CPR Products

CPR Masks and Equipment

At Emergency Response you will only find practical ideas in CPR.

That's why you will only find the best First Aid products at affordable prices—that's our promise to you.

It is well known that most people would not make mouth-to-mouth contact with a stranger for fear of disease transmission. Face shields and resuscitator masks are available to reduce this fear but how many trained in CPR will have their protection when it is needed?

The CPR Pen and CPR Key Ring addresses these concerns by having a Mouth-to-Mouth Protector inside a pen.

As long as the first aid provider carries the pen, key ring- they are ready to more safely perform CPR (and most people carry a pen).

The CPR Pen Mouth-to-Mouth Protector is small enough to fit inside the specially designed pen barrel but large enough to help protect the rescuer. To use it, unscrew the top cap, remove the face shield and tear open the packaging along the tear line.

Latex free 8"x 8" plastic shield to prevent direct contact with the victim

Printed land marks and instructions on how to use it to deliver breaths

Hydrophobic protective filter over the breathing hole to help prevent contact with a victim's saliva or blood yet allow sufficient ventilation*

Sterile plastic packaging

The pen comes with black ink and a medium ball point.

• \$12.00 each

Emergency Response

CPR Products

If you don't like to write then our CPR key Ring is what you need, "never be caught out ever".
Carry with you at all times, keys, purse or car or in your First Aid kit.

Emergency Response

Defibrillators & Equipment

Our newest generation Automatic External Defibrillator (AED).

For first Response professionals the Defibtech AED is standard equipment. For schools, offices, stores, factories, gyms, and public places, it's becoming as vital as the fire extinguisher.

This design technology makes it possible for every budget to afford a life-saving AED...

Mere seconds can mean the difference between life and death. So we provide an eye-catching AED (Automatic External Defibrillator) that can be located instantly. One that can be carried to the patient quickly without fumbling. One that can be used with minimal steps to analyze and treat the patient's condition.

- Pre -connected pads
- 5 year/125 shock lithium 9v battery
- 7 year/300 shock lithium 9v battery- available
 - 5 year warranty
 - Daily auto self testing
 - rated to dust protection
 - Rated for water protection
 - User's manual
 - Quick Use Card
- Compatible with all front line emergency ambulance defibrillators
 - Preparation kit includes:
Razor, Scissors, CPR mask
Towel, Gloves
 - Soft carry case
- Whole kit comes with prep carry case at no extra cost, just grab and use. +Free CPR key Ring

Brilliant Design

With its bright yellow and black coloring and attractive, sleek curves, the non- intimidating Lifeline AED (Automatic External Defibrillator) invites prominent display anywhere.

Latest Technology

The biphasic defibrillation we use is extremely effective at defibrillating patients in ventricular fibrillation - the most common form of Sudden Cardiac Arrest- on the first shock.

Emergency Response

Defibrillators

Easy to Use

The Lifeline AED (Automatic External Defibrillator) is designed for speed and simplicity. Built to the demanding standards of professional emergency personnel. Simple enough for non-medical users.

Lightweight, Durable

At just 4.2 pounds a child could carry it. Plus, the Lifeline AED (Automatic External Defibrillator)

Easy to use only two buttons

The Defibtech AED - reliable performance at a price you can afford.

BIG BUTTONS

The "Power On" and "Shock" buttons are oversized brightly lit so even the most nervous fingers will hit their mark.

Text light and voice sounds

A calm voice guides the responder step by step while a text display with lights shows the progress.
