# 1 Introduction

## 1.1 Acknowledgement

Thanks you for purchasing one of our products. Bryte IPX Tablet is high definition tablet PC with MT8312 MTK8382 CPU, which apply the Cortex-A9 of frequency of 1.7GHZ/2.2 GHz Quad Core or Octa Core Processor (depending on Model) and based on Android 4.2.X Operating System.

The Bryte Tablet is designed with superior technology and functions including WCDMA, WIFI, BT, GPS, FM, Super IPS Technology, High resolution Camera, Retina Display, Dual 2G/3G standard SIMs, voice call powered by 3.7V/6500 mAh high capacity battery. Your Bryte Tablet comes with in-built Bluetooth Radio and WiFi which facilitates wireless communication between devices or connect to the internet anytime and anywhere. It is also built with high-accuracy GPS/GPRS system for navigation and Location based Applications and functions.

This manual systemically introduces the functions, user guide and announcements, please read this manual carefully before using this device.

## 1.2 Caution

### Preventive maintenance

- To avoid failure of device, your Tablet, battery, charger and other accessories should not be kept in extreme temperatures, adverse environmental or working conditions.
- Please always keep the Bryte IPX Tablet dry. This is to avoid the device corrosion of electronic circuits that may lead to short circuit and electric shock.
- Keep the battery, charger and other accessories away from water and moisture.
- Do not operate the device or charger with wet hand.
- Do not knock, throw, bend, drop or shake the device. Rough handling can break it.
- Do not open, disassemble or tamper with the device or accessories arbitrarily, as any physical distortion or defect on the device or accessories nullifies product warranty.

## 1.3 Safety Instruction

Before using your Bryte IPX tablet, please read this chapter. For further instructions, please also refer regular safety tips, materials and announcement at [www.brytestore.com](http://www.brytestore.com).

- Always keep your tablet dry. Precipitation, humidity and all types of liquids or

- moisture can contain minerals that corrode electronic circuit.
- Do not use your Bryte IPX Tablet while driving.
  - Do not use the device in restricted areas such as Hospitals, Petrol Stations or any environment where electromagnetic emission are not allowed.
  - Switch your Bryte IPX to Airplane Mode when boarding an aircraft to avoid interference or interruption of signals.
  - To avoid electronic equipment failure, please shut down your Bryte IPX Tablet when operating in a high frequency environment or near high-accuracy electronic equipment.
  - Please do not open, disassemble or try to repair the device or accessories. Only authorized and qualified agent is allowed to service, repair or disassemble the device. **Unauthorized tampering or physical damage of device may invalidate the product's warranty.**
  - Please keep your tablet away from magnets, magnetic fields and magnetic equipment, as radiation from the device may erase the data stored in the magnetic equipment.
  - Do not use the device in high temperature or low temperature environment, inflammable gas (petrol stations).
  - Protect the Bryte Tablet and accessories from the reach of Children. Children should only be allowed to handle the device under the supervision of parents.
  - Please comply with related rules and regulations, and respect others' privacy, legal rights and relevant laws of the country while using the Bryte Tablet.
  - Please strictly adhere to related instructions in the manual when using USB cable to ensure the safety of the Bryte Tablet or PC.
  - Use only chargers and other accessories supplied with your device or approved by Technology Professionals Limited. Do not connect incompatible products.
  - Ensure you back up your important data in your computer, Micro SD or external memory

## 1.4 Abbreviation/Terminology

Abbreviation/Terminology	Full Name	Description
Bryte IPx8	Bryte 8-inches Tablet PC Device	IPX Air screen model of Android 4.2x
Bryte IPX 9.7	Bryte 9.7-inches Tablet PC Device	IPX Air screen model of Android 4.2x
WIFI	Wireless Fidelity	Base on IEEE 802.11b standard wireless LAN
T F	Trans Flash	Alternative name Micro SD, super miniature memory card

## 2 Getting Started

### 2.1 Bryte Tablet Operation and Preparation

#### Battery Charging

Before using your Bryte Tablet for the first time, charge it using the approved charger for at least 5 hours and ensure it is fully charge it.

