Important Safety Instructions

Please read these "Important Safety Instructions" thoroughly before operating the machine. As these instructions are intended to prevent injury to the user or other persons or destruction of property, always pay attention to these instructions. Also, since it may result in unexpected accidents or injuries, do not perform any operation unless otherwise specified in the manual. Improper operation or use of this machine could result in personal injury and/or damage requiring extensive repair that may not be covered under your Limited Warranty.

Installation

WARNING

- Do not install the machine near alcohol, paint thinner, or other flammable substances. If flammable substances come into contact with electrical parts inside the machine, it may result in a fire or electrical shock.
- Do not place the following items on the machine. If these items come into contact with a high-voltage area inside the machine, it may result in a fire or electrical shock. If these items are dropped or spilled inside the machine, immediately turn OFF the main power switch, and disconnect the power cord from the power outlet. Then, contact your local authorized Canon dealer.
 - Necklaces and other metal objects
 - Cups, vases, flowerpots, and other containers filled with water or liquids

CAUTION

- Do not install the machine in unstable locations, such as unsteady platforms or inclined floors, or in locations subject to excessive vibrations, as this may cause the machine to fall or tip over, resulting in personal injury.
- Never block the ventilation slots and louvers on the machine. These openings are provided for proper ventilation of working parts inside the machine. Blocking these openings can cause the machine to overheat. Never place the machine on a soft surface, such as a sofa or rug.

- Do not install the machine in the following locations:
 - A damp or dusty location
 - A location near water faucets or water
 - A location exposed to direct sunlight
 - A location subject to high temperatures
 - A location near open flames
- Do not remove the machine's leveling feet after the machine has been installed, as this may cause the machine to fall or tip over, resulting in personal injury.

Power Supply

WARNING

- Do not damage or modify the power cord. Also, do not place heavy objects on the power cord, or pull on or excessively bend it, as this could cause electrical damage and result in a fire or electrical shock.
- Keep the power cord away from a heat source; failure to do this may cause the power cord coating to melt, resulting in a fire or electrical shock.
- Do not connect or disconnect the power cord with wet hands, as this may result in electrical shock.
- Do not connect the power cord to a multiplug power strip, as this may cause a fire or electrical shock.
- Do not bundle up or tie the power cord in a knot, as this may result in a fire or electrical shock.
- Insert the power plug completely into the power outlet, as failure to do so may result in a fire or electrical shock.
- Do not use power cords other than the power cord provided, as this may result in a fire or electrical shock.
- As a general rule, do not use extension cords. Using an extension cord may result in a fire or electrical shock. If an extension cord must be used, however, use one rated for voltages of 220-240 V AC and over, untie the cord binding, and insert the power plug completely into the extension cord outlet to ensure a firm connection between the power cord and the extension cord.

CAUTION

- Do not use power supplies with voltages other than those specified herein, as this may result in a fire or electrical shock.
- Always grasp the power plug when disconnecting the power cord. Pulling on the power cord may expose or snap the core wire, or otherwise damage the power cord. If the power cord is damaged, this could cause current to leak, resulting in a fire or electrical shock.
- Leave sufficient space around the power plug so that it can be unplugged easily. If objects are placed around the power plug, you will be unable to unplug it in an emergency.

Handling

WARNING

- Do not attempt to disassemble or modify the machine. There are high-temperature and high-voltage components inside the machine which may result in a fire or electrical shock.
- If the machine makes strange noises, or gives off smoke, heat, or strange smells, immediately turn OFF the main power switch, and disconnect the power cord from the power outlet. Then, contact your local authorized Canon dealer. Continued use of the machine in this condition may result in a fire or electrical shock.
- Do not use highly flammable sprays near the machine. If gas from these sprays comes into contact with the electrical components inside the machine, it may result in a fire or electrical shock.
- To avoid damage to the power cord and creating a fire hazard, always turn OFF the main power switch, and unplug the interface cable when moving the machine. Otherwise, the power cord or interface cable may be damaged, resulting in a fire or electrical shock.
- Do not drop paper clips, staples, or other metal objects inside the machine. Also, do not spill water, liquids, or flammable substances (alcohol, benzene, paint thinner, etc.) inside the machine. If these items come into contact with a high-voltage area inside the machine, it may result in a fire or electrical shock. If these items are dropped or spilled inside the machine, immediately turn OFF the main power switch, and disconnect the power cord from the power outlet. Then, contact your local authorized Canon dealer.

