IMPORTANT INFORMATION

Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subject to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

SAVE THESE INSTRUCTIONS.

WARNING: You must have access to a mains circuit breaker or other power disconnect device before installing any wiring. BE sure that power is disconnected by removing fuses or turning the mains circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

WARNING: Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

WARNING: This equipment is intended for installation in accordance with the Nation Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

Additional Resources for DMX512

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522). PREFACE

1. About this Manual

The document provides installation and operation instructions for the following products:

- SL eSTROBE 130 LED Luminaire

Please read all instructions before installing or using this product. *Retain this manual for future reference.* Additional product information and descriptions may be found on the product specification sheet.

Note: The SL eSTROBE 130 LED Luminaire is universal voltage 100 to 240 VAC (auto-ranging).

2. Included Items

Each SL eSTROBE 130 LED Luminaire includes the following items:

- SL eSTROBE 130 LED Luminaire
- AC Power Input Cable
- Installation and User's Manual (*this document*)

SL eSTROBE 130 LED Luminaire Overview

1. SL eSTROBE 130 LED Luminaire Components

Common Luminaire Components

Figure 1: SL eSTROBE 130 LED Luminaire Components

LCD Display / Menu System

Figure 2: LCD Display & Menu System

Note: For Menu operation and programming details, refer to the "LCD Display and Menu System" on page 8.

INSTALLATION AND SET UP

1. Power Requirements

The SL eSTROBE 130 LED Luminaire operates on AC input voltages from 100 to 240 VAC.

WARNING! This luminaire does not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from the luminaire when not in use.

AC Power Operation

When connected to an AC source, the luminaire operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 130 Watts.

Table 1: SL eSTROBE 130 Voltage (VAC) vs. Current

Voltage (AC)	Total Current (A)	Voltage (AC)	Total Current (A)
100	1.30	180	0.72
110	1.18	190	0.68
120	1.08	200	0.65
130	1.00	210	0.62
140	0.92	220	0.59
150	0.86	230	0.56
160	0.81	240	0.54
170	0.76		

2. Connecting Power

Direct connection to a AC power source using an AC input cable.

3. Connecting to the DMX 512 Network

Basic DMX512 installation consists of connecting multiple SL eSTROBE 130 LED luminaires together (up to 32 luminaires) in "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL eSTROBE 130 LED Luminaire. Another cable runs from the other DMX connector on the first Luminaire to a DMX connector on the next SL eSTROBE 130 LED Luminaire (or DMX512 device to be controlled).

Figure 3: SL eSTROBE 130 LED Luminaire DMX512 Input / THRU Connections

Note: For more information on DMX512 networking and systems, refer to "Additional Resources for DMX512" on page 1. For SL eSTROBE 130 LED Luminaire DMX Mapping, refer to "DMX CONTROL" on page 13.

Figure 4: SL eSTROBE 130 LED Luminaire - DMX512 Connections

4. Mounting Luminaire

Floor Mounting

The SL eSTROBE 130 LED Luminaire is designed to sit directly on its yoke assembly in a floor installation application. When used in this type of application, loosen the locking handle securing the inner portion of the yoke assembly and separate out (as shown in **Figure 5**). Be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling.

Figure 5: Floor Mounting

Truss / Hanging Applications

The SL eSTROBE 130 LED Luminaire is provided with the ability to hang via truss hooks, clamps, etc. (sold separately). Simply attach hook, clamp, etc. to the SL eSTROBE 130 LED Luminaire enclosure assembly in the provided M10 holes. It is recommended (and may be required by local and national safety codes) to use and install a safety cable (sold separately) as illustrated in **Figure 6**. When hanging the fixture, be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling and positioning. Refer to "Luminaire Dimensions" on page 34 for spacing (dimensional) requirements.

Figure 6: Truss Mounting

OPERATION AND PROGRAMMING

1. LCD Display and Menu System

SL eSTROBE 130 LED Luminaires

The SL eSTROBE 130 LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's settings:

- Presets (Standard and User Defined)
- Chase
- Settings
- Status

Note: If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired. For the SL eSTROBE 130 LED Luminaire menu structure, see "[SL eSTROBE 130 LED Luminaire Menu Tree](#)" on page 10.

Upon power up, the LCD will display the main screen display menu of SL eSTROBE 130 LED Luminaire. Press “<” or “>” to select then press 'OK' to enter.

