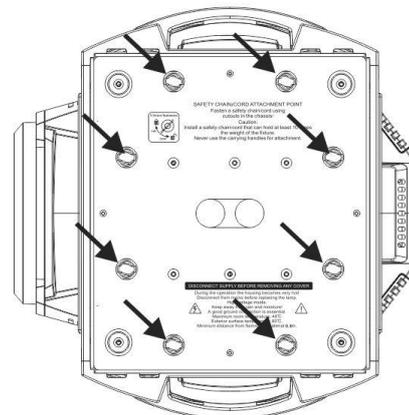

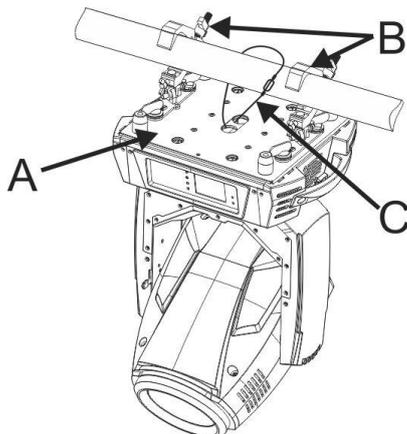

- **Important:** The installation must be carried out by qualified service personal only. Improper installation can result in serious injuries and/or damage to property. Overhead rigging requires extensive experience! Working load limits should be respected, certified installation materials should be used, the installed device should be inspected regularly for safety.
- Make sure the area below the installation place is free from unwanted persons during rigging, de-rigging and servicing.
- Locate the fixture in a well ventilated spot, far away from any flammable materials and/or liquids. The fixture must be fixed **at least 50cm** from surrounding walls.
- The device should be installed out of reach of people and outside areas where persons may walk by or be seated.
- Before rigging make sure that the installation area can hold a minimum point load of 10times the device's weight.
- Always use a certified safety cable that can hold 12 times the weight of the device when installing the unit. This secondary safety attachment should be installed in a way that no part of the installation can drop more than 20cm if the main attachment fails.
- The device should be well fixed; a free-swinging mounting is dangerous and may not be considered!
- Don't cover any ventilation openings as this may result in overheating.
- The operator has to make sure that the safety-relating and machine-technical installations are approved by an expert before using them for the first time. The installations should be inspected every year by a skilled person to be sure that safety is still optimal.

### Installation:

- Fix the Truss hooks (1) to the Omega clamps with screw and locking nut.
- Fasten the omega clamps (2) on the bottom of the base by inserting quick-lock fasteners (3) into the holes of the base and tighten fully clockwise.

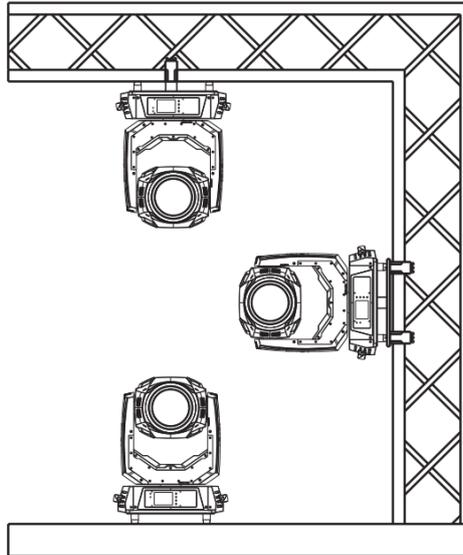

### OMEGA BRACKET HOLES

- A = Mounting plate
- B = Quick clamps
- C = Safety cable / Security chain

# MOUNTING

The fixture can be installed in any position

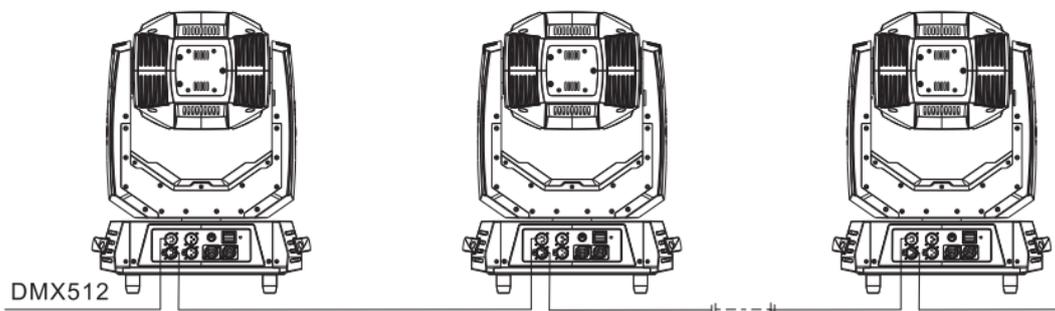

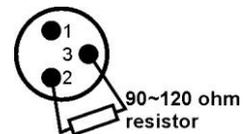

# ELECTRICAL INSTALLATION + ADDRESSING

**⚠ Important:** The electrical installation should be carried out by qualified personal only, according to the regulations for electrical and mechanical safety in your country.

