

# LeadFormix Email Module

Find step-by-step instructions to use the LeadFormix Email Module effectively and *set up email campaigns, upload mailing lists, send emails and monitor reports*

## LeadFormix Email Module User Manual

LeadFormix Email Module is now available within LeadFormix. Once you are logged in to LeadFormix, click on the icon for 'Email Campaigns' to access LeadFormix Email Module.

### Step-by-step instructions to:

1. Set up an email campaign
2. Upload a mailing list
3. Send emails
4. Monitor reports

## Step 1: Set up an email campaign

- Click on 'Create Campaign'

**Manage**

**Campaign** +

- Create Campaign
- Manage Campaigns
- Manage Attachments
- Upload Attachment
- Create Template
- Manage Templates

**Contacts** +

- Create Mailing List
- Manage Mailing List
- Manage Contacts
- Unsubscribed contacts
- Suppression List

**Reports** +

- Sent Campaigns Report

### Create Campaign

Create Campaign > Title & Type of Campaign

**Start here to Create & Send a Campaign**

Campaign Title :

**Sender Details**

From Name :

From Email :

Reply To Email :

Physical Address :

- Choose 'Type of Campaign'

### Choose Type of Campaign

Select the type of Template you want to use .

#### Text Templates

- ☒ Create your own template
- ☐ Use existing templates

#### Graphical Templates

- ☐ Create your own template
- ☐ Use existing templates

- For **Text Templates:**

Content can be added manually or by importing a .txt file (Notepad)

### Text Only Template

**Campaign Title:** TEXT TEMPLATE

Type or Copy Paste Text or Import from Text file

C:\Documents and Settings\admin\ Browse... Import File

**Email Subject:** Text Email Template \*

- For **HTML/Graphical Templates:**

Content can be added by **importing an .HTML file**. Click on '**Browse**', select the HTML file and click on '**Import File**'.

### Create your own Template

Import a template if you have already created or just start creating your own template in the editor.

**Campaign Title:** Upload HTMLFile

Type or Copy Paste Text or Import from HTML Campaign

E:\newsletter-06012010.html Browse... Import File

## OR

Content can be added by copying HTML code from either an Online HTML template or an Offline HTML file

- **Online HTML Template**

Open the file in a browser (Firefox) and click on '**View**' and click on '**Page Source**'.

Copy the entire Source Code from the page that opens. '**Ctrl + A**' then '**Ctrl + C**'

## - Offline HTML File

To copy Source Code from HTML file, **'Right Click'** on the file and **'Open With Notepad'**.

Using the formatting toolbar for a graphical template, you can upload images from your desktop, insert tables, horizontal lines, smiley's, buttons, bullets, numbering, hyperlinks; change background, font and font color, etc.

To insert images in content, click on the **Image Icon**

To upload images, you can add the **'Image URL'** and Click **'OK'**.

To upload images from your local computer, click on **'Upload'** and **'Browse'** for the image file. Click on **'Send it to Server'** and click **'OK'**. The image will be uploaded on LeadFormix server

**To hyperlink**, select the text to be linked. Click on the **'Link'** button and select link type like URL or Email. Add the URL or Email ID and click **'OK'**.

**PS:** Redirected links cannot be tracked. Add the actual web page links. Also, make sure that the Landing Pages have LeadFormix code in them.

**To remove hyperlink**, select the text to be unlinked. Click on the **'Unlink'** button.

The following steps remain common for both Text and HTML templates:

- Customize content with recipient's *Email Address, First Name, Last Name, Phone, Mobile Number, Contact Address, Comments, Job Title* and other *Company information*. Click on **'Personalization Tag'** to select the code.

body p

Personalization Tag

  - Suppression List

### Create Mailing List

[Create List](#) > [Create New List](#)

#### Create New List

List Name \* :

List Owner's Name \* :

List Owner's Email \* :

LeadFormix Email Module provides 4 different options to create a new mailing list.

### A. Add Contacts One-by-One

It is mandatory to add 'Email Address', 'First Name' and 'Last Name'. The rest of the fields are optional. Click on 'Add Contact' after each contact is added.