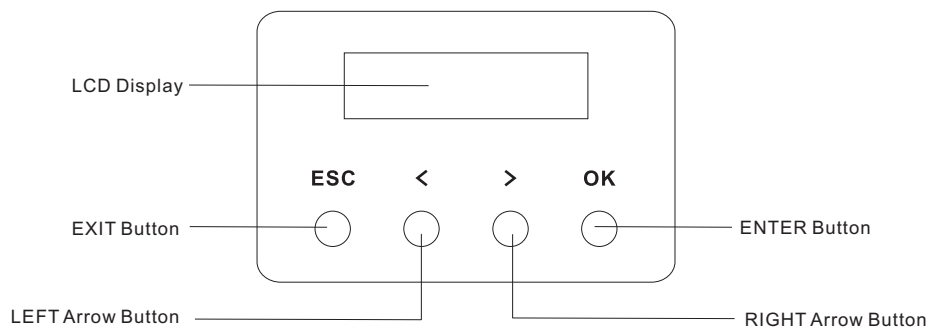

Figure 7: LCD Display and Menu System

2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Upon power up, the LCD will display the main menu automatically. When the desired menu item is reached, press the OK button to display the menu options, and to navigate and configure the menu options as required.

To navigate and access the menu settings/selections:

- Step 1. Make sure the luminaire is powered and turned on.
- Step 2. Press the desired button to access the menu categories.
- Step 3. Use the “<” and “>” arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.

Press the OK button to accept changes.

Preset

To edit and save a preset

- Step 1. Press the OK button to access the Preset menu.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all presets and select the desired preset number.
- Step 3. Press the OK button to select the desired menu. In RGB mode, the user can select **Intensity, Strobe Rate, Duration, Effects, Zone1, Zone2, Zone3 and Zone4.**
- Step 4. Once at the desired preset, use the LEFT and RIGHT arrow buttons to adjust parameter value as desired. Once all values are adjusted as desired, press the OK button.
- Step 5. Press the ESC button to select Save a Preset, the screen will then display "Save Preset: x". Use the LEFT and RIGHT arrow buttons to make a selection, then press the OK button.
- Step 5. The preset is now saved. Press the ESC button to exit the current menu.

Chase

- Step 1. Select Chase and press the OK button to access.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Select the Built-in Chase X(1-10) option or the User Chase(1-8) option, then press the OK button to select the desired menu.
- Step 4. Once at desired menu, use the LEFT and RIGHT arrow buttons to adjust the parameter value as desired. Once all values are adjusted as desired, press the OK button.
- Step 5. The chase is now saved. Press the ESC button to exit the current menu.

Settings

- Step 1. Press the OK button to access Settings.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Press the OK button to select the desired menu among **General, Factory Default, DMX and Display.**
- Step 4. Once at desired menu, use LEFT and RIGHT arrow buttons to adjust the related fixture information. Once all values are adjusted as desired, press CHECK MARK (OK) button.
- Step 5. Adjustment is now saved. Press ESC button to exit current menu.

Status

To check the fixture operational status:

- Step 1. Press CHECK MARK(OK)button to access Status.
- Step 2. Use the LEFT and RIGHT arrow buttons to scroll through all menus.
- Step 3. Press the OK button to select the desired menu from **LED Level, Temperature, and Other Info.**
- Step 4. Once at the desired menu, use the LEFT and RIGHT arrow buttons to check the related fixture information.

Note: For more information about Preset, Color Filter, Chase, Strobe/Timing, Settings and Status, please refer to the "SL eSTROBE 130 LED Luminaire Menu Tree" on page 11.