### Electrical installation for two or more units in DMX-mode:

- The DMX-protocol is a widely used high speed signal to control intelligent light equipment. You need to “daisy chain” your DMX controller and all the connected units with a good quality balanced cable.
- Both XLR-3pin and XLR-5pin connectors are used, however XLR-3pin is more popular because these cables are compatible with balanced audio cables.  
 Pin layout XLR-3pin: Pin1 = GND ~ Pin2 = Negative signal (-) ~ Pin3 = Positive signal (+)  
 Pin layout XLR-5pin: Pin1 = GND ~ Pin2 = Negative signal (-) ~ Pin3 = Positive signal (+) ~ Pins4+5 not used.
- To prevent strange behavior on the DMX units, due to interferences, you must use a 90Ω to 120Ω terminator at the end of the chain. Never use Y-splitter cables, this simply won't work!
- Make sure that all units are connected to the mains.
- Each unit in the chain needs to have its proper starting address so it knows which commands from the controller it has to decode. In the next section you will learn how to set the DMX addresses.

# OPERATING INSTRUCTIONS

- Do not switch the unit on and off in short time intervals as this reduces the lamp life.
- Always unplug the unit when it is not used for a longer time or before replacing the bulb and or making the service.
- In the event of serious operating problems, stop using the fixture and contact your dealer immediately.
- **Important:** Never look directly into the light source! Don't use the effect in the presence of persons suffering from epilepsy.

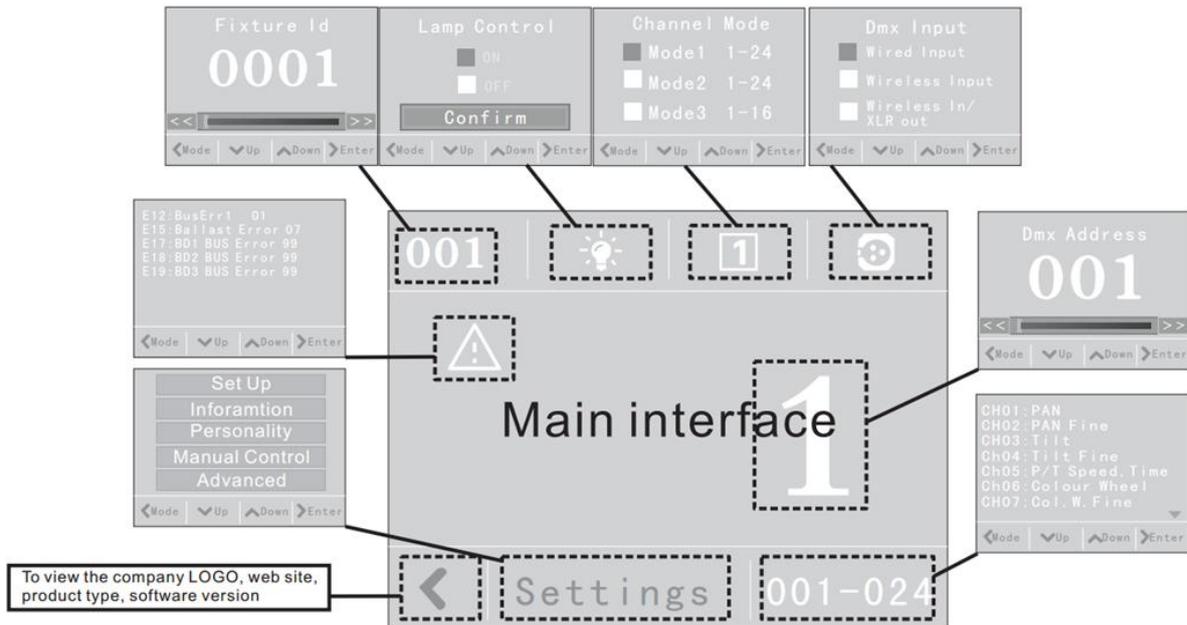

**MENU**

You can use the buttons or touch screen to navigate the setup menu with its different sub menus etc. You can easily change settings like DMX address, different functions etc.