CAUTION

- Do not place heavy objects on the machine, as they may tip over or fall resulting in personal injury.
- Close the feeder/platen cover gently to avoid catching your hands, as this may result in personal injury.
- Do not press down hard on the feeder/platen cover when using the platen glass to make copies of thick books. Doing so may damage the platen glass and result in personal injury.
- Do not touch the finisher while the machine is printing, as this may result in personal injury.
- Turn OFF the control panel power switch for safety when the machine will not be used for a long period of time, such as overnight. Also, turn OFF the main power switch, and disconnect the power cord for safety when the machine will not be used for an extended period of time, such as during consecutive holidays.

- **Do not place your hand in the part of the tray where stapling is performed when a finisher is attached, as this may result in personal injury.**

**Finisher-Q1/Saddle Finisher-Q2**

Finisher-P1

- The laser beam can be harmful to human bodies. Since radiation emitted inside the product is completely confined within protective housings and external covers, the laser beam cannot escape from the machine during any phase of user operation. Read the following remarks and instructions for safety.
- Never open covers other than those instructed in this manual.
- Do not remove the caution label attached to the cover of the laser scanner unit.

- If the laser beam escapes from the machine, exposure may cause serious damage to your eyes.

Maintenance and Inspections

WARNING

- When cleaning the machine, first turn OFF the main power switch, then disconnect the power cord. Failure to observe these steps may result in a fire or electrical shock.
- Disconnect the power cord from the power outlet regularly, and clean the area around the base of the power plug's metal pins and the power outlet with a dry cloth to ensure that all dust and grime is removed. If the power cord is connected for a long period of time in a damp, dusty, or smoky location, dust can build up around the power plug and become damp. This may cause a short circuit and result in a fire.
- Clean the machine using a slightly dampened cloth with a mild detergent mixed with water. Do not use alcohol, benzene, paint thinner, or other flammable substances. Check detergent for flammability prior to use. If flammable substances come into contact with a high-voltage area inside the machine, it may result in a fire or electrical shock.
- There are some areas inside the machine which are subject to high-voltages. When removing jammed paper or when inspecting the inside of the machine, do not allow necklaces, bracelets, or other metal objects to touch the inside of the machine, as this may result in burns or electrical shock.
- Do not burn or throw used toner cartridges into open flames, as this may cause the toner remaining inside the cartridges to ignite, resulting in burns or a fire.

CAUTION

- The fixing unit and its surroundings inside the machine may become hot during use. When removing jammed paper or when inspecting the inside of the machine, do not touch the fixing unit and its surroundings, as doing so may result in burns or electrical shock.
- When removing jammed paper or replacing the toner cartridge, take care not to allow the toner to come into contact with your hands or clothing, as this will dirty your hands or clothing. If they become dirty, wash them immediately with cold water. Washing them with warm water will set the toner, and make it impossible to remove the toner stains.
- When removing paper which has become jammed inside the machine, remove the jammed paper gently to prevent the toner on the paper from scattering and getting into your eyes or mouth. If the toner gets into your eyes or mouth, wash them immediately with cold water and immediately consult a physician.
- When loading paper or removing jammed originals or paper, take care not to cut your hands on the edges of the originals or paper.
- When removing a used toner cartridge, remove the cartridge carefully to prevent the toner from scattering and getting into your eyes or mouth. If the toner gets into your eyes or mouth, wash them immediately with cold water and immediately consult a physician.

Consumables

WARNING

- Do not burn or throw used toner cartridges into open flames, as this may cause the toner remaining inside the cartridges to ignite, resulting in burns or a fire.
- Do not store toner cartridges or copy paper in places exposed to open flames, as this may cause the toner or paper to ignite, resulting in burns or a fire.
- When discarding used toner cartridges, put the cartridges in a bag to prevent the toner remaining inside the cartridges from scattering, and dispose of them in a location away from open flames.

