Conductive Garments

Conductive Garments are design to be used in conjunction with a variety of electromedical modalities both in the home and clinical setting. This unique material consisting of conductive silver mesh can stimulate large or multiple areas without the side effect of skin irritation sometimes found with the use of conventional electrodes.

Our universal sized, conductive glove is used to treat the entire hand with is difficult to treat with self-adhesive electrodes. Commonly used to treat RSD, Carpal tunnel and wrist and hand injuries.

- Universal Sized
- Available in Glove, Sock, Elbow/Knee Sleeve and Back Brace

Glove: **Item GU2856** Sizes: Small–Large
Knee/Elbow: **Item GU4017** Sizes: Universal, Small, Medium
Sock: **Item GU4025** Sizes: Universal, Small, Medium

Conductive Knee Brace

This conductive knee brace gives support, warmth and electrotherapy stimulation to the knee. Self Adhesive electrodes often are not large enough and do not adhere properly on the knee, which makes this product so popular.

Item GK1517

Conductive Neck Garment

This conductive garment was designed to treat the areas of the neck, which are difficult to reach with standard self-adhesive electrodes.

Item GN3275 Male; Item GN3278 Female

Conductive Wrap

This conductive wrap allows you to apply the electrotherapy stimulation to multiple areas of the body, such as the calf, thigh, ankle, etc.

Item GR4764

The Relief Wrap™

The Relief Wrap Brace helps patients place the electrodes on difficult to reach locations without assistance from others. This Belt can be customized to fit your customer's specific needs or treatment protocols, such as 4 electrode placement for TENS & EMS or 8 electrode placements for Interferential.

Available in S, M, L, XL, 2XL, & 3XL sizes.