- Use the UP / DOWN buttons to navigate the menu and change the values of the selected functions.
- Each time you select a menu item or change a setting you must press the ENTER button to confirm.
- Press the MENU button to return to the (previous) menu.

**TOUCHSCREEN – MAIN INTERFACE LAYOUT:**

When the unit is switched on, the display shows the BriteQ logo, followed by the main interface as shown below. The main interface is split up in different parts (icons). You can press these icons, which are in fact shortcuts, to immediately access different parts of the setup menu (see drawing).

**FIXTURE ID**

The Fixture id (ranging from 0001 to 9999) makes installation easier because each product can be identified by a unique number. With the internal battery, no need to plug the power to set or read the fixture id. To change the fixture id a password is needed: the password is "1702".

**LAMP CONTROL**

Set the lamp ON or OFF

**CHANNEL MODE**

Set the channel mode of BriteQ BTX-TITAN:

- **Mode 1:** 24 Channels
- **Mode 2:** 25 Channels
- **Mode 3:** 16 Channels

**DMX INPUT**

- **is green:** received DMX-signal is OK.
- **is red and lcd is blinking:** received DMX-signal is NOT OK or NO DMX-signal received.

Used to set the desired input for the DMX signal:

- **Wired Input:** XLR (3 or 5pin) input is used.
- **Wireless Input:** DMX-signal comes from an external wireless transmitter (sold separately)
- **Wireless Input / XLR out:** DMX-signal comes from an external wireless transmitter (sold separately). The wireless DMX-signal is also available at the DMX output port (3 or 5 pins) for further daisy chaining of other equipment.

**Important Remark:** originally this projector is NOT equipped with a wireless receiver module. A wireless receiver module is optionally available.

**DMX ADDRESS**

Set the DMX address by pressing the center of the screen at least 2 seconds (yellow progress bar appears on the screen) and DMX Address panel appears. DMX address can be modified with the slider on the touch screen or with the “+” and “-“ button. The “>>” icon sets the last valid DMX address, according to the selected channel mode. The “<<” sets the address to 1. Confirm the DMX address by pressing ENTER. The main page is now updated, and the DMX range used by the product is on the right down corner of the screen.

**CHANNEL LIST**

Pressing on the DMX address range xxx-xxx on the main screen shows the DMX-chart according to the selected channel mode.

