ALL SALES ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

TERMS

We extend Thirty (30) Days open account to customers on approved credit. And we offer a cash discount of 2% for payment made within 10 days of the invoice date. These discounts will be indicated on our invoice to you. If credit terms are desired on new accounts, please accompany your first order with credit information. Your first order placed will be C.O.D., unless pre-approved. **Current bank interest rates will be charged to overdue accounts. Should suit be instituted to collect any debts, customer will pay all actual cost of collection and Attorney fees.**

FREIGHT POLICY

Freight charges are \$1,200.00 pre-paid throughout the continental United States (\$1,800 pre-paid to Hawaii) all orders contain a handling fee.

FUEL SURCHARGE APPLIES TO ITEMS WHERE EXCESSIVE WEIGHT AND DIMENSIONAL CONSIDERATIONS WOULD BE A FACTOR: SUCH AS BACKERBOARD SCREWS, MIXING TUBS, SCREDS, PAN LINERS, TILES, SAWS, AND SPONGES.

CLAIMS

All claims for merchandise damaged in transit must be made with the freight company.

DEFECTS

The billing department **must be notified** of any defects and price or quality errors within **5 working days after receipt of shipment**. Defective merchandise may be returned no later than 30 days after receipt.

RETURNS

No merchandise may be returned without approval (written or verbal) from our office. All merchandise should be returned prepaid. **No merchandise may be returned that has been out of the factory for 3 months or longer.** Merchandise that has been discontinued, either in our catalog or price sheet, cannot be returned under any circumstances. **No returns shall be accepted on special order items.**

CREDITS

Credit for returned goods not accompanied by the original invoice number will be issued at the current price from which shall be deducted.

-20% of the net credit value, for handling and restocking.

Credit for freight charges shall be issued on defective materials and in-house errors only. Credit not taken within a one year period will be forfeited. Refund checks shall not be issued unless the account is to be closed permanently.

Plastic Sand Grid
• Separates Particulates from Cleaner Water

09-CADDY-W

Wheel Set
• Saves Your Back

Each unit comes in this full color merchandizer box! (1 per Box)

Several years ago we started seeing grout tubs appear in the American flooring market...

Contrary to what you may believe, grout tubs have been a very useful cleanup tool in Europe for 30 years. Initially developed by Germany and now appearing all over the USA, this tool bucket kit is quite the time saver. The tub and sponge design provide many benefits. The slit fabric backed sponge allows sand to release more easily and the fabric material attaches to a Velcro handle making it interchangeable. The extra large plastic handle attachment keeps the sponge flat thus preventing excessive grout removal and cleaning a larger area faster. Now, if you think cutting your grouting time in half isn't a good enough reason for using one of these great tubs hear this. The No. 1 reason I love this tool is that I can feel my child's face again. That's right, you know what I'm talking about. Grout has chemicals in it that make your hands feel like cardboard. This setup prevents you from putting your hands in the grout water... "soft hands, wow, what a nice feeling". I've used several tubs but have found the Troxell® tub system is the best unit on the market. Some brands have plastic rollers that break easily. Troxell has a non-breakable rustproof stainless steel roller system. Other systems also have a sponge glued to the handle. This requires you to buy a new handle with every sponge doubling your operating cost. The Velcro attached system that Troxell® offers is much less expensive. Buy yourself one of these system you won't be disappointed.

GorillaGrip®
COMFORT

Ask the Resident Expert...

- Q. What is a margin float, and why should I care?
- A. Imaging the control of a margin trowel combined with the grouting ability of a quality float... that is exactly what you have with a margin float. Makes floating behind toilets and other hard-to-reach areas easy. Troxell's margin float is balanced, comfortable to hold, and has the right combination of stiffness and flexibility. Hold one in your hand...you'll see what I mean.

GLOBAL PATENTED

GLOBAL PATENTED / ULTIMATE COMFORT

The perfect combination of protection and comfort other kneepads just can't match. Unlike other kneepads, they are so comfortable that they can be worn with shorts. The quick-fastening front-strap design and "clear zone" behind the knee eliminates rash or pinching. They are constructed of 100% washable neoprene. Non-liquid pad provides a cushion for the knees that won't rupture or ooze gel. Non-marring polyurethane coating extends life of kneepad for longer service.

Ideal for any tasks that require kneeling: including cleaning, gardening and landscape, painting and plumbing, brick and tile work, concrete and electrical, automotive, marine, audio-visual installation...and the list goes on.

