Time machine

 Reserve met | Closed: 6:40 pm, Sat 1 Oct 2005

Unfinished project.

Started making a machine to facilitate time travel, unfortunately I just don't have the time to complete it.

Have had mixed results, so no guarantees.

Would suit DIY handyman with quantum physics background or similar interest.

No time wasters please !

Would consider swap for anti-gravity machine

Questions and answers

- Q** Do you have the flux capacitor to go with this? I can't see it in the photo.. *posted by: [studio1](#) (417 )* 5:06 pm, Tue 27 Sep
- A** This model does not use a flux capacitor to reduce the time dilation effect. Are you sure you know what you are doing ?
- Q** Does this run on mains? What's the reserve? What will postage be to Palmerston North? *posted by: [izzy_dude](#) (90 )* 8:24 pm, Tue 27 Sep
- A** The machine can be self powered if you can find a source of Uranium 235. Alternatively it can run of mains power supply. Postage anywhere in NZ, anytime \$5
- Q** haha. great stuff. +bids+ *posted by: [westyandseven](#) (124 )* 4:20 am, Wed 28 Sep

A haha. If its so great why arent you bidding ?

Q I've got a space continuum transfunctioner. Would you consider swaping it for that? It's a bit rough and ready and blows a little blue smoke but appears to be running ok. *posted by: [allmypukunui](#) (25 ★★) 10:23 am, Wed 28 Sep*

A space continuum transfunctioners are old school. I used to have one and it blew blue smoke too, just before it blew up. Get rid of it now.

Q I'd like to go back & see my Great Uncle Rodney when he was 18 because he skulled a jug of beer in only 3.2 seconds & I'd certainly like to see that! I'm pretty sure that I have the necessary skills to complete the project too. I got a C+ in 4th form Science & two sticky red stars. *posted by: [mrshin](#) (372 ★★) 1:34 pm, Wed 28 Sep*

A Certainly an event worthy of time travel. And if any one can get this puppy working, its you - with your fancy two red stars, and forth form education.

Q Will this machine be capable of going forwards as well as backwards it time. I built one in 2052 that only went backwards and I haven't been able to get back to my time. I need one that can go boths ways so I can come back to this time to feed the cat I have. *posted by: [jd10](#) (234 ★★) 2:07 pm, Wed 28 Sep*

A interesting dilema, but simply answered by the formula : $dt = dt' \cdot (1 - v^2/c^2)^{1/2}$ which i have designed the device around, in theory past and future travel should be possible. I have sympathy for you and your cat, but when amateurs play with time travel this is what happens.

Q i loove it... its a master piece in progress ;p *posted by: [mooona](#) (254 ★★) 6:47 pm, Wed 28 Sep*

A this is not a piece of conceptual art. it is a very serious quantum level time travelling device - well would be if it worked.

Q Does it have fast forward, rewind and pause? *posted by: [izzy_dude](#) (90 ★★) 9:21 am, Thu 29 Sep*

A Time is a little more complicated than fast forwarding, rewinding and pause. The time reference dilator is capable of such functions but the theory behind it is somewhat unproven. It does have an eject button if thats any help ?

Q Here's a curly question... If I traveled back in time to when I was ten years old, do you think it would be illegal for me to fondle my younger self? *posted by: [absolut](#) (22 ★★) 2:13 pm, Thu 29 Sep*

A in a court of law i believe what you are describing would be classed as Self pleasure, or perhaps self abuse Either way both are perfectly legal no matter what the age. If you were caught they would have issues proving it via DNA anyway

Q Back in '82, I used to be able to throw a pigskin a quarter mile. Would this machine be able to take me back in time so I could take State? *posted by: [nzjafa](#) (2 ★) 3:10 pm, Thu 29 Sep*

A you need to give up on your glory years, and live for the now. A quarter mile is pretty impressive though, is that for real ?

Q Does the eftpos machine work on Pre-pay time credits or pay as you travel? *posted by: [steve__](#) (28 ★★) 3:31 pm, Thu 29 Sep*

A i see you have mistaken the time defliberator for an old eftpos machine. Easy mistake for beginners to time travel to make, they do look similar.

Q If I am successful with my bid, do you think there is sufficient grunt in the machine to go back to the beginning of this auction, wipe out all memory of it, so I don't have to pay you. *posted by: [bubbs29](#) (83 ★★) 4:04 pm, Thu 29 Sep*

- A** if the auction dosnt take place, you would never have the time machine, so you would be stuck in the past, with no machine to get back to the present. time is a dangerous thing to play with, and you really need to carefully consider the consequences, before you start mucking with the past, and breaching time continuation
-
- Q** Ha! Call me an amateur. I just fixed my time machine. All I had to do was put the AA batteries in the other way round and now it goes forwards in time! See you suckers later, Im going back to the future. Oh and as a heads up to the winner of this auction everything in the future is chrome *posted by: [jd10](#) (234 ) 4:29 pm, Thu 29 Sep*
- A** Please note AA batteries were only invented in 1968 so dont go back beyond this time. Also they will be phased in 2010 due to the invention of the organic fuel cell, brought on by the severe depletion of the worlds battery resources. So dont go forward in time past this date.
-
- Q** Yes I do know what I am doing.. without the flux capacitor I can't modulate the 21 gigawatts of energy I need to transmogrify the time / space continuum. So far all attempts to locate a flux capacitor have proved fruitless, hence why I haven't been able to time travel. They've got them in the future, but I can't get there to get one. *posted by: [studio1](#) (417 ) 4:39 pm, Thu 29 Sep*
- A** I dont know a great deal about flux capacitors as my machine does not use one. You could try getting in contact with Marty McFly, his delorean time machine is based on Flux capaitation and he maybe able to supply you with one. May pay to get a couple cos they dont last to long apparently. I think I saw one for sale on trademe a while back..
-
- Q** I have half of my cheese and tomato sandwich left from lunch, would you consider a trade? *posted by: [adamstar](#) (59 ) 4:44 pm, Thu 29 Sep*
- A** What kind of dressing ?
-
- Q** do you think i could get your theory on paper so i can build my own time machine, all i need is a prtble phone, efptos machine, shit coomputer tower, headset, spard floppy disc and some random wires,.....that way i can go back and have sex with any one i want no mater what they say and it would be legal because by the time i am back in this time i wouldnt of aged a bit so they will be looking for someone 15 years older..... this machine sounds great...maybe i could be a hero and stop the 7/1 *posted by: [sldwys1](#) (50 ) 4:48 pm, Thu 29 Sep*
- A** unfortunately its all in my head, and a bit hard to explain to people not hip with the theories behing time travel. you seems to have the parts down, but you also need a positive, can do attitude, and a certain amount of qunatum physics knowledge. And an awful lot of patience. it amazes me how many people wish to use time travel for sexual gratification, it is not what it was designed for.
-
- Q** I am particularly saddened to have been outbid. However \$9.52 was the limit of my budget (being as it is 76% of my annual income). By the way, what are these things that go whoosh when they pass my buggy on the road? *posted by: [rogerp](#) (517 ) 4:48 pm, Thu 29 Sep*
- A** Those things going woosh would be cars going the speed limit. You should consider a new job, a monkey gets paid more in a zoo.
-
- Q** Would it be safe for pets? *posted by: [bigbobthefob](#) (82 ) 5:10 pm, Thu 29 Sep*
- A** The testing I have carried out to date involved animals. I received varying results and dont want to disclose to much because the SPCA may get wind of this. Im sure if you were able to get it working correctly it would be safe for all organic life forms.
-
- Q** ATTENTION ALL BIDDERS AND WATCHERS ALIKE! I have already won this auction. I collected the incomplete model and I used my skills to complete the project in only 42 days. I then travelled back in time just to send you this message to prove that it

