

# Power Charger Pack

## User Manual

### Battery Pack for iPhone 5

#### Welcome

Thank you for purchasing the power charger Pack. You will now be able to travel great distances, be the master of your own destiny, no longer bound by the limitations of your iPhone internal battery. Let's get the power.

#### Package Contains

Power charger Pack  
Micro USB Cable

#### Features

The power charger Pack extends the battery life of your iPhone for hours and provides a comfortable ergonomic design with the complete protection of a hard shell case.

#### Here's a rundown of why the power charger Pack is so fantastic:

- 1.Ergonomic, form-fitting, fully protective impact-resistant case-and-battery in-one for iPhone
- 2.Integrated power switch allows you to put the power charger Pack in standby mode. Only use the battery when you need it. In standby mode, the power charger Pack still allows charge and sync capabilities through the micro-USB port and still offers the complete protection of case.
- 3.User breakthrough rechargeable lithium polymer battery. (Much safer than those troublesome lithium ion batteries)
- 4.State-of-the-art battery technology extends the life of your iPhone for hours.....and you can even recharge it while it's still connected to the iPhone! This battery charger rocks.
- 5.Track battery power status at a glance with an integrated 4-light LED status indicator. Indicates charging mode and current battery life. Know before

you go!

6.It's the included USB micro cable connection that allows you to charge and sync your iPhone while refilling your power charger Pack at the same time. Really you don't even have to disconnect, though it's a snap when you do.

7.Rechargeable for over 500 cycles (These are FULL cycles. Partial cycles don't count as full. So, you can charge your power charger Pack 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off)

8.Smart battery technology actually instructs the iPhone to drain out the power charger Pack. When you're done with the power charger Pack, you can pull it off and still have a fully charged iPhone.

9.The power charger Pack offers complete protection from top to bottom. No more choosing between protection and power.

10.Built-in short circuit, over-charge and temperature protection. Safety First!

#### Compatibility

Though the power charger Pack for iPhone 5 comes with a standard ipod/iPhone connection pin, this battery is intended solely for use with the Apple® iPhone 5. Please do not attempt to use the product with another device, things could go haywire, but contact us if they do.

#### Charging your power charger Pack

Connect the power charger Pack to a power source using the micro USB cable that came with your power charger Pack. The USB cable can be plugged in to your computer or only "Made for iPhone" wall-plug style power source with USB out including the standard iPhone USB wall adaptor. (The LEDs located on the back of the device will blink when charging, as the power charger Pack becomes more charged the LEDs will indicated how full it is, but one

LED will remain blinking until completely full.)

### Charge your iPhone 5 using the power charger Pack

If your iPhone is drained of power or if you want to extend the battery life of your iPhone, simply slide the iPhone into the power charger Pack. Make sure that the pin connector is securely inserted into the bottom of the iPhone and the switch is turned on. When the iPhone recognizes the power charger Pack, a battery symbol will appear on the screen and you will hear a chirp from the iPhone, this indicates that the iPhone is charging or using the power from the power charger Pack rather than from the iPhone itself.

If your iPhone is drained of power, the power charger Pack will first charge your iPhone. If your iPhone is full charged, the power charger Pack will act as your primary battery and no power will be lost from the iPhone internal battery until the power charger Pack is depleted. So you keep on talkin', rockin', surfin', and sendin'!

### Checking the status of the power charger Pack

You are always in the KNOW! To check the battery status of the power charger Pack, press the button located on the bottom of the device. When pressed, the LED lights will illuminate for several seconds. Four LEDs means that the power charger Pack is fully charged, and one LED means that it's almost empty.

### Switching your power charger Pack to stand-by mode

If you'd rather use your internal battery and not the power charger Pack use the switch on the back lower-right corner of the power charger Pack to put it into stand-by mode. The dot near the switch will indicate whether the power charger Pack is in standby mode or charging mode.

When your internal battery is low, simply flick the switch on and your iPhone will begin charging immediately.

**Note:** Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.

### Sync with your computer without removing the power charger Pack

While connected to the power charger Pack you can still sync your iPhone with a computer. Simply connect the included micro USB cable from the power charger Pack to the computer and sync your iPhone the same as if it was directly connected.

### To keep your power charger Pack operating to its fullest potential, make sure to do the following:

1. Keep your power charger Pack dry and away from moisture and corrosive material.
2. Do not wash the power charger Pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened, cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your power charger Pack once every three months when not in use. And remember to

charge it for one hour before putting it away the first time.