CAUTION

Keep toner and other consumables out of the reach of small children. If these items are ingested, consult a physician immediately.

Periodic Inspection of the Breaker

This machine has a breaker that detects excess current or leakage current. Be sure to test the breaker once or twice a month using the following procedure.

IMPORTANT

- Make sure that the main power is turned ON, and the machine is neither printing nor scanning before inspecting the breaker.
- If a malfunction occurs after an inspection, contact your local authorized Canon dealer.
- Before the main power is turned OFF, make sure that you wait for at least 30 seconds after the last printing process is finished. Otherwise, the next print output may become dirty.

Checking the Breaker

1 Push the test button with the tip of a ball-point pen, or similar object.

IMPORTANT

Briefly push the test button.

2 The breaker lever automatically switches to the OFF ("○" side) position. Confirm that the power is cut OFF.

IMPORTANT

- Do not use the test button to turn the power ON and OFF.
- If the breaker lever does not switch to the OFF ("○" side) position, repeat step 1.
- If the breaker lever does not switch to the OFF ("○" side) position, despite carrying out the above procedure two or three times, contact your local authorized Canon dealer.
- The breaker lever may stop between ON and OFF, depending on the type of breaker.
- When the breaker lever is stopped between ON and OFF, it is in an OFF state.

3 Once you have confirmed that the power is OFF, press the main power switch to OFF ("⏻" side).

4 Move the breaker lever to ON ("I" side).

IMPORTANT

If the breaker stops between ON and OFF, move the breaker lever to OFF, then back to ON.

5 Press the main power switch to ON ("I" side).

Installation Location and Handling

This section describes precautions for installation location and handling. We recommend that you read this section prior to using this machine.

Installation Precautions

Avoid Installing the Machine in the Following Locations

■ **Avoid locations subject to extremes of temperature and humidity, whether low or high.**

For example, avoid installing the machine near water faucets, hot water heaters, humidifiers, air conditioners, heaters, or stoves.

■ **Avoid installing the machine in direct sunlight.**

If this is unavoidable, use curtains to shade the machine. Be sure that the curtains do not block the machine's ventilation slots or louvers, or interfere with the electrical cord or power supply.

■ **Avoid poorly ventilated locations.**

This machine generates a slight amount of ozone during normal use. Although sensitivity to ozone may vary, this amount is not harmful. Ozone may be more noticeable during extended use or long production runs, especially in poorly ventilated rooms. It is recommended that the room be appropriately ventilated, sufficient to maintain a comfortable working environment, in areas of machine operation.

- **Avoid locations where a considerable amount of dust accumulates.**
- **Avoid locations where ammonia gas is emitted.**

- **Avoid locations near volatile or flammable materials, such as alcohol or paint thinner.**

- **Avoid locations that are subject to vibration.**

For example, avoid installing the machine on unstable floors or stands.

- **Avoid exposing the machine to rapid changes in temperature.**

If the room in which the machine is installed is cold but rapidly heated, water droplets (condensation) may form inside the machine. This may result in a noticeable degradation in the quality of the copied image, the inability to properly scan an original, or the copies having no printed image at all.

- **Avoid installing the machine near computers or other precision electronic equipment.**

Electrical interference and vibrations generated by the machine during printing can adversely affect the operation of such equipment.

■ Avoid installing the machine near televisions, radios, or similar electronic equipment.

The machine might interfere with sound and picture signal reception. Insert the power plug into a dedicated power outlet, and maintain as much space as possible between the machine and other electronic equipment.

■ Do not remove the machine's leveling feet.

Do not remove the machine's leveling feet after the machine has been installed. If you put weight on the front of the machine while the drawers or units within the machine are pulled out, the machine may fall forward. To prevent this from happening, make sure that the machine's leveling feet are in place.

Select a Safe Power Supply

- Plug the machine into a 220-240 V AC outlet.
- Make sure that the power supply for the machine is safe, and has a steady voltage.
- Do not connect other electrical equipment to the same power outlet to which the machine is connected.
- Do not connect the power cord to a multiplug power strip, as this may cause a fire or electrical shock.
- The power cord may become damaged if it is often stepped on or if heavy objects are placed on it. Continued use of a damaged power cord can lead to an accident, such as a fire or electrical shock.