actually works ! I am a genius. Also the winning lotto numbers for this Saturday are: 6, 9, 23, 29, 32, 37 & 40. The powerball is 19. *posted by: [mrshin](#) (372 )* 5:20 pm, Thu 29 Sep

A Cool, it seems this auction ends with a successful bid. congratulations!

Q Hi ; can you confirm that the phase modulation has been accurately calibrated on this. I've read on the geeksquad forums that incorrectly calibrated phase modulation while time travelling can make a guy grow boobies. *posted by: [arcad23](#) (105 )* 5:29 pm, Thu 29 Sep

A I have noticed this i had put it down to old age and The Noodle Box but you have me thinking....

Q YES I HAVE A ANTI GRAVITY MACHINE THAT I WOULD LIKE TO SWAP. COULD YOU FINISH YOUR TIME MACHINE AND BRING IT TO TAURANGA AND GO BACK IN TIME TO WHEN MY ANTI GRAVITY MACHINE KICKED INTO GEAR AND FLOATED OFF TOWARDS THE SUN, IF YOU CAN DO THIS IT WILL PREVENT IT TAKING OFF AND THEN YOU CAN SWAP IT. THANKYOU FROM JASON. *posted by: [jase59](#) (180 )* 5:29 pm, Thu 29 Sep

A Sorry the reserve price has already been met.

Q Hi Mike, This is great!! My dad was once a Great Viking Warrior in his past life.This would make a great present for him to go back in time and find out where and when he was killed in battle.WATCHING WITH INTEREST!!! as he still displays many viking attributes today. *posted by: [dancer17](#) (231 )* 5:37 pm, Thu 29 Sep

A unfortunately you have missed fathers day. Possibly the perfect fathers day gift. good to see your motives are for time travel are genuine and historical, not to distort time or go on some crazy rampage, for your own gain. Good for you

Q If I bought this, and then went back in time and stopped myself buying the time machine, would I completely disappear? Or would it cause a rip in the space/time continuum and cause the earth to fold in on itself? *posted by: [cjh1](#) (477 )* 5:41 pm, Thu 29 Sep

A You see this is the issue. people like you who want to experiment with time and see "what would happen". What if the earth did fold in on its self...then what. Whoops! Time travel is very serious and there are HUGE repercussions, with breaking the time continuum. With time travel comes a certain responsibility to the rest of man kind.

Q can i go bak to when powerball was 16mill and win lotto,that would be fantastically methologacally great *posted by: [kurto48](#) (65 )* 6:16 pm, Thu 29 Sep

A A machine of this sort should not be used for personal gain...

Q sushi anyone ??????????? *posted by: [jmanshande](#) (229 )* 7:11 pm, Thu 29 Sep

A I rather like Noodle Box if your buying?

Q Can you please tell me how many speeds the dischargeable time synchroniser has. Also, does the machine operate at the same speed going forward as in going backwards, and if so how long would it take me to travel backwards 100 years. *posted by: [bubbs29](#) (83 )* 7:33 pm, Thu 29 Sep

A It is an older Synchroniser Forward is 16X Speed backwards 4X Speed

Q would you be willing to swap for The Tardis, which i have in my possession. Its the original that Doctor Who himself used. *posted by: [trade51](#) (27 )* 8:03 pm, Thu 29 Sep

A Does it come with Billie Piper?

- Q** hi does it have seating and for how many.does the phone work and what network is it on thankes *posted by: [alana30](#) (38 ★★) 8:15 pm, Thu 29 Sep*
- A** Sorry you will have to supply your own seats as i am now using mine in my home theater.
-
- Q** I have 3 money growing trees planted on the moon. Would you consider a trade for 1? *posted by: [shano38](#) (19 ★★) 8:40 pm, Thu 29 Sep*
- A** how big are these money trees, and how do you harvest the money, as i know for a fact moon travel is an impossibility. it is impossible to get to the moon to get harvest the money. despite this i will definately consider a swap.
-
- Q** Hey does this travel to 8.10pm Saturdays and then return to Friday nite. Mmmm this is sounding real good and hey cheap when you think of being able to win lotto each week. And ah this is just the start. Maybe I better consult the bank manager for a quicky loan. *posted by: [teddybearlady](#) (351 ★★) 8:43 pm, Thu 29 Sep*
- A** Funnilly enough I could never get it to travel to 8.10pm Saturday. What is your bank managers name and I can give him a call if you like. Lotto is small time - with the power to travel time you can think big.
-
- Q** howz it do u wana swap 4 my sole have a look at my listings *posted by: [lowedvtec](#) (43 ★★) 8:51 pm, Thu 29 Sep*
- A** That depends. What kind of shoe is your sole from?
-
- Q** Does this unit allow you to travel sideways through time, if so, how many miles to the litre? Also, could you confirm that this is a genuine time-travel device, as my last few time-machine purchases turned out to be frauds. *posted by: [brandooooon](#) (19 ★★) 8:53 pm, Thu 29 Sep*
- A** No it does not allow sideways travel through time as this unit was only designed to work 1-dimesionaly. It also does not depend on any non-renewable hydrocarbon resource for power. I can confirm this is a genuine work-in-progress and you would only be cheating yourself by not getting it working.
-
- Q** Hi Mike, on the previous listing, I asked a question, I believe it is still pertinent to this listing, could you please answer it, cheers Johnee. *posted by: [johnee](#) (230 ★★) 9:09 pm, Thu 29 Sep*
- A** If the device was currently working i would be able to go back in time to check your question, unfortunetly it is still in its unfinished state so you will need to repost the question.
-
- Q** could you give me the full formula for the physics of this machine, i will need it if i am going to continue to work on this invention, thanks *posted by: [godave](#) (36 ★★) 9:11 pm, Thu 29 Sep*
- A** Yes but it wont be what you expected!
-
- Q** If you dont have time why dont you just complete it and then go back in time to when you didnt have time and then you would have already finished it. Duh *posted by: [lin40](#) (4 ★) 9:41 pm, Thu 29 Sep*
- A** Your pretty smart! If you got this time machine i'd bet you would be smart enough to make it work... but your probably to busy trying to cure cancer or something.
-
- Q** Are you all completely out of your minds?? *posted by: [shebedevil](#) (162 ★★) 10:03 pm, Thu 29 Sep*
- A** Moon struck thunder over the swamp in autumn, rules and customs are disregarded. Contradictions say both yes and no and you must try to understand both sides.
-
- Q** i will be your giney pig on a bogus jerney if you send me back i will mack sure hallen

