

TX-130C

Digital CDMA2000 1X Handheld Portable Telephone

Thank you for choosing the up-to-date TX-130C, our new model, developed by top researchers to support the CDMA2000 1X system through Qualcomm-manufactured MSM6100 chips and CDMA technologies. This product allows for high speed communication services, such as web browsing, data & fax services, and a GUI animation menu.

Among its many advanced features, the T9 Input Mode makes it much easier to enter letters. In addition, the VR (Voice Recognition) makes it more user friendly, with proven technologies including:

- Full graphic display with 9 text input line and 1 icon line with variable font size.
- Easy to dial through the VR feature.
- Enhanced for web browsing & data services (i.e.; wireless internet Downloads, wireless fax send/receive, Openwave, UP browser)
- GUI & Animation display compliant with CDMA2000 1X.
- Full graphic main display - 260K color TFT LCD.
- Mobile Camera (SXGA 1.3 Mega Pixel)
- Navigation Key and 25 keys aligned for more convenience.
- Sophisticated features of speaker phone, and voice recognition.
- Additional services including text messaging and Web browsing on top of authentication, call forwarding, call transfer, call waiting.

Important Information

This TX-130C user guide contains very important information about how to handle and use the product. So please read this manual thoroughly, pay attention to the warranty on the back page and be alert to the exclusions and limitations of your warranty, which are related to the unauthorized use of components.

In Idle Mode -Press up to access the phone book, down to access the messaging menu, right to access the Schedule and left to access the Web.

Inside the menu -Within a menu, use to scroll through menu options. Press  to select an option.

SOFT KEYS: (MENU Key) Press to access the main menu or function displayed on the bottom line. **(Right Key)** Press to access your contacts. Press to access the function displayed on the bottom line.

KEY GUARD: Press and hold to enter Keyguard mode.

ETIQUETTE MODE: Press and hold to enter Etiquette (vibrate) Mode.

CLR KEY: Press to clear a digit from the display, to return to the previous page, or press and hold to enable speaker phone mode.

CAMERA KEY: Press to access pictures menu or press and hold to access your Camera Mode.

DISPLAY INDICATORS

Signal Strength

Current signal strength - the more lines, the stronger the signal.

Roaming

Phone is out of home area.

Service Indicator

 Indicates call is in progress,  indicates the phone cannot receive a signal from the system.

Message

Text, Voice, Web Alerts messages.

Digital Mode

Phone is operating in digital mode.

Battery

Battery charging level - the more blocks, the stronger the charge.

Mute

Phone is mute during a call.

Ring Mode

"Shows current ringer mode.

Emergency Call

Blinks when an emergency call is in progress.

Silent

Displays when silent mode is in use during a call.

Auto Answer

Phone is in answering machine mode.

Etiquette

Phone will vibrate when a call or message is received.

Speaker Phone

Phone is in speaker phone mode.

DISPLAY INDICATORS

Alarm

Appears when either an event or an alarm is set.

Dormant

Indicates the phone is in disconnection condition while on "Server Connection".

Fax Only

To receive a fax call.

Data Only

To receive an async. call.

Location Icon

Indicates whether the Location Service of your phone is Off/On.

1X

Phone is in the 1x service area.

Analog Mode

Phone is operating in analog mode.

Web Browser

Phone is in a web browser session.

TTY

TTY mode is active.

TTY mode is inactive.

Voice Privacy

"Voice Privacy" mode.

Phone Lock

Phone is locked.

Ear Jack

Headset is connected.

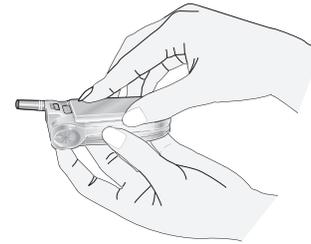

Secure

Phone is in "Secure" mode.

USING THE BATTERY

INSTALLING THE BATTERY

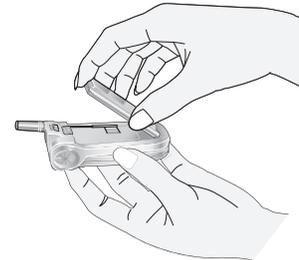

- 1 Place the battery on the back of the handset and slide into place.
- 2 Push the battery down until it locks into place.

NOTE: Make sure the battery is securely placed to avoid slipping off during a call.

REMOVING THE BATTERY

- 1 Pull down the release latch, lift up the battery.
- 2 Remove the battery from the handset.