Provide Adequate Installation Space

- Provide enough space on each side of the machine for unrestricted operation.

No optional equipment is attached.

The optional Feeder (DADF-L1), Finisher-P1, and Paper Deck-Q1 are attached.

The optional Feeder(DADF-L1),Saddle Finisher-Q2, Puncher Unit-L1, and Paper Deck-Q1 are attached.

Moving the Machine

- If you intend to move the machine, contact your local authorized Canon dealer beforehand.

Handling Precautions

- Do not attempt to disassemble or modify the machine.

- Some parts inside the machine are subject to high-voltages and temperatures. Take adequate precautions when inspecting the inside of the machine. Do not carry out any inspections not described in this manual.
- Be careful not to spill liquid or drop any foreign objects, such as paper clips or staples inside the machine. If a foreign object comes into contact with electrical parts inside the machine, it might cause a short circuit and result in a fire or electrical shock.

- If there is smoke, or unusual noise, immediately turn the main power switch OFF, disconnect the power cord from the outlet, and call your local authorized Canon dealer. Using the machine in this state may cause a fire or electrical shock. Also, avoid placing objects around the power plug so that the machine can be disconnected whenever necessary.

- Do not turn the main power switch OFF or open the front covers while the machine is in operation. This might result in paper jams.
- Do not use flammable sprays, such as spray glue, near the machine. There is a danger of ignition.

- This machine generates a slight amount of ozone during normal use. Although sensitivity to ozone may vary, this amount is not harmful. Ozone may be more noticeable during extended use or long production runs, especially in poorly ventilated rooms. It is recommended that the room be appropriately ventilated, sufficient to maintain a comfortable working environment, in areas of machine operation.
- For safety reasons, turn OFF the control panel power switch of the machine when it will not be used for a long period of time, such as overnight. As an added safety measure, turn OFF the main power switch, and disconnect the power cord when the machine will not be used for an extended period of time, such as during consecutive holidays.

CAUTION

The iR 3100C/iR 3100CN incorporates a rich array of input and output features that can greatly enhance your efficiency. Equipped with features that meet the needs of document work in a digitized office, the iR 3100C/iR 3100CN represents the ultimate in digital multitasking machines.

Copying

See the *Copying and Mail Box Guide*

In addition to normal copying functions, convenient new functions, such as "Sample Set" which helps to avoid copy errors, "Booklet" for making copies into booklets, and "Different Size Originals" for copying originals of different sizes together in one copy operation, are provided to increase your productivity.

Mail Box Function

See the *Copying and Mail Box Guide*

The Mail Box function enables you to save image or document data that has been scanned from the scanner unit, or created on a PC to the machine's internal hard disk. The saved data can be printed at a required time, or merged with separately saved data or data created on a PC for simultaneous processing.

Sending Function (optional)*

See the ***Sending and Facsimile Guide***

The Send function enables you to send scanned image or document data to file servers, or send it by e-mail or I-fax. A variety of file formats are supported (PDF, TIFF, and JPEG), which offer you greater flexibility in accommodating the digital workplace environments.

*The optional Color Universal Send Kit and Resolution Switching Board are required.

Faxing (optional)*

See the ***Sending and Facsimile Guide***

In addition to normal facsimile functions, the machine offers you Super G3 compatibility which enables you to transmit documents at high speeds, greatly reducing transmission costs as compared to conventional facsimile machines..

*The optional Super G3 FAX Board and Resolution Switching Board are required.

Printing (optional)*

See the ***PS/PCL/UFR Printer Guide***

You can upgrade this machine to a high-speed network printer by installing one of the optional colour network printer kits. There are three kinds of kits available. The Color Network UFR Printer Kit offers you UFR (Ultra Fast Rendering) Technology, which utilizes a newly invented printing algorithm to minimize file processing and achieve maximum performance.

The Color Network Multi-PDL Printer Kit offers you not only UFR, but also PS and PCL printing capability. This kit is standard-equipped in the iR 3100CN.

Color Network Print Unit can efficiently output various data types including large and complex files (such as combining colour graphics, photos, and text), Adobe PostScript 3 files, detailed graphics, etc.