clark taks all her beauty sleep not just 2 hours a night ,i will allso make time stand still when when i get out bid on my next auction call me about the giney pig deal any "time" on 0900 spaceman. thanks 4 your time.ps do u have a buy now ,or yesterday ,or tomorw *posted by: [pepe5](#) (73 ★★) 10:13 pm, Thu 29 Sep*

A I have actually trialed this on a Guinea pig and the results were not pleasing. My legal advice is i need some serious arse consent forms signed before I do any more "trials". i actually have a theory that helen Clark is a space traveller from both a differnt time, planet and dimension. her politics actively demotes research into time travel,

Q have you programmed, or allowed for, a few memory times? perhaps so when you have to leave a time in a hurry you can do so? as i have a few 'jobs' i have to do, and they will require quick exit.... *posted by: [chris_2million](#) (21 ★★) 10:32 pm, Thu 29 Sep*

A Sounds awfully suspicious. Quantum physists are renowned for their high ethics and morals. I would have to question your motives and interest in time travel. It is unsafe to have just anyone travelling the tides of time, there is so much potential for so much damage to be done

Q Hi i have something that can solve your problems cheque out my listing 4 one preloved timeing light good nik has helped in meany time related matters like getting the dloren up in runing and my phonebox please reply to DR who at the red phonebox on the corner of the world just past santas place ,thanks 4 your time ps you can buy now the timeing light 4 \$one pot of gold,or a bank cheque. *posted by: [pepe5](#) (73 ★★) 10:36 pm, Thu 29 Sep*

A there is nothing wrong with the timing, the issue seems to be with the particle atomization unit, its making a clunking noise. And tends to rematerilise objects anatomically incorrect. I.e it once put a guinea pigs arse on its face, and its face on its arse.

Q I have noticed recent eddies in the space/time continuum. Does this reflect your recent testing regime with your machine? *posted by: [historyman](#) (284 ★★) 12:11 am, Fri 30 Sep*

A Perhaps or maybe your losing your mind?

Q Oops, another question: does the main power source have adaptive capability allowing for mating to an Improbability Drive? Second sub-question: is the user manual translated by the same guy that wrote on a \$2 shop toy "Plug you in and watch for educative flashing effect of lights"? *posted by: [historyman](#) (284 ★★) 12:16 am, Fri 30 Sep*

A One question per person please.

Q These questions and answers are the funniest thing I have ever seen on TradeMe! Brilliant! *posted by: [arrh](#) (209 ★★) 12:58 am, Fri 30 Sep*

A What that Auction for season 1 and 2 of Americas funniest home videos. That show is some funny as shit. Bob saget rocks Hard !!! that was the funniest thing I ever saw on trademe !

Q I would like to know where you got the patent for this time machine from.As i am part in a group of professionals dedicated to creating and marketing "spare time"...I believe a copyright infringmint may have ocured here by you. I will contact my research and development department (I believe they are on the couch in the middle of research atm) and discuss this further with them. *posted by: [woosh](#) (71 ★★) 8:20 am, Fri 30 Sep*

A Let them discuss all they like with a time machine copyright infringmint is not an issue.

Q I want to avoid the use of nuclear power and stick with mains. Have you worked out the number of metres of cable required per year of travel. Does it vary going forward or backward? I've got the recipe for elastic copper wire. Could this help in its range. If so perhaps some of those followong this auction would like to make me an offer. *posted by:*

[bazz34](#) (18 ★★) 10:08 am, Fri 30 Sep

A i havent figured out the length needed per year yet. I found out the hard way that a 20 metre cable isnt long enough for 5 years of time travel - the cord was yanked out at the wall, and I lost my cat inbetween times. retrieved the machine by pulling on the cord. Elastic copper wire could be useful for bungy time travelling.

Q ATTENTION ALL BIDDERS AND WATCHERS ALIKE! I have already won this auction. I collected the incomplete model and I used my skills to complete the project in only 42 days. A To ensure history continuity it is vital that you win this bid, and also do not meet your self in a differnt time. So you actually need to bid!!! Great to hear you got it going, was it the flux capacitor or the time reference dilator ?

Q I'm very interested in upgrading to your machine, as mine is getting a bit worn.....can I come and inspect your machine..?? How does last Wednesday sound...?? *posted by: [biggzblues](#) (29 ★★) 10:49 am, Fri 30 Sep*

A Sorry i had a court arraignment last Wednesday.

Q Do you have a perpetual motion machine for sale? *posted by: [jovi1](#) (100 ★★) 10:50 am, Fri 30 Sep*

A Of course not! Everyone knows this is impossible! Have you not read the laws of Thermodynamics?

Q I bet it isn't 90% fat free per 100 grams!! *posted by: [peanutaxis](#) (36 ★★) 10:54 am, Fri 30 Sep*

A I bet you it is.

Q Bubbs29 had an interesting question about wiping the auction. Your answer Miked was quite incorrect. I recently bid on http://www.trademe.co.nz/structure/listings/listings_search_results.asp?searchtype=GENERAL&searchstring=36725312&searchregion=100 and succeeded, then notified Trademe who withdrew the auction - but I still have Skippy. Neither Trademe, the Police, nor the original seller can prove I don't have it. If anyone visits I merely go back in time to prior to Skippy's pool being com *posted by: [thbean](#) (3 ★) 10:55 am, Fri 30 Sep*

A http://www.trademe.co.nz/structure/listings/listings_search_results.asp?searchtype=GENERAL&searchstring=36725312&searchregion=100

Q Cont: If anyone visits I merely go back in time to prior to Skippy's pool being completed - It is of course the Wellington Harbour which I closed off. Sorry forgot to let everyone now that all ferry sailings have stopped to ensure Skippy's safety. *posted by: [thbean](#) (3 ★) 10:56 am, Fri 30 Sep*

A Bob saget is no longer the funniest thing on trade me - check the link above... a dolphin for sale.... and I was worried about the SPCA. Thats brilliant.