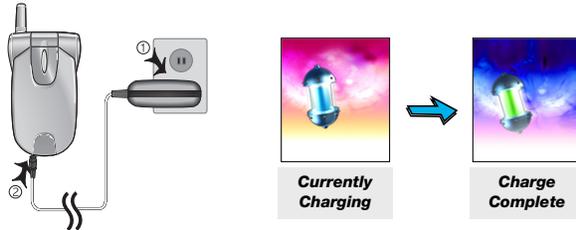

NOTE: If the battery is not correctly placed in the battery compartment, the handset will not turn on and/or the battery may detach during use.

CHARGING THE BATTERY

POWER CONNECTION

1. Plug the AC charger into a standard outlet.

NOTE:

1. Fully charge the battery before using - it is not charged when purchased.
2. It is more efficient to charge the battery with the phone turned off.

CHARGING THE BATTERY

BATTERY STANDBY TIMES

The operating time is subject to your handset usage and configuration.

	CDMA
STD 1100 mAh	190 hours
EXT 1700 mAh	290 hours

BATTERY TALK TIMES

The operating time is subject to your handset usage and configuration.

	DCS	PCS
STD 1100 mAh	210 mins	220 mins
EXT 1700 mAh	310 mins	350 mins

NOTE: These times are for a new battery. Talk and standby times may decrease over time.

BATTERY INFORMATION

Dos

- Only use the battery and charger approved by the manufacturer.
- Only use the battery for its original purpose.
- Try to keep batteries in a temperature between 41°F (5°C) and 95°F (35°C).
- If the battery is stored in temperatures above or below the recommended range, give it time to warm up or cool down before using.
- Completely drain the battery before recharging. It may take one to four days to completely drain.
- Store the discharged battery in a cool, dark, and dry place.
- Purchase a new battery when its operating time gradually decreases after fully charging.
- Properly dispose of the battery according to local laws.

Don'ts

- Don't attempt to disassemble the battery – it is a sealed unit with no serviceable parts.
- Don't accidentally short circuit the battery by carrying it in your pocket or purse with other metallic objects such as coins, clips and pens. This may critically damage the battery.
- Don't leave the battery in hot or cold temps. Otherwise, it could significantly reduce the capacity and lifetime of the battery.
- Don't dispose of the battery into a fire.

Chapter 2

BASIC OPERATION

This chapter explains the phone's basic functions including menus, volume levels, and call features.

- Using the Phone
- Using the Main Menu
- Menu Summary
- Basic Functions
- Functions During a Call
- Making an Emergency Call

USING THE PHONE

TURNING THE PHONE ON

1. Press and hold  until your "Telecom" logo appears and the melody begins to play.

- If "Password" appears on the display enter your 4-digits password to unlock your phone.
- The default password is the last 4 digits of your phone number.

TURNING THE PHONE OFF

1. Press and hold  until "Telecom" animation appears.

- NOTE:**
1. Immediately change or recharge the battery when "Low Battery Warning Power Off" appears on the display. Memory may possibly be damaged if the phone turns off due to the battery completely draining.
 2. Turn the phone off before removing or replacing the battery. If the phone is on, unsaved data may be lost.

- NOTE:** You can rotate the LCD counter-clockwise at an angle of 180 degrees. However, if you turn it by force, it can cause serious damage.

The screen can be turned and closed on top of the keys with the LCD facing outwards.

USING THE MAIN MENU

ACCESSING THE MENU

Your phone can be customised via the menu. Each function can be accessed by scrolling with the Navigation Key or by pressing the number that corresponds with the menu item.

1. To access the menu from the idle screen, press  [MENU].
2. To scroll through the menu, press the Navigation Key up and down.
3. To return to the previous page, press  [CLR]. To exit the current menu and return to the idle mode, press .
4. To enter a function when its main page is displayed, press  [OK]

● Hotkey

In idle mode, move the Navigation Key as follows to access these functions:

- Upward movement: Phone Book
- Downward movement: Messaging
- Rightward movement: Schedule
- Leftward movement: Web

If you are in a second-level menu, you may also navigate to the next or previous second-level menu by pressing the Navigation Key right or left.

BASIC FUNCTIONS

MAKING A CALL

1. Enter a phone number.

- **To modify the phone number you have entered:**

- To erase one digit at a time, press [CLR].
- To erase the entire number, press and hold [CLR].

2. Press .

The indicator , appears on the display.

