| 8. Rear Camera | Rear-facing camera for taking pictures |
| 9. Speaker | |

Charging Battery

The device has a built-in rechargeable battery. No extra battery installation is required. Just charge the device when it indicates low battery.

To charge the battery, connect the device to any standard wall outlet via the USB port using the power adaptor. It takes about 5 hours to fully charge the battery.

Note:

- a. We advice to use only the delivered power adapter with this tablet.
- b. You can operate the device even when it is being charged. But for extended battery life, it is suggested NOT to use the device when it is charging.
- c. It is recommended to charge the battery before you use the device for the first time.
- d. For maximum performance, lithium-ion batteries need to be used often. If you don't use the device often, be sure to recharge the battery at least once per month.
- e. Should the rechargeable battery of the device discharge completely, connect the device (using the adapter) to the main power source for approximately 5-10 minutes before attempting normal operation.
- f. In some cases, devices which have been charged for longer periods of time may not be able to be switched back on. Should this occur you have to make a Reset. Press and hold for 10 Seconds to reset and restart the device.

Touchscreen

The touchscreen is a capacitive display and designed for precision and responds best when touched with the smallest point possible. Use the flat pad of your finger to touch the screen.

Connect via USB

Please note: Only use connecting cable with a maximum length of 80cm. Please make sure when connecting the USB adapter or connector cables attention to the correct alignment of the connector before inserting it into the USB socket on the unit. Incorrect insertion may cause damage to plug and socket.

On the side of the plug there are usually small sizes of hooks that secure the fixation. Pay special attention on the position of the hooks, they show upwards when connecting cables while the screen is above.

Installing Memory Card

This device can read files directly from memory card and USB memory.

To use a memory card, find the card slot at the side of the device and then insert the memory card into the slot in the correct orientation or Connect USB Memory using the provided USB adaptor cable. To access the files stored in the memory card, enter the **Explorer** mode by tapping the Explorer icon and select the “SD Card” directory.

- Check that the Micro SD card is in the correct position with the contact pin facing downwards as illustrated. You may damage the card and the reader if Micro SD card is not inserted in correct position.
- Push the Micro SD card into the card slot until it clicks.
- To remove Micro SD card, push the card once again until it clicks.

Note: We recommend using only Micro SD or SDHC cards up to 32GB capacity.

- When a Micro SD card is inserted in or ejected from the device, it may take few seconds for the device to update the content.
- Please avoid inserting or ejecting Micro SD card when other operation is running as this may cause the system hang.
- Do Not remove the card if the content inside the card is being played. This will halt the operation of the device and might cause a system hang.
- Only use the provided USB adaptor cable to attach USB memory devices.
- Please use your fingernails to properly insert or remove the card.

Transferring Files

Before reading or playing files, you need to transfer media files from a computer to the device.

- 1) Connect the device to a computer with the supplied USB cable.
- 2) Once connected, one removable disk drive will show on your computer. It represents the internal memory of the device and the memory card inserted into the device. Now you can copy files from or to these disk drive just as you would on your hard drive.
- 3) Disconnect the device from the computer.

Note: The pre-installed applications and Android OS occupy a considerable part of capacity – nearly more than 1GB, it is normal that you see huge difference between available memory space and total capacity. **Caution!** The device supports Adobe DRM contents. Adobe Digital Editions (ADE) is required. Please refer to the user's manual for closer information's on how to use DRM protected files.

Screen lock

The screen automatically turns off and locks itself after a set period of time. When the screen turned off, press the **Power** button to light up the screen.

Push the lock icon  and drag it to the open lock at the right side to unlock.
