# WARNING DECAL PLACEMENT

### IMPORTANT PRECAUTIONS

WARNING: To reduce the risk of serious injury, read all important precautions and instructions in this manual and all warnings on your exercise bike before using your exercise bike. ICON assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

- It is the responsibility of the owner to ensure that all users of the exercise bike are adequately informed of all precautions.
- Before beginning any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.
- 3. Use the exercise bike only as described in this manual.
- The exercise bike is intended for home use only. Do not use the exercise bike in a commercial, rental, or institutional setting.
- Keep the exercise bike indoors, away from moisture and dust. Do not put the exercise bike in a garage or covered patio, or near water.
- 6. Place the exercise bike on a level surface with at least 2 ft. (0.6 m) of clearance around the exercise bike. To protect the floor or carpet from damage, place a mat under the exercise bike.
- 7. Inspect and properly tighten all parts regularly. Replace any worn parts immediately.
- 8. Keep children under age 12 and pets away from the exercise bike at all times.
- Wear appropriate clothes while exercising; do not wear loose clothes that could become

- caught on the exercise bike. Always wear athletic shoes for foot protection.
- The exercise bike should not be used by persons weighing more than 264 lbs. (120 kg).
- Be careful when mounting and dismounting the exercise bike.
- 12. Always keep your back straight while using the exercise bike; do not arch your back.
- 13. The exercise bike does not have a freewheel; the pedals will continue to move until the flywheel stops. Reduce your pedaling speed in a controlled way.
- 14. To stop the flywheel quickly, press the brake lever downward.
- 15. When the exercise bike is not in use, tighten the resistance knob completely to prevent the flywheel from moving.
- 16. To avoid damaging the brake pads, do not lubricate the brake pads.
- 17. Over exercising may result in serious injury or death. If you feel faint or if you experience pain while exercising, stop immediately and cool down.

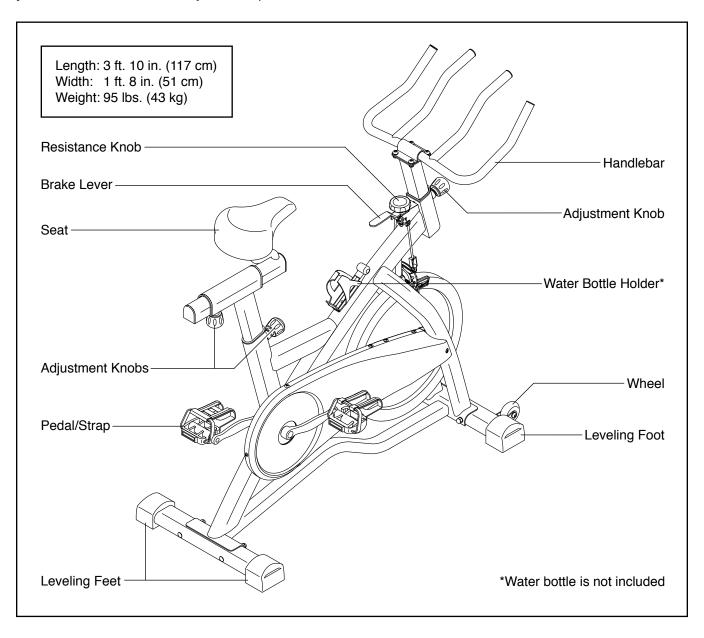

# **BEFORE YOU BEGIN**

Thank you for selecting the new PROFORM® 320 SPX exercise bike. Cycling is an effective exercise for increasing cardiovascular fitness, building endurance, and toning the body. The 320 SPX exercise bike provides a selection of features designed to make your workouts at home more effective and enjoyable.

For your benefit, read this manual carefully before you use the exercise bike. If you have questions after

reading this manual, please see the front cover of this manual. To help us assist you, note the product model number and serial number before contacting us. The model number and the location of the serial number decal are shown on the front cover of this manual.

Before reading further, please familiarize yourself with the parts that are labeled in the drawing below.

### **ASSEMBLY**

- Assembly requires two persons.
- Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until you finish all assembly steps.
- Left parts are marked "L" or "Left," and right parts are marked "R" or "Right."
- Some parts may be preassembled. Extra parts may be included.

