Overview of New Features

IntraVet 350

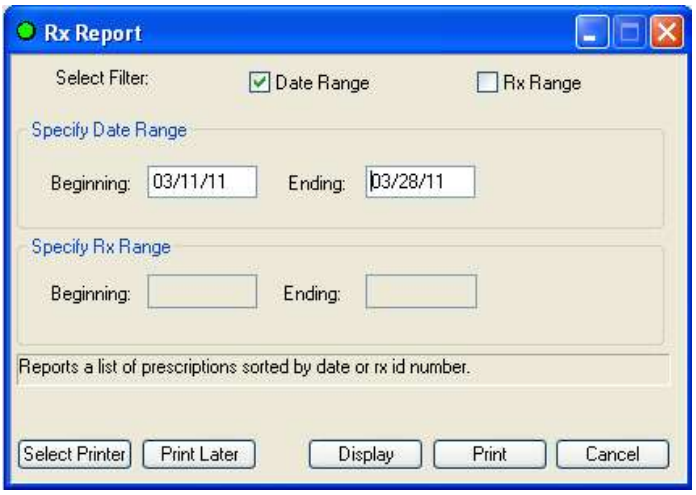
This update is designed to bring your **IntraVet** system up to current guidelines with new reports, new labels and certification changes. Please review the following information to familiarize your office with these changes.

Reports

To better comply with the current state and federal guidelines, the following changes have been made to reports:

Rx Report – Access the Rx Report by selecting **Reports** | **Inventory Reports** | **Rx Reports**. Filter by **Date Range** – the date assigned to the prescription; or **Rx Range** – the number now assigned to all prescriptions.

*Choose the **Select Printer** button to choose a printer for this report.*



Select **Display** to preview the report prior to printing. Select **Print** to print. Select **Print Later** to add the report to the batch for printing later. Select **Cancel** to close without generating.

Controlled Substance Dispensing Report – This report includes the following:

- The National Drug Code (NDC) number will display.

- The Prescription date replaces the Transaction Date
- Prescriber's DEA number is displayed
- Preview the report prior to printing

The **Controlled Substance Dispensing Report** allows you to track the dispensing of controlled substances for regulatory reporting reasons. To access this report, select **Reports** | **Inventory Reports** | **Controlled Substance Dispensing Report**.

Enter the **Beginning** and **Ending** dates. Enter a number of days in the **Days supply greater than or equal to** field.

Select **Display** to preview the report prior to printing. Select **Print** to print. Select **Print Later** to add the report to the batch for printing later. Select **Cancel** to close without generating.

Certificates

Texas Rabies Certificate – Changes have been added to the Texas Rabies Certificate to comply with Texas state laws pertaining to rabies tracking.

Form 51 with Picture – The existing patient photo will appear on this form. In the **Certificate F3 Lookup**, select **Form 51 with Picture**.

Rx Labels

Changes to prescription labels have been made to meet the requirements of the following states:

Nevada – The NV label now includes the following fields:

- A serial number will be generated with each form that can be used for tracking purposes.

Arizona – The AZ label now includes the following fields:

- The dispensing office's address now appears on the Rx label.

Texas – The TX label now includes the following fields:

- The client's address is now printed on prescriptions for controlled substances.

- If the patient is stabled (or kenneled) in a different location, a second label that contains the patient's address will print to comply with TX state law that requires both the client and patient addresses be included on any controlled substance prescription label.

Integrations

Now you can share information with the following software products:

Procyte

Procyte DX is a hematology analyzer from IDEXX. Access the **Procyte DX** interface by selecting **File** | **Lab Interface** | **Idexx VetLab**/**Lasercyte.**

ePetHealth

ePetHealth is the leading provider of electronic pet medical records. To access **ePetHealth**, select **Client Account Management** | **Patient (Edit or New)** | **Setup tab** | **ePetHealth ID**.

RADInfo

RADInfo is a digital radiology system used to obtain X-rays. After installing **RADInfo**, you will need to:

1. Setup the **RSVS Viewer** under **Setup** | **Other Programs** | **RSVS Viewer**. Select **Browse** to locate the **RSVS Viewer** file (cmdrsvs.exe).
2. In **IntraVet**, under **Setup | DICOM**, select the **RADInfo** radio button under **DICOM** providers.
3. Double-click the newly placed **Activate MWL** icon on your desktop to register the software.

With this new interface:

- **Breed** and **Species** information will now be shared with **RADInfo**.

For more information on using **RADInfo**, please contact a **RADInfo** representative.

X-Charge Additions

X-Charge transactions are now Payment Card Industry (PCI) data compliant.
