installing your software

To install the Internet Everywhere Software:

- 1 If another connection software is installed on your laptop, we recommend that you uninstall it.
- 2 Prior to installing the Internet Everywhere software, please ensure your antivirus is disabled. Insert your data card or USB modem into your laptop. It will automatically start the installation process. If the installation does not automatically start type X:autorun.exe in the Run dialogue box, where X is the letter denoting your inserted device (seen by Windows as a CD drive).
- 3 Please read the End-User Software Licence Agreement before using the Internet Everywhere software. If you agree with these terms and conditions, please click the "Accept" button and the installation will start
- 4 Follow the on-screen instructions. The installation will take about 10 minutes.
- 5 If the installation is successful the following message "Internet Everywhere has been installed" will display.
- 6 The Internet Everywhere software will be installed to the location Start > All programs > Orange. A shortcut will appear on your desktop and in your system folder. The software will launch automatically when USB modem or data card is connected

usina vour donale

You can now launch the Internet Everywhere application in three wavs:

- Double-click the Internet Everywhere icon on vour desktop