 In addition to the included tool(s), assembly requires the following tool(s):

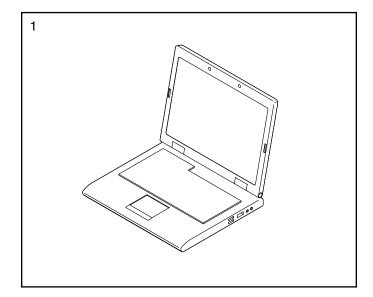

one adjustable wrench

Assembly may be easier if you have a set of wrenches. To avoid damaging parts, do not use power tools.

- 1. Go to www.iconsupport.eu on your computer and register your product.
  - · activates your warranty
  - saves you time if you ever need to contact Customer Service
  - · allows us to notify you of upgrades and offers

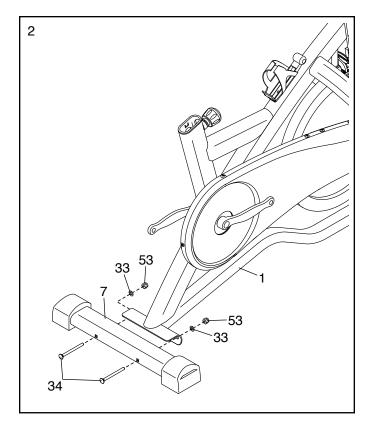

Note: If you do not have Internet access, call Customer Service (see the front cover of this manual) and register your product.

 If there is a shipping bracket (not shown) on the rear of the Frame (1), remove the two screws, the two washers, and the shipping bracket. Discard the screws, washers, and shipping bracket.

Identify the Rear Stabilizer (7), which does not have wheels.

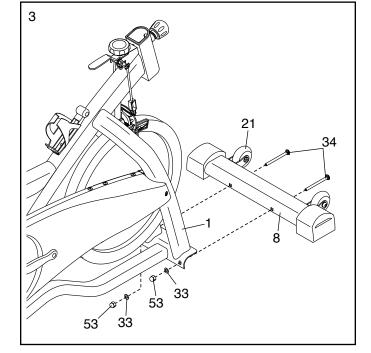

Attach the Rear Stabilizer (7) to the Frame (1) with two M8 x 90mm Carriage Bolts (34), two M8 Washers (33), and two M8 Acorn Nuts (53).

 If there is a shipping bracket (not shown) on the front of the Frame (1), remove the two screws, the two washers, and the shipping bracket. Discard the screws, washers, and shipping bracket.

Orient the Front Stabilizer (8) so that the Wheels (21) are in the position shown.

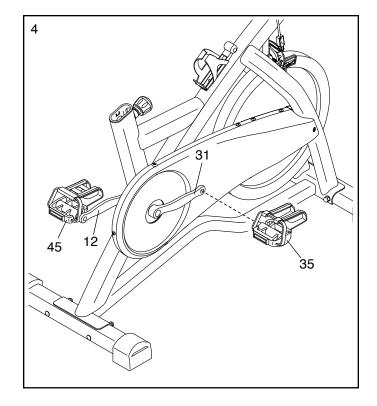

Attach the Front Stabilizer (8) to the Frame (1) with two M8 x 90mm Carriage Bolts (34), two M8 Washers (33), and two M8 Acorn Nuts (53).

4. Identify the Right Pedal (35).

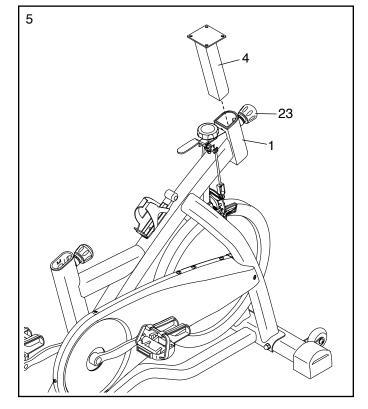

Using an adjustable wrench, **firmly tighten** the Right Pedal (35) **clockwise** into the Right Crank Arm (31).

Then, tighten the Left Pedal (45) **counterclockwise** into the Left Crank Arm (12).

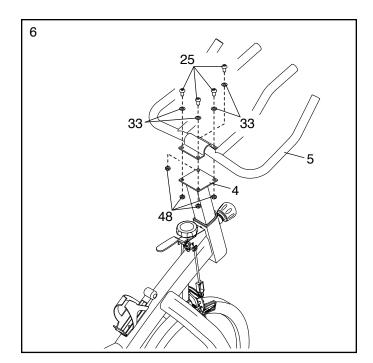

5. Locate the Adjustment Knob (23) on the front of the Frame (1). Loosen the Adjustment Knob and pull it outward. Then, insert the Handlebar Post (4) into the Frame.

