

Setting Up Remote Control Functions (CZ-RWSK1U)

The functions of the wireless remote can be set on site.

(These settings are saved in nonvolatile memory in the remote controller, so even when its batteries are changed, the settings do not revert to the defaults.)

<Note> The operation of the air conditioner can be impacted, depending on the settings made, so only service personnel should make the settings.

Furthermore, making changes to these settings may cause actual operation to deviate from what is printed in the Operating Instructions, so be sure to explain this to the customer fully.

Making Settings (Do with unit stopped.)

1. Holding down the Swing/Wind Direction + OFF Timer  + Mode Select buttons at the same time for 4 or more seconds makes the display switch to the setting screen. (See Diagram Below.)
2. Use the Temperature setting buttons,  /  , to select the number of the item to be set.
3. Use the ON Timer buttons,  /  , to change settings.
4. The settings are saved with the Once/Every Day button. When this is done, the settings display of the LCD changes from blinking to light.
5. If other settings are to be changed as well, repeat steps 2 to 4.
6. When all settings have been made, press the Start/Stop button.

Example: Operation mode setting screen