Add Contact one-by-one

[Create List](#) > [Add one-by-one](#)
1. [Create Email](#) > 2. [Add](#)

#### Add One-by-One

New List Title :

Email Address :

First Name :

Last Name :

Phone :

Mobile Phone :

Street Address :

City :

State :

Country :

Postal Code :

Title :

Company :

Department :

Industry :

Add Contact

## B. Import Contacts

Prepare a mailing list in a spreadsheet with column headers as mentioned in the Yellow highlighted text. The columns **'Email Address', 'First Name' and 'Last Name'** are mandatory. Save file as **.CSV (Comma delimited)**.

**'Browse'** for the file and **'Import File'** to LeadFormix Email Module.

Upon importing, to identify the contacts that were not uploaded, click on the number mentioned for **Errors**. You can Open/Download a .CSV file with details of errors, like Duplicate entry, Subscriber already exists, Unsubscribed id or Invalid email id.

Duplicate entries, if any, will be deleted by default while importing a list.

### Contact list

[Create List](#) > [Import Contacts](#)

[1. Create Email](#) > [2. Add List & Contacts](#) > [3. Send Campaign](#)

Note: Choose csv file with contacts information . Column titles can be the following: name (variant first name, first\_name), last name (variant surname, last\_name, lastname), company, email (variant e-mail) phone (variant landline), mobile (variant cell), city, state, street, pincode (variant zipcode), country, title, department, industry. Case insensitive.

New List Title:

Delimiter:

Total in File : 100, Successful Import: 87, Duplicate Entries: 1, Error : 13

## C. Add Contacts from Existing Lists

Select *'Existing Mailing Lists'* to combine them into a *'New Mailing List'*.

## D. Add Contacts from Existing Contacts

Select *'Existing Contacts'* to combine them into a *'New Mailing List'*.

You can sort the data by *'First Name', 'Last Name', 'Company' or 'Email ID'*. To sort alphabetically, click on the column header. Clicking again on the same column header will sort the list in the reverse order (Z - A).

Select All the Contacts Before Clicking on **'Add Contact'**.

To **Add New Contacts** or to **Delete Contacts** from a mailing list, click on **'Manage Mailing Lists'**

Contacts	+
<a href="#">Create Mailing List</a>	
<a href="#">Manage Mailing List</a>	
<a href="#">Manage Contacts</a>	
<a href="#">Unsubscribed contacts</a>	
<a href="#">Suppression List</a>	

To **Edit Contacts**, click on **‘Manage Contacts’**. Select a contact and click on **‘Edit’**

## Step 3: Send Emails

- After testing an email campaign, select a mailing list and click **'Next'**
- At this stage, you can delete some contacts from the list, if you so wish to, for this particular email campaign. Please Note: Email ids will NOT be deleted from the Main Mailing List, but will ONLY be deleted for the current campaign.
- Click on **'Confirm and Send Campaign'**
- Emails can be either sent immediately or Scheduled for future. To start sending emails, click on **'Send Immediately'**. You will receive a message saying **'Campaign Scheduled Successfully'** and your emails will get sent in 2 minutes.
- To **'Schedule a Campaign'**, set a **Date** and **Time** as per your system's time. Select the **Notification** options and provide an email address for notification. Click on **'Schedule Campaign'**.

### Schedule Campaign

Campaign Title	:	HTML Template
Subject Title	:	HTML Email Template
Delivery Date	:	2010-05-31 
Time	:	09 : 30 AM
List	:	Target Audience
Notify when sending starts	:	<input checked="" type="checkbox"/>
Notify when sending ends	:	<input checked="" type="checkbox"/>
Email for Notification	:	<input type="text" value="Email Address"/>

Schedule Campaign

## Step 4: Monitor Reports

- Click on **'Sent Campaigns Report'**
- Reports can also be searched by **'Campaign'** or a **'Date Range'**.
- To view a detailed report, select a report and click on **'View Details'**.
- The report shows the details of who *Opened the email, Clicked on the links, Pages Visited, Phrases of Interest, Time Spent on each Page, Time of Visit, Unsubscribed, Bounced, Reason for Bounce*
- Reports can be downloaded in .CSV format

## Special Features of LeadFormix Email Module

### Built-in Email Templates:

Apart from letting you create your own emails, LeadFormix Email Module provides Text email templates and HTML templates based on varied layouts which are proven to work in all major email programs. Just customize the email content to suit your business needs.