3. SL eSTROBE 130 LED Luminaire Menu Tree

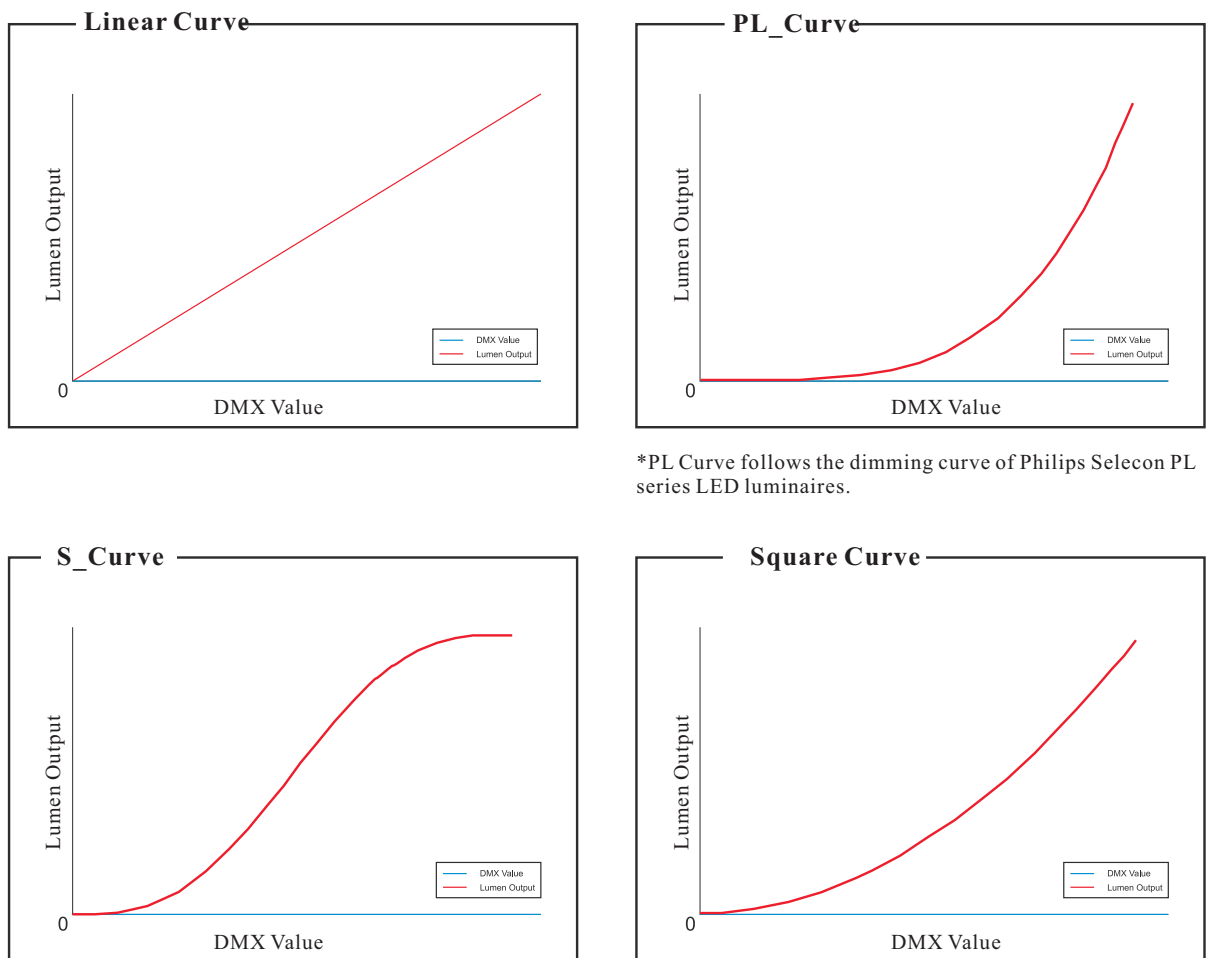

Figure 8: SL eSTROBE 130 LED Luminaire Menu Tree

4. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL_Curve
- S_Curve
- Square Curve

*PL Curve follows the dimming curve of Philips Selecon PL series LED luminaires.

Figure 9: SL eSTROBE 130 LED Luminaire Dimmer Curves

5. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL eSTROBE 130 LED Luminaire to act as the “Master” luminaire and all other connected luminaires are controlled by this master luminaire. When a luminaire is set to “Slave” mode, it will only luminaire and follow any commands send from a “Master” luminaire. Only one “Master” luminaire is allowed in this type of operation.

To setup a master / slave network:

- Step 1. Set the first luminaire in the DMX512 chain to **Master Mode** through the luminaire's menu system.
- Step 2. Set all other connected luminaires to **Slave Mode**.
- Step 3. The master luminaire can be controlled via DMX512, RDM or through standalone operation (a self-contained network utilizing on-board effects). The salve luminaires will mimic the master luminaire's operation in all cases.