*Only one colour network printer kit can be installed at the same time.

Using the Remote User Interface

See the *Remote UI Guide*

You can control functions, such as confirming the status of the machine, job operations, and printing instructions for data saved in inboxes, all from your PC's web browser.

Scanning (optional)*

See the *Color Network ScanGear User's Guide*

Scanning image data into computers is a function that is available if the iR 3100C/iR 3100CN is upgraded with printer and network capabilities. You can scan images of up to A3 in size at a resolution of 600 x 600 dpi.

*The optional Color Network Multi-PDL Printer Kit (Standard-equipped in iR 3100CN), Color Network UFR Printer Kit, or Color Network Printer Unit must be installed in order to use this function.

Main Power and Control Panel Power

The machine is provided with two power switches, a main power switch and a control panel power switch, as well as a breaker that detects excess current or leakage current.

1

Before You Start Using This Machine

How to Turn ON the Main Power

- 1 Make sure that the power plug is firmly inserted into the power outlet.

WARNING

Do not connect or disconnect the power cord with wet hands, as this may result in electrical shock.

- 2 If the optional Security Key is inserted into the machine, make sure that it is in the ON position (turn it to the right).

- 3 Press the main power switch to ON ("I" side). The main power switch is located on the right side of the machine.

If you want to turn the main power OFF, make sure that you first turn the control panel power switch OFF, and then press the main power switch to the "O" side.

The main power indicator on the control panel lights when the main power switch is turned ON.

IMPORTANT

- If the main power indicator on the control panel does not light even though the main power switch is ON, be sure to check the breaker to see if it is OFF. (See "When the Power Does Not Turn ON," in the *Reference Guide*.)
- Before the main power is turned OFF, make sure that you wait for at least 30 seconds after the last printing process is finished. Otherwise, the next print output may become dirty.

4 The screen is displayed while the system software is loading.

The machine is ready to scan in approximately 45 seconds (at a room temperature of 20°C) after the screen above appears.

The screen is displayed when the machine is ready to scan.

IMPORTANT

- If you turn OFF the main power, wait at least 10 seconds before turning the main power back ON.
- Do not turn the main power OFF if the optional Color Universal Send Kit or Super G3 FAX Board and Resolution Switching Board are attached, and you want to be able to send or receive fax documents. Sending or receiving I-fax or fax documents cannot be done when the power is turned OFF.

Things You Must Do Before Using This Machine

This section describes the important setting registrations and procedures that must be done before the machine is used for sending operations. For the further details of the operations, see "Things You Must Do Before Using This Machine" in the *Sending and Facsimile Guide*.

CHAPTER

This chapter describes how to load paper, and replace toner.

Loading Paper	2-2
Replacing the Toner Cartridge	2-5

Loading Paper

If the selected paper has run out during printing, a screen prompting you to load paper appears on the touch panel display.

IMPORTANT

- A screen prompting you to load paper also appears if the selected paper drawer is not fully inserted into the machine. Make sure that the paper drawer is properly in place.
- Do not load paper of an irregular size into the paper drawers.
- Do not load the following types of paper into the paper drawers. Doing so may cause a paper jam.
 - Severely curled or wrinkled paper
 - Thin straw paper
 - Paper which has been printed on using a thermal transfer printer (Do not print on the reverse side of this paper either.)
- Never place paper or any other items in the empty part of the drawer next to the paper stack. Doing so may cause paper jams.

NOTE

- If a message prompting you to load paper appears during printing, the remaining prints are automatically made after you load the correct paper. If you select another paper drawer, the remaining prints are made after you press [OK].
- To cancel printing, press [Cancel].
- The following paper sizes can be loaded into paper drawers 1, 2, 3, and 4.
 - Paper drawer 1: A4, A4R, A5R, and envelopes
 - Paper drawer 2, 3, 4: 305 x 457 mm, A3, A4, A4R, and A5R
 - Envelopes can be loaded into paper drawer 1 only if the optional Envelope Feeder Attachment-C1 is attached.
 - Paper drawers 3 and 4 can be used only if the optional Cassette Feeding Unit-Y1 is attached.
- For more information on available paper stock that can be loaded into the paper drawers, see "Available Paper Stock," in the *Reference Guide*.