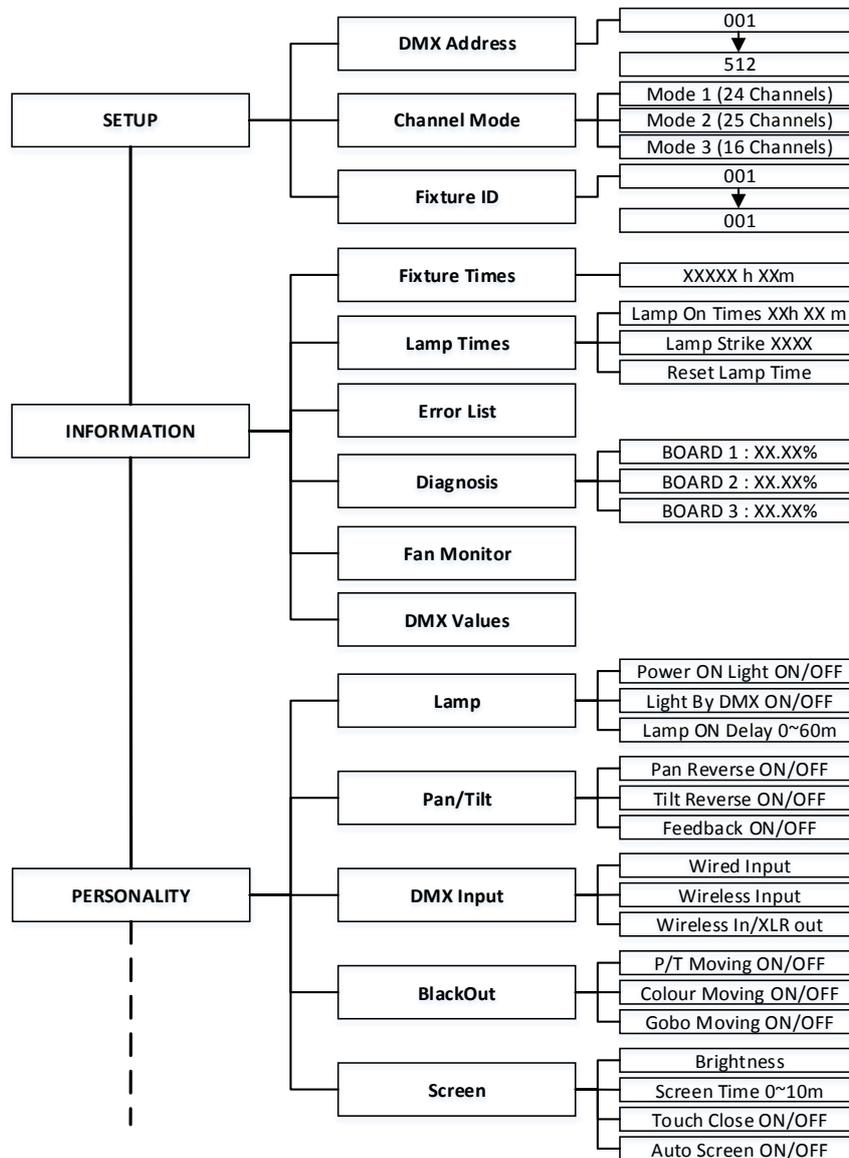

**ERROR MESSAGES **

Press the -ICON: a list of error messages will appear. Please check the list of error codes at the end of the user manual.

