## **Preparations**

- Prior to operation, please read this manual carefully.
- Check every items in the carrying case.
- Copy PC Viewer program in Micro SD Card to your PC or Laptop prior to operation.

## Package

# **Before Operation**

## Directions

Please keep the followings to avoid potentially hazardous or damage to the products from mishandled

- 1. Use supplied authorized battery charger to recharge batteries.
- 2. Confirm battery polarity when inserting battery case into battery charger.
- 3. Rotate the battery cap open on the body and insert a battery case with correct polarity direction.
- 4. The LED on the battery charger changes from red to green color when charging is done completely.
- 5. Do not see the lights directly from the device, it may damage your eye sight.
- GPS activation takes a little time after power on for searching satellites. GPS information could not be stored during this searching time.
- 7. Receive sensitivity of GPS could be different from environment, weather and other factors. GPS inaccessible area : Inside buildings, Underground parking lots, Complex skyscraper area, Nasty weather etc.,
- 8. Once waterproof cap for functional key part is installed, it is not available to receive GPS signal.
- 9. E-Compass may have deviation in the environment of magnetic field.
- 10. Map screen in the PC Viewer is not available without internet access.
- 11. Rotate the 3 caps (Battery cap, waterproof cap of interface & functional key) to close it completely while using in underwater. (Waterproof O-ring is consumable so it is needed to be changed periodically.)
- 12. It may takes a little time to turn on the LCD display.
- 13. LCD display color could be changed in the low temperature.
  - (But it is not failure, it comes back soon in the normal temperature)
- 14. Do not shock the front lens and LCD display part.
- 15. Use the tweezers when change waterproof ring or pull out Micro SD card.

## Parts name

- 1. Camera
- 2. IR LED (6pcs)
- 3. Hi Powered LED
- 4. Head
- 5. LCD Display
- 6. DVR Rotary Switch
- 7. Function Keys / GPS Receiver
- 8. LED Rotary Switch
- 9. Battery Cap
- 10. Slot for Hand Strap
- 11. Interface Out

(HDMI / USB / Micro SD Card)

# **Before Operation**

## Battery Charging

Put the battery pack into the battery case as shown in illustration.

#### Caution

Use only authorized battery supplied what has 18650 PCM safety circuit inside. Before insert the battery, confirm the battery polarity.

To charge batteries, put the battery case into battery

charger as shown in illustration.

Red LED : Under charging

Green LED : Charged completely

Red LED blink : Change battery (Normally life time of battery pack is more than 500 times).

### How to use and charge Lithium - ion Batteries

- 1, Use 2 battery packs in turn.
- 2. Do not leave fully charged battery (Green LED) in the charger more than 1 hour.
- 3. To prolong the battery life time, let the battery be full-discharging and full-charging once a half year.
- 4. It takes 5~6 hours to fully charge up a fully discharged battery.

5. Overcharging, over-discharging and charging below 0°C will shorten the battery life time and not recommended.

## **Check point for Waterproof function**

Check carefully followings when use waterproof function.

- Check the waterproof ring(2pcs) completely which are installed on functional key part(No.1), If it is damaged, replace waterproof ring(Key Control Section O-Ring) supplied and spray lubricant on the O-ring.
- Check the waterproof ring(2pcs) completely which are installed on Interface part(No.2), ), If it is damaged, replace waterproof ring(Key Control Section O-Ring) supplied and spray lubricant on the O-ring.
- Check the waterproof ring(2pcs) completely which are installed on battery cap, If it is damaged, replace waterproof ring(Key Control Section O-Ring) supplied and spray lubricant on the O-ring.
- 4. Each waterproof cap should be closed completely.
- 5. Insufficient lubricant may cause of damage to waterproof ring.