- 1 Press and release the button on the paper drawer in which you want to load paper.

- 2 Grip the handle, and pull out the paper drawer until it stops.

- 3 Open a package of paper, and remove the paper stack.

CAUTION

When loading paper, take care not to cut your hands on the edges of the paper.

IMPORTANT

Rewrap any remaining paper in its original package, and store it in a dry place, away from direct sunlight.

NOTE

- For high quality printouts, use paper recommended by Canon.
- Before loading paper, always fan the sheets several times, and align the edges to facilitate feeding. Also, you should always fan paper that has just been removed from a newly opened paper package.

4 Load the paper stack into the paper drawer.

Even out the edges of the paper stack. Load the paper stack against the right wall of the paper drawer.

When loading paper into the paper drawer for the first time, set the paper size dial to match the paper size being loaded. (See "Adjusting a Paper Drawer to Hold a Different Paper Size," in the *Reference Guide*.)

When loading paper into the paper drawer, make sure that the paper size setting is the same size of the paper that is being loaded.

IMPORTANT

- Paper which has been rolled or curled must be straightened out prior to use.
- Make sure that the height of the paper stack does not exceed the loading limit mark () at the back of the paper drawer.
- When loading 305 x 457 mm paper in the paper drawer, remove the left guide and insert it into the hole in the front left side of paper drawer.

NOTE

- Each paper drawer holds approximately 550 sheets of paper (80 g/m²).
- For more information on the print direction of preprinted paper (paper which has logos or patterns already printed on it), see "Relationship between Original Orientation and Preprinted Paper Output Chart," in the *Reference Guide*.

5 Gently push the paper drawer back into the machine until it clicks into place in the closed position.

CAUTION

When returning the paper drawer to its original position, be careful not to get your fingers caught, as this may result in personal injury.

IMPORTANT

You will not be able to make copies or print if you load paper that exceeds the loading limit, or if the paper drawer is not completely pushed into the machine. Always check that the paper drawers are in place. If a paper drawer is overloaded, decrease the amount of paper so that it does not exceed the loading limit.

Replacing the Toner Cartridge

When there is only a small amount of toner remaining in the machine, the following message appears on the touch panel display, as shown. You can continue printing, but at this time you should purchase new toner of the indicated colour so that you have it available when needed.

When the toner runs out completely and prints can no longer be made, a screen with instructions on how to replace the toner cartridge, like the one shown, appears on the touch panel display. Follow the instructions on the touch panel display, and the procedure described below to help you replace the toner cartridge.

With [Recover Later], you can continue certain operations, such as mode settings and scanning of originals, even if you do not replace the toner cartridge immediately.

CAUTION

- Keep toner out of the reach of small children. If toner is ingested, consult a physician immediately.
- If toner gets onto your hands or clothing, wash it off immediately with cold water. Do not use warm water as this may set the toner permanently, and you may not be able to remove the toner stains.

IMPORTANT

- Use only the toner cartridges intended for use with this machine.
- Do not replace toner cartridges until the message prompting you to do so appears.
- The colour of the toner to be replaced is shown on the touch panel display. A toner cartridge revolver is mounted inside the machine. It holds four toner cartridges and rotates. When toner of a particular colour runs out, its toner cartridge is rotated to the toner supply port, and can be replaced. Only one toner cartridge can be replaced at a time. However, when two or more toner cartridges have to be replaced at the same time, replace them in this order: black, yellow, magenta, and cyan.
- If you continue copying or printing in black-and-white after cyan, magenta, or yellow toner runs out, do not remove the depleted toner cartridges from the machine.
- Do not touch the shutter door and gear of the toner cartridge, as this may cause the toner cartridge to leak.

NOTE

- When the <Remaining toner is low.> message appears, approximately 10% of the toner is left.
- If toner runs out during a print job, the remaining prints are made after you replace the toner cartridge.

1 Open the front cover of the main unit.

2 Open the toner supply port cover.

- 3** Turn the knob of the toner cartridge in the direction of the arrow (counterclockwise).