- **If "CALL FAILED" appears on the display or the line is busy, press or .**

- **If you activate the "AUTO REDIAL" function, the phone will automatically retry for the number of times you have selected. (Refer to page 78)**
- **If the number you're calling is stored in the phone book, the name and number will appear when the call is placed.**
- **There is another way to make a call through the VR mode, which is called "VAD (Voice Activated Dialing)". Please refer to page 86 (Voice Service) for details on making calls using VAD.**

3. To end a call, press .

NOTE: Please refer to page 34 for more details about storing a phone number.

BASIC FUNCTIONS

PAUSE FEATURE

You can dial or save a phone number with pauses for use in the automated systems where you need to enter a credit card number, a social security number, or other numbers. This feature will be convenient when you are linked to an ARS (Advanced Record System).

1. To insert a pause, enter a phone number then press  [OPTIONS]. Select either a Hard Pause ("P" appears) or a Timed Pause ("T" appears).
2. To dial the number press , to store the number press  [SAVE].

- **Hard Pause:** When connected to an ARS, it will not proceed to the next number until you press  or .
- **Time Pause:** When connected to an ARS, it automatically proceeds to the next number after three seconds.

SPEAKER PHONE

The speaker phone feature allows you listen to audio through the speaker and talk without holding the phone.

1. To activate the speaker phone when the phone is in idle mode, answering mode or calling mode, press and hold .
2. The phone returns to normal (speaker phone off) after ending or call or when the phone is turned off and back on.

BASIC FUNCTIONS

ANSWERING A CALL

1. To answer a call, press any key except , , or . To enable a call, press .

● **In the Settings menu, you can select either "Any Key" or "Talk Key" to answer a call. If "Talk Key" is selected, the phone can only be answered by pressing .** See page 77 for more information.

2. To end the call, press .

NOTE: In Auto Answer Mode, a call is automatically answered after a preset number of rings. See page 78 for more details.

3 WAY CALLS

1. To add a third person to an existing call, press  to place the first caller on hold.
2. When you hear a dial tone, dial the second number and press .
3. When the second party answers press 3 then 'TALK' to connect all three parties.
4. To finish both calls, press . To end only the second call press .

NOTE: 3 Way Calls does not allow you to conference more than two parties at one time.

NOTE: 3 Way Calls is a network service, please call *123 to subscribe.

BASIC FUNCTIONS

CALL WAITING FUNCTION

Notifies you of an incoming call when you are on the phone by sounding a beep and displaying the caller's phone number on the screen.

1. To answer another call while on the phone, press . This places the first call on hold.
2. To switch back to the first caller, press again.

NOTE: *Call Waiting is a network service, please call *123 to subscribe.*

KEY GUARD

Your phone is equipped with a Key Guard function which prevents the phone from operating when keys are pressed accidentally, such as when you carry the phone in your bag while it is switched on.

1. To lock the phone, press and hold .
2. To unlock the phone, press any key then input the password.

- **Lock feature will deactivate when the phone is powered off. Upon next powered up, you will need to press to lock phone again.**
- **Press 1, 2, 3 to unlock the key guard.**

ETIQUETTE

Mutes key tones and activates the vibration mode to alert you of an incoming call or message.

1. To turn etiquette mode on/off, press and hold .

BASIC FUNCTIONS

ADJUSTING VOLUME

Volume can be adjusted by using the volume control keys on the side of the handset, or by using the menu.

1. Press [MENU] then select one of the following. To increase the volume press the Navigation Key upwards or to the right. To lower the volume, press it downwards or to the left.

- **Ringer** : Controls the ringer volume.
- **Key Tone** : Controls the key pad volume.
- **Voice Call** : Controls the earpiece volume.
- **Messages** : Controls the received messages alert volume.
- **Speaker Phone** : Controls the speaker volume.
- **Power On** : Controls the power on volume.
- **Power Off** : Controls the power off volume.

2. Adjust volume then press [OK] to save it.

NOTE: *To adjust the earpiece volume during a call, press the volume keys on the side of the phone or the Navigation Key (left or right).*

CALLER ID FUNCTION

Identifies the caller by displaying their phone number. If the caller's name and number are already stored in your phone book, they both will appear. This feature is system dependent. Please contact your service provider for details.

NOTE: *Caller ID calls are stored in the call history.*

FUNCTIONS DURING A CALL

To display menu options during a call, press  [MENU]. These menu items are available while you are on a call.

MUTE (UNMUTE)

The caller cannot hear you or any sounds from your side but you can still hear them.