### Personalization Tags or Mail Merge Fields:

Personalize your emails by using LeadFormix Email Module's customization tags to add prospect information like *First Name, Company, Designation, Phone, Mobile Number, Contact Address, Comments, Job Title* and other *Company information*. Adding some personalization makes the email appear like a one-on-one messaging and helps to build the prospects interest in your product/service.

### Schedule an Email Campaign:

LeadFormix Email Module provides the flexibility to set up an email campaign, select a list, but send emails at a future point in time. A notification email will be sent when the campaign starts and ends.

### Preview a Mailing List & Delete Contacts for a Specific Email Campaign only:

You can choose to delete specific contacts for a specific email campaign; without having to delete them from the mailing list. This feature is helpful when sending a follow up email to only those who did not respond/open the email/click on the links in the email.

### Time Spent on Phases of Interest:

LeadFormix tracks all the Phrases of interest and the time spent on each phrase. These phrases relate to specific pages on your website. This provides information on the most visited or most popular (based on time spent) pages on your website.

### Global Unsubscribers:

LeadFormix Email Module automatically removes unsubscribed contacts from the entire database. An unsubscribed contact cannot be added in any of the future mailing lists; they will be deleted by default from the new mailing lists.

**Suppression List:**

LeadFormix Email Module gives you the option to upload your list of unsubscribers, so that they are removed from any of your current or future mailing lists. The suppression list may include email addresses or the domain names of the companies to be unsubscribed.

**Forward to a Friend:**

LeadFormix Email Module has a Forward to a Friend option in the email and the number of forwards is mentioned in the Email Campaign Report.

**Daily Report:**

Daily report feature allows users to subscribe to a summary report with the status of email campaigns. To subscribe to Daily Reports, click on '**Settings**' in your LeadFormix account. Select '**EF1 Settings**' and select the option for '**Daily Report**'.

## Monitoring Email Campaigns

### What our Clients need to know:

Here are a few points that must be kept in mind when you want to run an email campaign.

- All emails have to comply with the CAN SPAM Act of 2003
- No mass mailing is allowed for any email campaign - including lead generation emails. An option to Unsubscribe or Opt Out has to be present in all Email Campaigns. Emails sent to Opt-In lists will however be not considered as mass mailing.
- You must not be deceptive in the header (return email address, domain name, IP address) or the subject line.
- You must give a method for the recipient of the email to opt-out or unsubscribe from your list or from receiving any future emails from you. You must process their opt-out within 10 business days. You must maintain this opt-out list.
- Maintain good email list hygiene practices. If you have doubts, contact your ESP for clarifications
- You must include your physical mailing address in your emails.
- The email must be identified as an advertisement. You don't have to put it in the subject, but your email content must contain the name of the business and/or other identifying information showing that the email is commercial in nature.
- You cannot harvest email addresses from web sites, directories, membership databases, or any other service/website that prohibit taking of email addresses. You may not guess at email address (for example, send to every info@domain.com email) to send mass emails.
- Do not send emails to Generic Email addresses like info@, sales@, customerservice@, webmaster@, help@, support@ from EmailForce1

It is important to maintain an open and transparent communication with your ESP. Inform your ESP immediately if you hear of any complaints either from your email receivers or ISPs, so proper action can be taken immediately to ensure email deliverability and to retain your email sender reputation.

**7. What happens to bounced emails?**

LeadFormix Email Module tries to re-send an email to a bounced ID 5 times (in case it is a Soft Bounce). If it is still not delivered the email id is unsubscribed from the mailing list.