Black Toner Cartridge

Cyan, Magenta, or Yellow Toner Cartridge

IMPORTANT

Turn the knob on the black cartridge, until the arrow points to 'Unlock'. Turn the knob on the cyan, magenta, or yellow toner cartridge until it stops.

4 Grip the knob on the toner cartridge, and pull the toner cartridge out of the toner supply port.

Pull the toner cartridge out halfway, then remove it completely while supporting it with your other hand from underneath.

WARNING

Do not burn or throw used toner cartridges into open flames, as this may cause the toner remaining inside the cartridges to ignite resulting in burns or a fire.

IMPORTANT

If the toner cartridge cannot be pulled out, check that the knob is turned all the way to the appropriate position.

5 Set a new toner cartridge.

Support the new toner cartridge with your hand from underneath while pushing it into the machine with your other hand.

Push the new toner cartridge in as far as possible.

● If you are replacing the cyan, magenta, or yellow toner cartridge:

- ☐ Hold the new toner cartridge in your hands and gently tilt it up and down five times.

Turn the toner cartridge so that the arrow printed on it is facing up, and push the toner cartridge into the machine.

IMPORTANT

When tilting the cyan, magenta, or yellow toner cartridge, be careful not to touch the shutter door, or turn the knob, as this may cause the toner cartridge to leak.

- 6** Turn the knob of the toner cartridge in the direction of the arrow (clockwise) until it stops.

Black Toner Cartridge

Cyan, Magenta, or Yellow Toner Cartridge

IMPORTANT

Before you turn the knob on the toner cartridge, make sure that the toner cartridge is pushed in as far as possible.

- 7** Close the toner supply port cover, and close the front cover of the main unit.

CAUTION

When closing the cover, be careful not to get your fingers caught, as this may result in personal injury.

IMPORTANT

Make sure to close the front cover securely. You will hear the click of the three magnets against the inside of the machine.

CHAPTER

This chapter explains what to do in response to a paper jam and an error message display.

Clearing Paper Jams	3-2
List of Error Messages	3-6
List of Error Codes without Messages	3-6

Clearing Paper Jams

The screen indicating the location of the paper jam appears on the touch panel display, followed by instructions on how to clear the paper jam. This screen repeatedly appears on the touch panel display until the paper jam is entirely cleared.

WARNING

There are some areas inside the machine which are subject to high-voltages. When removing jammed paper or when inspecting the inside of the machine, do not allow necklaces, bracelets, or other metal objects to touch the inside of the machine, as this may result in burns or electrical shock.

CAUTION

- When removing jammed originals or paper, take care not to cut your hands on the edges of the originals or paper.
- When removing paper which has become jammed inside the machine, take care not to allow the toner on the jammed paper to come into contact with your hands or clothing, as this will dirty your hands or clothing. If they become dirty, wash them immediately with cold water. Washing them with warm water will set the toner, and make it impossible to remove the toner stains.
- When removing paper which has become jammed inside the machine, remove the jammed paper gently to prevent the toner on the paper from scattering and getting into your eyes or mouth. If the toner gets into your eyes or mouth, wash them immediately with cold water and immediately consult a physician.
- The fixing unit and its surroundings inside the machine may become hot during use. When removing jammed paper or when inspecting the inside of the machine, do not touch the fixing unit and its surroundings, as doing so may result in burns or electrical shock.

NOTE

If you press [Recover Later] on the screen indicating the paper jam, you can continue operating the machine, such as you can set mode settings and scan originals, even if the jammed paper is not removed immediately.

1 Inspect all paper jam locations indicated on the touch panel display, and remove any jammed paper.

See the appropriate pages below for instructions on finding and removing jammed paper. Or, you can follow the instructions on the touch panel display.

If jammed paper tears while it is being removed, be sure to remove any remaining pieces from inside the machine.

IMPORTANT

- If the machine's power is turned OFF when there is a paper jam, detection of paper jams in the paper drawers is not possible after the power is turned back ON. Clear paper jams without turning the power OFF.
- If a paper jam occurs in the optional Feeder (DADF-L1), you cannot continue operating the machine. Follow the directions on the touch panel display to clear the paper jam. (See "Feeder (DADF-L1) (Optional)," in the *Reference Guide*.)

● If a paper jam occurs inside the main unit:

- See the instructions on the following pages.