1. Press  [MENU] .

- **To deactivate, press  [MENU] .**
- **The phone will automatically unmute in Emergency Call or Callback mode.**

SPEAKER MODE

Activates the speaker phone when you are on a call. The phone returns to normal (speaker phone off) after ending or call or when the phone is turned off and back on.

1. Press  [MENU] .

SILENT (SILENT QUIT)

Prevent the other end from hearing tones if any key is pressed during a call.

1. Press  [MENU] .

- **To deactivate it, press  [MENU] .**

FUNCTIONS DURING A CALL

SEND MY PHONE

Automatically transmits your phone number to a pager during a call. (Dependent on pager service)

1. Press  [MENU] .

LOCATION

Enables the network to locate your current location through Global Positioning System (GPS). (Refer to page 68 for more details.)

1. Press  [MENU] .

PHONE INFO.

Notifies you of your handset information. Please see page 82 for more details.

1. Press  [MENU] .

PHONE BOOK

Displays the Phone Book menu.

1. Press  [MENU] .

FUNCTIONS DURING A CALL

CALL HISTORY

Displays the Call History menu.

1. Press  [MENU] .

MESSAGING

Enables you to send a message (SMS) during a call.
(Refer to page 113 for more details.)

1. Press  [MENU] .

MAKING AN EMERGENCY CALL

This 111 feature automatically places your phone in the Emergency Call Mode when you dial the preprogrammed emergency number, 111. It also operates in the lock mode and out of the service area.

111 IN LOCK MODE

The “111” call service is available even in the lock mode.

1. Enter “111” then press .
2. The call connects.
3. The phone exits the Lock Mode for 5 minutes.
4. To exit emergency mode, press .

- **When the call ends, the phone returns to Lock Mode.**

111 USING ANY AVAILABLE SYSTEM

1. Enter “111” then press .
2. The call connects.
3. The phone remains in Emergency Mode for 5 minutes.
4. To exit emergency mode, press .

- **The phone continuously attempts to receive service from any available system.**

MEMO

Chapter 3

MEMORY FUNCTION

This chapter explains numerous functions including saving phone numbers to the internal phone book, entering text and accessing call logs.

- Storing Phone Numbers
- Text Input Methods
- Speed Dialing
- Call History
- Phone Book

STORING PHONE NUMBERS

The phone book stores up to 300 entries.

1. Enter phone # then press or press [OPTIONS] then select "Save".
2. Choose "New Entry" or "Existing Entry".
To select, press [OK].
3. The Phone # will appear above a list of icons.
The name of the icon is displayed below the list.
Use the Navigation Key to choose the type of # you're adding, as indicated by the icon.
To select, press [OK].
4. Enter a name then press .
Follow instructions for entering text on page 35.
To change the input mode, press [Abc].
5. Use the Navigation Key to scroll through more options for the entry (group, other numbers, ringer).

- Mobile:** Enter mobile phone number.
- Home:** Enter home phone number.
- Office:** Enter office phone number.
- Pager:** Enter pager number.
- FAX:** Enter fax number.
- E-Mail:** Enter E-Mail address.
- Wireless Addr.:** Enter Homepage address.
- Group:** Personal, Business, Etc.
- Ringer:** Select Ringer Type.
- Msg.Ringer:** Select Msg.Ringer Type.
- Graphic:** Select a picture image.
- Memo:** Enter memo.
- Set Secret:** Lock, Unlock.

6. To store the entry, press [SAVE].
"Phone Book Entry Saved!" or "Entry edited!" will be displayed.

TEXT INPUT METHODS

ENTERING CHARACTERS

Your phone offers several text input methods for convenient entry of memory location names and text messages:

Abc mode: Enters words by repeatedly tapping the corresponding key until the desired character is displayed.

T9WORD: Tap each corresponding key only once and the phone predicts the word you are entering.

Numeric mode: Only enters numbers.

Symbol mode: Enters symbols like @, #, %.

ALPHA MODE [Abc]

Use the digit keys to enter letters, numbers and characters.
Enter letters using the keypad as follows:

Key Pad	1 Repetition	2 Repetitions	3 Repetitions	4 Repetitions	5 Repetitions
1	1	-	?	,	!
2ABC	A	B	C	2	...
3DEF	D	E	F	3	...
4GHI	G	H	I	4	...
5JKL	J	K	L	5	...
6MNO	M	N	O	6	...
7PQRS	P	Q	R	S	7
8TUV	T	U	V	8	...
9WXYZ	W	X	Y	Z	9

To change the input mode, press [Abc].

