Ionising Air Purifier

Thank you for purchasing the Ionising Air Purifier. This can remove pollutants from the air such as tobacco smoke, and allergy-causing particles such as dust, pollen and pet fur.

To use the Ionising Air Purifier, plug it into any standard electrical outlet and switch the unit on. The power indicator light will show if there is a power supply.

The Ionising Air Purifier has a dust filter which helps remove impurities from the air that is drawn in. This is backed up by ionisers which help reduce the irritants in the air. The Ionising Air Purifier releases negative ions into the environment to help the air purification process. This is achieved by the negatively charged ions attaching themselves to any pollutant particles which then become heavier than air and fall to the floor or other surfaces from where they can be removed by wiping or dusting.

A slight sensation may be felt if you touch the carbon fibre, which is sited at the front of the outlet grill. This is normal and presents no danger.

Safety Instructions

The Ionising Air Purifier is for indoor use only.

Remove all packaging before use.

Ensure that all air openings are free from any restrictions or coverings in any way.

Do not place any object on or into the unit.

Do not use the unit, cable or plug in or around water.

Do not place the unit on a soft surface as this may cause the unit to tip over, blocking the openings.

Keep the unit away from direct sunlight and heat.

Ensure that the cable is kept away from any heat source and is not hidden under a rug, in order to avoid any fire hazards.

Do not use the unit on or near any electronic or electrical devices such as audio/video tapes, floppy disks, computers, watches, radios or telephones.

Do not use the Ionising Air Purifier if any part is missing or damaged.

If the cable is damaged, it must be replaced by the manufacturer or an electrical specialist, in order to avoid any hazard to the user.

Keep the unit out of the reach of children.

Close supervision is advised when any appliance is used near children.

Do not place the unit close to walls or doors as dust may accumulate.

Do not disassemble the unit.

Do not touch inside the grill.

Always unplug the Ionising Air Purifier before cleaning, moving or when not in use.

Never unplug by pulling the cord.

Care and Maintenance

Always unplug the Ionising Air Purifier before cleaning.

To clean the unit, wipe with a soft, damp cloth.

Do not immerse the unit, cable or plug in water or any other liquid.

To clean the carbon fibre on the outlet grill, use a clean, soft brush.

To clean the dust filter, first remove it from the unit and remove any dust build-up by hand and then wash the filter in tepid water (not dishwasher safe). Allow to dry completely before replacing.

Never operate the unit without the filter in place.
