PENTAX Optio 555

PC Connection Manual

You can transfer images and movies captured with a digital camera to your computer and then organize, display, edit, print, and share them by installing the software recorded on the provided CD-ROM to your computer and connecting your digital camera to your computer with the USB cable. This section explains how to install the provided software "ACDSee for PENTAX" and the other necessary preparations for enjoying your digital camera pictures and movies on your computer.

Software Provided

Windows

- ACDSee for PENTAX 2.0 (Image viewing/editing software) ACD photostitcher (Panorama image editing software) FotoSlate 3.0 (Image layout and printing software)
- ACD Showtime! for PENTAX (Movie editing software) QuickTime 6
- DirectX 9.0

Macintosh

- ACDSee for PENTAX (Image viewing software)
- ACD photostitcher (Panorama image editing software)
- You are recommended to use the AC adapter D-AC5 (optional) connected to a power outlet when connecting the camera to a computer. If the battery runs out of power while images are being transmitted to the computer, the image data may be lost or damaged. When using the AC adapter, make sure that the DC terminal is properly connected to the camera.

- Internet Explorer
- http://www.microsoft.com/ie
- Windows Media Player http://www.microsoft.com/windows/windowsmedia/
- Windows Installer Service
- http://support.microsoft.com/default.aspx?scid=kb;EN-US;292539

Macintosh System Requirements

• USB connection

• OS

- OS : Mac OS 9.2/X (Ver. 10.1, 10.2, 10.3)
- · USB port must be standard equipment
- * Installation of the driver is not necessary

Application Software

<ACDSee for PENTAX and ACD photostitcher>

(6 languages: English, French, German, Spanish, Italian, Japanese)

- : Mac OS 9.2 or higher (QuickTime 6 or later is required. Or, for Mac OS 9.2. the most recent version of CarbonLib is necessary.)
- CPU : PowerPC 266MHz or higher
- Memory : 8MB minimum
- Hard Disk space : 6MB minimum
- * Operation is not guaranteed on all PCs meeting the system requirements.

Macintosh **Step 2**

Installing the Image Processing Software DSee for PENTAX)

ction describes the procedures for installing ACDSee for PENTAX, which lets you view t images transferred to your Macintosh.

Furn your Macintosh on.

nsert the CD-ROM (S-SW32) in the CD-ROM drive.

- Double-click the CD-ROM (S-SW32) icon.
- Double-click the [Install ACDSee] icon.
- The PENTAX Software Installer screen appears.

Double-click the [Master Installer] icon to display the PENTAX Software Installer screen.

You can choose the languages from the

lisplayed screen.

6 Click [ACDSee[™]].

The setup screen appears. Follow the on-screen guidance to input registration information and install the software.

"ACD Photosticher", a panorama image editing software, is also installed when you install all program features of ACDSee for PENTAX (complete installation).

If the message [CarbonLib-xxxxx could not be found] appears during installation;

- You must add the extension file "CarbonLib" to the Extension folder in the System folder in order to install the provided software in Mac OS 9.2.
- This message appears when this extension file does not exist or when an older version of the file exists.
- The latest version of the CarbonLib file is available on the Apple website. Download the file and then install it.
- Apple website: http://www.apple.com/ Contact Apple for detailed information on how to use the CarbonLib file.

Installing the Software

Macintosh **Step 4** Transferring Images to a Macintosh

Connecting the Camera and Macintosh

- **1** Turn your Macintosh on.
- With your camera turned off, connect to your Macintosh using the USB cable.

If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transmitted to your Macintosh.

3 Turn your camera on.

The camera is recognized as [untitled] ([NO_NAME] in Mac OS X) on the desktop. The drive name can be changed.

- If the SD Memory Card has a volume label, the volume label name appears instead of [untitled]. A new unformatted SD Memory Card may show the manufacturer name or model number.
 - When the camera is connected to a Macintosh with the USB cable, the power indicator blinks to indicate that the camera is communicating with the Macintosh.

Transferring Images

See your Macintosh user's manual for how to copy or move files.

Even if camera images are not transferred, they can be directly displayed on the Macintosh from a camera connected to the Macintosh.
To edit images, first transfer them to your Macintosh.