Note: For more information on DMX512 networking and systems, refer to “[Additional Resources for DMX512](#)” on page 1. For SL eSTROBE 130 LED Luminaire DMX Mapping, refer to “[DMX CONTROL](#)” on page 13.

Figure 10: SL eSTROBE 130 LED Luminaire - Master / Slave Configuration

DMX CONTROL

This section contains information for operating the luminaire using DMX control in Single Channel, Three Channel, Four Channel, 16-Bit Control or Zone Mapping modes. For Menu options and detailed information, see the "LCD Display and Menu System" on Page 8.

Note: These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

1. SL eSTROBE 130 LED Luminaire DMX Mapping

Single Channel Mode

Table 2 provides DMX channel mapping of all DMX512 control values when the SL eSTROBE 130 LED Luminaire is in Single Channel mode (as set by the luminaire's menu system).

Table 2: SL eSTROBE 130 LED Luminaire DMX Channel Mapping (Single Channel Mode)

DMX Channel	Parameter	Range DMX	Range%	Default- recommended console default values	Description
1	Strobe Rate	0 - 255	0 - 100%	0	Please refer to the Strobe Rate detail.

Three Channel Mode

Table 3 provides DMX channel mapping of all DMX512 control values when the SL eSTROBE 130 LED Luminaire is in Three Channel mode (as set by the luminaire's menu system).

Table 3: SL eSTROBE 130 LED Luminaire DMX Channel Mapping (Three Channel Mode)

DMX Channel	Parameter	Range DMX	Range%	Default- recommended console default values	Description
1	Intensity	0 - 255	0 - 100%	0	8 bit control for Intensity of LED settings
2	Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration, Range is 0-255 White light mode (when strobe rate is also at 255) Please refer to the Strobe Duration Detail
3	Strobe Rate	0 - 255	0 - 100%	0	Strobe rate slow to fast. White light mode (when strobe duration is also at 255) Please refer to the Strobe Rate Detail.

Four Channel Mode

Table 4 provides DMX channel mapping of all DMX512 control values when the SL eSTROBE 130 LED Luminaire is in Four Channel mode (as set by the luminaire's menu system).

Table 4: SL eSTROBE 130 LED Luminaire DMX Channel Mapping (Four Channel Mode)

DMX Channel	Parameter	Range DMX	Range%	Default- recommended console default values	Description
1	Intensity	0 - 255	0 - 100%	0	8 bit control for Intensity of LED settings
2	Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration, Range is 0-255 White light mode (when strobe rate is also at 255) Please refer to the Strobe Duration Detail
3	Strobe Rate	0 - 255	0 - 100%	0	Strobe rate slow to fast. White light mode (when strobe duration is also at 255) Please refer to the Strobe Rate Detail.
4	Effects	0 - 255	0 - 100%	0	Controls strobe operations as follows: No Effect = DMX 0-5 Ramp Up = DMX 6-42 Ramp Down = DMX 43-85 Ramp Up/Down = DMX 86-128 Random = DMX 129-171 Ring 1 = DMX 172-173 Ring 2 = DMX 174-175 Ring 3 = DMX 176-179 Ring 4 = DMX 180-182 Checker pattern A = DMX 183-184 Checker pattern B = DMX 185-186 Random zones = DMX 187-214 Circle zone chase clockwise = DMX 215-235 Circle zone chase counter-clockwise = DMX 236-255

16-Bit Mode

Table 5 provides DMX channel mapping of all DMX512 control values when the SL eSTROBE 130 LED Luminaire is in 16-Bit mode (as set by the luminaire's menu system).

Table 5: SL eSTROBE 130 LED Luminaire DMX Channel Mapping (16-Bit Mode)

DMX Channel	Parameter	Range DMX	Range%	Default- recommended console default values	Description
1 2	Intensity High Intensity Low	0 - 65535	0 - 100%	0	16 bit control for Intensity of LED settings
3	Effects	0 - 255	0 - 100%	DMX 0	Controls strobe operations as follows: No Effect = DMX 0-5 Ramp Up = DMX 6-42 Ramp Down = DMX 43-85 Ramp Up/Down = DMX 86-128 Random = DMX 129-171 Ring 1 = DMX 172-173 Ring 2 = DMX 174-175 Ring 3 = DMX 176-179 Ring 4 = DMX 180-182 Checker pattern A = DMX 183-184 Checker pattern B = DMX 185-186 Random zones = DMX 187-214 Circle zone chase clockwise = DMX 215-235 Circle zone chase counter-clockwise = DMX 236-255
4	Control Channel	0 - 255	0 - 100%	0	Please refer to the Control Channel detail.
5	Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration, Range is 0-255 White light mode (when strobe rate is also at 255) Please refer to the Strobe Duration Detail
6	Strobe Rate	0 - 255	0 - 100%	0	Strobe rate slow to fast. White light mode (when strobe duration is also at 255) Please refer to the Strobe Rate Detail.