**8. What are Hard Bounces and Soft Bounces?**

A soft bounce is an email that is recognized by the recipient's mail server but is returned to the sender because the recipient's mailbox is full or the mail server is temporarily unavailable. A soft bounce message may be deliverable at another time. A hard bounce is an email that permanently bounced back to the sender because the address is invalid. A hard bounce might occur because the domain name doesn't exist or because the recipient is unknown.

**9. Can we re-send an email to a bounced ID?**

We can re-send emails to Soft Bounces only. Hard Bounces are permanently unsubscribed. To re-send emails to Soft Bounces, first re-subscribe them from the **'Unsubscribed Contacts'** in the Contacts menu. Sort contacts by **'Type'** by clicking on the column header. Select only soft bounces (B) to re-subscribe.

**10. Should we manage unsubscribers manually?**

LeadFormix Email Module will automatically delete unsubscribers from all your current and future email lists to ensure that emails don't get sent to them.

## Email Campaign/Content/Template Queries

**1. I don't see the images in LeadFormix Email Module when I copy the source code or upload the file**

Check if the image URLs are complete. Use fully qualified links or the full path for images. `` may look fine on your internal servers, but it won't render externally.

**2. I don't see the images when I receive the email in my Inbox**

Make sure you click on **'Display Images Below'** when you receive the email. Image rendering also depends on the Email Service Provider being used; some do not display images by default. There is dependency on the rendering engine to auto download the images and will depend on the User's Email Settings.

**3. Is 'Campaign Title' the Subject Line of the Email?**

No. Campaign Title is the text that best describes the purpose of your email campaign, or the version of email template or your target audience.

4. **Can I customize the 'From email id'?**

Yes you can put in any from email id e.g. your own id. The email recipients will see the emails as coming from that id

5. **Can the 'From Email' & 'Reply to Email' be changed after the campaign has been saved?**

'Reply to Email' can be changed. 'From Email' cannot be changed; in case you need to change the 'From Email', set up a new campaign.

6. **I have created a Text Email and a name gets inserted in the header or footer of my email content.**

The customization code might have got added by an un-intentional click on the Personalization Tags. Go to the **'Edit'** mode by simply delete the customization code (%BASIC:FIRSTNAME%) that might have got added.

7. **How to edit an already saved email campaign?**

Click on **'Manage Campaigns'**, select the email campaign to be edited and click on **'Edit'**.

8. **How to add more contacts to an existing mailing list?**

Click on **'Manage Mailing Lists'**, select the specific mailing list and click on **'Add Contact'**.

9. **How to edit existing contact details?**

Click on **'Manage Contacts'**, search for the contact to be edited, select it and click on **'Edit'**. A new window opens where you can edit the details, then click on **'Submit'** and close the window.

10. **What time zone is considered while setting up the scheduled campaigns?**

Your local time zone is considered. If you want to schedule for another time zone, then correspondingly adjust the time such that it goes out at the correct time for the target time zone.

## Report Queries

1. **Why don't I see previous email campaign reports?**

The reports page displays the reports of only the latest campaigns. In case you are looking for a specific report, search for the reports by selecting a campaign or by selecting a specific date range.

2. **How are opens calculated?**

Opens are calculated using a 1 px image embedded with the message When the

client opens the message, this 1 px image is downloaded and the client is understood to have opened the email. If downloading of images is not enabled (by default image downloads are not enabled) then opens can't be ascertained. So the open numbers are conservative and can potentially be higher than the number indicated.

**3. What are single page and multi page clicks?**

If email recipient visit only one page on your site by clicking on the mail sent out to them, then all such users are considered under single page. If email recipients click on more than one page, then it's considered under multipage clicks

**4. How can I subscribe to daily email reports?**

You can subscribe to a summary report of email campaigns. In your LeadFormix account click on '**Settings**', select '**EF1 Settings**' and select the option for '**Daily Report**'. You will receive a mail report with the updated email campaign statistics.

**5. Can I compare email reports?**

Yes, select 2 reports and click on '**Compare**'. This feature provides a comparison on Open Rates, Click Rates, Bounce Rate and Unsubscribe Rate for the campaigns. It also calculates the averages across all the selected campaign reports.