Move the Handlebar Post (4) upward or downward to the desired position, release the Adjustment Knob (23) into an adjustment hole in the Handlebar Post, and then tighten the Adjustment Knob. Make sure that the Adjustment Knob is firmly engaged in an adjustment hole.

6. Attach the Handlebar (5) to the Handlebar Post (4) with four M8 x 16mm Bolts (25), four M8 Washers (33), and four M8 Locknuts (48).

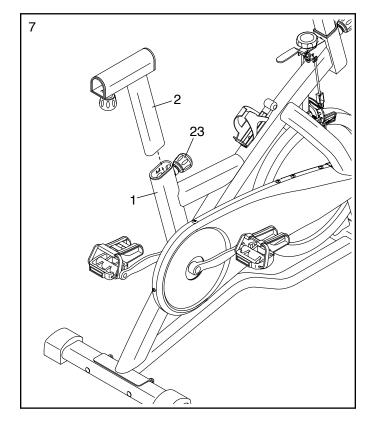

7. Orient the Seat Post (2) as shown.

Locate the Adjustment Knob (23) on the rear of the Frame (1). Loosen the Adjustment Knob and pull it outward. Then, insert the Seat Post (2) into the Frame.

Slide the Seat Post (2) upward or downward to the desired position, release the Adjustment Knob (23) into an adjustment hole in the Seat Post, and then tighten the Adjustment Knob.

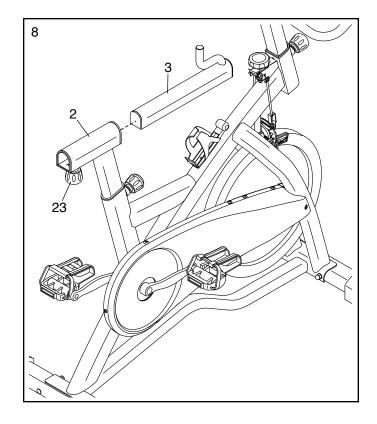

Make sure that the Adjustment Knob is firmly engaged in an adjustment hole.

8. Orient the Seat Carriage (3) as shown.

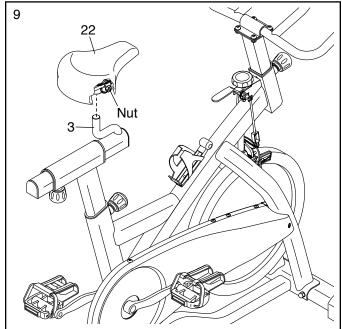

Locate the Adjustment Knob (23) on the Seat Post (2). Loosen the Adjustment Knob and pull it downward. Then, insert the Seat Carriage (3) into the Seat Post.

Slide the Seat Carriage (3) to the desired position, release the Adjustment Knob (23) into an adjustment hole in the Seat Carriage, and then tighten the Adjustment Knob. Make sure that the Adjustment Knob is firmly engaged in an adjustment hole.

 Slide the Seat (22) onto the post on the Seat Carriage (3). Make sure that the Seat is level and that the nose of the Seat is pointing straight ahead.

Then, tighten the two nuts (only one nut is shown) beneath the Seat (22).

10. After the exercise bike is assembled, inspect it to make sure that it is assembled correctly and that it functions properly. Make sure that all parts are properly tightened before you use the exercise bike. Note: Extra parts may be included. Place a mat under the exercise bike to protect the floor or carpet.

### HOW TO USE THE EXERCISE BIKE

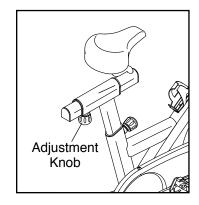

#### HOW TO ADJUST THE ANGLE OF THE SEAT

You can adjust the angle of the seat to the position that is most comfortable. You can also slide your seat forward or backward to increase your comfort or to adjust the distance to the handlebar.

To adjust the seat, see assembly step 9 on page 9. Loosen the nuts on the seat clamp a few turns, and then tilt the seat upward or downward or slide the seat forward or backward to the desired position. Then, retighten the nuts.