Zone Mapping Mode

Table 6 provides DMX channel mapping of all DMX512 control values when the SL eSTROBE 130 LED Luminaire is in Zone Mapping mode (as set by the luminaire's menu system).

Table 6: SL eSTROBE 130 LED Luminaire DMX Channel Mapping (Zone Mapping Mode)

DMX Channel	Parameter	Range DMX	Range%	Default	Description
1 2	Master Intensity - High Master Intensity - Low	0 - 65535	0 - 100%	0	16 bit control for Intensity of LED settings.
3	Effects	0 - 255	0 - 100%	0	Effects.(Refer to the Effects detail)
4	Control Channel	0 - 255	0 - 100%	0	Control Channel(Refer to the Control Channel detail)
5	Zone 1 Intensity	0 - 255	0 - 100%	0	8-bit control for zone Intensity.
6	Zone 1 Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration(Refer to the Strobe Duration Detail.)
7	Zone 1 Strobe Rate	0 - 255	0 - 100%	0	Strobe's rate slow to fast.(Refer to the Strobe Rate detail)
8	Zone 2 Intensity	0 - 255	0 - 100%	0	8-bit control for zone Intensity.
9	Zone 2 Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration(Refer to the Strobe Duration Detail.)
10	Zone 2 Strobe Rate	0 - 255	0 - 100%	0	Strobe's rate slow to fast.(Refer to the Strobe Rate detail)
11	Zone 3 Intensity	0 - 255	0 - 100%	0	8-bit control for zone Intensity.
12	Zone 3 Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration(Refer to the Strobe Duration Detail.)
13	Zone 3 Strobe Rate	0 - 255	0 - 100%	0	Strobe's rate slow to fast.(Refer to the Strobe Rate detail)
14	Zone 4 Intensity	0 - 255	0 - 100%	0	8-bit control for zone Intensity.
15	Zone 4 Strobe Duration	0 - 255	0 - 100%	0	Strobe's duration(Refer to the Strobe Duration Detail.)
16	Zone 4 Strobe Rate	0 - 255	0 - 100%	0	Strobe's rate slow to fast.(Refer to the Strobe Rate detail)

CLEANING AND CARE

WARNING! All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when the luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the luminaire. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

1. Special Cleaning and Care Instructions

Being a solid-state luminaire, and unlike most luminaires, the SL eSTROBE 130 LED Luminaire requires very little routine maintenance by the user. This section covers portions of the luminaire that can be removed for cleaning.

The SL eSTROBE 130 LED Luminaire requires special care when it comes to cleaning the front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than the glass lenses used in traditional luminaires.

The following is a list of cleaning materials required to care for your SL eSTROBE 130 LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol*
- A mild soap solution.

Note: *Reagent grade isopropyl alcohol is good to use on the SL eSTROBE 130 LED Luminaire plastic optics with anti-reflection coatings.

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens, Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

WARNING! Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL eSTROBE 130 LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housing of the luminaire.

If you have any questions regarding the use or care of your SL eSTROBE 130 LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

2. Front Lens Cleaning

To clean the front lens:

- Step 1. Turn off the luminaire and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Centre.

WARNING! Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.

4. Accessories

Only Showline approved accessories should be used with your SL eSTROBE 130 LED Luminaire. For a list of available accessories from Showline, please see [“Accessories” on page 3](#). For questions regarding accessories, please contact your local Authorized Showline Dealer or Showline office.

TECHNICAL SPECIFICATIONS

1. Operational Specifications

Source:	Cool White Array
Beam Angle:	120 Degrees
Light Output:	>26,000 lumens
Color Temperature:	6500K
Input Voltage(AC):	100V to 240V (+/- 10%, auto-ranging)
Current(AC):	1.30 Amps (100V) / 0.54Amps(240V)
Power Consumption:	130 Watts(max)
Frequency:	50/60Hz