These workhorse kneepads are so comfortable you may forget that you have them on! Can you say that about other kneepads?

**U.S. Patent 4641775
International Patent 2001-2935
Huntington Beach, CA 92648**

SUPER-SOFT KNEEPADS

Patented Comfort Technology

Durable pad, encased in comfortable neoprene, protects knees for extended kneeling.

Comfortable neoprene is 100% washable and is less likely to bind and cause rash.

Strong Velcro® front fastener stays put and allows a free range of motion.

Unique front strap design makes this the most versatile, easy to use and comfortable kneepad on the market. Front strap and kneepad coated with polyurethane for add protection and durability.

Sales of Leatherhead™ Knee Pads Eclipse Regular Knee Pads

INTRODUCED 18 MONTHS AGO, SALES SKYROCKET

After years of feedback, TroxellUSA® responded by enlarging and putting a durable leather front on the revolutionary Super Soft™ Knee Pads. These two simple modifications opened up these products to users that were on the fence in terms of their willingness to adopt Super Soft™ Knee Pads.

Concrete contractors, in particular, were quick to embrace the use of Leatherheads for their durability. As were users over 180 lbs (82 kg), who discovered the elevated comfort level Super Softs offer.

Always evolving, always innovating, TroxellUSA® does what needs to be done to bring the best, most successful products to the market. At the forefront, with the most accurate gauge of industry needs and conditions, TroxellUSA® makes it happen.

- Use the 1/8" wheel for mosaic and tightly spaced floor tiles
- The 1/4" wheel is perfect for larger grout joints

SURFACE INSTALLATION SCIENCE

It is fair to say surface installers consider themselves to be professional tradesmen...some would even consider themselves to be artisans. Yet, many refuse to embrace technology in favor of some skewed sense of tradition. The famous artisans of old didn't shun scientific advances of their trade...they invented them and profitted from them. And their competitors fell by the wayside.

Not unlike a war, you wouldn't want your enemy to have a technological advantage. While surface installation may not be as life or death as this...it is very competitive. More than ever, quick turn-around is essential to winning customers, closing project sales cycles, and earning referrals.

Browse this publication with this in mind, it is your ally and will help you quickly see how advancements will help you succeed. The state-of-the-art tools we offer not only save on labor costs and material waste, they help tradesmen earn and keep customers.

SPOTLIGHT ON... KAYLA TROXELL!

Don't tell Kayla Troxell there is a slowdown in the economy. "Now's the time to pick-up market share as the weaker players...and, frankly, some of the major ones, too...are squeezed out of the game." In addition to picking up accounts orphaned by faltering companies, she's become TroxellUSA's brand manager for SCP. She states, "Tough markets breed opportunities. I want to show my customers where they are."

SUPER STICKY!

**Made in
AMERICA!**

Premium Grade Velcro®

TEN TIME SAVER TIPS!

1. Use a **Walking Meter** to speed up job estimating...and you don't need someone to hold the dummy end of the tape
2. Snap layout lines & use hairspray to keep lines from wearing away
3. Use self-tapping square head drive **Backerboard Screws**...you'll cut your screw time in half!
4. Using a **Tile Caddy** or Dolly - keeps tile at your side when setting...and you'll save your back from straining!
5. Profiling with a **Diamond Wheel** eliminates dust and edges stone fast!
6. A **Grout Caddy System** cleans up 3 times faster than an old school sponge...ask for the new **Jumbo Caddy Sponge**
7. Set the center of a room first and allow to dry, then set the outside area
8. 2 People! Get a helper to make your cuts...a setting job is just too much for one person
9. Use a **China Marker** - a standard pencil mark washes or rubs away easily
10. Use **Cheesecloth** for cleaning grout film...a REAL TIME SAVER!

21 RINGSAW

BUZZCUT™ RING SAW

FOR THE DETAIL ORIENTED CONSUMER

Quickly cut irregular shapes or circles with complete control and precision into tile and glass... take your workmanship to new levels of artistry

Just a little off the top, please...

Dino's®

WHOLESALE ONLY

Famed for its creative heritage, Venice is the ancestral home of modern applied arts...especially glass, ceramics and metal work. Due to the proximity of a variety of Italian quarries, these sciences have been married to the stone and tile industries ever since. Tap into the source of your creativity. Give your customers something more than the "same old same old"...give them Old World Innovation and New World Technology