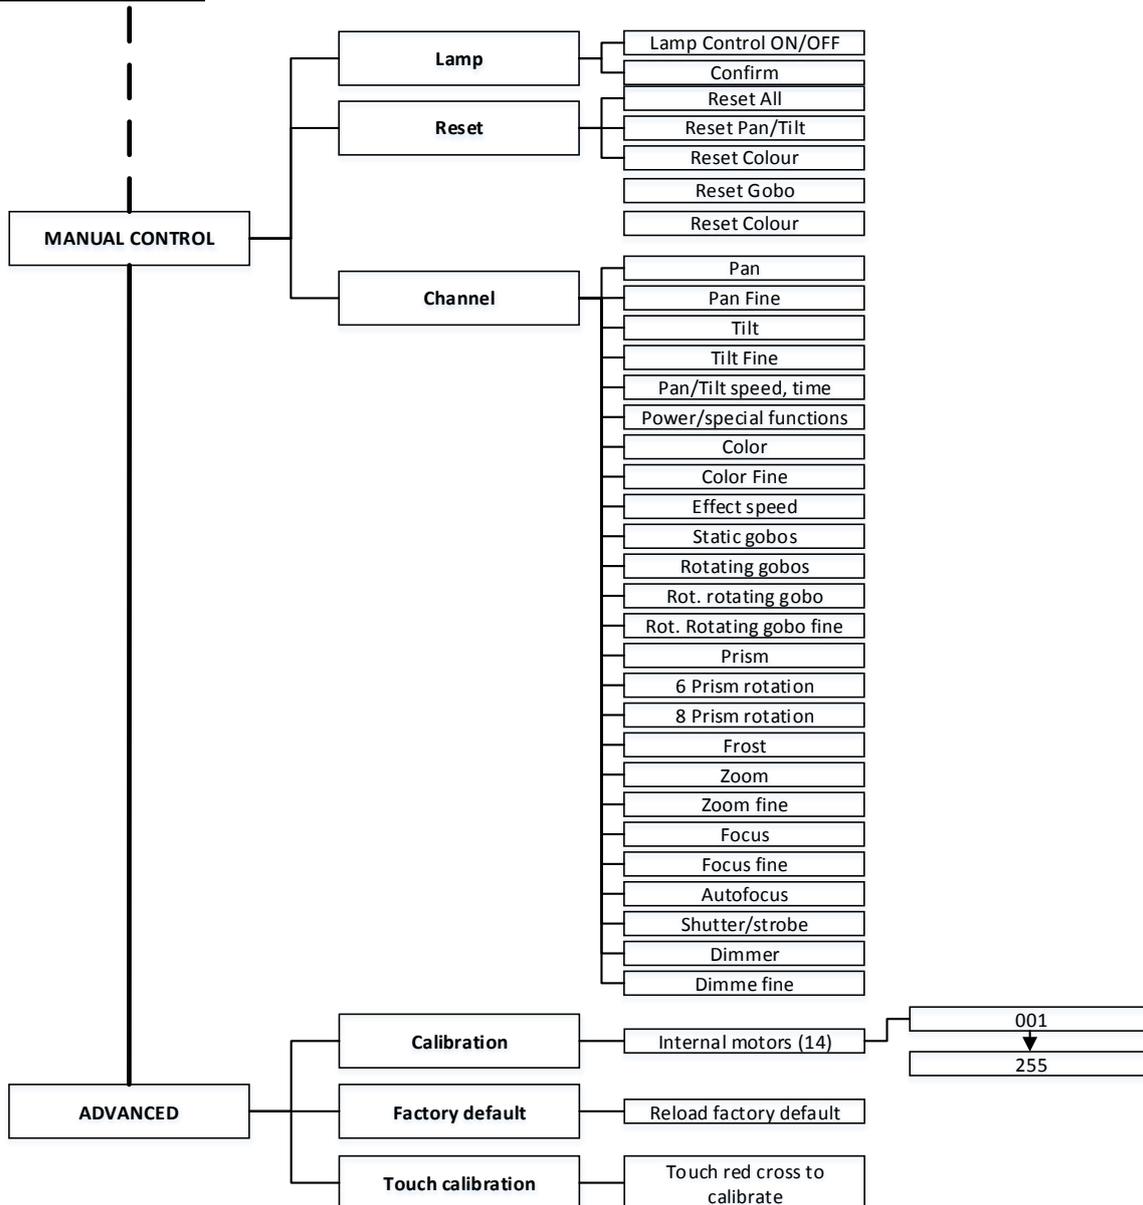

**SETTINGS MENU**

Press “Settings” on the display to open the setup menu. Use the UP/DOWN, MODE and ENTER-buttons to navigate.

**MENU MAP – PART 1**

**MENU MAP – PART 2**

**SET UP DMX ADDRESS**

Set the DMX address by pressing the center of the screen at least 2 seconds (yellow progress bar appears on the screen) and DMX Address panel appears. DMX address can be modified with the slider on the touch screen or with the “+” and “-“ button. The “>>” icon set the last DMX address possible according to the selected channel mode. The “<<” set the address to 1. Set the DMX address by pressing enter. The main page is now updated, and the DMX range used by the product is on the right down corner of the screen.

**SET UP CHANNEL MODE**

Set the channel mode of BriteQ BTX-TITAN:

- **Mode 1:** 24 Channels
- **Mode 2:** 25 Channels
- **Mode 3:** 16 Channels

**SET UP FIXTURE ID**

The Fixture id (ranging from 0001 to 9999) makes installation easier because each product can be identified by a unique number. With the internal battery, no need to plug the power to set or read the fixture id. To change the fixture id a password is needed: the password is “1702”.

**INFORMATION** FIXTURE TIMES

Shows the operation time (in hours) since it first start.

**INFORMATION** LAMP TIMES

**Lamp on times:** Show the total hours with lamp on since it first start  
**Lamp strikes:** Show the total count of lamp strike since it first start  
**Reset lamp time:** Reset the total hours with lamp on since it first start.  
Should be done after changing the bulb.

**INFORMATION** ERROR LIST

If an error is detected, a list of error(s) will appear here. By default, without any error: "no error".

**INFORMATION** DIAGNOSIS

Show the state of each cards. If one of the electronic card is not at 100%, contact the technical support.

**INFORMATION** FAN MONITOR

Shows the rotation speed of the fans. Speed in rotations per minute.

**INFORMATION** DMX VALUE

Shows the DMX value received by the Briteq BTX-TITAN on the DMX input. It can be used as a DMX analyzer to check the values received.

**PERSONALITY** LAMP**Power on light (on – off):**

- **On:** Turn the lamp on at power on.
- **Off:** The lamp has to be switched on using the local menu or DMX.

**Lamp on by DMX (on – off):**

- **On:** lamp can be switched on by DMX.
- **Off:** lamp cannot be switched on by DMX.

**Lamp on delay (0-60min):**

The lamp is automatically switched on 0-60min after the projector was switched on. Delayed start can be useful in permanent installation.

**PERSONALITY** PAN TILT**Pan reverse (on-off)**

- **On:** Pan works in opposite direction
- **Off:** Pan works normally

**Tilt reverse (on-off)**

- **On:** Tilt works in opposite direction
- **Off:** Tilt works normally

**Feedback (on-off)**

- **On:** pan/tilt position is automatically corrected.
- **Off:** pan/tilt position is not corrected.

**PERSONALITY** DMX INPUT

Used to set the desired input for the DMX signal:

- **Wired Input:** XLR (3 or 5pin) input is used.
- **Wireless Input:** DMX-signal comes from an external wireless transmitter (sold separately)
- **Wireless Input / XLR out:** DMX-signal comes from an external wireless transmitter (sold separately).  
The wireless DMX-signal is also available at the DMX output port (3 or 5 pins) for further daisy chaining of other equipment.