NOTE: If the battery is completely discharged, it may take several minutes before charging indicator is displayed.

### 2.2 Bryte Tablet Status and Reminder

#### Notifications/Reminder icons

When reminder message pops up in your reminder window, Swipe the column down to open the reminder list. Choose the menu you need, and confirm the information. You can close the reminder window through clicking the column to slide up.

Please refer to below status icons:

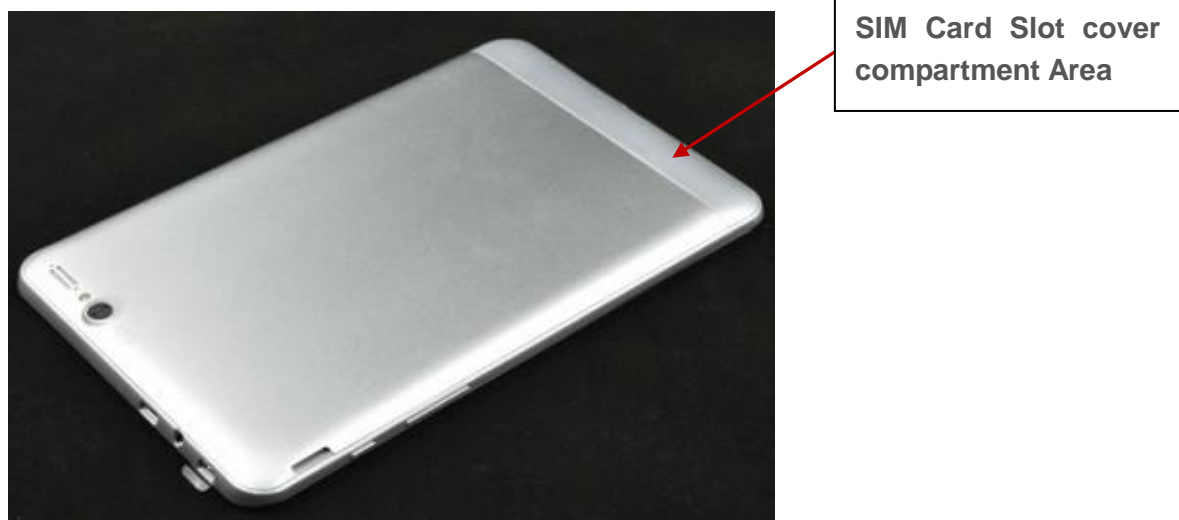

Icon	Meaning	Icon	Meaning
	New email		Airplane Mode on
	USB connected		USB debugging connected
	Return button		Downloading
	Display recently-used application		Home button
	Battery Level		WIFI connected, internet is available

### **Reminder board**

Reminder Notification icons will display when you have an incoming mails, WIFI is switched on , you can slide down the notification to view detailed information.

## **2.3 Inserting SIM Card and Memory Card (Micro SD)**

Your Bryte IPX Tablet is designed to use two Standard SIM cards (Dual SIM), the size of the SIMs depends on the model. But the procedure used in inserting the SIM card are similar.

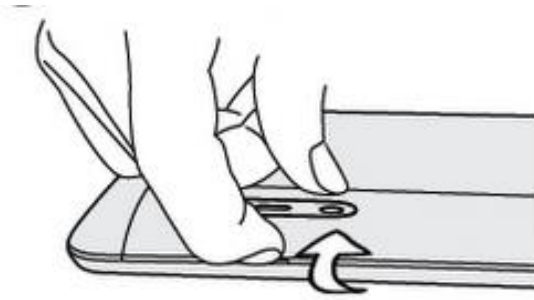

Bryte Tablet

- 2.3.1 Locate the SIM Slot cover compartment Area of your Tablet (In most Models, this is the white Area at the back of the tablet as shown in the figure above).
- 2.3.2 Locate the opening tab at the edge of the SIM slot compartment area as shown in the picture below.