- **To enter a space, press .**
The cursor will automatically move to the next column.
- **Repeat until letters are entered.**
There is a 16-letter limit.
- **To delete one digit, press [CLR].**
To delete the entire entry, press and hold [CLR].
- **To change from lowercase to uppercase, press .**

TEXT INPUT METHODS

T9™ PREDICTIVE TEXT MODE [T9Mode]

To choose T9™ mode from the Editor screen press  [Abc], then choose [T9Word]. This mode predicts the words you are entering using a built-in dictionary. With T9™ predictive text input, you press each key only once for each letter. The chart below outlines how to use T9™ mode.

KEY	FUNCTION
 Mode	Press to change mode. [T9Word][Abc][Num][Symbols].
 Next	Press to view the next matching word if the highlighted word is not the word you intended.
 Space	Press to accept a word and add a space.
 Shift	Press to select a letter case of the standard text input or T9 text input mode. [Abc], [ABC], and [abc] indicate the standard text input. [T9word], [T9Word], and [T9WORD] indicate the predictive text input.
 Clear	Press to delete a character to the left of the cursor.
 Save	Store the letters and numbers you enter.

TEXT INPUT METHODS

T9 Predictive Text Mode

1. Press each key once for each letter of the word you are writing.

- To write **John** with the English dictionary selected:

1. Press 5 once - (for - k)
2. Press 6 once - (for - km)
3. Press 4 once - (for - log)
4. Press 6 once - (for - john)

NOTE: *The display shows for each key pressed.*

2. Press  until the correct word is displayed.

3. To select the correct word, press  .
If the T9 mode does not recognize or suggest the word you want to enter, re-enter the name in the Alpha ABC mode.

NOTE: *When entering more than one word in T9Word Mode, enter the first word then press  to insert a space and start the next word.*

TEXT INPUT METHODS

NUMERIC MODE [Num]

Numeric mode allows you to add a number to your entry/message. To select numeric mode from the Editor screen press  [Abc], then select [Num].

SYMBOL MODE [Symbols]

Symbol mode allows you to add various symbols to your entry. Whether you are adding an e-mail address to your phone book or sending an expressive message, symbols make these entries easier.

To select symbol mode from the Editor screen press  [MODE] then choose [Symbols].

Use the Navigation Key to select the symbol.

The corresponding key number for that symbol will appear as well. Use the Navigation Key to select the symbol.

To move to the next screen of symbols press .

SPEED DIALING

SPEED DIAL

Dials a number simply by pressing and holding its Speed Dial location number. For a 2-digit location number, press the first number then press and hold the second number. To store a number in Speed Dial:

1. Press  [MENU]  .
2. To assign a phone number to a location, select the location then press  [SET].
3. The phone book list will be displayed alphabetically. Select a name then press .
4. "Speed Dial # X Edited!" will be displayed.

● **If a phone number is already assigned to the location, press  [ERASE] then the Navigation Key to delete.**

● **If the entry is set to secret, you will be asked for your password.**

ONE-TOUCH/TWO-TOUCH DIALING

Ideal for frequently dialed numbers, this feature allows phone book entries to be dialed via the keypad with only one or two key presses.

ONE-TOUCH/TWO-TOUCH DIALING:

- 2-9 : Press the corresponding memory number and hold for more than 1 second.
- 10-20 : Press the first digit and second digits of the memory number short and long respectively.

- **If no phone number is stored in the location entered, "There is no number" will appear on the screen.**
- **If the entry is set to secret, you will be asked for your password.**
- **To One-Touch voicemail press and hold "1".**

CALL HISTORY

To access Call History from the idle mode, press  [MENU] .

ALL CALLS

- 2.1. Select a text message then press  [OK].
The text message is displayed.

- 2.2. To erase message, press  [ERASE].

3. Press  [OPTIONS].

- 4.1. If the text message is saved from the "Inbox" menu, this screen will be displayed.

● **To select inbox menu: Reply, Reply with Copy, Forward, Erase, Save to Contact, Save to Quick Text, Lock & Unlock**

- 4.2. If the text message is saved from the "Outbox" menu, this screen will be displayed.

● **To select outbox menu: Resend, Send To, Erase, Save to Contact, Lock & Unlock**

5. Select one by pressing  [OK].

QUICK TEXT

QUICK TEXT

To view/edit the Quick Text messages:

1. Press [MENU] or press .
- 2.1. Select a Quick Text message from the list.
Press [OPTIONS].
- 2.2. To add a new Quick Text message, press [ADD NEW]. To edit the Quick Text message you have selected, press [EDIT].
3. To erase the saved Quick Text message, press [ERASE].

