

Bluetooth Aluminum Keyboard

for new iPad and iPad 2

User Manual

XUMA™

Thank you for choosing Xuma.

Congratulations on the purchase of your new Xuma Bluetooth Aluminum Keyboard Case for the new iPad and iPad 2. This case features a Bluetooth keyboard housed in a durable aluminum iPad case. You can store your iPad in the case, and when you're ready to type, just remove your iPad, prop it up with the integrated stand, and pair it with the keyboard. The keyboard charges via USB, features a slim design, and boasts seventeen shortcut keys for maximum functionality.

Here are some basic instructions to get you through the setup & synchronization process.

A. Box Contents

1. Aluminum keyboard case
2. USB charging cable
3. User instruction manual (this booklet)

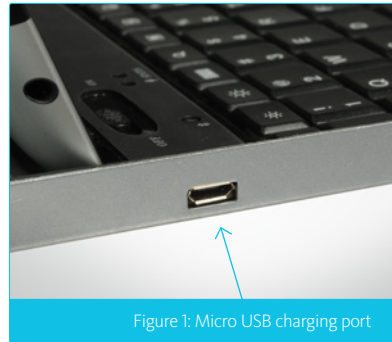

Figure 1: Micro USB charging port

Charging

To charge the keyboard, use the included USB charging cable to connect it to your computer's USB port (Figure 1) or to a USB AC adapter (not included). The charging light will glow when the unit is charging, and will turn off when it reaches a full charge. (Figure 2)

 The charging light will blink when battery power is low.

Figure 2: Charging light

Getting Started

1. Match up the iPad's headphone jack and dock connector port with the corresponding cutouts on the case (Figure 3).
2. Place the iPad facedown into the case and press firmly on the corners until secure.
3. Remove the iPad from the case by gently pulling on the corner of the case nearest the camera. The iPad will separate from the case and you will be able to pull it out easily.
4. To convert the case to a stand for viewing and working, place the iPad in the well and gently let go. The case supports both landscape and portrait positions.
5. If you want to adjust the viewing angle, pull up the integrated kickstand and set its rear feet in the appropriate notches.

Figure 3: Headphone jack

Figure 4: Kickstand

 When you are ready to store the iPad, make sure to return the kickstand to its flat position.

 Note: When setting up the iPad in portrait position, be sure to use the kickstand to provide adequate support (Figure 4).

Pairing Up the Keyboard

1. Turn on the keyboard by moving the power switch to the ON position. The STATUS light will briefly glow.
2. To enter pairing mode and make your keyboard discoverable, press the bluetooth button. The STATUS light will blink in pairing mode.
3. On your iPad, select Settings > General > Bluetooth. (Figure 5)
4. Select ON to activate the iPad's Bluetooth feature. The iPad will automatically search for available Bluetooth devices.
5. Select Bluetooth Keyboard from the list of discovered Bluetooth devices.
6. Type in the four-digit code that appears onscreen and press ENTER. Once paired, the STATUS light will continue to blink at a slower pace.

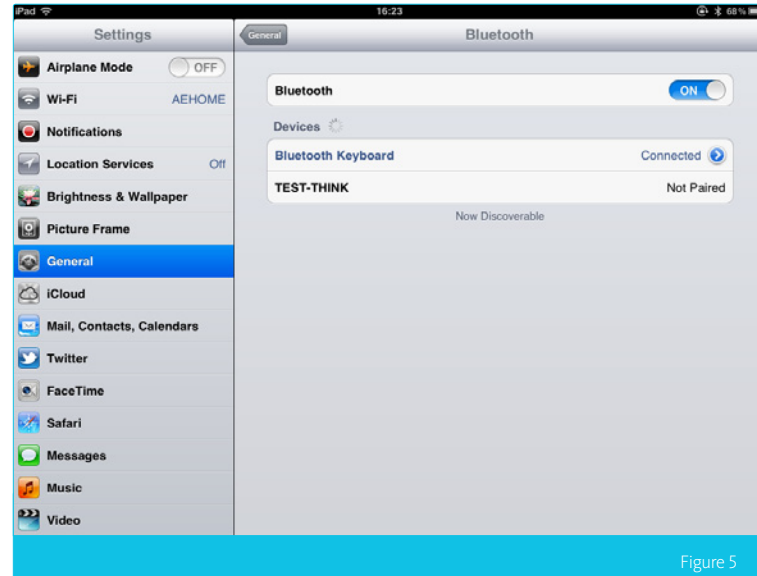

Figure 5

Once the initial setup is complete, your iPad will automatically recognize your Xuma keyboard for future use.

Shortcut Keys

The shortcut keys are shortcuts to various functions on your iPad. They are located in the top row, directly above the number keys.

sleep mode on iPad

Press the fn key + the space
bar to switch the keyboard
language.

Sleep Mode

When the keyboard is inactive for fifteen minutes, it will enter sleep mode in order to conserve power. Press any key and wait for the keyboard to turn back on; it may take a few seconds.

Troubleshooting

Following are a few common problems that may arise during the operation of your Bluetooth wireless iPad Case, and basic troubleshooting solutions to avoid them.

Problem	Solution
The keyboard does not respond.	Make sure that the wireless keyboard is turned on, and that the battery is charged.
The wireless keyboard is not pairing up with the iPad.	<p>Make sure that the wireless keyboard and the iPad are turned on, and that their batteries are charged.</p> <p>Make sure the wireless keyboard is within operating distance of the iPad (33 feet, or 10 m).</p> <p>Make sure the iPad's Bluetooth setting is turned on.</p> <p>Make sure to select Bluetooth Keyboard on the iPad's list of discovered Bluetooth devices.</p> <p>If there are multiple Bluetooth Keyboards in the iPad's list of discovered Bluetooth devices, make sure to select the right one.</p>
The keyboard will not charge.	<p>Make sure the USB cable is properly connected to the wireless keyboard and the power source.</p> <p>If you are using a USB AC adapter (not included), make sure that it has an output of at least one ampere-hour (1 Ah), and that it is properly plugged into the power outlet.</p>