Q WANTED: Someone to go back in time with me. This is not a joke. PO BOX 6657 TARANAKI. NEW PLYMOUTH You will get paid when we get back. Must bring own weapons, saftey isnt guarenteed. Ive only done this once before. whos keen? if i win this auction maybe it could be you..... like charlie and the willy wonkaz P *posted by: [spasticated](#) (185 ★★) 10:56 am, Fri 30 Sep*

A time travel is fraught with danger, and not for the inexperienced. I suggest only seasoned/veteran time soliders answer this add. Also this auction is not a personal add for you to advise for travelling companions or single woman who like walks on the

beach.

Q I am a celebrity from "sing like a superstar"...with this machine, can I go back in time to the moment when I signed up, and simply rip up the contract instead ?? *posted by:* [carmm](#) (35 ★★) 10:58 am, Fri 30 Sep

Q can i buy this yesterday? *posted by:* [godzillas-kid](#) (33 ★★) 10:59 am, Fri 30 Sep

A The inner truth says you know the answer already.

Q I bought the GE Time Travel 2000 two weeks ago. I have just come back from 1.05pm, Tuesday the 4th and "Izzy Dude" from Palmy wins the auction with a bid for \$251. Quite a bargain really considering the windfall he'll have on number 7, race 4 at Alexandra next Saturday. Up until now only he and I knew that. *posted by:* [tumekepinga](#) (12 ★★) 11:04 am, Fri 30 Sep

A "Izzy Dude" sounds like jellymeat i wouldnt beleave a word hes saying put your money on No9 "Big Girls Are Fun"

Q No, its cocksey....What was I thinking? *posted by:* [scuzzy](#) (70 ★★) 11:06 am, Fri 30 Sep

A I recently saw you in a Hamilton night club dancing, i dont know what you were thinking then either.

Q On the off chance....if you travel back(and forward) does this effect the ageing process??...i am a firm believer in reincarnation...and would love to go back to me prev life! I know to avoid the "ageing process", you need to add a multi atomising perplexer advance control device, with a preloaded dysanctym driver to the machine....does this beast have such a device loaded?? *posted by:* [jamiecooper](#) (26 ★★) 11:12 am, Fri 30 Sep

A See the above "Man Breast" reply.

Q more fm in whangarei wanted to contact and talk tou its all good contact dave *posted by:* [dolphins4](#) (178 ★★) 11:15 am, Fri 30 Sep

A Are they serious bidders ?

Q I see the machine has a New Zealand 2-pin power plug on it. Does this mean that travelling is restricted to no further back than the invention electricity? And how would I get on if I wanted to witness an event overseas? Do you supply a travel adaptor? *posted by:* [steve98](#) (72 ★★) 11:17 am, Fri 30 Sep

A You should be able to pick up a travel adaptor from any DSE store for around \$30.00, figure this cost into your final bid amount.

Q My DeLoren is stuck in 930BC and the time travell unit is knacked. Does the new one come with Road side Assistance????????? *posted by:* [rogem](#) (183 ★★) 11:17 am, Fri 30 Sep

A I am sure you could apply to AA Mutual

Q Also, is this an 021 or an 027? *posted by:* [steve98](#) (72 ★★) 11:19 am, Fri 30 Sep

A There is no phone attached to this device you are confusing the phone looking device with the "Flash sequence time modulator dial up".

Q Hey there. I have an ultimate Corbon Tube, do you know if it will fit Bitronian ultrazector belt? I am currently building a T9 ULTRA PARALLAX ZURG. I was curious to know if you had a proton Xyler? Otherwise, very interested. *posted by:* [vin05](#) (22 ★★) 11:21 am, Fri 30 Sep

- A** No it wont fit, unless you machine 1.45 mm off the end. i spent ages trying to fit it. A proton xyler, wow thats pretty flashy, I wish I had one then i could maybe get this puppy up and running. i cant afford the fancy gear, my misssus is always moaning about how much I spend on my silly time travel idea. nag nag nag

- Q** Hi. My names John Titor from the year 2036 and I am currently having troubles with my Dual Singularity Kerr field. I need to get back to my own future past time in a hurry and I was wondering what the mass offset distance is on this puppy? Also did it come with flash back arrestors? Are the parts compatible with 2036 designs? What time jump are you from anyway? *posted by: [hexapod](#) (12 ★★) 11:34 am, Fri 30 Sep*

-
- Q** does it run on batteries????????? *posted by: [tacman1](#) (12 ★★) 11:43 am, Fri 30 Sep*
- A** The machine can be self powered if you can find a source of Uranium 235. Alternatively it can run of mains power supply if you have a very long extension cord

- Q** Hi, I work for NASA adn we'd be very interested in err meeting with you to discuss the future of this type of machine in the mass market. - Q** Hi there. Can you please tell me is this the kind of time machine that is operated by placing between the legs, i am a bit concerned because of what happened to Napoleon and his uncle. there is a parallell here because that one didnt work either... *posted by: [hello3](#) (93 ★★) 12:03 pm, Fri 30 Sep*

Q G machine works but it has the darndest nack and will only ever function whilst hanging up side down. Would this be an amicable trade? *posted by: [stuffin](#) (46 ★★) 12:15 pm, Fri 30 Sep*

A In no way would this be and amicable trade, i dont want your broken junk that only works when its upside down... what do you take me for?

Q It appears the machine has appended to it an IDE hard drive. I would like to know what size this drive is so I can use it in my computer should I fail to satisfactorily get my Heisenberg compensator to work. The manufacturers of the Starship enterprise were successful with the compensator, but unfortunately I have been unsuccessful in acquiring the engineering schematics for their design. Therefore depending on the price, and specifications of the drive, It might be a good buy either way. *posted by: [geoffr](#) (41 ★★) 12:18 pm, Fri 30 Sep*

A It has a 6 gig HD for storing time co-ordinates. it is actually way over speced, the starship enterprise only had only a 500MB Hard drive. True... The Hard drive also has some games on so you can play whilst travelling time

A The start up combination is red, red blue, blue red blue, blue, blue then red. it is

important the buttons are pushed in that sequence. No matter what you do never, never push them together at the same time... ever.