**Important Remark:** originally this projector is NOT equipped with a wireless receiver module. A wireless receiver module is optionally available.

**PERSONALITY BLACKOUT****P/T moving (on-off)**

- **On:** Blackout while pan/tilt is moving
- **Off:** No blackout while pan/tilt is moving

**Colour moving (on-off)**

- **On:** Blackout while colour changes
- **Off:** No blackout while colour changes

**Gobo moving (on-off)**

- **On:** Blackout whiles gobo changes
- **Off:** No blackout while gobo changes

**PERSONALITY SCREEN****Brightness**

Set the brightness of the screen

**Screen time**

Set a delay from 0 to 10 minutes to automatically exit the menu interface and switch the screen off.

**Touch screen (on-off)**

- **On:** The touchscreen is active
- **Off:** The touchscreen is not active, menu navigation is only possible using the buttons.

**Auto screen (on-off)**

- **On:** the screen is automatically rotated, based on the angle of the BriteQ BTX-TITAN.
- **Off:** the screenhe orientation is fixed

**MANUAL CONTROL LAMP**

**Lamp control (on-off):** Set the lamp on/off manually

**MANUAL CONTROL RESET**

**Reset All:** Reset all functions of the BriteQ BTX-TITAN

**Reset pan/tilt:** Reset pan and tilt

**Reset colour:** Reset colour wheel

**Reset gobo:** Reset gobo wheel

**Reset other:** Reset all other functions

**MANUAL CONTROL CHANNEL**

Change the value for each channel manually. This is an easy way to quickly test the machine without any DMX console.

**ADVANCED CALIBRATION**

Calibration of the 14 integrated motors. Values can be set from 001 to 255.

Calibration password is "0088".

**ADVANCED FACTORY DEFAULT**

Return to the factory default settings.

**ADVANCED TOUCH CALIBRATION**

Recalibrate the touchscreen by pressing the red cross on the screen.

## DMX CHANNEL (FULL VERSION)

The unit is equipped with 3 different DMX modes:

- **24CH-MODE:** Full functionality mode
- **25CH-MODE:** Full functionality extended mode with separate rotating speed control for both prisms.
- **16CH-MODE:** Simple mode with limited functionality

24CH	25CH	16CH	VALUE	FUNCTION		
1	1	1	000-255	PAN		
2	2		000-255	PAN FINE (Least significant bit)		
3	3	2	000-255	TILT		
4	4		000-255	TILT FINE (Least significant bit)		
5	5	3	000-255	PAN / TILT SPEED (fast to slow)		
6	6	4		<b>POWER / SPECIAL FUNCTIONS</b>		
			000 - 009	Reserved		
			<b>+ IMPORTANT + To activate the following functions, the Shutter / strobe of the selected unit should be closed (0-31 DMX Value) for more than 3s in order to validate the special function</b>

24	25		DIMMER FINE

## MAINTENANCE

- Make sure the area below the installation place is free from unwanted persons during servicing.
- Switch off the unit, unplug the mains cable and wait until the unit has been cooled down.

### During inspection the following points should be checked:

- All screws used for installing the device and any of its parts should be tightly fastened and may not be corroded.
- Housings, fixations and installations spots (ceiling, truss, suspensions) should be totally free from any deformation.
- When an optical lens is visibly damaged due to cracks or deep scratches, it must be replaced.
- The mains cables must be in impeccable condition and should be replaced immediately when even a small problem is detected.
- In order to protect the device from overheat the cooling fans (if any) and ventilation openings should be cleaned monthly.
- The interior of the device should be cleaned annually using a vacuum cleaner or air-jet.
- The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimize light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surroundings can cause greater accumulation of dirt on the unit's optics.
  - Clean with a soft cloth using normal glass cleaning products.
  - Always dry the parts carefully.
  - Clean the external optics at least once every 30 days.
  - Clean the internal optics at least every 90 days.

