Standby time: Up to 250 hrs
Audio Play: up to 28 hrs
Video Play: up to 2.5 hrs

Features

The iPower Pro for iPhone 4/4S projects videos and slideshow images up to 60'' screen size with 0.5W audio output. The projector is charged through an external power source, through AC/DC or USB interfaces. The iPower Pro can provide power and charge independently for iPhone as a battery case. When the iPhone is loaded in the projector, you can charge the iPhone after the battery of the iPower Pro is full. For projection, images and powerpoints must be in N video format. Visit www.ipowerup.net for video conversion support.

Sync

When iPhone is inserted in iPower case, you are able to synchronize your iPhone with iTunes or other applications without removing the iPhone from the iPower Pro case. It is recommended to use the original included mini USB cable, as other cables may not work properly.

Charging Instructions:

A. Charging for projector

1. Connect wire cables.
Connect one end of the auxiliary AC Adaptor to the USB interface of the projector and the other end to power socket.
2. When the LED indicator light is red, it is charging.
3. After the charging is complete, red LED indicator light and green LED indicator light will flash constantly.

B. ***Charging from iPower Pro case to iPhone 4/4S***

1. Connect the projector and the phone.
2. Slide the power switch to the left; it will charge phone through the projector.
3. When charging phone through the projector, LED indicator light will become red.
4. When the battery of the Pro is lower than 3.3V, it will discontinue charging the iPhone to protect the battery of iPower Pro.

C. Charging iPower Pro and iPhone 4/4S at the same time

1. Insert the phone into the projector.
2. Connect wire cables.
Connect one end of the auxiliary AC Adaptor to the USB interface of the projector and the other end to power socket.
- When the projector is turned off, the external power will charge the projector first, and the red LED remains; when the charging completes, the green LED indicator illuminates and red LED indicator remains on, then the external power will charge the IPhone 4.
- When the projector is in video mode, the external power will charge the projector, when charging completes, the external power will automatically switch to charge the iPhone, the red LED indicator remains on and the blue LED indicator will flash.
-When the projector is charging IPhone 4, the external power will charge both (the projector and the iPhone), the red LED indicator remains on.

Adjustments

When in video mode, you can adjust the focus wheel to achieve better video quality and resolution. For audio, you can adjust the volume through pressing the two buttons on the left side.

LED lights Indication

-Red light flashing = iPower Pro charging
-Green light flashing = Charging complete
-Blue light flashing = iPower Pro is in video mode
-Blue flashing rapidly = >20% power and iPower Pro will shut off automatically in one minute.

Pictures & Video

Video Play

1. Connect the projector and the iPhone.
2. Turn on the projector.
3. Select video files to display in the main interface of IPhone 4/4S, then press PLAY.

Picture Slideshows

1. Connect the projector and the iPhone.
2. Turn on the projector.
3. Select picture file to display in the main interface of the iPhone, then press "Browse".

File Management

You can copy or delete pictures and videos on iPhone through connecting the projector to computer. A setup wizard will pop and and walk you through the steps to manage files.
