

IPEVO VX1 Internet Conference Station

Hear and Be Heard

Adobe connect, GoToMeeting, Google Hangouts, Skype and similar VoIP services offer up plenty of features and convenience for remote meetings. If you have a computer or tablet, you have the ability to teleconference. But one aspect of the experience often

Features at a Glance

- USB plug-and-play convenience for PC or Mac; VX-1 is ready to go out of the box and is compatible with many popular VoIP applications, including Adobe Connect, GoToMeeting, Google Hangouts, Skype, WebEx, FaceTime and more
- 3.5mm audio jack and cable included; turn your iDevice (iPad, iPhone or iPod Touch) into an instant conference station for group chats
- 5 mics - 1 Omni Mic and 4 Unidirectional Mics - for clean and crisp voice communication in 360 degrees for all your virtual meetings
- A 16-bit Digital Sound Processor (DSP) features full duplex, environmental noise suppression and echo cancellation with 16 kHz sampling rate signal processing
- A separate sound processor enhances voice processing, delivering a wide dynamic range for natural, intelligible conversations
- Volume control, one-touch mute, and microphone selection are all within easy reach; LED indicators let you know your status at a glance

Common complaints include:

- The speaker's not loud enough. Laptop and tablet speakers are design for personal use, and so they're often not loud enough for a room full of people, even at maximum volume.
- The mic's only designed for one person. Built-in microphones can only capture the closest person's voice clearly. As a consequence, everyone in the meeting feels they need to yell and/or crowd around the microphone, rather than sitting comfortably.
- Echo noise. Very frequently, the person on the other end of the teleconference hears their own voice because their voice is played and then recorded into the mic again. This can really put a strain on comprehensibility during a meeting, leading to people needing to repeat what they just said. Plus, it's extremely annoying!

These issues interrupt, slow, and add frustration to remote meetings. But all of these issues can be overcome with the IPEVO VX-1 Internet Conference Station, the perfect complement to your VoIP usage. With VX-1's superior voice capture and transmission, everyone can hear, and everyone can be heard.

Specifications

- **Input and Output**

- Type B USB Connector x 1
 - Interface: Type B USB 2.0 Full-Speed (Compatible with USB 1.1)
 - Power Supply: USB bus-powered (5V / 500mA)
 - Max. Power Consumption: 2.5W
- 3.5mm Stereo Headphone Jack x 1
- Microphones
 - High Sensitivity Omnidirectional Microphone x 1
 - High Sensitivity Unidirectional Microphone x 4
 - Frequency bandwidth: 50 ~ 20,000Hz
- Speaker
 - Frequency bandwidth: 20 ~ 20,000Hz

- **Size and Weight**

- Dimensions (Ø x H): Ø188 x 50mm/ Ø7.4 x 2.0inches
- Weight: 17ozs/480g

- **Operating System**

- Windows XP/Vista/7/8
- Mac OSX 10.5 and up

Package Contents

- VX-1 Internet Conference Station
- Type B USB Connector
- 3.5mm Stereo Headphone Jack
- User Manual