**Attention: We strongly recommend internal cleaning to be carried out by qualified personnel!**

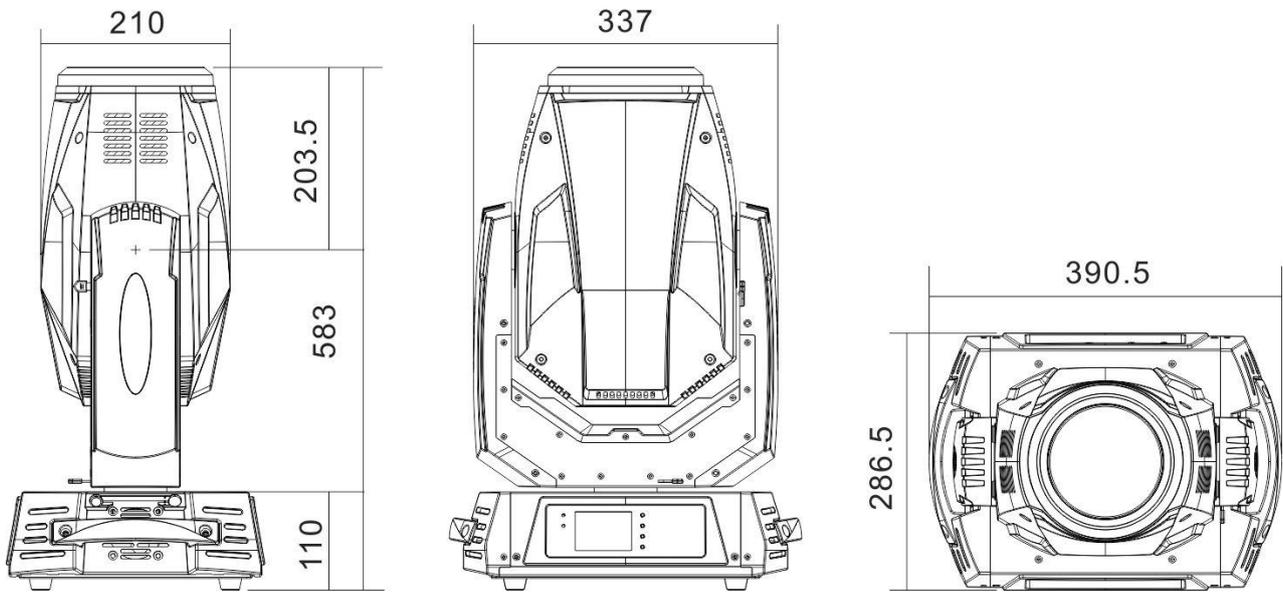

## SPECIFICATIONS

<b>Mains Input:</b>	AC 100~240V, 50/60Hz
<b>Power consumption:</b>	400Watt
<b>Fuse:</b>	250V 6,3A fuse
<b>Sound Control:</b>	none
<b>DMX connections:</b>	3pin & 5pin XLR IN/OUT
<b>Movement:</b>	Pan: 540° Tilt: 270° (+ Pan/Tilt lock for transport protection)
<b>Dimmer/Shutter:</b>	Mechanical dimmer
<b>Color wheel:</b>	1 open + 13 fixed colors (see below)
<b>Fixed gobo wheel:</b>	1 open + 14 fixed gobos (see below)
<b>Rotating gobo wheel:</b>	1 open + 9 rotating gobos (see below)
<b>Effect:</b>	8 facets circular and 6 facets lineat rotating prisms & frost
<b>Beam angle:</b>	2.7° > 11°
<b>Focus:</b>	Electronic (16 bits)
<b>DMX channels used:</b>	16-24-25 Channels
<b>Lamp:</b>	Osram Sirius HRI 280W E20.6
<b>Size:</b>	391 x 287 x 583 mm
<b>Weight:</b>	15 kg