# HOW TO ADJUST THE HORIZONTAL POSITION OF THE SEAT

To adjust the position of the seat, first loosen the adjustment knob and pull it downward. Then, move the seat forward or backward, release the adjustment knob into an adjustment hole in the seat carriage, and firmly tighten the adjustment knob.

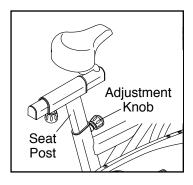

Make sure that the adjustment knob is engaged in an adjustment hole.

#### **HOW TO ADJUST THE SEAT POST**

For effective exercise, the seat should be at the proper height. As you pedal, there should be a slight bend in your knees when the pedals are in the lowest position.

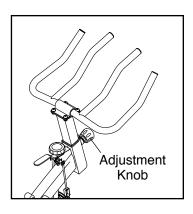

To adjust the height of the seat post, first loosen the adjustment knob and pull it outward. Then, move the seat post upward or downward, release the adjustment knob into an adjustment hole in the seat post, and firmly tighten the adjustment knob.

Make sure that the adjustment knob is engaged in an adjustment hole.

#### **HOW TO ADJUST THE HANDLEBAR POST**

To adjust the height of the handlebar post, first loosen the adjustment knob and pull it outward. Then, move the handlebar post upward or downward, release the adjustment knob into an adjustment hole in the handlebar post, and firmly tighten the adjustment knob.

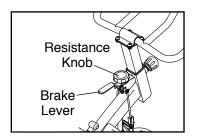

Make sure that the adjustment knob is engaged in an adjustment hole.

#### **HOW TO ADJUST THE PEDAL STRAPS**

To tighten the pedal straps (see the drawing on page 4), simply pull the ends of the pedal straps. To loosen the pedal straps, press and hold the tabs on the buckles, adjust the pedal straps to the desired position, and then release the tabs.

#### HOW TO ADJUST THE PEDALING RESISTANCE

To increase the resistance of the pedals, turn the resistance knob clockwise; to decrease the resistance, turn the resistance knob counterclockwise.

To stop the flywheel, push the brake lever downward. The flywheel should quickly come to a complete stop.

IMPORTANT: When the exercise bike is not in use, tighten the resistance knob completely.

#### HOW TO LEVEL THE EXERCISE BIKE

If the exercise bike rocks slightly on your floor during use, turn the dials on one or both of the leveling feet on the front or rear stabilizer (see the drawing on page 4) until the rocking motion is eliminated.

#### HOW TO MAINTAIN THE EXERCISE BIKE

Inspect and tighten all parts of the exercise bike regularly. Replace any worn parts immediately.

To clean the exercise bike, use a damp cloth and a small amount of mild detergent. IMPORTANT: To avoid damage to the console, keep liquids away from the console and keep the console out of direct sunlight.

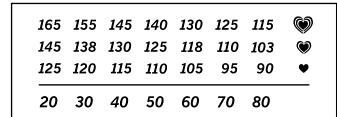

### **EXERCISE GUIDELINES**

WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.

These guidelines will help you to plan your exercise program. For detailed exercise information, obtain a reputable book or consult your physician. Remember, proper nutrition and adequate rest are essential for successful results.

#### **EXERCISE INTENSITY**

Whether your goal is to burn fat or to strengthen your cardiovascular system, exercising at the proper intensity is the key to achieving results. You can use your heart rate as a guide to find the proper intensity level. The chart below shows recommended heart rates for fat burning and aerobic exercise.

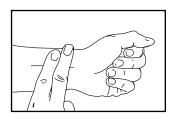

To find the proper intensity level, find your age at the bottom of the chart (ages are rounded off to the nearest ten years). The three numbers listed above your age define your "training zone." The lowest number is the heart rate for fat burning, the middle number is the heart rate for maximum fat burning, and the highest number is the heart rate for aerobic exercise.

Burning Fat—To burn fat effectively, you must exercise at a low intensity level for a sustained period of time. During the first few minutes of exercise, your body uses carbohydrate calories for energy. Only after the first few minutes of exercise does your body begin to use stored fat calories for energy. If your goal is to burn fat, adjust the intensity of your exercise until your heart rate is near the lowest number in your training zone. For maximum fat burning, exercise with your heart rate near the middle number in your training zone.