ERASE ALL

ERASE MESSAGES

1. Press [MENU] or press .
- 2.1. To erase all the voice mail, press .
- 2.2. To erase all the inbox messages, press .
 - **Read Msg : To erase all messages already read.**
(However, the locked Message(s) will not be deleted).
 - **All Msg : To erase all messages.**
- 2.3. To erase all the outbox messages, press .
- 2.4. To erase the saved messages, press .
- 2.5. To erase the web alerts messages, press .
- 2.6. To erase all Quick Text, press .
3. Press [YES] or [NO].

SETTINGS

Manages messaging features through various features.

SAVE SENT MSG

1. Press [MENU] or press .
2. Select “Off”, “On” or “Prompt” with the Navigation Key.
3. Press [OK].

DEFAULT CALLBACK

Edits the default callback number so that the recipient can call back or reply.

1. Press [MENU] or press .
2. Input a callback number.
3. Press .

● Press [FIND] to find a number from the phone book.

REMINDER

Enables phone to alert you of an incoming message.

1. Press [MENU] or press .
2. Select “Off” or “On” with the Navigation Key.
3. Press [OK].

SETTINGS

AUTO ERASE

Automatically erases inbox/outbox messages when new messages arrive.

INBOX

1. Press [MENU] or press .
2. Press . Select “Disable” or “Read Msg” with the Navigation Key.
3. Press [OK].

OUTBOX

1. Press [MENU] or press .
2. Press . Select “Disable” or “Old Msg” with the Navigation Key.
3. Press [OK].

ENTRY MODE

Sets an Entry Mode as a default. For example, if T9 Mode is the default, its icon will appear.

1. Press [MENU] or press .
2. Select “Alpha Mode” or “T9 Mode” with the Navigation Key.
3. Press [OK].

SETTINGS

MESSAGE LOG

INCOMING LOG

1. Press [MENU] or press .
2. Press . Displays information on the incoming messages including "Stored Msg/Read Msg".
3. To return to the previous page, press [OK].

OUTGOING LOG

1. Press [MENU] or press .
2. Press . Displays information on the outgoing messages such as "Sent Msg".
3. To return to the previous page, press [OK].

RESET LOG

1. Press [MENU] or press .
2. Press . Select "Incoming Log" or "Outgoing Log" with Navigation Key.
3. "Reset Incoming/Reset Outgoing Log?" will be displayed. Press [YES] or [NO].

SETTINGS

RETRY TIME

1. Press [MENU] or press .
2. Select on of the following with the Navigation Key.
 - **3 mins/5 mins/10 mins/30 mins.**
3. Press [OK].

EDIT VOICE CB#

1. Press [MENU] or press .
2. Input a new voice call back number or edit voice call back number.
 - **Press [FIND] to find a number from the phone book.**
 - **To insert a pause, enter a phone number then press [OPTIONS]. Select either a Hard Pause ("P" appears) or a Timed Pause ("T" appears).**
3. Press .

MEMO

Chapter 7

DOWNLOADS & INTERNET

This chapter explains using you phone to access the Wireless Internet.

- Downloads
- Start Internet Browser
- Browser Menu

DOWNLOADS

Your mobile phone provides a unique feature -Downloads- that enables you to download games, ringers, screen savers, applications and more from your network to your mobile phone. Please contact your service provider for the availability of these services.

START DOWNLOADS

1. To launch "Downloads" from the standby mode, press  [MENU] .
2. When three or more icons appear on the screen, select an application with Navigation Key.
3. To start the application, press  [OK].
4. To end the application, press . The phone will return to the standby mode.

DOWNLOADING APPLICATIONS

1. Press  [MENU]  .
2. Select "Get New" with Navigation Key and press  [OK].
3. The phone will access your service provider's server. Follow the prompt to download applications.

DOWNLOADS

GAMES

You can play a variety of entertaining and graphically-rich games on your mobile phone. New games are easy to download and play.

1. Press  [MENU]  .
2. Select "Get New" then press  [OK]. The Mobile Browser will launch and take you to the "Game" download menu.
3. Use the Navigation Key to select the game you wish to download.
4. From the item information page, select "Purchase".
5. A confirmation page will notify you that the game has been purchased and show the folder where the game is stored. To download the game, select "Downloads".