Q This is the Time Police!! I hope you all realize that any unauthorized time travel is illegal and this device has not been sanctioned by the Federation of Time Travel Traffic Control established in 2034. Any users CAN and WILL be prosecuted in accordance to laws past following the REAL discovery of time/space violation. All time travellers and passengers MUST seek proper passport by first travelling forward to 2035, sitting your time travel license, then obtaining approval from the FTTTC to travel *posted by: [thadazbaby](#) (21 ★★) 12:35 pm, Fri 30 Sep*

Q I have reviewed the model specs and am beginning to understand the science behind your machine. I am, however, struggling with the 'phone' style mechanism that replaces the more traditional flux capacitor. A I only have my learners.

Q You mentioned from an earlier question that it would need Uranium 235 for energy source. Would that violate NZ law being Nuclear Free? Being the case this machine is illegal to use in NZ, will Australia allow it so? *posted by: [arlevien](#) (154 ★★) 12:58 pm, Fri 30 Sep*

Q Hi there. 2 questions: 1) I bid \$29.99 as DSE are selling a mass produced version of this item for only \$34.99. Now WHY would I pay you more than \$29.99 for what is clearly a HOME-MADE time machine that doesn't even work! I might end up stuck in the 80's!!! And we all know THAT would suck. I've already been stuck there for nearly 10 years of my life, and I don't want to repeat. B) Previous Q about how Eddies in the S.T.C. (space-time continuum)... Has anyone heard how he's getting on? Q Can you give me a rough idea of the size of time sphere? I have a rather large build; I'm afraid my head or feet might stick out, with the inevitable results. Also did you include a spatial compensator? Nothing worse than moving through time only to discover the Earth's elsewhere in orbit. *posted by: [kenyarb](#) (17 ★★)* 2:01 pm, Fri 30 Sep

Q If we are ever able to develop a workable theory for time travel, we would open up the ability to create very complicated problems called paradoxes. A paradox is defined as something that contradicts itself. Here are two common examples: Let's say, for the sake of argument, that you could travel back to a time before you were born. The mere fact that you could exist in a time before you were born creates a paradox. If you were born in 1960, how could you exist in 1955? Q This will really help with some plans I have. I'll need an accomplice who has some duck tape, jumper leads, earplugs and can speak fluent American. That way we'll be able to get into TVNZ without being noticed and stop whoever it was the thought of "Sing like a Superstar". I also need a Bull Terrier that goes crazy at the sound of Teletubbies, a credit card with the name John Banks on it, and a leather gimp outfit. Last but not least. Does anyone have 7 of 9's address before she got famou *posted by: [brynn](#) (124 ) 2:17 pm, Fri 30 Sep*

Q I really see the potential, but am concerned about the hours that may be required to completely finish the project. Also the colour of the start sequence buttons is a problem for me. Instead of "The start up combination is red, red blue, blue red blue, blue, blue then red" is this possible to be green, green gold, gold green gold, gold, gold, then black? My time travel outfit is black, gold and green and the red/blue buttons wouldn't match.... *posted by: [autumnwinds](#) (1145  ) 2:17 pm, Fri 30 Sep*

A In the future 90% of all humans are colour blind so colour becomes somewhat irrelevant. Every good time traveller needs a tight fitting lycra jump suit to travel time in style

Q I don't have an 'anti-gravity' machine, but I do have an 'anti-gravy' machine, it dries up your sunday roast should someone force watery gravy on you, it's really useful, would you swap it for this? *posted by: [richardrayner](#) (24 ) 2:29 pm, Fri 30 Sep*

Q Is there any warranty with the time machine? If Yes, then how many years? Can I get refund if it doesn't work? Is it authentic? *posted by: [fungming](#) (33 ) 2:29 pm, Fri 30 Sep*

Q I think that you'll find that a black leather gimp suit is better for time travel because of durability. This is particularly important for withstanding laborious stop-motion sequences of plants growing around your house and sedimentary soil building up around you before you reach the time period with cute dumb blonds walking around in togas. *posted by: [brynn](#) (124 ) 2:57 pm, Fri 30 Sep*

Q Further to my previous question...the trilamination of the tiny spheres with selected metals and their subjection to a magnetic field and current (sustained by the load) destabilizes the orderliness of the proton, the heavier atom and the 'tissue' of individual layers of metal. The matter then seeks to re-establish itself in the 'fractal set'. The trilamination inserts a 'curve' where there ought to be none, between the atomic structure and the next higher context of presence which is normally *posted by: [james185](#) (37 ) 3:00 pm, Fri 30 Sep*

Q How did I find out about it??? There was an article about it on tomorrows news at 6. Be warned, Paul Holmes intends to interview you soon as well and the Labour party is about to introduce a new time tax based on how long it takes you to travel thru 1 hour. I'm lucky that it will be cheap for me as an amateur traveller it still takes me 60 minutes and so I only have to pay the base rate plus GST. *posted by: [golf.geek.nz](#) (47 ★★)*

Q The answer to your question re: How is everybody finding out about your auction? Has to do with the time looping phenomenom stated earlier, an email was sent approximately 3 hours ago to one person and the time continuum is looping with different forwarded email addresses withthe URL Link to this auction. This was a result of the future purchaser going back in time to 3 hours ago and promoting the auction to make himself famous, what a big head eh? *posted by: [brettsky1](#) (72 ★★)* 3:01 pm, Fri 30 Sep

Q I think I have identified one of the problems you may be having. The formula you describe earlier does not take into account Boussinesq's theory of triple intergration. Try using $dt/dx = (1-v^2/c^2)/2$. By combining this with Einsteins $E=mc^2$, we find that $dt/dx = (1-E.v^2/m)/2$. Research by E. Brown in 1986(Ph.D) gives a close approximation for v in these circumstances to be 88 mph, or 39.11 m/s. An estimate of mass (m) allowing for an adequate quantity of uranium would be 765 kg, so we now have dt/ *posted by: [phantomchickenz](#) (21 ★★) 3:18 pm, Fri 30 Sep*

A Everyone whos anyone knows that Boussinesqs was a no good drunk with crazy ideas.

Q Blimey - when I asked my last question at 2.17 there wre approx 17,000 hits - an hour later (now) it's over 22,000!!! Don't you wish your machine was working and you could just travel to when the auction had been completed? *posted by: [autumnwinds](#) (1145 ★★) 3:18 pm, Fri 30 Sep*

A I am gettin sick of all these questions. i do worry that people are not taking this seriously. i put a lot of heart into that machine, and I dotn just want to sell it to some goof as a novelty

Q we noticed a sizeable disruption on the 1st of april this year and its taken us this long to locate you and your machine,the damage caused was immense but your efforts unwittingly triggered a bio-shperoid that randomly eradicated one of mankind's next largest threat of extinction,congradulations,but don't attempt again please,there's so much at stake! *posted by: [moritz](#) (36 ★★) 3:18 pm, Fri 30 Sep*

A How could this be more damaging than 36 killer dolphins with poison dart guns?