- 2.3.3 Insert your finger into the Opening Tab and gently pull backward as shown below to open the compartment cover.

**(Please ensure you don't exert pressure on the Screen, to avoid breakage)**

- 2.3.4 Insert you SIM Card (Either Single or Double depending on Model), you can also install the microSD external memory storage card in the microSD card slot on your tablet.

- 2.3.5 Insert you SIM Card (Either Single or Double depending on Model), you can also install the microSD external memory storage card in the microSD card slot on your tablet.

2.3.6 Replace Back the Cover Compartment and ensure that it grip firmly.

**You can now use your Bryte Tablet to make and receive calls, access the Internet via your 3G SIM card or Wi-Fi network and do much more.**

# 3 Quick Start Guide

## 3.1 Keys Function

### Keys Function Description:

Power button	Short press to sleep/wake up, Long press to Shut-down or Startup Device.
Volume + (up)	Increase Volume
Volume - (down)	Decrease Volume
<b>HOME button</b> (home) 	Click it at any interface to return to the main interface.
<b>Back button</b> (back) 	Click at any interface to return to previous menu
<b>Menu button</b> 	To Display the main menu interface.
<b>Setting button</b> 	display recently browsed history

## 3.2 Startup and Shutdown

### Startup

Press and hold the **POWER Button for about three seconds**, you can select your preferred interface iOS or Android (if available depending on the model). Enter the unlock key or pattern if your device screen is locked.

### Shutdown

1. Press and hold the POWER Button for about three second, a shutdown dialog window will pop up.
2. Shutdown dialog window contains Four Options: Mute mode, Airplane Mode, Reboot and Shutdown.
3. Click Shutdown to shut down your Tablet. (Click any of the other options to switch to the mode).

### 3.3 Switch Screen Sleep Mode

**Screen will go into sleep mode when:**

1. No operation is performed (device is idle) for some time, this help conserve power thereby increasing battery life.
2. You press POWER Button (Short Press).

**Activate Display when in Sleep Mode.**

If the screen is in Sleep Mode, press the POWER Button once to activate screen display. The screen will be locked , swipe to the left or draw unlock pattern to unlock, it will display as shown in picture 3.1 below.

**Picture 3.1**

### 3.4 Using the Touch Screen

**Bryte Tablet operating methods**

You operate or activate any item in either in the main screen, menu or application in your Bryte Tablet using any of the following methods:.

#### **Click**

When you want to use the screen keyboard typing or choose application in the main interface, you only need to touch it (click) with your finger.

#### **Press on**

If you want to open any item( textbox or the link in the webpage), or shortcut press on the item, for options or short- cut menu, press and hold the list (item ) to activate the menu.

#### **Swipe or Slide**

Slide or Swipe is simply to make a quick vertical or horizontal movement across the screen with your finger. You slide to change views, display options etc.

#### **Pull or Drag**

To drag an image or icon, press and hold it and move it to the position you want..

#### **Rotate**

For most pictures, you only need to rotate your Bryte Tablet through 90 degrees to change the screen orientation from horizontal to vertical or vice versa. For instance, when typing or watching movies.

