# Epson SureColor **SC-S30610**

Screen or commercial printers, signmakers, digital copy shops and photo labs can expand their service portfolios with the Epson SureColor SC-S30610.

Designed to give the lowest total cost of ownership, the SC-S30610 can produce everything from posters, signs, banners, backlit panels and POS to vehicle wraps, interior decorations and exhibition displays. Users can reliably and cost-effectively print on vinyl, canvas, clear film, photographic paper and a range of popular banner substrates, at up to 64-inches (162.6cm) size.

Thanks to a jack at the rear, loading a new roll is a one-person job, and media tensioning can be controlled easily from front or back of the printer, speeding set-up and maximising productivity.

High workloads are accommodated with ease thanks to Epson-engineered performance, reliability and ergonomic printing. The SC-S30610 prints at speeds from 7.3m²/hour up to 29.4m²/hour (depending on mode).

The new UltraChrome GS2 ink for the SC-S30610 builds on the strengths of UltraChrome GS (used in the Epson Stylus Pro GS6000) with a new yellow formulation. UltraChrome GS2 is odourless, nickel-free and requires no special ventilation, allowing the SC-S30610 to be used in an office environment.

The power-efficient SC-S30610 is ENERGY STAR-qualified, saving money and impact on the environment.

## KEY FEATURES

- Prints on a wide range of coated and non-coated media up to 64 inches (162.6cm) wide
- Single-operator roll media loading via easy-to-operate jack system
- Easily-accessible front and rear media tensioning control
- Speeds of up to 29.4m²/hr (Draft mode; 10m²/hr in Production mode; 7.3m²/hr in Quality mode, all on vinyl)
- Epson's proven Thin Film Piezo printhead for precise droplet formation and long production life
- Enhanced ink requires no ventilation and is suitable for use in an office environment

**EPSON**®

# Epson **SureColor SC-S50610**

Designed to deliver a very high level of efficiency, the SC-S50610 uses two Thin Film Piezo printheads, running two sets of CMYK (or CMYK + white for the 5-colour model) ink simultaneously, to print at speeds in excess of 51m2/hour. A built-in dryer ensures prints are ready quickly and, to further boost productivity, Epson's additional print drying system is included as standard.

Loading a new roll is a one-person job using the jack system at the rear, and the media loading lever is conveniently accessible from both the front and rear of the printer. Heavier rolls up to 80kg can be easily accommodated using the printer's optional heavy-roll supply system.

The SC-S50610 automatically optimises media handling and printhead alignment for the media type, and automatically adjusts the substrate tension to enable accurate media feeding. Feed adjustments can be made during printing without stopping and re-starting.

The SC-S50610 can produce everything from posters and signs to vehicle wraps. It reliably and cost-effectively prints on vinyl, canvas, clear film, photographic paper and a range of popular banner substrates, at up to 64-inch (162.6cm) width. The 5-colour model can produce high-quality white prints on both dark and transparent substrates. Prints are lightfast for three years outdoors without lamination*.

Epson's UltraChrome GS2 Ink is odourless, nickel-free and meets the requirements of the Nordic Swan EcoLabel, the SC-S50610 is kinder to the environment, and can be used in an office as special ventilation is not required. To further reduce environmental impact, plus energy bills, the printer is power efficient and ENERGY STAR-qualified.

## KEY FEATURES

- Prints at 51.8m2/hour
- One-person jack system
- Auto-optimised media handling
- Posters, signs, banners and more
- 3 years outdoors*

# Epson **SureColor SC-S70610**

The Epson SureColor SC-S70610 is Epson's first 64-inch (162.6cm) printer to support white and metallic ink simultaneously, enabling creative print makers, specialist sign makers and professional display printers to expand their service portfolios.

High-quality prints are assured with the combination of Epson's UltraChrome GSX Ink and proven Micro Piezo TFP printhead, which delivers clarity, fine detailing and smooth blends at resolutions of up to 1440 x 1440dpi.

The UltraChrome GSX ink-set, featuring light magenta, light cyan, light black and orange as well as CMYK, gives the 8-colour SC-S70610 the widest colour gamut of Epson's SureColor range. The 10-colour model includes white and metallic inks to increase versatility. Both models achieve ultra-smooth tonal gradations thanks to the use of light inks, including light black ink for enhanced, neutral greyscales.

Users can cost-effectively print vivid colours, solid whites and special metallic effects on clear film, vinyl, canvas, photographic paper and a range of popular banner substrates, all at up to 64-inch (162.6cm) width. Prints are lightfast for up to three years outdoors without lamination*.

When using 8 colours, the SC-S70610 prints at up to 26.8m2/hour (high-speed mode), and at up to 4m2/hour with metallic ink enabled.

Thanks to a jack system at the rear, loading a new roll is a one-person job. Users can make feed adjustments while printing to optimise quality and reduce downtime.

Epson's UltraChrome GSX Ink is odourless and nickel-free, and carries the Nordic Swan Ecolabel. The printer is designed to be power efficient and is ENERGY STAR-qualified.

## KEY FEATURES

- Micro Piezo TFP printhead
- 8/10-colour ink-set
- Enhanced greyscales
- One-person jack system