Q ... so we now have $dt/dx = (1-2E)/2 = 1/2 - E$. It is currently Friday afternoon so energy levels (E) are tending to zero, so $\lim(E \rightarrow 0) dt/dx = 1/2$. It is now simple intergration to get to $t = x/2$, rearranging to $x = 2t$. Now, simply decide how far (in seconds) you wish to travel, multiply by two, and enter into the distance field in the 2000 x 2000 travel matrix (which I'm sure you already have). Bob's your uncle, your travelling forward in time. NOTE: Many people have indicated they wish to tra *posted by: [phantomchickenz](#) (21 ★★) 3:19 pm, Fri 30 Sep*

A Huh ?

Q ... NOTE: Many people have indicated they wish to travel backward in time. A laymans description of why this is impossible is given on www.howstuffworks.com, but basically wormhole theory dictates that your stiff out of luck. Happy travelling! *posted by: [phantomchickenz](#) (21 ★★) 3:19 pm, Fri 30 Sep*

A Yip cause the internet is always right. I have read lots of stuff on the www which simply is not true. Just look up "moon landing". The internet is full of cranks and hoax sites dispelling people on their desire to travel time

Q Does it come in other colours?. Hoping so as this one will not match my all pink decor! *posted by: [kidzone](#) (633 ★) 3:21 pm, Fri 30 Sep*

A No it is an one of prototype. I never got to the mass production stage, basically because i couldnt get this one to work.

A http://www.trademe.co.nz/structure/auction_detail.asp?id=36973310 It clearly states it is compatable with any time machine. I dont know how they can make that guarantee, given the propritary type of interface i was using. Still would be a handy add on to have

Q When traveling in time, how would you ensure that you keep pace with the world? It is after all making its way through space at a fair lick, spinning to boot. Q Hi, with regards to the time travel.. How much would the depature tax be if I wanted to go back in time and witness the birth of Jesus? With the oil prices going up in the world, prices just seem to rise higher and higher! And as there is no BP, Mobil,Caltex etc in Bethlehem in the year 0000, I take it the depature tax would be too steep to get back to the present?? Cheers The Pope *posted by: [ajmarsters](#) (54 ★★) 4:41 pm, Fri 30 Sep*

A What witht he price of oil if you do win this auction and go back to when Jesus was born id take a very big shovel and a canteen.

Q This device could be the end of us all. Q Hi - just been analysing the picture of your machine before dinner and I am wondering if you should stick with it. Your big problem seems to be that there is little or no Mac componentry involved - making the machine quite unevolved. Word on the street is that Steve Jobs is just adding the finishing touches to what the pundits are calling iTravel... I'd sit on it for another 3 months - try and get some time and a half at work and save some coin. Just a thought - good luck either way. *posted by: [shardul_nz](#) (59 ★★) 6:52 pm, Fri 30 Sep*

A I dont accept eftpos (machine is currently out of order)or petty cash i hope they can do direct debit.

Q I have an anti-grav machine I would swap, but its missing its discombulator CX-421. Without it, it often works in reverse multiplying gravity by up to 1000X, it has killed a few people. Since the discombulator CX-421 is only built by the Zorax of planet Iconon-9, which as you know was recently destroyed by Rii Clan - they're pretty rare. Also, whats the shipping to Alpha Centauri? *posted by: [pulse](#) (108 ) 7:11 pm, Fri 30 Sep*

Q I am the winner of this auction. The machine is indeed faulty and can only go back in time. If you don't refund my money immediately I will be forced to not make my winning bid and therefore not be in need of the refund in the first place. Either way you won't receive bad feedback and you'll still get a healthy price from the next best winning bid. Actually forget about the refund. I'm off to buy a lotto ticket for last week opps... Or you could donate some money to a worthy charity (The society for prevention of ethical monkeys) and its yours

If only I were a clever woman, I could describe to you my gorgeous Inventor, how you unite in yourself the beauties of phisics .I would tell you that you are the greatest genius of all ages, and I should only be speaking the simple truth. A Ahem, just for the record I am single, approximately thirty years of age. In the past (and the future) I have found that physics and romance to not mix, but am always keen.

Q The 1000th anniversary G-Shock finally phases out world time in favour of time travel. One day you'll look back on this contraption and laugh. You should hire a designer if you want to scale production. *posted by: [dealn1](#) (3606  )* 8:23 pm, Fri 30 Sep

A Yeah but does that new G-Shock work underwater?

Q what processer do you use to operate it? e.g. pentium 3... can it connect up to the net? *posted by: [pandoras-reaper](#) (0 )* 8:24 pm, Fri 30 Sep

A Its a 486 with no modem.

Q Hi, Out of curiosity how many watchers do you have? Hey great to see something a little different up for auction!! Good luck with your auction!!!! *posted by:*

[angeez1](#) (1842  ) 8:35 pm, Fri 30 Sep

A There are 527 watchers, when what I really want is 527 bidders. I dont need luck I need bidders, people just seem to be treating me and my auction as a joke.

Q Hey dude, this auction is plastered all over the radion station, and more fm are the ones whom want you to get in touch with them for some freebies, there talking about you dude.. remember my user name and let me know what they give you... :-)

posted by: [redsonja](#) (657 ) 8:40 pm, Fri 30 Sep

A More FM better not be using my auction to get themselves free publicity. Despite the allure of freebies my ethics and non commercial stance, mean I cant break radio silence

Q I have a copy of the REAL 'hitchhiker's guide to the galaxy. (as in the one published on Ursa Minor.) Would you consider swapping the time machine for an entry from the guide (eg, directions to the restaurant at the end of the universe, information on Vogons, etc). *posted by:* [grassyhill](#) (26 ) 8:43 pm, Fri 30 Sep

A Nah i got a copy on DVD.

Q I noticed you have an Eft-pos facility on this time machine.....Does this cater for Daylight Saving?? *posted by:* [mahills](#) (82 ) 8:45 pm, Fri 30 Sep

A The Day light saving is always a tricky thing, does the clock go backwards or forwards?

Q Hi Mike, could you please contact aj at morefm dot co dot nz, he wants to speak to you about the Time machine. Thanks. *posted by:* [smithc](#) (441 ) 8:46 pm, Fri 30 Sep

A Is this some kind of fancy morse code?