## **3.5 Home Page**

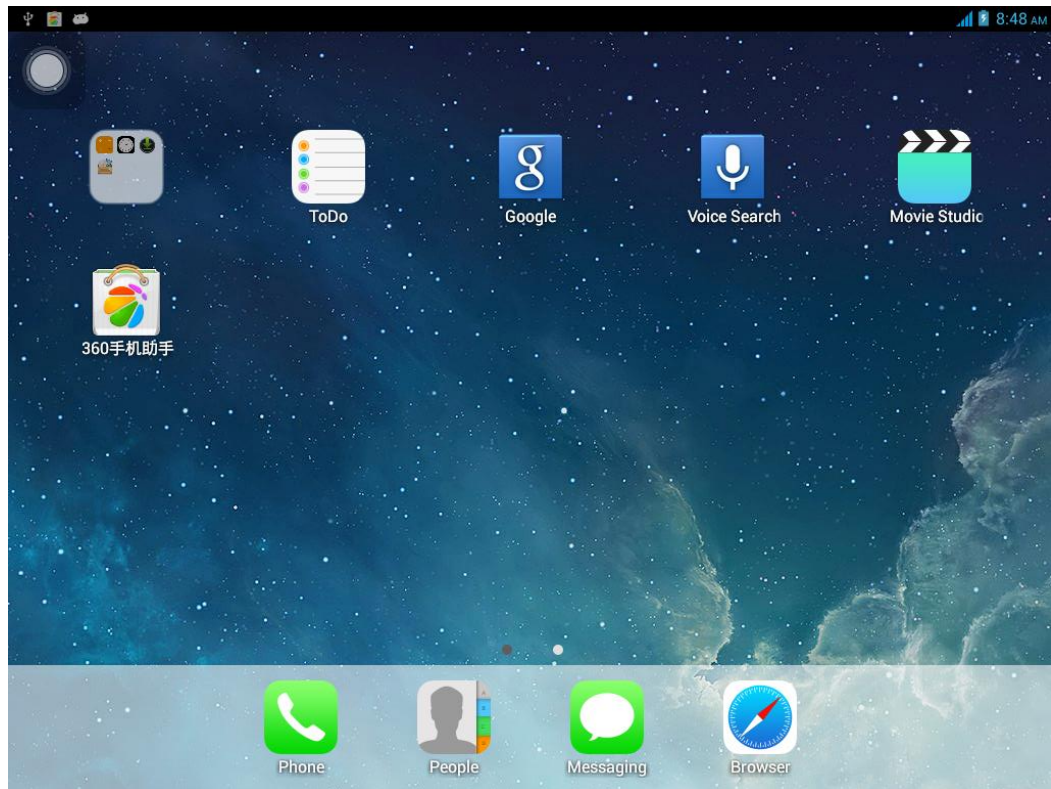

Main interface is as shown in picture 3.2, below, Press and hold (long press) a blank area on screen to activate popup windows to set wallpaper, folder, widgets, and shortcut.

You can also do this through the Setting Tool.

### The extended home page

The home page can be extended beyond the wideness of screen to provide more space, which you can put new-added shortcuts and widgets. Click the blank space in home page then slide right or left to extend to the right or left of the screen. In the home page, there are two extended pictures as the following picture,