DOWNLOADS

RINGERS

1. Press  [MENU]  .
2. Select “Get New” then press  [OK].
The Mobile Browser will launch and take you to the “Ringers” download menu.
3. Use the Navigation Key to select a ringer you wish to download.
4. From the item information page, select “Buy”.
5. A confirmation page will notify you that the ringer has been purchased and is stored in the “Ringers” folder.
To download the ringer, select “Download”.

DOWNLOADS

SCREEN SAVERS

1. Press  [MENU]  .
2. Select “Get New” then press  [OK].
The Mobile Browser will launch and take you to the “Screen Savers” download menu.
3. Use the Navigation Key to select a Screen Saver you wish to download.
4. From the item information page, select “Buy”.
5. A confirmation page will notify you that the Screen Saver has been purchased and is stored in the “Screen Savers” folder. To download the Screen Saver, select “Download”.

DOWNLOADS

APPLICATIONS

1. Press  [MENU]  .
2. Select “Get New” then press  [OK].
The Mobile Browser will launch and take you to the “Applications” download menu.
3. Use the Navigation Key to select a Application you wish to download.
4. From the item information page, select “Buy”.
5. A confirmation page will notify you that the Application has been purchased and is stored in the “Applications” folder. To download the Application, select “Download”.

START INTERNET BROWSER

ACCESS THE INTERNET

Your TX-130C allows you to browse various Internet websites directly from your phone. This provides you with access to up-to-date information such as news, sports, weather and entertainment information when you subscribe to Internet service with your service provider. Please contact your service provider for a list of available websites and service details.

1. To start your Internet browser and access websites through your wireless handset press  [MENU]  or press  or press .

BROWSER MENU

BROWSER MENU

The browser menu lists the actions necessary to operate the browser.

Once in the web browser, Press and hold  or press  to access the browser menu.

BACK

- ◆ To return to the previous page, press  [MENU] .

HOME

- ◆ To display the homepage, press  [MENU] .

FORWARD

- ◆ To forward to the next page, press  [MENU] .

BOOKMARKS

- ◆ To view your “Bookmark List”, press  [MENU] .
- This provides easy website access without entering a URL.

SEARCH

- ◆ To launch a “Google” search, press  [MENU] .

GO TO URL

- ◆ To enter and access a URL, press  [MENU] .

BROWSER MENU

SHOW URL

- ◆ To display the current URL, press  [MENU] .

RELOAD

- ◆ To refresh the current URL, press  [MENU] .

SETTINGS

- ◆ To access the mobile browsing settings menu, press  [MENU] .

HOMEPAGE

Show the homepage URL.

- ◆ To select “Homepage”, press .

DOWNLOADS

Allows the user to turn on/off object display (images and sounds).

- ◆ To select “Downloads”, press .

RESTART BROWSER

Restarts the mobile browsing dumping the cache and returning to the home page.

- ◆ To select “Restart Browser”, press .

VIEW TITLE REGION

Sets the mode and display for long title URL:

- ◆ To select “View Title Region”, press .

BROWSER MENU

SCROLL MODE

Sets the mode and scrolling speed for long texts.

- ◆ To select “Scroll Mode”, press .

SEND REFFERER

This is the menu for URL sending when users try to connect a new site.

- ◆ To select “Send Refferer”, press .

KEY PRESS TIMEOUT

Selects the duration for how long the mobile browsing will wait for acknowledgement after key press.

- ◆ To select “Key Press Timeout”, press .

SECURITY

Accesses the security menu and settings.

- ◆ To select “Security”, press .

HISTORY

- ◆ To display URLs that you visited recently, press  [MENU] .

ABOUT...

Displays the name of the supplier of the Mobile browsing, the Mobile browsing software version and root certificate list.

- ◆ Press  [MENU] and select “About...” with pressing the “Down Navigation Key”, then press .

Chapter 8

SAFETY AND WARRANTY

- Safety Information for Wireless Handheld Phones
- Safety Information for FCC RF Exposure
- SAR Information
- FDA Consumer Update

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

Read This Information Before Using Your Handheld
Portable mobile phone

EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

ANSI C95.1 (1992) *
NCRP Report 88 (1986) *
ICNIRP (1996) *

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951).

The design of your mobile phone complies with the FCC guidelines (and those standards).

1* : American National Standards Institute.
2* : National Council on Radiation protection and measurements.
3* : International Commission on Nonionizing Radiation Protection.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorised antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

DRIVING SAFETY

Talking on the phone while driving is extremely dangerous and is illegal in some areas. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them.