Q Hi there, I think you are HOT!!.... are you married yet?... I'm considering to bid the auction so that I can get to know you better and travelled back the time, the time before I had a sex change operation..... I'm a big fans of you man.... lots of love, Rambo. *posted by:* [dst](#) (113 ) 8:48 pm, Fri 30 Sep

A Im not married my missus dumped me, said I spent to much time in the shed working on the time machine. She will be back though, once she see the serious \$\$\$\$ I get for it on trademe.

Q This may well be the answer to all of my problems.....You see I have a hobby of growing KAURI Trees, which I find rather time consuming! *posted by:* [mahills](#) (82 ) 8:52 pm, Fri 30 Sep

A Would you like to trade? Forestry is the way of the future, trust me.

Q Sorry to harp on and off about this, but due to the gravity of the situation the monkeys would like to know if you would be willing to swap the time machine for an Atari. And a harp. Let me know, and I'll pass your message on. *posted by:* [samgabriel](#) (55 ) 8:56 pm, Fri 30 Sep

A I already have an Atari ST, that is a state of the art piece of equipment, i would consider swapping for some games like Ikari Warriors and Moonbase... man those games are wick!!

Q so, does this machine works well with the remote control of http://www.trademe.co.nz/structure/auction_detail.asp?id=36973310 *posted by:* [robbie_in_nz](#) (29 ) 8:56 pm, Fri 30 Sep

A This has been asked several times please try to keep up... In answer to your Q: Yes most likely.

A Is this Marc Ellis?

I have one initial question: Is it possible to attach a Reality Distortion Field Generator

- Q** (RDFG-Unit)to this particular Time Machine? I know it attaches to the RDFG-panel on the TM6000 with 4 X 8mm Hex bolts, but this being a custom built, I wanted to be sure before bidding again... And also, not unlike yourself, I'm a bit shocked by the number of people who don't seem to be taking this auction seriously. Good "luck". *posted by: [samgabriel](#) (55 ) 9:45 pm, Fri 30 Sep*
- A** CHears for the vote of confidence, unfortunetly it dosnt have an attachment for a Reality Distortion Field Generator but there is nothing stoping you form putting one o if you win the auction. at current price its still a bargin once you factor in the cost of your Reality Distortion Field Generator add on card.

Q Sorry to tell you, your polaron capacitor is obviously destabilising the phlogiston matrix of the translucidated fnark-inhalor, making all left quarks spin right and tachyons behave like leptons. Q Ah, I have just come up with an emergency fix for your polaron capacitor and send it back to you, I can see you incorporated it last week, so you are nearly in working

condition. Pity you will have given up and sold it. Then again, you have not sorted out the problem of the variable speed of light yet, which we will have been discussing yesterday evening or was that the day before tomorrow after it will have been too late because you sold your time machine? Q Hey Mike, We've been monitoring your auction from our mirror site TradeMe.Mars, and we feel obliged to tell you that those beta version hyper-dimensional resonators can become a little unstable if you set the travel destination beyond about 50 years. You could end up + or - a few hours from where you intended, and if the earth, as you call it, has moved as per normal you could end up a few kilometers under the crust, or else very high up in the atmosphere. Could this be a problem for your purc *posted by: [geophilus](#) (223  ) 8:53 am, Sat 1 Oct*

A Yeah but the Dolphin guy is in the NZ Herald.

Q Hey. You are on the cover of the times!!! Front page man!!!!!!!!!!!! *posted by: [jase.nz](#) (179  )* 12:13 pm, Sat 1 Oct

A What can i say... im famous LOVE ME

Q What about a board powered by hydrocarbonite, im a dealer in anti-gravity boards and i am very interested in buying this time machine so i can go into the future and buy some Playstation 3's and some xbox 360's come to the past and sell them for heaps making megaloads of profit. *posted by: [ayzee33](#) (99  )* 12:15 pm, Sat 1 Oct

A Forget the Playstation 3's and Xbox 360's think BIG. Go back in time and buy a crap load of brand new still in the package Ataris, they will be worth a heap in 10 years.

Q Does this theory help you finish your Time Machine ? When a cat is dropped, it always lands on its feet, and when toast is dropped, it always lands buttered side down. Therefore, if a slice of toast is strapped to a cat's back, buttered side up, and the animal is then dropped, the two opposing forces will cause it to hover, spinning inches above the ground. If enough toast-laden felines were used, they could form the basis of a perpetual motion machine. Adding in the temporal co-efficient o *posted by: [guym1](#) (5 )* 12:20 pm, Sat 1 Oct

A I based an earlier design on the whole cat hovering thing. Once again i ran into issues with the SPCA - they seem to have some agenda with time travel

Q At last..Ive been on the hunt for one of these for a while. Can you confirm its able to transport larger objects. How would I squeeze my wifes arse into it. Have tried rowing machines and exercycles with limited success.. *posted by: [1455](#) (52  )* 12:21 pm, Sat 1 Oct

A .

Q Would you consider swapping time machine for a memory enhancer in good working order? Some manual input needed. Size is A4 but could be downsized or upsized at little expense. Runs off most PCs. Closeup photo of part of it available at <http://tinypic.com/e6cbxe.jpg> posted by: [khaki](#) (12 ★★) 12:25 pm, Sat 1 Oct

Q presumably it comes with technical support, is there any history of alzhiemers in your family, id hate to get to the future, have a problem and find i cant get back posted by: [andyxa](#) (55 ★★) 12:25 pm, Sat 1 Oct

A There will be no support provided once sale is final.

Q Can you tell me if the time machine has a catalytic convertor as the SPCA outlawed those in the mid 23'rd century and I'de hate to get done by a couple of catscan machines waiting behind the superhighway roadsign for some sucker to go warping past with an illegal moggie convertor ! The fine could be more than the price of the time machine. Meow. posted by: [ixplorer1](#) (126 ★★) 12:27 pm, Sat 1 Oct

Q Some of the bidding on this auction confuses me. Why would NASA be interested in this auction? This isn't a space craft, it's a friggin Time Machine. I can understand Jason Guns interest with his predicament (that goes without saying)Some other people just have no idea. Geeks !!! posted by: [mrshin](#) (372 ★★) 12:29 pm, Sat 1 Oct

A Exactley ! I think time travel is beyond the comprehension of most, and it shows in some of the questions asked. I was thinking of just donating to Jason Gun, as he obviously needs it more than most

Q I have mastered the art of jumping down n up rather then jumping up n down, This has defied gravity therefore not actually needing an anti gravity machine, I am willing to teach you this skill personally for the time machine posted by: [seasme_street](#) (114 ★★) 12:47 pm, Sat 1 Oct

A .