#### [ Caution]

- 1. Spray lubricant on every waterproof ring before using under the water. (Insufficient lubricant may cause of damage to waterproof ring.)
- Once waterproof cap for interface is installed, sound recording is not available because mike hole is located in interface part.
- Once waterproof cap for functional key part is installed, GPS receiving is not available because GPS antenna is located in interface part.
- Clean with water and dry up completely after using in the marine. (Use rubber cap for interface and functional key part when normal operation)
- 5. To keep the waterproof performance completely, replace waterproof ring one or two times per year.
  - (Four or five times per year when frequently used)
- 6. Be careful not to be tapped foreign substances around waterproof ring.
- 7. Do not use more than 1 hour consecutively in the marine.

# Operation

## Flashlights

1. Flashlight is activated by LED rotary switch.

Each function is executed when icon on the rotary switch is placed on arrow marking.

# Operation

Video		,	DVR recording with re the rotary switch is place	,
Icons			,	
Night Vision Video Recording	Night Vision Power On	Power Off	Normal Mode Power On	Normal Mode Video Recording

[ How to change night vision mode and normal mode]

Night vision mode is activated when the rotary switch is set to "ON" icon on the right side of the "OFF" icon. To activate Normal mode, rotate the switch to the opposite direction, set the other "ON" icon on the arrow marking.

#### **PC Viewer display** 2

- 1. Pharobit LOGO
- 2. Minimize, Maximize, Close
- 3 Video screen
- 4. Map screen
- 5. Map / satellite view selection 9. Maximize Map Screen
- 6. Play, Stop, REW, FF, Mute, 10. Video edition start button
- Repeat control, Volume bar
- 7 File Search
- 8 Maximize Video Screen

- 11. Video edition finish button
- 12. File manager
- 13 File list
- 14. Total distance display

## 3 File Search

To play video file, click the file search icon and select a \*.MP4 file in the browser. To see GPS data on the map only, select a \*.TXT file in the browser.

## File path : SDCARD root\DCIM\100MEDIA %Caution

- 1. Video screen is not available when open TXT file.
- 2. Map Screen is not available if no TXT file exists with same file name to the selected MP4 file.

MP4 / TXT selection

3. Map Screen is not supported without Internet access.

#### Screen for Selecting TXT file

## 4 Global position information

Red balloon pins pop up during video playing which have GPS information. Global position, time, path and distances are displayed once a red balloon pin is clicked.

- 1. Right click on a red balloon pin, where the origin, then "add ruler" menu pops up.
- Click the "add ruler" menu and a yellow point marker is created.
- 3. Drag the marker to an arbitrary user point. Distance from the origin to the user point is displayed automatically.

It is possible to make a new user point from the user point, then it displays total distance from origin red balloon pin through the user points. This function is useful to measure distance through arbitrary path.

Start point of recording : Blue balloon pin Path Tracing : Red balloon pin Finish point of recording : Green balloon pin Created random post : Yellow balloon pin

## 6 Store user path

Store user path by clicking "File manager" button (No.12) followed by "Map save" button.

## 7 Edit Video

This function allow users to create new video files from a video file by specifying video start and end points. 1. Move the time slide bar to the time where the new video file supposed to be started, or play the file until the time.

Click video edition start button (10), then a window pops up with the thumbnail image of the start time.
 Play the file again, or move the slide bar until the end time and then click video edition finish

button (11). The thumbnail image of the end time is displayed on the blank on the right side of the start time thumbnail image.

4. Create a new video file by clicking save button.

# **Q & A**

#### Can not turn on the device?

- Check if the battery is installed as instructed in the manual.
- Check the battery power

#### Recording is not available?

- Do not insert the Micro SD card while DVR is turned on. The card should be installed while DVR is turned off.
- Check the memory capacity left.
- Audio recording is not available once the waterproof cap for interfaces is installed.

#### LCD does not turn on?

- Check it the rotary switch is placed on "ON" position.
- Check the battery power.
- Set to the night vision mode in the night.

#### The map is not available in the PC Viewer?

- Check the internet connection.
- If the GPS information is not stored, the map is not working in the PC Viewer.
- GPS inaccessible area: Inside buildings, Underground parking lots, Complex skyscraper area, Bad weather conditions etc.,
