4.2 Functions
● **Installing the batteries**
Open the battery compartment, on the bottom of the device, and insert the 2 supplied AAA batteries. The AMC530 will beep and the LCD display will activate upon correct insertion. Replace the battery cover.

● **Setting the time and date**
When the time is displayed on the LCD screen, press SET to start adjusting the time and date. The UP and DOWN buttons change the flashing value and the SET button cycles through the adjustable values in this order: hour – minutes – year –month – day . Press the mode button to finalise your settings and return to clock mode. The device will automatically return to clock mode after a minute's inactivity.

● **Setting the alarm clock**
First select alarm mode. The mode button switches between clock mode and alarm mode, alarm mode is indicated by a bell on the left hand side of the LCD screen and whilst in clock mode, the colon between the hour and minute display flashes. Press the UP button to select from the following alarm modes:

1   "(((o)))", Single alarm
2   "ZZ" Alarm with snooze
3   "blank" No alarm

Press SET to start adjusting the alarm time. The UP and DOWN buttons change the flashing value and the SET button cycles through the adjustable values in this order: hour, minutes, snooze duration (settable from one minute to one hour in 1 minute intervals). Press the mode button to finalise your settings and return to alarm mode. The device will automatically return to alarm mode after a minute's inactivity.