Q This machine sounds just like I need. Can you guarantee that I will go from 66kg to 56kg by tomorrow night. If so I am willing to outbid everyone. posted by: [clair4](#) (478 ★★) 12:50 pm, Sat 1 Oct

Q 1. Does it have similar capabilities to the tardis which features on Doctor Who? 2. What sort of link does it have to the time vortex and is it stable? posted by: [martyn_jl](#) (63 ★★) 12:55 pm, Sat 1 Oct

Q I have posted a question on the model after this that you are selling in 2009 on trademe but you are no longer answering questions on your future auctions, can you please answer my questions here? posted by: [jake1z2s](#) (1 ★) 12:56 pm, Sat 1 Oct

A I stop answering Q: in about an hour, as i get a bad case of R.S.I.

A Seller Comment:
I would seem i typed an error earlier, we are indeed on the front page of the Waikato Times. Hope this will add to more serious bidders. 1:01 pm, Sat 1 Oct

Q you are a fruitloop but it seems to be working i am now thinking of taping a pile of junk together and calling it a timemachine and geting a heap of money for a pile of shit good thinking batman posted by: [chris241](#) (113 ★★) 1:08 pm, Sat 1 Oct

Q I think you are being a little hard on NASA as it is obvious they indeed need the time machine to go back in time to save there space shuttles from a premature ending.After all space shuttles dont grow on trees you know.As for the crew of the space shuttles well they are required back it the good old USA to help clean up from the effects of a the storms they have had.Just between you and me I heard these storms were the results of the Russians testing a new weather machine. *posted by: buss (93 ★★) 1:22 pm, Sat 1 Oct*

A bloody Ruskies

Q hi could this unit take me back to 1964 cause i missed a beatles concert in auckland cause i was too young *posted by: rob331 (292 ★★) 1:28 pm, Sat 1 Oct*

A You didnt miss much. Just a crap load of young beautiful easy woman screaming at the top of their lungs looking for sex with anyone and everyone.

Q Does it come with wafers ? *posted by: mdubdub (26 ★★) 1:32 pm, Sat 1 Oct*

A Wafers are available but would be an extra cost. I sthis really relevant.

Q I,ve just located 2 of my own surviving time machines. There had been a third larger time machine but it was destroyed in the interests of humanity. I'm cleaning them up and checking for warpage. They seem alright. Will probably offer one of them on trade me soon. *posted by: mcaninch (8 ★) 1:45 pm, Sat 1 Oct*

Q Does it only go back/ forwards intime but your stil in the same spot? or can you make it so you end up in a nother country?? coz anything past 1800's in nz you would get eaten *posted by: flameboy7 (73 ★★) 1:58 pm, Sat 1 Oct*

Q I wish I had seen this before.. you may have been interested in my flying carpet.. I recently lost my M.A.L (Mat Aviation License) due to exceeding the weight to mat ratio.. shouldnt have eaten that last yak burger in Tibet. *posted by: crashparrot (69 ★★) 2:16 pm, Sat 1 Oct*

Q You mentioned on a thread on the message board that money raised from this auction will go to a charity. Good on you if you are genuinely donating to a charity, would that be minus the TM fees you will be charged? If this is true, what charity were you looking at? Would you me thinking the SPCA in light of your guinea pig mishaps? *posted by: 24mitch24 (910 ★) 2:32 pm, Sat 1 Oct*

Q Do you think i could rule the world if i went back to the start of time with an army of robots i just finished working on? i promise i will make you and all your relatives royalty. *posted by: suma123 (58 ★★) 2:37 pm, Sat 1 Oct*

Q Do you think you'll be able to clock the page view counter by the time this auction ends? *posted by: squidsquad (12 ★★) 2:37 pm, Sat 1 Oct*

A .

Q This looks suspiciously like my time machine that was stolen from its park outside my home in Dunedin next monday. I am contacting Trademe yesterday to warn them that

you will be placing an auction for stolen goods. You can expect a visit from the police last Tuesday unless you return the vehicle within the next 3 minutes. You have been warned!! *posted by: [shane-0](#) (27 ★★) 2:53 pm, Sat 1 Oct*

Q Let's say, for the sake of argument, that you could travel back to a time before you were born. The mere fact that you could exist in a time before you were born creates a paradox. If you were born in 1960, how could you exist in 1955? *posted by: [djbryant](#) (622 ★★) 3:08 pm, Sat 1 Oct*

Q Ps - Mikey. It would appear you are a little premature questioning the integrity of the bidders. Please refrain from doing this again, or I may get quite cross. *posted by: [jase.nz](#) (179 ★★) 3:28 pm, Sat 1 Oct*

A Seller Comment:

Ahem, Due to the recent publicity a proffessor of quantum physics got in touch to have an inspection of both my therom and the machine. He has confirmed that my theory is fatally flawed, and in fact my machine is just a phone attached to an old computer and an eftpos machine. I am incredilly embarrassed and would like to apologise to everyone who took an interest. As such the Auction will be withdrawn today at 6pm. My sincere apoogies to all the genuine time travellers out there. Peace out ! 4:50 pm, Sat 1 Oct

Q Is this covered under the FAIR TRADING ACT, if it does not work can I return it..... *posted by: [crested](#) (214 ★★) 4:51 pm, Sat 1 Oct*

Q Will you marry me? I like your style! Ooops are you male or female as if female we will have to resort to a civil union!oh and don't worry about the one that thinks he is married to me... He will do the lawns and dishes! *posted by: [bubby1](#) (627 ★★) 5:16 pm, Sat 1 Oct*

A .

Q Hey would you trade it for a 1979 TARDIS? Its all up to date in regards to service history and another question is why didnt you switch to plutonium like the DOLORIAN? seems more efficient as Uranium is hard to find at the warehouse-always sold out.give us a buzz about the trade.TARDIS just had a paintjob and upgraded the FLUX CAPACITOR.yours looks pretty mint though....Newer model? *posted by: [tfl](#) (199 ★★) 5:20 pm, Sat 1 Oct*

Q Thats pathetic. You have an opinion. And in mine, not a good one. Peace out biatch. I will continue bidding until 6pm to keep me believing in something that was so, so close to being within my grasp. RIP time machine! The Dr "Jason Gunn" ESQ *posted by: [jase.nz](#) (179 ★★) 5:24 pm, Sat 1 Oct*

Q Sad to hear you will be withdrawing. Was good while it lasted. *posted by: [kiweaze](#) (599 ★★) 5:25 pm, Sat 1 Oct*

Q Man... Why are you pulling it out? Do you have to? Because it's funny shit... if you are getting taken down by the government or some shit tell them to shove it... everybody knows its not a real time machine and if they are not happy with it being false advertising them they can fuck off *posted by: [steelboy](#) (11 ★★) 5:28 pm, Sat 1 Oct*