Aerobic Exercise—If your goal is to strengthen your cardiovascular system, you must perform aerobic exercise, which is activity that requires large amounts of oxygen for prolonged periods of time. For aerobic exercise, adjust the intensity of your exercise until your heart rate is near the highest number in your training zone.

#### **HOW TO MEASURE YOUR HEART RATE**

To measure your heart rate, exercise for at least four minutes. Then, stop exercising and place two fingers on your wrist as shown. Take a six-second heartbeat count, and multiply the

result by 10 to find your heart rate. For example, if your six-second heartbeat count is 14, your heart rate is 140 beats per minute.

#### **WORKOUT GUIDELINES**

**Warming Up**—Start with 5 to 10 minutes of stretching and light exercise. A warm-up increases your body temperature, heart rate, and circulation in preparation for exercise.

Training Zone Exercise—Exercise for 20 to 30 minutes with your heart rate in your training zone. (During the first few weeks of your exercise program, do not keep your heart rate in your training zone for longer than 20 minutes.) Breathe regularly and deeply as you exercise; never hold your breath.

**Cooling Down**—Finish with 5 to 10 minutes of stretching. Stretching increases the flexibility of your muscles and helps to prevent post-exercise problems.

#### **EXERCISE FREQUENCY**

To maintain or improve your condition, complete three workouts each week, with at least one day of rest between workouts. After a few months of regular exercise, you may complete up to five workouts each week, if desired. Remember, the key to success is to make exercise a regular and enjoyable part of your everyday life.

#### **SUGGESTED STRETCHES**

The correct form for several basic stretches is shown at the right. Move slowly as you stretch—never bounce.

#### 1. Toe Touch Stretch

Stand with your knees bent slightly and slowly bend forward from your hips. Allow your back and shoulders to relax as you reach down toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Hamstrings, back of knees and back.

#### 2. Hamstring Stretch

Sit with one leg extended. Bring the sole of the opposite foot toward you and rest it against the inner thigh of your extended leg. Reach toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Hamstrings, lower back and groin.

#### 3. Calf/Achilles Stretch

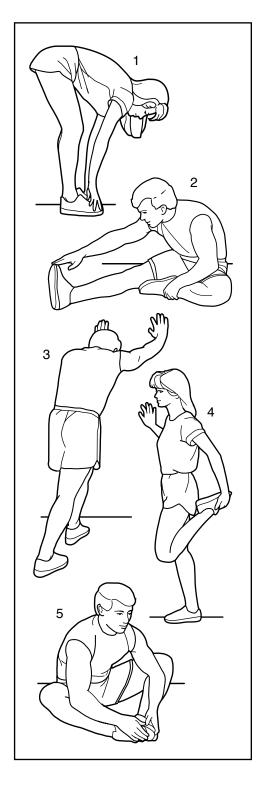

With one leg in front of the other, reach forward and place your hands against a wall. Keep your back leg straight and your back foot flat on the floor. Bend your front leg, lean forward and move your hips toward the wall. Hold for 15 counts, then relax. Repeat 3 times for each leg. To cause further stretching of the achilles tendons, bend your back leg as well. Stretches: Calves, achilles tendons and ankles.

#### 4. Quadriceps Stretch

With one hand against a wall for balance, reach back and grasp one foot with your other hand. Bring your heel as close to your buttocks as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Quadriceps and hip muscles.

#### 5. Inner Thigh Stretch

Sit with the soles of your feet together and your knees outward. Pull your feet toward your groin area as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Quadriceps and hip muscles.

Note: Specifications are subject to change without notice. For information about ordering replacement parts, see the back cover of this manual. \*These parts are not illustrated.

# **EXPLODED DRAWING**

### ORDERING REPLACEMENT PARTS

To order replacement parts, please see the front cover of this manual. To help us assist you, be prepared to provide the following information when contacting us:

- the model number and serial number of the product (see the front cover of this manual)
- the name of the product (see the front cover of this manual)
- the key number and description of the replacement part(s) (see the PART LIST and the EXPLODED DRAWING near the end of this manual)

### RECYCLING INFORMATION

This electronic product must not be disposed of in municipal waste. To preserve the environment, this product must be recycled after its useful life as required by law.

Please use recycling facilities that are authorized to collect this type of waste in your area. In doing so, you will help to conserve natural resources and improve European standards of environmental protection. If you require more information about safe and correct disposal methods, please contact your local city office or the establishment where you purchased this product.