- ① Duplexing Unit (See "Duplexing Unit (Inside the Main Unit)," in the *Reference Guide*.)
- ② Fixing Unit (See "Fixing Unit (Inside the Main Unit)," in the *Reference Guide*.)
- ③ Stack Bypass (See "Stack Bypass," in the *Reference Guide*.)
- ④ Paper Drawer 1 (See "Paper Drawer 1," in the *Reference Guide*.)
- ⑤ Paper Drawer 2 (See "Paper Drawer 2," in the *Reference Guide*.)

NOTE

Some areas that are shown to have paper jams may not actually have paper jams. However, always check all locations indicated on the touch panel display in the order that is given.

● If a paper jam occurs inside an optional unit

❑ See the instructions on the following pages.

- ① Feeder (DADF-L1) (See "Feeder (DADF-L1) (Optional)," in the *Reference Guide*.)
- ② Inner 2way Tray-C1 (See "Inner 2way Tray-C1 (Optional)," in the *Reference Guide*.)
- ③ Cassette Feeding Unit-Y1 (See "Cassette Feeding Unit-Y1 (Optional)," in the *Reference Guide*.)
- ④ Copy Tray-J1 (See "Copy Tray-C1 (Optional)," in the *Reference Guide*.)

- ⑤ Finisher-P1 (See "Finisher-P1 (Optional)," in the *Reference Guide*.)
- ⑥ Paper Deck-Q1 (See "Paper Deck-Q1 (Optional)," in the *Reference Guide*.)

- ⑦ Finisher-Q1 (See "Inside the Top Cover of Finisher-Q1/ Saddle Finisher-Q2 (Optional)," or "Inside the Buffer Pass Unit (Optional)," in the *Reference Guide*.)

- ⑧ Puncher Unit-L1 (See "Puncher Unit-L1 (Optional)," in the *Reference Guide*.)

- ⑨ Saddle Finisher-Q2 (See "Inside the Top Cover of Finisher-Q1/Saddle Finisher-Q2 (Optional)," or "Buffer Pass Unit (Optional)," or "Inside the Front Cover of Finisher-Q1/ Saddle Finisher Q2 (Optional)," or "Saddle Stitcher Unit (Optional)," in the *Reference Guide*.)

- 2** After you have removed all of the jammed paper at the locations indicated on the touch panel display, restore all levers and covers to their original positions.
- 3** Continue to follow the procedure and instructions displayed on the touch panel display.

Once you have removed all of the jammed paper in locations other than the feeder, printing or copying resumes.

If there is paper that still needs to be removed, a screen indicating how to clear that paper jam appears on the touch panel display. Repeat the procedure from step 1.

NOTE

You do not have to re-enter the number of copies or prints, even if you are printing multiple sets. The machine automatically recalculates the number of copies or prints to make based on the number of sheets that have jammed.

List of Error Messages

List of Error Codes without Messages

If a job or operation does not complete successfully, check the error code, and perform the necessary operations according to the error code displayed. You can check the error code on the Details screen under [Log] from the System Monitor screen. (See "Job Details," in the *Reference Guide*.)

If a send, receive, or fax job does not complete successfully, the error code is printed in the Results column on the Activity Report and Send Report. (See "Printing Communication Reports," in the *Sending and Facsimile Guide*.)

Perform the necessary procedures according to the error code.

NOTE

If a send job is cancelled, <STOP> is printed in the Results column on the Send report.

- *1 The machine's performance may be affected if image processing, such as compression, enlargement/reduction, and rotation, are carried out.
- *2 The output order of competing jobs varies, depending on whether an optional finisher is attached.
When an optional finisher is attached: one set is output alternately for each job
When an optional finisher is not attached: one page is output alternately for each job
- *3 The machine's processing speed may be lowered.
- *4 While a PDF (Compct) file or I-fax is being sent, memory conflicts may arise if a received print job or image data processing job is executed. The performance of all operations affected by this memory conflict may decrease, depending on the amount of available memory.

NOTE

- The machine's performance may be affected if several network send and received jobs are being carried out at the same time.
- The operation of printing data from an inbox is included in "Print Data" under "Print" in the table.