## DIMENSIONS

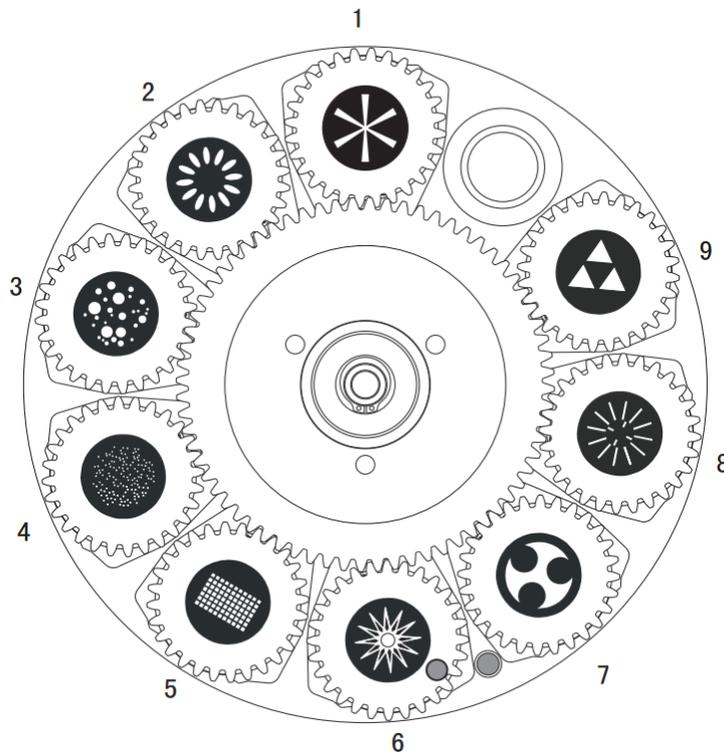

## COLOUR WHEEL

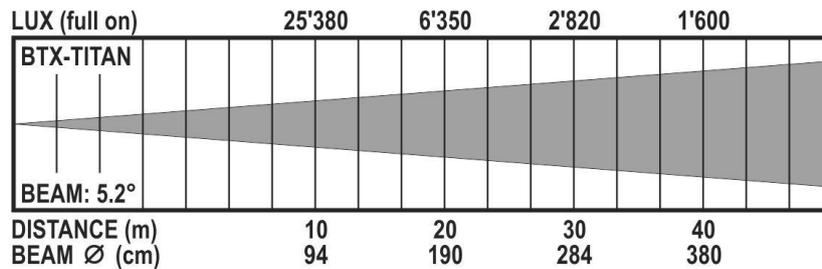

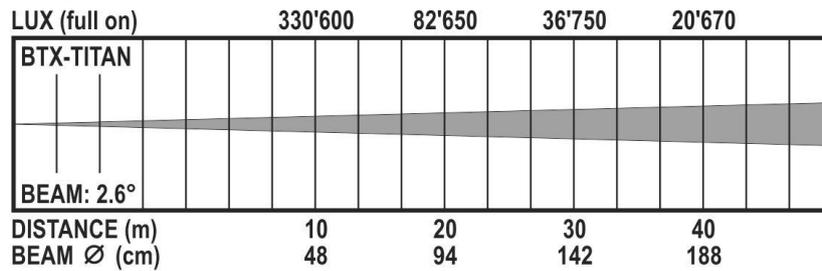

**FIXED GOBO WHEEL** (effective diameter 5.8mm)

**ROTATING GOBO WHEEL**

## LUX CHARTS

## TROUBLESHOOTING

### ERROR LIST

CODE	ERROR MESSAGE	NAME	EXPLANATION
E14	SPDError	Wrong setting parameters (automatic recovery) EOL	Reset all setting parameters
E15	Ballast Error	Ballast Error	Check whether the rectifier control line is wrong, change the rectifier
E16	MFpga Error	Master control chip error	Change the main control chip or change the display board semi-finished products
E17	BD1 BUS Error	To scan the communication error	Look for virtual communication signal lines, communication chip welding or short circuit
E18	BD2 BUS Error	Scanning to the driven plate 1 communication error	
E19	BD3 BUS Error	Drive plate 1 to drive plate 2 communication error	
E21	Pan FB. Err	Levels of light coupling error	Check that the light coupling line, optical coupling switch and a plate of the relative position measurement
E22	Pan Zero Err	Level of magnetic susceptibility (origin) error	Check line magnetic susceptibility, magnets and magnetic susceptibility of distance and location, have the magnet
E23	Tilt FB. Err	The vertical light coupling error	Check that the light coupling line, optical coupling switch and a plate of the relative position measurement
E24	Tilt Zero Err	Vertical magnetic susceptibility (origin) error	Check line magnetic susceptibility, magnets and magnetic susceptibility of distance and location, have the magnet
E25	6 Prism Err1	Six prism magnetic susceptibility (origin) error	
E26	6 Prism Err2	Six prism rotation of magnetic susceptibility (origin) error	
E27	8 Prism Err1	Eight prism magnetic susceptibility (origin) error	
E28	8 Prism Err2	Eight prism rotation of magnetic susceptibility (origin) error	
E29	R.Gobo Err1	Rotate magnetic susceptibility (origin) error	
E30	R.Gobo Err2	Rotating magnetic susceptibility patterns (origin) error	
E31	Zomm Err	Amplification of magnetic susceptibility (origin) error	
E32	Focus Err	Focusing magnetic susceptibility (origin) error	
E33	St.Gobo Err	Fixed plate of magnetic susceptibility (origin) error	
E34	ColourW. Err	Color piece of magnetic susceptibility (origin) error	
E35	Hot Err	Heat insulation motor/magnetic susceptibility (origin) error	Check the line of magnetic susceptibility, magnets and magnetic susceptibility of distance and location, is there a magnet, the motor line ever.