**Picture 3.3**

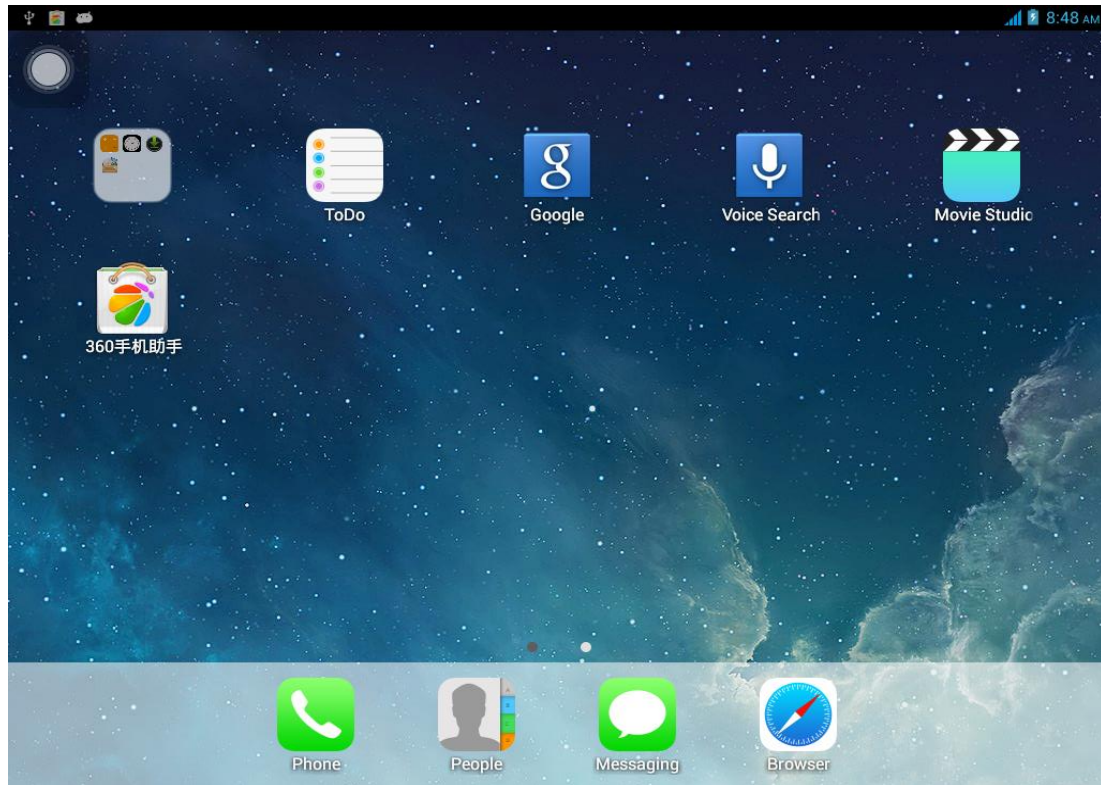

**The shortcut icons management in desktop (Home/Main View) application.**

**Create folder icon in desktop**

1. Drag the icons need to be put together on one icon(can also overlay several icons) as Picture 3.4.
2. Then click the over layed icons, the applications can be folded

Click the unnamed folder in the black box, it will pop up the hidden keyboard, the folder name can be renamed (this is similar with Apple iOS system), the icons position can be changed through long press.

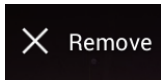

**Picture 3.4**

### **To remove an icons from desktop (Home view)**

1. Press and hold (Long press) the icons you want to remove, this will activate the

Remove  icons on the top right corner of the screen.

2. Drag the icon to the remove icon above, till the icon become red, then remove your finger to delete the icon.

### **Change the wallpaper of desktop**

1. In home page, long press any blank space in the main screen, it will pop up a window to change the wallpaper.
2. Click the gallery or wallpaper gallery to select the wallpaper.

## 3.6 Choosing/ Running Application

Click Apps Icon  on any view to display all installed Apps as shown in Picture 3.6, choose the application you want to run or activate. Note, you may need to swipe to the left to view other Apps if current View is full.

Picture 3.6

## 3.7 USB Connection

### Bryte Tablet storage configuration

You can transfer documents or files from your Bryte Tablet to your Laptop or Desktop Computer and vice versa. This is necessary especially if you want to back up or restore important files. Before transferring file/documents, you have connect your Bryte Tablet to your Computer using the USB cable:

1. Connect the Bryte Tablet and computer by USB cable, the Notification column will ask you the mode of connection you want.
2. Open the Notification and Accept USB Connection.
3. It will as shown in the Picture 3.4, then click “Turn on USB storage”.
4. Allow the Driver to install USB device, this may take some time and you may be required to be connected to the internet especially if USB Driver have not been previously installed in your computer.
5. You can now copy the files and documents you want from your Tablet to Computer or vice versa.

**Picture 3.7**

#### **To copy files into Tablet's memory card**

1. Connect the Bryte Tablet to computer with USB cable as stated above.
2. Accept USB Connection and allow computer connect.
3. After successful connection, Open "My Computer" in your computer, select "Removable Disc" to access the external Memory (MicroSD Card) of your Bryte Tablet.
4. Copy the files you need into "Removable Disc" or its folders
5. After copying, click "shutdown the USB storage" configuration on your tablet to uninstall. Then disconnect the USB cable.

Notice: When your Bryte Tablet is connected with USB cable and USB Storage is turned ON, you will not be able to view the contents of the memory card through your Tablet. It's only after you detach the USB cable, that you can be able to access memory card through your Bryte Tablet.