Disconnecting the Camera from Your Macintosh

1 Drag [untitled] on the desktop to the trash.

- If the SD Memory Card has a volume label, drag the icon of that name to the trash.**Disconnect the USB cable from your Macintosh and the camera.**
- If the camera (removable disk) is being used by an application such as ACDSee for PENTAX, the camera cannot be disconnected until the application is closed.
 The camera will be turned off when the USB cable is disconnected.

Transferring Images to a Windows PC

When the digital camera is connected to your Windows PC and the camera is turned on, the PC automatically recognizes the camera and begins transferring images.

If the digital camera is connected to your PC in [PictBridge] USB Connection mode, the images cannot be transferred. Disconnect the USB cable from your camera and PC, follow the instructions in "Setting Up Your Digital Camera" to set the USB Connection mode to [PC], and then reconnect the USB cable.

Connecting the Camera and PC

1 Turn your PC on.

2 With your camera turned off, connect to your PC using the USB cable. If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transmitted to your PC.

3 Turn your camera on.

The Device Detector screen appears automatically.

If the Device Detector screen does not appear, display and copy the images following the steps in "When the Device Detector screen does not appear".

When the camera is connected to a PC with the USB cable, the power indicator blinks to indicate that the camera is communicating with the PC.

Transferring Images

4 Confirm that [Acquire images from the device with ACDSee] is checked and click [OK].

5 Click [Next].

6 Select an image to copy and click [Next].

7 Specify the name and save destination of the image, and click [Next].

The image is copied to the PC.

Click [Finish].
 The ACDSee for PENTAX 2.0 Browser starts.

The first time ACDSee for PENTAX 2.0 is run, "ACDSee has detected that you do not have the following software installed on your computer: Ghostscript 7.0 (or later)" may appear in the [Components missing] dialog box. If you will only display or edit images inside the digital camera, it is not necessary for Ghostscript 7.0 to support ACDSee for PENTAX 2.0. Click [Close] to close the message window.

When the Device Detector screen does not appear

4 Double-click the [ACDSee for PENTAX 2.0] icon on the desktop.

5 Double-click [My Computer].

6 Double-click [Removable Disk].

<image>

If the SD Memory Card has a volume label, the volume label name appears instead of [Removable Disk]. A new unformatted SD Memory Card may show the manufacturer name or model number.

- 7 Double-click the [DCIM] folder. Images are stored in folder [xxxPENTX], where "xxx" is a threedigit folder number.
- Select the folders you want to copy to the PC. Hold the [Ctrl] key on the keyboard while clicking on the folders in which the images you want to copy are stored.
- Select [Copy To Folder...] from the [Edit] menu. The Copy Files screen appears.
- **10** Specify the destination folder.
- **11 Click [OK].** The image is copied to the PC.

Disconnecting the Camera from Your PC

Windows XP

- Double-click the Signature [Safely Remove Hardware] icon in the task bar.
 The Safely Remove Hardware screen appears.
- 2 Select [USB Mass Storage Device] and click [Stop]. The Stop a Hardware device screen appears.

4 Disconnect the USB cable from your PC and the camera.

3 Select [USB Mass Storage Device] and click [OK].

A message appears indicating that the hardware can be safely

Windows 2000/Me

removed.

- Double-click the S [Unplug or eject hardware] icon in the task bar.
 The Unplug or Eject Hardware screen appears.
- 2 Select [USB Mass Storage Device] and click [Stop]. The Stop a Hardware device screen appears.
- 3 Select [USB Mass Storage Device] and click [OK]. A message appears indicating that the hardware can be safely removed.

4 Click [OK].

- **5** Disconnect the USB cable from your PC and the camera.
- If the camera (removable disk) is being used by an application such as ACDSee for PENTAX 2.0, the camera cannot be disconnected until the application is closed.
 The camera will be turned off when the USB cable is disconnected.

Product Registration on the Internet

Please click [Product Registration] on the software selection screen in **Step 2**.

A world map for Internet Product Registration is displayed.

If your PC is connected to the Internet, click the displayed country or region and then follow the instructions to register your product.

Thank you very much for your cooperation.

Only customers in displayed countries and regions can register their products on the Internet Product Registration.