Also, if using your mobile phone while driving, please:

- Give full attention to driving. Driving safely is your first responsibility.
- Use hands-free operation, if available.
- Pull off the road and park before making or answering a call, if driving conditions require.

If you must use the phone while driving, please use one-touch, speed dialing, and auto answer modes.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

WARNING: Failure to follow these instructions may lead to serious personal injury and possible property damage.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

ELECTRONIC DEVICES

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (152.40mm) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers :

- ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on.
- Do not carry the phone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

ELECTRONIC DEVICES

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Posted Facilities

Turn your phone OFF where posted notices so require.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

OTHER SAFETY GUIDELINES

Aircraft

FCC Regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas

To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.

Potentially Explosive Atmospheres

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle’s engine.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

PRECAUTIONS AND WARNINGS

Please read and understand all of the Precautions and Warnings contained in this manual before attempting to operate your phone.

1. DO NOT use this equipment in an extreme environment where high temperature or high humidity exists, such as near a heater or in a closed car parked in the sun.
2. DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using the unit, lay down the unit to avoid possible damage due to instability.
3. DO NOT expose this equipment to liquids such as rain or spilled beverages.
4. DO NOT use unauthorised accessories. Use of unauthorised accessories may result in fire, electric shock or other bodily injury.
5. DO NOT disassemble the phone or its accessories. If service or repair is required, return the unit to an authorised service center. If unit is disassembled, the risk of electric shock or fire may result.
6. DO NOT short-circuit the battery terminals with metal items etc.
7. DO NOT use harsh chemicals, cleaning solvents or strong detergents to clean this phone. Always clean it with a soft, damp cloth.
8. DO NOT paint this phone. This can clog moving parts.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

OPERATING PROCEDURES

Never violate any of the following Rules and Regulations of the FCC when using your phone. The following offenses are punishable by fine, imprisonment, or both:

- Using obscene, indecent, or profane language.
- Using the unit to give off false distress calls.
- Wiretapping or otherwise intercepting a telephone call, unless that person has first obtained the consent of the parties participating in the call.
- Making anonymous calls to annoy, harass, or molest other people.
- Charging to an account without authorisation to avoid payment for service.
- Refusing to yield a party line when informed that it is needed for an emergency call (It is also unlawful to take over a party line by stating falsely that it is needed for an emergency).

SAFETY INFORMATION FOR FCC RF EXPOSURE

WARNING! Read this information before using your phone

CAUTION

In August 1996, the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

Body-worn Operation (Holster Part Number : 2H020665002)

This device was tested with holster (Part No:2H020665002) for body-worn operation with the back of the phone kept 0.59 inches (15mm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.59 inches (15mm) must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. All belt-clips, holsters and similar accessories used by this device must not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with FCC RF exposure limits and should be avoided.

Note: For more information about RF exposure, please visit the FCC website at www.fcc.gov.

SAR INFORMATION

THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.* Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.15 W/kg and when worn on the body,

SAR INFORMATION

as described in this user guide, is 0.633 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID PP4TX-130C.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at <http://phonefacts.net>.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

**U.S. Food and Drug Administration -
Center for Devices and Radiological Health
Consumer Update on Mobile Phones**

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;

- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.

FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term "wireless phone" refers here to handheld wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety

guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be predisposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years' follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is FDA doing to find out more about the possible health effects of wireless phone RF?

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF).

FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.

FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators.

The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects.

Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (<http://www.fcc.gov/oet/rfsafety>) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.

8. What has FDA done to measure the radiofrequency energy coming from wireless phones ?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, "Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test

methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and

increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000.

FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:

MEMO

Chapter 9

WARRANTY

- Protect Your Warranty
- 12 Month Limited Warranty

PROTECT YOUR WARRANTY

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit.

“Warranty does not apply to... or to any product or part there of which has suffered through alteration... mishandling misuse, neglect or accident”.

Many companies are making look alike accessories and in some cases, promoting that their product is equal to or better than the product Becareful. Some of these products may not be compatible to use with your product and may damage the unit or cause it to malfunction. It service is required on your unit and it is determined that a non-Pantech accessory has created the problem with your unit the Warranty with not apply. In addition if the unit has already suffered irreversible damage by reason of a noncompatible accessory the Warranty will be voided. To protect your Warranty use only compatible accessories which cannot damage or interfere with the functioning of your product.