## **3.8 Typing and Editing Documents**

#### **Use the screen keyboard**

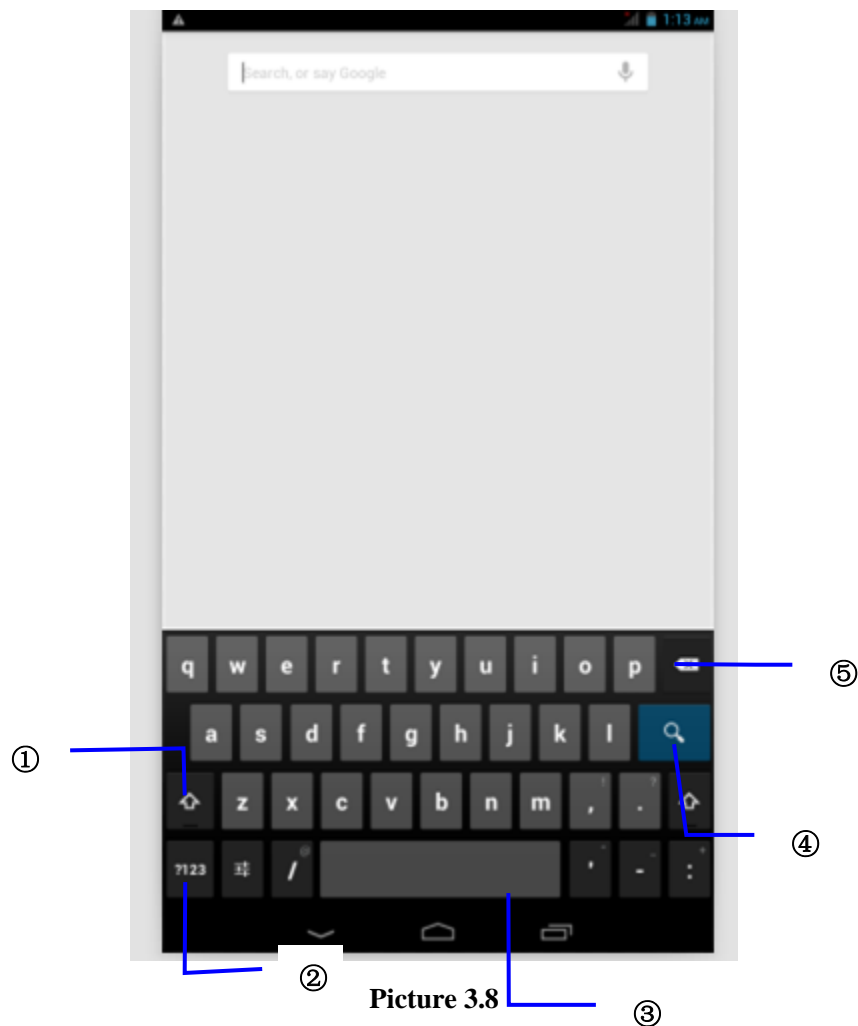

When you select the text area (either words or numbers) the on-screen keyboard will be activated. The keyboard contains the following typing options:

1. Android keyboard
2. Google Key-in

### Choose the typing method you want

1. Click Setting procedure application.
2. Select Language and Keyboard.
3. In the text setting area will reveal all the installed words-typing methods in your Bryte Tablet.
4. Tick the typing method you want.

### Use and Switch of input method

N0	Meaning as in Picture 3.8 above
1	Switch between Capital and Small letter
2	Switch between Word and Number Mode of Text input
3	click to insert the space

4	Click to execute input
5	delete the character in the left of cursor, click and hold to delete all the characters in the left of the cursor.

## 3.9 Operation Technique

### **Enter widgets interface**

In the application interface, click widgets on the above of screen, or slide the screen, it will switch into widgets interface. Long press any widget to create its shortcut, then you can enter into the application through the shortcut icon.

### **Create application shortcut icons in the desktop**

In the application interface or widgets interface, long press any icon to switch into desktop automatically, drag and hold the icon, you can move to any position in the desktop.

Remind: If the target position has no space, the widget won't be add in the main screen.
